Chaucer, Physician's Tale, l. 54.

Seyng any thyng *sownyng* to treson.
Paston Letters, I. 183.

All such thingis as *sowne* wyth or ayenst the common wele. *Arnold's Chron.*, p. 88.

6†. To resound.

The shippes hereupon discharge their Ordinance, . . . insomuch that the tops of the hilles *sounded* therewith.
Hakluyt's Voyages, I. 245.

To sound in damages, in *law*, to have as its object the recovery of damages: said of an action brought, not for the recovery of a specific thing, as replevin or an action of debt, but for damages only, as for trespass, etc.

II. *trans.* **1.** To cause to produce sound; set in audible vibration.

A baggepipe wel coude he blowe and *sowne*.
Chaucer, Gen. Prol. to C. T., l. 565.

I have *sounded* the very base-string of humility.
Shak., 1 Hen. IV., iii. 4. 6.

2. To utter audibly; pronounce; hence, to speak; express; repeat.

But now to yow rehersen al his speche,
Or al his woful wordes for to *sowne*.
Chaucer, Troilus, ii. 573.

Then I, as one that am the tongue of these,
To *sound* the purposes of all their hearts.
Shak., K. John, iv. 2. 48.

The Arab by his desert well
. . . hears his single camel's bell
Sound welcome to his regal quarters.
Whittier, The Haschish.

3. To order or direct by a sound; give a signal for by a certain sound: as, to *sound* a retreat.

To *sound* a parley to his heartless foe.
Shak., Lucrece, l. 471.

4. To spread by sound or report; publish or proclaim; celebrate or honor by sounds.

Thou sun, of this great world both eye and soul,
Acknowledge him thy greater; *sound* his praise.
Milton, P. L., v. 171.

She loves aloft to *sound*
The Man for more than Mortal Deeds renown'd.
Congreve, Pindaric Odes, ii.

5. To signify; import. [A Latinism.]

Hise resons he spak ful solempnely,
Sownynge alway thencrees of his wynnyng.
Chaucer, Gen. Prol. to C. T., l. 276.

If you have ears that will be pierced — or eyes
That can be opened — a heart that may be touched —
Or any part that yet *sounds* man about you.
B. Jonson, Volpone, iii. 6.

The cause of divorce mentioned in the law is translated "some uncleanness," but in Hebrew it *sounds* "nakedness of aught, or any real nakedness." *Milton*, Divorce, i.

6. To examine by percussion, as a wall in order to discover hollow places or studding; specifically, in *med.*, to examine by percussion and auscultation, in order to form a diagnosis by means of sounds heard: as, to *sound* the lungs.

sound[6] (sound). An obsolete or dialectal contracted form of *swound*, *swoon*.

soundable (soun'da-bl), *a.* [< *sound*[4] + *-able*.] ★Capable of being sounded.

soundboard (sound'bōrd), *n.* **1.** In musical instruments, a thin resonant plate of wood so placed as to enhance the power and quality of the tones by sympathetic vibration. In the pianoforte it is placed just under or behind the strings; in the pipe-organ it forms the top of the wind-chest in which the pipes are inserted; in the violin, guitar, etc., it is the same as the belly — that is, the front of the body. Great care is exercised in the selection and treatment of the wood for soundboards, which is either pine or spruce-fir. Also *sounding-board*. See cut under *harp*.

2. Same as *sounding-board*, 1. See cut under *abat-voix*. — **Pedal soundboard.** See *pedal*.

sound-boarding (sound'bōr″ding), *n.* In *carp.*, short boards which are disposed transversely between the joists, or fixed in a partition for holding pugging or other material, intended to prevent sound from being transmitted from one part of a house to another.

sound-body, sound-box, sound-chest (sound'-bod″i, -boks, -chest), *n.* Same as *resonance-box*.

sound-bone (sound'bōn), *n.* [< *sound*[3] + *bone*.] The bone of a fish lying close to the sound or air-bladder. It is a part of the backbone, consisting of those vertebræ collectively which are ordinarily cut out in one piece in splitting the fish.

sound-bow (sound'bō), *n.* The thickened edge of a bell against which the clapper strikes. In stating the proportions of a bell, the thickness of the sound-bow is usually taken as a unit.

sound-deafness (sound'def″nes), *n.* Deafness to sound of every pitch or quality, as distinguished from *pitch-deafness* and *timbre-deafness*.

sounder[1]† (soun'dėr), *n.* [Early mod. E. also *sownder*, < ME. *soundre*, < AS. *sunor*, a herd.] **1.** A herd of wild swine.

That men calleth a trip of a tame swyn is called of wylde swyn a *soundre:* that is to say, 3if ther be passyd v. or vj. togedres. *MS. Bodl.* 546. (*Halliwell.*)

Now to speke of the boore, the fyrste year he is
A pygge of the *sounder* callyd, as haue I blys;
The secounde yere an hogge, and soo shall he be,
And an hoggestere whan he is of yeres thre;
And when he is foure yere, a boor shall he be,
From the *sounder* of the swyne thenne departyth he.
Book of St. Alban's (ed. 1496), sig. d., i.

2. A young wild boar: an erroneous use.

It had so happened that a *sounder* (i. e., in the language of the period, a boar of only two years old) had crossed the track of the proper object of the chase.
Scott, Quentin Durward, ix.

Such then were the pigs of Devon, not to be compared with the true wild descendant, . . . whereof many a *sounder* still grunted about Swinley down.
Kingsley, Westward Ho, viii.

sounder[2] (soun'dėr), *n.* [< *sound*[4] + *-er*[1].] A sounding-machine. — **Flying sounder**, an apparatus, devised by Thomson, for obtaining deep-sea soundings, at a moderate depth, without rounding to or reducing speed. With this sounding-machine a sounding was made at a depth of 130 fathoms while the steamer was moving at the rate of 16 knots an hour.

sounder[3] (soun'dėr), *n.* [< *sound*[5] + *-er*[1].] That which sounds; specifically, in *teleg.*, a receiving instrument in the use of which the message is read by the sound produced by the armature of the electromagnet in playing back and forth between its stops.

sound-figures (sound'fig″ūrz), *n. pl.* Chladni's ★figures. See *nodal lines*, under *nodal*.

sound-hole (sound'hōl), *n.* In musical instruments of the viol and lute classes, an opening in the belly or soundboard, so shaped and placed as to increase its elasticity and thus its capacity for sympathetic vibration. In the modern violin and similar instruments there are two sound-holes, placed on each side of the bridge; they are usually ★called the *f-holes*, from their shape.

sounding[1] (soun'ding), *n.* [< ME. *soundynge, sowndyng, sowninge;* verbal n. of *sound*[4], *v.*] **1.** The act or process of measuring the depth of anything; exploration, as with a plummet and line, or a sound. — **2.** The descent of a whale or of a fish to the bottom after being harpooned or hooked. — **3.** *pl.* The depth of water in rivers, harbors, along shores, and even in the open seas, which is ascertained in the operation of sounding. The term is also used to signify any place or part of the ocean where a deep sounding-line will reach the bottom; also, the kind of ground or bottom where the line reaches. Soundings on English and American charts are expressed in fathoms, except in some harbor-charts where they are in feet. See *deep-sea*. — **In or on soundings.** (*a*) So near the land that a deep-sea lead will reach the bottom. (*b*) In comparatively shoal water: said of a whale in the Arctic Ocean, Bering Sea, Sea of Okhotsk, or in bays, lagoons, etc., whose depths may be readily fathomed. — **To get on or off soundings**, to get into or beyond water where the bottom can be touched by sounding; figuratively, to enter into a subject or topic which one is or is not competent to discuss. — **To strike soundings**, to find bottom with the deep-sea lead.

sounding[2] (soun'ding), *n.* [< ME. *soundyng;* verbal n. of *sound*[5], *v.*] The act of producing a sound or a noise; also, a sound or a noise produced; specifically, in *music*, compare *sound*[5], *v. i.*, 2.

Musicians have no gold for *sounding*.
Shak., R. and J., iv. 5. 143.

The Stage.
After the second *sounding* [of the music].
B. Jonson, Every Man out of his Humour, Ind.

sounding[2] (soun'ding), *p. a.* [Ppr. of *sound*[5], *v.*] **1.** Causing or producing sound; sonorous; resounding; making a noise.

Ay me! whilst thee the shores and *sounding* seas
Wash far away. *Milton*, Lycidas, l. 154.

2. Having a magnificent or lofty sound; hence, bombastic: as, mere *sounding* phrases.

Keep to your subject close in all you say;
Nor for a *sounding* sentence ever stray.
Dryden and Soames, tr. of Boileau's Art of Poetry, i. 182.

sounding-board (soun'ding-bōrd), *n.* **1.** A canopy over a pulpit, etc., to direct the sound of a speaker's voice toward the audience. See *abat-voix*. Also *soundboard*.

Since pulpits fail, and *sounding-boards* reflect
Most part an empty, ineffectual sound.
Cowper, Task, iii. 21.

2. In *building*, a board used in the deafening of floors, partitions, etc. See *sound-boarding*. — **3.** Same as *soundboard*, 1.

sounding-bottle (soun'ding-bot″l), *n.* A vessel for raising water from a great depth for examination and analysis. It is generally made of wood, and has valves opening upward in the top and bottom. It is fixed on the sounding-line over the lead, so that the water passes through it as the line descends; but when it is drawn up the force of gravity closes the valves, thus retaining the contents. It often contains a thermometer for showing the temperature below the surface.

sounding-lead (soun'ding-led), *n.* The weight used at the end of a sounding-line.

sounding-line (soun'ding-līn), *n.* A line for ★trying the depth of water.

sounding-machine (soun'ding-ma-shēn″), *n.* A device for taking deep-sea soundings. See *deep-sea*.

sounding-post (soun'ding-pōst), *n.* Same as *sound-post*.

sounding-rod (soun'ding-rod), *n.* A graduated rod or piece of iron used to ascertain the depth of water in a ship's pump-well, and consequently in the hold.

soundisman†, *n.* A Middle English form of *sandesman*.

Then sent were there sone *soundismen* two
To Priam, the prise kyng, purpos to hold.
Destruction of Troy (E. E. T. S.), l. 8866.

soundless[1] (sound'les), *a.* [< *sound*[4] + *-less*.] Incapable of being sounded or fathomed; unfathomable.

He upon your *soundless* deep doth ride.
Shak., Sonnets, lxxx.

soundless[2] (sound'les), *a.* [< *sound*[5] + *-less*.] Having no sound; noiseless; silent; dumb.

Cas. For your words, they rob the Hybla bees,
And leave them honeyless. . . .
Bru. O yes, and *soundless* too;
For you have stol'n their buzzing, Antony.
Shak., J. C., v. 1. 36.

sound-line (sound'līn), *n.* The tow-line carried down by a whale when sounding.

soundly (sound'li), *adv.* [< *sound*[1] + *-ly*[2].] In a sound manner, in any sense of the word *sound*.

soundness (sound'nes), *n.* [< *sound*[1] + *-ness*.] The state of being sound, in any sense. = **Syn.** See *sound*[1], *a.*

sound-post (sound'pōst), *n.* In musical instruments of the viol class, a small cylindrical wooden prop or pillar which is inserted between the belly and the back, nearly under the treble foot of the bridge. Its purpose is to prevent the crushing of the belly by the tension of the strings, and to transmit the vibrations of the belly to the back. Its material, shape, and position are of great importance in determining the quality and power of the tone. It is sometimes called the instrument's *soul* or *voice*. Also *sounding-post*.

sound-proof (sound'prōf), *a.* Impervious to sound; preventing the entrance of sounds.

It [silicate of cotton] is of great efficiency as a stuffing for *sound-proof* walls and flooring. *Ure*, Dict., IV. 293.

sound-radiometer (sound'rā-di-om″e-tėr), *n.* An apparatus devised by Dvorak to show the mechanical effect of sound-waves. It consists of a light cross of wood pivoted with a glass cap upon a vertical needle, and carrying four pieces of card perforated with a number of holes, raised on one side and depressed on the other like those of a nutmeg-grater. The cross-vanes rotate rapidly when placed before the resonance-box of a loud-sounding tuning-fork.

sound-register (sound'rej″is-tėr), *n.* An apparatus for collecting and recording tones of the singing voice or of a musical instrument. It was invented in Paris in 1858.

sound-shadow (sound'shad″ō), *n.* The interception of a sound by some large object, as a building. It is analogous to a light-shadow, but is less distinct, since sound-waves have much greater length than light-waves.

For just as a high wall, a hill, or a railway-cutting often completely cuts off sounds by forming a *sound-shadow*.
Pop. Sci. Mo., XXXI. 364.

sound-wave (sound'wāv), *n.* A wave of condensation and rarefaction by which sound is propagated in an elastic medium, as the air. See *sound*[5] and *wave*.

sounet†, *n.* and *v.* A Middle English form of *sound*[5].

soup[1] (soup), *v.* and *n.* An obsolete or dialectal ★form of *sup*.

soup[2] (söp), *n.* [= D. *soep* = MHG. G. *suppe* = Sw. *soppa* = Dan. *suppe* = Icel. *sūpa*, soup; < OF. (and F.) *soupe*, soup, broth, pottage, sop, = Pr. Sp. Pg. It. *sopa*, soup; < MD. *soppe, sop*, a sop, broth, D. *sop*, broth, = Icel. *soppa* = Sw. *soppa*, a sop: see *sop*. *Soup*[2] is a doublet of *sop*, derived through OF., while *soup*[1], *n.*, is a native variant of *sup*.] **1.** In *cookery*, originally, a liquor with something soaked in it, as a sop of bread; now, a broth; a liquid dish served usually before fish or meat at dinner. The basis of most soups is stock; to this are added meat, vegetables, vermicelli, herbs, wine, seasoning, or whatever is chosen: as, cream *soup;* tomato *soup;* turtle *soup*. See *julienne, purée, soup-maigre*.

Between each act the trembling salvers ring,
From *soup* to sweet-wine.
Pope, Moral Essays, iv. 162.

2. A kind of picnic in which a great pot of soup is the principal feature. Compare the like use of *chowder*. [West Virginia.]—**Portable soup**, a sort of cake formed of concentrated soup, freed from fat, and, by long-continued boiling, from all the putrescible parts.

soup[3]†, *v.* An obsolete form of *soop*, *swoop*.

E. A. Freeman, Venice, p. 138.

(*c*) Supremacy or dominion; hegemony: applied to the relation between a powerful state and other states or regions: as, Rome's *sovereignty* over the East; Great Britain holds the *sovereignty* of the seas. (*d*) The supreme, absolute, uncontrollable power by which any state is governed (*Cooley*); the political authority, whether vested in a single individual or in a number of individuals, to order and direct what is to be done by each individual in relation to the end and object of the state (*Halleck*). It is essential to the modern conception of sovereignty that it should be exclusive of any other human superior authority, should be wielded by a determinate person or organization of persons, and should be on the whole habitually obeyed by the bulk of the community. Thus, in the United States, sovereignty is vested in the body of adult male citizens. The claim that each State—that is, the adult male free citizens of each State—possessed a separate sovereignty was one of the elements of controversy involved in the civil war.

I state Austin's doctrine of *Sovereignty* in another way, more popularly, though without, I think, any substantial inaccuracy. It is as follows: There is, in every independent political community—that is, in every political community not in the habit of obedience to a superior above itself—some single person or some combination of persons which has the power of compelling the other members of the community to do exactly as it pleases. This single person or group—this individual or this collegiate Sovereign . . .—may be found in every independent political community as certainly as the centre of gravity in a mass of matter. If the community be violently or voluntarily divided into a number of separate fragments, then, as soon as each fragment has settled down (perhaps after an interval of anarchy) into a state of equilibrium, the Sovereign will exist and with proper care will be discoverable in each of the now independent portions. The *Sovereignty* over the North American Colonies of Great Britain had its seat in one place before they became the United States, in another place afterwards; but in both cases there was a discoverable Sovereign somewhere. This Sovereign, this person or combination of persons, universally occurring in all independent political communities, has in all such communities one characteristic common to all the shapes *Sovereignty* may take, the possession of irresistible force, not necessarily exerted, but capable of

being exerted. . . . The Sovereign, if a single person, is or should be called a Monarch; if a small group, the name is an Oligarchy; if a group of considerable dimensions, an Aristocracy; if very large and numerous, a Democracy.
Maine, Early Hist. of Institutions, p. 349.

Much is said about the *sovereignty* of the States. . . . What is *sovereignty* in the political sense of the term? Would it be far wrong to define it "a political community without a political superior"? Tested by this, no one State, except Texas, ever was a sovereignty.
Lincoln, in Raymond, p. 146.

The chief attributes of *sovereignty* with which the states have parted are the coining of money, the carrying of mails, the imposing of tariff dues, the granting of patents and copyrights, the declaration of war, and the maintenance of a navy. *J. Fiske*, Amer. Pol. Ideas, p. 98.

(*e*) A state, community, or political unit possessing independent power.

The late colonies had but recently become compactly organized self-governing States, and were standing somewhat stiffly apart, a group of consequential *sovereignties*, jealous to maintain their blood-bought prerogatives, and quick to distrust any power set above them, or arrogating to itself the control of their restive wills.
W. Wilson, Cong. Gov., i.

(*f*†) Supremacy in excellence; supreme excellence.

Fie, fie, unreverend tongue! to call her bad
Whose *sovereignty* so oft thou hast preferr'd
With twenty thousand soul-confirming oaths.

Some of the Oniscidæ are land animals, and are known as hog-lice, *sows*, etc. *Pascoe*, Zoöl. Class., p. 84.

3. In *metal.*, the metal which has solidified in the common channel or feeder through which the molten iron flows from the blast-furnace into a series of parallel grooves or furrows, which are the "pigs" appertaining to the sow, and the iron from which bears the name of *pig-iron*, or simply *pig:* used also of other metals.

It is the manner (right woorshipfull) of such as seeke profit by minerall, first to set men on woorke to digge and gather the owre; then by fire to trie out the metall, and to cast it into certeine rude lumpes, which they call *sowze*.
Lambarde, Perambulation (ed. 1596), Pref. (*Halliwell.*)

For the strengthening of his nerves or sinews, they made him two great *sows* of lead, each of them weighing eight thousand and seven hundred quintals. . . . Those he took up from the ground, in each hand one.
Urquhart, tr. of Rabelais, i. 23.

4†. A military engine consisting of a movable roof arranged to protect men handling a battering-ram. Compare *vinea*, also *cat* and *cat-castle*.—**Old sow.** See *old*.—**To have, take,** or **get the right (or wrong) sow by the ear,** to pitch upon the right (or wrong) person or thing; come to the right (or wrong) conclusion. [Low.]

He *has the wrong sow by the ear*, i' faith; and claps his dish at the wrong man's door.
B. Jonson, Every Man in his Humour, ii. 1.

You *have a wrong sow by the ear*.
S. Butler, Hudibras, II. iii. 580.

II. *a.* Female: applied to fish: as, a *sow* hake. See *sow fish*, under *fish*[1].

sow[3]†, *v.* An obsolete spelling of *sew*[1].

sowa (sō'ä), *n.* See *soya*.

sowans (sō'anz), *n. pl.* Same as *sowens*.

sowar (sō-är'), *n.* [Also *suwar;* < Hind. *sawār*, < Pers. *sawār*, a horseman.] A horse-soldier; especially, a native cavalry soldier in the British-Indian army, often in the sense of an orderly or mounted attendant or guard.

In the cavalry of the Madras army the horses are provided by Government, but in that of Bengal and Bombay the trooper, or *sowar*, as he is designated in India, finds himself in everything except his arms.
N. A. Rev., CXXVII. 145.

sowback (sou'bak), *n.* A low ridge of sand or gravel; a hogback or horseback; a kame; a drum or drumlin.

The long parallel ridges, or "*sowbacks*" and "drums," as they are termed, . . . invariably coincide in direction with the valleys or straths in which they lie.
J. Geikie, Great Ice Age, p. 17.

sowbane (sou'bān), *n.* The maple-leaved goosefoot, *Chenopodium hybridum*, regarded as fatal to swine. Also called *hog's-bane*.

sow-belly (sou'bel^{ǝ}i), *n.* Salt pork; salt-horse; salt-junk: used by fishermen, whalers, sailors, and soldiers. [Low.]—**Sow-belly hake.** See *hake*[2].

sowbread (sou'bred), *n.* A plant of the genus *Cyclamen*, particularly *C. Europæum*. The species are low stemless herbs sending up leaves and scapes from corms which are sometimes very large, and, where native, are sought after by swine. The flowers are rose-colored, pink, or white, nodding, the divisions of the corolla reflexed, and are cultivated for ornament, the best-known species being *C. Europæum*, hardy in southern Europe and England, and the more tender and showy *C. Persicum*.

sow-bug (sou'bug), *n.* A hog-louse; a pill-bug; a sow; any terrestrial isopod of the family *Oniscidæ*, as *Oniscus asellus*. Some sow-bugs can roll themselves up into a ball like a tiny armadillo. See *sow*[2], *n.*, 2, and cut under *Oniscus*.

sowcet. An obsolete form of *souse*[1], *souse*[2].

sowdant, *n.* An obsolete variant of *sultan*. *Chaucer*.

sowdanesset, sowdannesset, *n.* Obsolete variants of *sultaness*.

sow-drunk (sou'drungk), *a.* Drunk as a sow; beastly drunk. [Prov. Eng.]

Soä *sow-droonk* that tha doesn not touch thy 'at to the Squire. *Tennyson*, Northern Cobbler.

sowdwort†, *n.* An obsolete form of *saltwort* (*Salsola Kali*): also applied to the columbine, *Aquilegia vulgaris*.

sowel, *n.* Same as *soul*[2].

sowens (sō'enz), *n. pl.* [Also *sowans*, *sowins;* origin obscure; cf. *sew*[2].] **1.** A nutritious article of food made from the farina remaining among the husks of oats, much used in Scotland and formerly in Northumberland. The husks (called in Scotland *seeds* or *sids*), after being separated from the oatmeal by the sieve, still retain a considerable portion of farinaceous matter. A quantity of the husks is steeped in water till the farinaceous matter is dissolved, and until the liquid has become sour. The whole is then put into a sieve, which allows the milky liquid to pass through into a barrel or other vessel, but retains the husks. The starchy matter gradually subsides to the bottom of the barrel. The sour liquor is then decanted off, fresh water is stirred into the deposit that is left, and the mixture, when boiled, forms sowens. In England it is more commonly called *flummery*. The singular form *sowen* is used attributively or in compounds: as, a *sowen*-tub.

These *sowins*, that is, flummery, being blended together, produce good yeast. *Mortimer*, Husbandry.

As if it were any matter . . . whether a ploughman had suppit on minched pies or sour *sowens*.
Scott, Old Mortality, vii.

2. A kind of paste employed by weavers for stiffening their yarn in working.

[Scotch and prov. Eng. in both senses.]

sower[1] (sō'ėr), *n.* [< ME. *sower*, *sawere*, < AS. *sāwere*, a sower, < *sāwan*, sow: see *sow*[1].] **1.** One who sows or scatters seed.

Behold, a *sower* went forth to sow. Mat. xiii. 3.

2. That which sows seed; a sowing-machine. —**3.** One who scatters or spreads; a disseminator; a breeder; a promoter.

They are the *sowers* of suits, which make the court swell, and the country pine. *Bacon*.

Terming Paul . . . a *sower* of words, a very babbler or trifler. *Hakewill*.

sower[2]†, *n.* An obsolete spelling of *sewer*[1].

sower[3]†, *a.* An obsolete spelling of *sour*[1].

sow-fennel (sou'fen^{ǝ}el), *n.* See *fennel*.

sow-gelder (sou'gel^{ǝ}dėr), *n.* One who spays sows.

First, he that led the cavalcate
Wore a *sow-gelder's* flagellate [horn].
S. Butler, Hudibras, II. ii. 610.

sowiet (sou'i), *n.* Same as *sow*[2], 4.

They laid their *sowies* to the wall.
Auld Maitland (Child's Ballads, VI. 222).

sowing (sō'ing), *n.* [Verbal n. of *sow*[1], *v.*] **1.** The act of one who sows or scatters seed.—**2.** That which is sowed.

You could not keep the birds out of the garden, try how you would. They had most of the *sowings* up.
The Century, XXXVI. 815.

sowing-machine (sō'ing-ma-shēn^{ǝ}), *n.* In *agri.*: (*a*) A hand or horse-power seed-planting machine. (*b*) A broadcast sower. The hand-machines consist of a simple mechanism turned by a crank, which scatters the seed in a cloud in every direction. It is carried in one hand and operated by the other.

sowins (sō'inz), *n. pl.* See *sowens*.

sowkert, *n.* An obsolete form of *sucker*.

sowlt, sowle[1]†. Obsolete forms of *soul*[1], *sole*[6].

sowle[2], *n.* Same as *soul*[2].

sowm, *n.* and *v.* See *soum*.

sown[1] (sōn). A past participle of *sow*[1].

sown[2]†, **sownet**, *n.* and *v.* Obsolete forms of *sound*[5].

sown[3]†, *n.* and *v.* An obsolete form of *swoon*.

sowpt, *n.* An obsolete form of *soup*[2].

sowset. An obsolete spelling of *souse*[1], *souse*[2].

sowskin (sou'skin), *n.* See *hogskin*.

sowster†, *n.* Same as *sewster*. *Halliwell*.

sowtegeт, *n.* See *soutage*.

sowter†, **sowterly**†. Obsolete forms of *souter*, *souterly*.

sowth[1]†, *n.* and *a.* An obsolete spelling of *south*.

sowth[2] (south), *v.* [Appar. a var. of *souch*, *sough*[1].] **I.** *intrans.* To whistle softly. [Scotch.]

II. *trans.* To try over, as a tune, with a low whistle. [Scotch.]

On braes when we please, then,
We'll sit an' *sowth* a tune; . . .
An' sing 't when we ha'e dune.
Burns, First Epistle to Davie.

sowther, *v.* Same as *souther*[2]. *Halliwell*.

sow-thistle (sou'this^{l}), *n.* [< ME. *sowthystell*, < AS. *sugethistel*, < *sugu*, sow, + *thistel*, thistle. In ME. also called *swines thistell*.] A plant of the genus *Sonchus*, primarily *S. oleraceus*, a weed of waste places, probably native in Europe and central Asia, but now diffused nearly all over the world. It is a smooth herb with a milky juice, bearing runcinate-pinnatifid leaves and rather small yellow flower-heads. A similar plant, but with less divided spiny

leaves, is *S. asper*. A much more showy species is *S. arvensis*, with larger and brighter heads. These are all naturalized in the United States, the last less abundantly. The name has been extended to species of the allied genus *Lactuca*.

Sow-thistle (*Sonchus oleraceus*).
1, upper part of the stem with the heads; 2, one of the basal leaves; *a*, a flower; *b*, the achene with the pappus.

soy (soi), *n.* [F. *soy*, *soui* (G. Sw. Dan. *soja*, < NL. *soja*, *soya*); Malay *sōi*, < Jap. *siyau-yu*, Chinese *shōyu*, soy.] 1. A kind of sauce prepared in the East from the soy-bean (see def. 2). It is eaten with fish, cold meat, etc. There are two or three qualities of soy, but the Japanese soy is reckoned the best.

I have been told that *soy* is made with a fishy composition, and it seems most likely by the Taste; tho' a Gentleman of my Acquaintance who was very intimate with one that sailed often from Tonquin to Japan, from whence true *Soy* comes, told me that it was made only with Wheat and a sort of Beans mixt with Water and Salt.
Dampier, Voyages, II. 28.

From travellers accustom'd from a boy
To eat their salmon, at the least, with *soy*.
Byron, Beppo, vii.

2. The soy-bean or -pea, *Soia Soja* (*Dolichos Soja* of Linnæus). It is an annual leguminous plant with stout nearly erect or somewhat climbing stems covered with rusty hairs, bearing trifoliate leaves and from their axils two or three pods 1½ or 2 inches long. The seeds are made into the above sauce and variously used in cookery; an oil is also expressed from them, and the residue is extensively used in China for feeding cattle and as a fertilizer. The plant is native from northern India to Japan. The cultivated plant differs somewhat from the wild, and by some authors is distinguished as a species. Also *Sahuca bean*.

soya (sō′yä), *n.* [< Hind. *sōyā*, *sōā*, fennel.] Dill. Also *sowa*.

soy-bean (soi′bēn), *n.* See *soy*, 2.

soylet. A spelling of *soil*[1], *soil*[2], *soil*[5].

Soymida (soi′mi-dä), *n.* [NL. (Adrien de Jussieu, 1830), from the Telugu name.] A genus of choripetalous plants, of the family *Meliaceæ* and tribe *Swietenieæ*. It is characterized by flowers with five petals, united stamens forming a short ten-lobed tube or cup, the lobes two-toothed, with sessile anthers between the teeth, and an ovoid five-celled ovary which ripens into a woody septifragal capsule with compressed and winged seeds destitute of albumen. The only species, *S. febrifuga*, is a native of the East Indies, where it is known as *rohan* (or *rohun*) and *redwood*. (See also *rohun-bark* (under *bark*[2]) and *juribali*.) It is a tall tree with bitter bark and hard wood, bearing abruptly pinnate leaves with obtuse opposite leaflets, and flowers in axillary and terminal panicles.

soy-pea (soi′pē), *n.* See *soy*, 2.

Sozobranchia (sō-zō-brang′ki-ä), *n. pl.* [NL., < Gr. σώζειν, save, keep, + NL. *branchia*, gills: see *branchiæ*.] A group of urodele amphibians which do not lose the gills or tail. See *Perennibranchiata*.

sozobranchiate (sō-zō-brang′ki-āt), *a.* [< NL. *sozobranchiatus*, < Gr. σώζειν, save, keep, + NL. *branchiatus*: see *branchiate*.] Preserving the gills, as a urodele amphibian; perennibranchiate.

Sozura (sō-zū′rä), *n. pl.* [NL., neut. pl. of *sozurus*: see *sozurous*.] Urodele (or tailed) gilless batrachians, or those batrachians which lose the gills, but not the tail, when adult. They are a higher group than the *Sozobranchia*, both being together contrasted with the *Anura* or tailless batrachians.

sozurous (sō-zū′rus), *a.* [< NL. *sozurus*, < Gr. σώζειν, save, keep, + οὐρά, tail.] Retaining the tail; pertaining to the *Sozura*, or having their characters.

sozzle (soz′l), *v. t.*; pret. and pp. *sozzled*, ppr. *sozzling*. [A var. of *sossle*.] 1. To mingle confusedly. [Prov. Eng.]—2. To spill or wet through carelessness.—3. To splash. [U. S.]

A sandpiper glided along the shore; she ran after it, but could not catch it; she sat down and *sozzled* her feet in the foam.
S. Judd, Margaret, p. 8.

sozzle (soz′l), *n.* [< *sozzle*, *v.*] A state of sloppy disorder. [U. S.]

The woman, who in despite of poverty and every discouragement had always hated, to the very roots of her hair, anything like what she called a *sozzle*—who had always been screwed up and sharp set to hard work.
Mrs. Whitney, Leslie Goldthwaite, vii.

sozzly (soz′li), *a.* [< *sozzle* + -*y*[1].] Sloppy; draggled; mentally flabby; shiftless. [New Eng.]

Folks grows helplesser all the time, and the help grows *sozzlier*; and it comes to sauciness . . . and changes.
Mrs. Whitney, The Other Girls, xiii.

★ **Sp.** An abbreviation of *Spanish*.

sp. An abbreviation: (*a*) in *phar.*, of *spiritus*, *spirit*; (*b*) in *bot.*, of *species*, *specimen*; (*c*) in *zoöl.*, of *species* only: when two or more species are meant, *spp.* is used.

s. p. An abbreviation of *sine prole*, without issue.

spa (spä or spâ), *n.* [Formerly also *spaw*; < *Spa*, or *Spaa*, in the eastern part of Belgium, where there are mineral springs.] A mineral spring, or the locality in which such springs exist.

Past cure of physic, *spaw*, or any diet.
Beau. and Fl., Scornful Lady, iii. 2.

Never knew her better; . . . she has been as healthy as the German *Spa*.
Sheridan, Rivals, ii. 1.

spaad† (späd), *n.* [< D. *spaath* = F. *spath* = Sp. *espato* = Pg. *espatho* = It. *spato*, < MHG. *spāt*, G. *spat*, *spath*, friable stone, splinter, spar; origin unknown. Cf. *feldspath*.] A kind of mineral; spar.

English talc, of which the coarser sort is called plaister, the finer, *spaad*, earth-flax, or salamander's hair.
Woodward. (*Johnson.*)

★ **space** (spās), *n.* [< ME. *space*, < OF. (and F.) *espace* = Pr. *espaci* = Sp. *espacio* = Pg. *espaço* = It. *spazio*, < L. *spatium*, room, space, distance, interval, a public walk, etc., lit. 'that which is drawn out,' < √ *spa*, draw out; cf. Gr. σπᾶν, draw, draw out, Skt. √ *sphā*, fatten. Cf. *span*[1], *spade*[1].] 1. The general receptacle of things; room, (*a*) as a character of the universe, (*b*) as a psychological fact, a type of perception, (*c*) as a mathematical system. Space has been the subject of metaphysical discussion since the time of Plato and Aristotle. The chief opinions expressed in the course of modern philosophical development have been three: that space is something real and objective, independent of our perception of it; that it is something entirely subjective, a character of the perceptions of sight and touch; and that it is both subjective, as idea, and objective, since the order of our ideas corresponds to the order of relations between things themselves. Kant attempted at once to reconcile and to transcend these conflicting views. Space is, for him, the all-embracing container of the things in space, but this something is a form of our intuition; space is therefore subjective, but nevertheless, as a general form of experience, it is not empirically given; spatial predicates are applicable only to the world of sense-perception, and not to that of things-in-themselves. Recent philosophy has been largely occupied with criticism of the Kantian doctrine; positive work upon the problem has, perhaps, culminated in the belief that no theory of space is admissible which oversteps the limits of a possible experience. Hence the psychological analysis of our space-perceptions becomes of cardinal importance. Broadly speaking, there are at the present day two principal theories of space-perception. The one, which follows the lead of Berkeley, and has been worked out in various ways by J. S. Mill, Helmholtz, Lotze, Wundt, and others, is the *genetic* or *empiristic* theory; it asserts that the perception of space results, by a mental synthesis, from the combination of non-spatial sensations (retinal or cutaneous and muscular). The other, which is represented by Hering, Stumpf, Ward, James, etc., is the *nativistic* theory; it asserts that our sensations, some or all of them, are "positively and inexplicably extensive wholes." Neither of these theories has sufficiently discriminated the two fundamental problems of a space psychology: the problems of extension and of localization. It is quite possible, for example, to combine them, by maintaining that sensations of eye and skin are given extended, spread out, but that they are not given localized. Extension, spatiality in two dimensions, would then be a nativistic character of certain sensations; localization, whether in a plane or in the third dimension, would remain to be explained genetically. This explanation would be couched in some form of the theory of "local signs" (Lotze): that is, of intensive or qualitative sensation differences, definitely correlated with differences of objective spatial position. The vulgar conception of space as a sort of thing or substance of a different category from material things, through which the latter move without sensible resistance, is acceptable to mathematicians, who find that such a construction lends itself remarkably to their diagrammatic reasoning. For the geometer, space is primarily a system of points having the following properties: (1) It is continuous. See *continuity*, 2. (2) It is unlimited, whether the part at a finite distance from a given point be limited or not. (3) It has three dimensions—that is, a set of three numbers varying continuously may be placed in continuous one-to-one correspondence with the points of space. By a continuous correspondence is meant one in which a continuous variation in one member will correspond in every case to a continuous variation in the other. (4) All the points of space have perfectly similar spatial relations. (5) It is possible for a rigid body to move in space, and such a body is fixed by the fixation of three points, but not fewer. (6) Any figure may be magnified while preserving the proportionality of all its lines. Geometers often imagine these properties to be modified. In particular, they use the hypothesis of a space of four or more dimensions. They also often suppose the principle of similar figures, or, what is the same thing, the doctrine of parallels, to be false, thus producing what is known as the *non-Euclidean geometry*. This is of various kinds.

Stars countless, each in his appointed place,
Fast anchor'd in the deep abyss of *space*.
Cowper, Retirement, l. 84.

2. The interval between any two or more objects, or between terminal points; distance; extent, as of surface: as, the *space* of a mile.

And so he hym chased as faste as his horse myght hym bere, till he hadde lefte his felowes be-hynde the *space* of an arblaste. *Merlin* (E. E. T. S.), ii. 194.

There shall be a *space* between you and it [the ark] about two thousand cubits by measure. Josh. iii. 4.

I warrant he hath a thousand of these letters, writ with blank *space* for different names.
Shak., M. W. of W., ii. 1. 77.

Four gray walls, and four gray towers,
Overlook a *space* of flowers.
Tennyson, Lady of Shalott, i.

3. The interval between two points of time; quantity of time; duration.

There was silence in heaven about the *space* of half an hour. Rev. viii. 1.

Mean *space* I thinke to goe downe into Kente.
Cushman, quoted in Bradford's Plymouth Plantation, p. 37.

Nine times the *space* that measures day and night
To mortal men he with his horrid crew
Lay vanquish'd, rolling in the fiery gulf.
Milton, P. L., i. 50.

4. A short time; a while.

And, sith for me ye fight, to me this grace
Both yield, to stay your deadly stryfe a *space*.
Spenser, F. Q., II. vi. 33.

And Arthur and his knighthood for a *space*
Were all one will. *Tennyson*, Coming of Arthur.

5. Hence, time in which to do something; respite; opportunity; leisure.

Avyseth yow on it, when ye han *space*,
And of som goodely answere yow purchace.
Chaucer, Troilus, ii. 1124.

And I gave her *space* to repent. Rev. ii. 21.

6†. A path; course (?).

This ilke monk leet olde thynges pace,
And heeld after the newe world the *space*.
Chaucer, Gen. Prol. to C. T., l. 176.

7. In *printing*, one of the blank types which separate the words in print. The thicknesses most used are one third, one fourth, and one fifth of the square body of the text-type. Hair-spaces, still thinner, are also made. Spaces as thick as one half the square body and all thicker are known as *quadrats*.

8. In *musical notation*, one of the degrees between the lines of the staff. In the usual staff there are four spaces within the staff, but in the Gregorian staff there are only three. The name and significance of a space depend on the clef and the key-signature. See *staff*.

9. In *ornith.*, an unfeathered place on the skin between pterylæ; an apterium. *Coues*, Key to N. A. Birds, p. 87.—**Absolute, algebraic, basal space.** See the adjectives.—**Added space.** Same as *leger space*.—**Barycentric coördinates in space.** Same as *tetrahedral coördinates* (which see, under *coördinate*).—**Berth and space.** See *berth*[2].—**Cell-spaces,** the spaces in the ground-substance of connective tissue which inclose the connective-tissue corpuscles.—**Chyle-spaces,** the central lymphatic cavities of the intestinal villi.—**Complemental space of pleura,** the portion of the pleural cavity immediately above the insertion of the diaphragm, which is not filled by air in ordinary breathing.—**Dangerous space** (*milit.*), the zone before and behind the object fired at covered by the trajectory. See *battle-range*, under *battle*[1].—**Dead space,** in *fort.* Same as *dead angle* (which see, under *angle*[3]).—**Deep cardiac space,** the projection on the surface of the chest of the lung-covered portions of the heart. It borders on each side the superficial cardiac space.—**Elliptic, Euclidean, extramundane, gastrovascular space.** See the adjectives.—**Fontana's spaces.** Same as *canal of Fontana* (which see, under *canal*[1]).—**Geometry of space.** See *geometry*.—**Half-space or foot-space,** in a staircase, a resting-place or broad space between two flights of steps.—**Haversian spaces.** See *Haversian canal*, under *canal*[1].—**Hemal, hyperbolic, intercellular, interdental space.** See the adjectives.—**Hypoprostatic space,** the space lying between the rectum and the prostate. *Buchanan.*—**Interlamellar spaces,** the spaces between the lamellæ of the cornea.—**Interossecus space,** the space between parallel long bones.—**Interpeduncular space,** the triangular space at the base of the brain, between the crura cerebri.—**Interpleural, ivory, leger space.** See the adjectives.—**Lenticular space.** See *lenticular mark*, under *lenticular*.—**Linear, local, maxillopharyngeal, meant, middle, parabolic, parasinoidal, perforated, periocular, popliteal,** etc., **space.** See the adjectives.—**Polar coördinates in space.** See *coördinate*.—**Quarter-space,** a landing or interval at an angle-turn of a stair.—**Retroperitoneal space.** See *retroperitoneal*.—**Room and space.** See *room*[1].—**Superficial cardiac space,** the area on the surface of the chest over that part of the heart which is not covered by the lung. It is represented with approximate accuracy by a right-angled triangle bounded by the midsternal line, a horizontal line through the point of the apex beat, and a line drawn through that point and the intersection of the midsternal line with a horizontal line through the fourth costosternal articulation.

space (spās), *v.*; pret. and pp. *spaced*, ppr. *spacing*. [< *space*, *n.* Cf. *spatiate*, *expatiate*.] I.† *intrans.* To move at large; expatiate. [Rare.]

But she, as Fayes are wont, in privie place
Did spend her dayes, and lov'd in forests wyld to *space*.
Spenser, F. Q., IV. ii. 44.

II. *trans.* 1. To set at intervals; put a space between; specifically, in *printing*, to arrange the spaces and intervals in or between so that there may be no obvious disproportion: as, to *space* a paragraph; to *space* words, lines, or letters.

The porch, too, is open, and consists of columns *spaced* equidistantly over its floor, without either the bracketing arrangements of the southern or the domical forms of the northern styles. *J. Fergusson*, Hist. Indian Arch., p. 389.

2. To divide into spaces.

The artificer is ordered "to set up the frames, and to *space* out the rooms, that the Nine Worthies may be so instauled as best to please the eye."
Strutt, Sports and Pastimes, p. 27.

3. To measure by paces. *Halliwell.* [Prov. Eng.]—**Spaced braid,** a white cotton braid used for the trimming of washable garments. The name is derived from the pattern, which exhibits flat and simple spaces between raised edging.—**To space out,** in *printing*, to put more spaces between the words or lines of.

space-box (spās′boks), *n.* In *printing*, a petty case of wood or millboard, in six or eight divisions, holding the spaces needed for corrections on stone. Sometimes called *space-barge* or *space-paper* in England.

space-curvature (spās′kėr″vā-ṭūr), *n.* Riemann introduced the fundamental notion of the measure of curvature of space, an intrinsic characteristic of the space quite independent of any higher space.

spaceful (spās′fûl), *a.* [< *space* + *-ful.*] Wide; extensive. *Sandys.*

spaceless (spās′les), *a.* [< *space* + *-less.*] Destitute of space. *Coleridge.*

space-line (spās′līn), *n.* In *printing*, same as *lead*², 3.

space-mark (spās′märk), *n.* See *proof-reading.*

space-perception (spās′pėr-sep″shọn), *n.* The perception of space—that is, of bodies as ★extended, shaped, localized, moving, etc.

spacer (spā′sėr), *n.* 1. A device used in cable telegraphy for reversing the current at proper intervals, thus increasing the speed of transmission: also used for a somewhat similar purpose on land-lines.—2. In a typewriter, a key, and the mechanism connected with it, by which spaces are made between words.

space-relation (spās′rē-lā″shọn), *n.* A spatial relation, such as that two points lie within a tetrahedron of which four others are the vertices, and the like.

space-rule (spās′rōl), *n.* In *printing*, a hair-line of type-metal, type-high and about one thirty-sixth of an inch thick. Such rules are made of many lengths, from one twelfth of an inch to half an inch. They are used for cross-lines in table-work.

space-writing (spās′rī″ting), *n.* In newspaper work, the system of payment to reporters or other writers in proportion to the space allowed to their articles in print; also, writing or work under this system.

The standard of literary excellence in the news columns of the New York press has also been lowered by the general substitution of *space writing* for the work of salaried reporters, as well as by the influence already referred to.
Westminster Rev., CXXVIII. 858.

spacial, spaciality, etc. See *spatial*, etc.

spacing (spā′sing), *n.* [Verbal n. of *space*, *v.*] 1. The making of spaces. (*a*) The allowing and gaging of intervals between words in setting type, typewriting, or the like.

The change in the *spacing* being effected by a small cam at the side of the carriage. *Sci. Amer.*, N. S., LV. 24.

(*b*) In *art*, *mach.*, etc., the division of any surface into special parts.

In the spaces of decoration, as in all else, the Japanese artist studiously avoids uniformity or repetition of exact *spacing*. *Encyc. Brit.*, XIII. 591.

2. A space thus made.

Each tongue upon discs is cut slantingly across at regular *spacings* by steam passages analogous to the guide-plate vents of water turbines. *The Engineer*, LXIX. 225.

3. Spaces collectively.

spacing-lace (spā′sing-lās), *n.* Same as *seaming-lace.*

spacious (spā′shus), *a.* [Formerly also *spatious;* < F. *spacieux* = Sp. *espacioso* = Pg. *espaçoso* = It. *spazioso*, < L. *spatiosus*, roomy, ample, < *spatium*, room, space: see *space.*] 1. Inclosing an extended space; of great extent; wide-extended.

As though no other place, on Britain's *spacious* earth,
Were worthy of his end, but where he had his birth.
Drayton, Polyolbion, i. 189.

The *spacious* firmament on high,
With all the blue ethereal sky.
Addison, Ode, Spectator, No. 465.

2. Having large or ample room; not contracted or narrow; roomy.

On the North side of the Church is a *spatious* Court, which I could not conjecture to be less than one hundred and fifty yards long, and eighty or one hundred broad.
Maundrell, Aleppo to Jerusalem, p. 126.

Those melodious bursts that fill
The *spacious* times of great Elizabeth.
Tennyson, Fair Women.

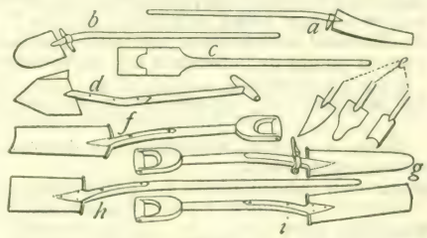
3†. Extensive; on a large scale; abounding: said of persons.

Is't possible that such a *spacious* villain
Should live, and not be plagued?
B. Jonson, Every Man out of his Humour, i. 1.

=**Syn.** Wide, capacious, ample, broad.

spaciously (spā′shus-li), *adv.* In a spacious manner; widely; extensively; roomily.

spaciousness (spā′shus-nes), *n.* The quality of being spacious; largeness of extent; extensiveness; roominess.



spadassin (spad′a-sin), *n.* [< F. *spadassin*, < It. *spadaccino*, swordsman, < *spada*, sword: see *spade*¹, *spathe.*] A swordsman; especially, a person devoted to fencing and presumed to be expert with the sword; hence, less properly, a bravo.

Bully swordsmen, *spadassins* of that party, go swaggering; or indeed they can be had for a trifle of money.
Carlyle. (*Imp. Dict.*)

spaddle (spad′l), *n.* [Dim. of *spade*¹. Cf. *paddle*².] A little spade; a spud. [Obsolete or provincial.]

Others destroy moles with a *spaddle*, waiting in the mornings and evenings for them. *Mortimer*, Husbandry.

or curved) may be pressed into the ground or other resisting substance with one foot, and a handle, usually with a crosspiece at the top, to be grasped by both hands. A spade differs from a two-handed shovel chiefly in the form and thickness of the blade.

Tho nomen heo *spade* and schouele and ner the place wende,
Deope heo gonne to delue ther as the smoke out wende.
Holy Rood (E. E. T. S.), p. 43.

Strength may wield the pond'rous *spade*,
May turn the clod, and wheel the compost home.
Cowper, Task, iii. 636.

2. A tool of soft iron used with diamond-powder by cameo-cutters in finishing.—3. In *whaling*, a large chisel-like implement used on blubber or bone in cutting-in. See phrases following.—4. In *herpet.*, a formation on the foot of some toads with which they dig. See *spade-foot.*—**Boat-spade,** an instrument, carried under the stern-sheets of a whale-boat, resembling a very large chisel, having a wide blade, and a handle six or eight feet long. This instrument was employed to stop a running whale by the process known as *hamstringing* or *spading flukes* (cutting the cords about the small), which required much experience and dexterity, and was a very hazardous undertaking; it has been done away with by the introduction of bomb-lances. The boat-spade is still carried in case of emergency.—**Bone-spade,** a cutting-spade, with a long thin shank, used by whalers for cutting out the throat-bone of a baleen-whale.—**Cutting-spade,** a sharp instrument like a very large narrow chisel fixed to a pole ten or more feet in length, used for cutting the blubber from a whale.—**Half-round spade,** a long-handled spade with a blade curved, or rolled up on the sides, resembling a carpenters' gouge, and used for cutting holes in the head of the blubber when boarding.—**Shoeing of a spade,** in *her.*, same as *spade-iron*, 2 (*b*).—**To call a spade a spade,** to call things by their proper names, even though these may seem homely or coarse; speak plainly and without mincing matters. Various unnecessary conjectures have been made as to the supposed occult origin of this phrase; but it means what it says—to call a simple thing by its simple name, without circumlocution or affected elegance.

Chesham does not like to *call a spade a spade*. He calls it a horticultural utensil. *Thackeray*, Philip, xxiii.

spade¹ (spād), *v. t.*; pret. and pp. *spaded*, ppr. *spading.* [< *spade*¹, *n.*] 1. To dig or cut with a spade; dig up (the ground) by means of a spade.—2. In *whaling*, to use the boat-spade on, as a whale; cut the tendons of the flukes of; hamstring.

G. *spannen*, extend, connect, = Icel. *spenna*, span, clasp, = Sw. *spänna*, stretch, strain, draw, = Dan. *spænde*, stretch, strain, span, buckle; √ *span*, perhaps, with present formative *-n*, < √ *spa*, extend, in Gr. σπάειν, σπᾶν, draw, draw out (see *spasm*), L. *spatium*, extension, space (see *space*). Cf. *spin*, *speed*.] **I.** *trans.* **1**†. To stretch or spread out; extend in continuity; give extent to.

> My right hand hath *spanned* [spread out, R. V.] the heavens. Isa. xlviii. 13.

2. To stretch from side to side or from end to end of; extend over or across; continue through or over the extent of.

> This soul doth *span* the world. *G. Herbert*, Content.

> The Rhyndacus is still *spanned* by an ancient bridge of three arches. *B. Taylor*, Lands of the Saracen, p. 295.

> The existing church shows portions of work a thousand years apart, and *spans* nearly the whole of Aquileian history. *E. A. Freeman*, Venice, p. 63.

3. To make a stretch or reach along, over, or around; measure or cover the span of; grasp; specifically, to measure or encompass with the hand, the little finger and thumb being extended as far as possible: as, to *span* a stream with a log or a bridge; to *span* a person's wrist.

> Thenne the kinge *spanes* his spere.
> *Avowyng of Arthur*, st. 13. (*Skeat.*)

> Oft on the well-known spot I fix my eyes,
> And *span* the distance that between us lies.
> *Tickell*, An Epistle.

> How your plump arms, that were, have dropped away!
> Why, I can *span* them. *Browning*, Pippa Passes, iii.

4†. To cock by the use of a spanner, as a wheel-lock musket or pistol.

> Every man, officer and soldier, having a pistol ready *spann'd* in one hand. *Clarendon*, Civil Wars, III. 248.

5. *Naut.*, to confine with ropes: as, to *span* the booms.—**6.** To shackle the legs of, as a horse; hobble. [Prov. Eng.]

II. *intrans.* **1.** To measure off or mark distances from point to point; make distinct stretches in going, as a span-worm or measuring-worm does.

> If the whale is *spanning*, i. e. swimming in a decided direction and appearing at the surface at intervals more or less regular, less caution is observed. *Encyc. Brit.*, XXIV. 526.

2. To be matched for running in harness; form a span: as, the horses *span* well. [U. S.]

span[1] (span), *n.* [< ME. *spanne*, *sponne*, < AS. *span*, a span (def. 4), *gespan*, a joining, connection, = D. *span*, a span, a team of horses, = OHG. *spanna*, MHG. G. *spanne* (> It. *spanna* = OF. *espan*, F. *empan*) = Icel. *spönn* (*spann-*) = Sw. *spann* = Dan. *spand*, a span; from the verb.] **1.** The full extent or course over which anything is stretched or prolonged; the space or time covered or included between terminal points; entire reach from end to end or from side to side: as, the *span* of life; the *span* of a bridge.

> As used of physical things, *span* is understood as the actual or net space or distance between bounding lines or surfaces; hence, the *span* of an arch is the length of the opening between the inner faces of its abutments. Compare def. 2. Often used figuratively.

> The brief *span* of Roman literature, strictly so called, was suddenly closed under a variety of influences. *Maine*, Village Communities, p. 381.

> Two arches over the same *span* of river, supposing the butments are at the same depth, are cheaper than one. *Ruskin*, Elements of Drawing.

> Yea, Manhood hath a wider *span*
> And larger privilege of life than man.
> *Lowell*, Comm. Ode.

2. A part or division of something between terminal points: as, a bridge of ten *spans*.

> In this sense a span would comprise the distance from the middle line of one pier or support to that of the next, the whole number of spans including the entire length of the structure. [The decision of the case referred to in the first quotation turned upon the distinction between senses 1 and 2.]

> The word *span* does not, even in architecture, always mean a part of a structure. It is, perhaps, as often used to denote the distance or space between two columns. Such is the obvious import of the term as used in the act under consideration, not merely as a part of the structure itself, but the measure of the distance between the piers of the bridge. *U. S. Supreme Ct.*, March, 1888. (*Judge Lamar.*)

> The channel *spans* were built out from the central pier and from the adjacent flanking *spans* without the use of false works in either channel. *Scribner's Mag.*, IV. 32.

3. Extent of stretch, physical or mental; distance over which anything may be extended; reach or grasp, as of the memory or of perception. [Rare.]

> Between the ages of eight and nineteen the *span* of school-girls increases from 6 to 7.9 for letters, and from 6.6 to 8.6 for numerals. *Span* increases not only with age, but with rank in class, and it is suggested that a "standard *span*" be added to the items for anthropometric measurement. *Amer. Jour. Psychol.*, I. 193.

4. As a measure, originally, the extent between the tips of the thumb and little finger when stretched out: the oldest use of the word in English. The *span* belongs to the system of long measure to which the cubit and fingerbreadth belong. It has always been considered as half a cubit, and still is so in several countries of Asia. The English span is 9 inches. The Swedish *spann* is an entirely different kind of measure.

> *Spanne*, mesure of the hand. Palmus. *Prompt. Parv.*, p. 467.

> Whyche Morteys ys in Depnesse ij *Spannys* to the botom; the brede ys sumwhat more thane a *Spanne*. *Torkington*, Diarie of Eng. Travell, p. 43.

> Atween his shoulders was ae *span*,
> About his middle war but three.
> *The Wee Wee Man* (Child's Ballads, I. 126).

5. Figuratively, any short space or period; a brief or limited extent or course; a relatively small measure of continuity.

> Behold, thou hast made my days as it were a *span* long. *Book of Common Prayer*, Psalter, xxxix. 6.

> For the refreshing of that one *span* of ground God lets fall a whole shower of rain. *Donne*, Sermons, x.

> Thyself but Dust; thy Stature but a *Span*,
> A Moment thy Duration; foolish Man!
> *Prior*, Solomon, i.

6. The hand with the fingers outspread, as for measuring or for grasping a handful of something. [Rare.]

> And my Conductor, with his *spans* extended,
> Took of the earth, and, with his fists well filled,
> He threw it into those rapacious gullets.
> *Longfellow*, tr. of Dante's Inferno, vi. 25.

7. *Naut.*, a rope fastened at both ends so that a purchase may be hooked to its bight; also, a double rope having thimbles attached between its two parts, used as a fair-leader for ropes.—**8.** (*a*) In the United States (from the original Dutch usage), a pair of horses or mules harnessed together; particularly, a pair of horses usually driven together, or matched for driving or work. (*b*) In South Africa, two or more yokes of oxen or bullocks attached to a wagon or a plow. For a wagon the span may consist of from twelve to twenty animals, and for a plow of six or eight.

span[2]. An archaic preterit of *spin*.

span[3] (span), *adv.* [The first element in the compound *span-new* erroneously taken as a separate word: see *span-new*, and cf. *spick-and-span*.] Wholly; entirely; freshly: as, my hands are *span* clean (sometimes *spandy* clean). *Bartlett.* [Colloq., U. S.]

MHG. G. *seil*, a rope, cord, = E. *sole*[4]).] A fastening for the hind legs of a horse or cow, or for the legs on one side, to prevent the animal from kicking or straying; especially, a rope for fettering a cow's hind legs while she is milked; a tether. [Prov. Eng.]

> *Spancel*, a rope to tie a cow's hinder legs. *Ray* (ed. 1674), p. 44.

spancel (span'sel), *v. t.*; pret. and pp. *spanceled* or *spancelled*, ppr. *spanceling* or *spancelling*. [< *spancel*, *n.*] To fasten the legs of with a spancel, as those of a cow or horse to prevent the animal from kicking. [Prov. Eng.]—**To spancel a crab** or **a lobster**, to stick the point of a leg into the base of each movable claw, to prevent the animal from pinching. This is also done by thrusting a peg into the joint of the nippers or chelæ.

spanceled, spancelled (span'seld), *a.* [< *spancel* + *-ed*[2].] In *her.*, hobbled or fettered to a clog: said of a horse.

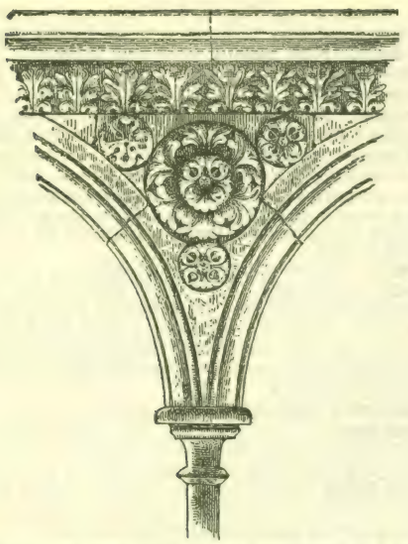
A Horse Spanceled.

When the bearing is properly depicted, a fore and a hind leg should have each a fetter-lock above the hoof and fastened to the one end of a heavy clog.

span-counter† (span'koun″tėr), *n.* [< *span*[1], *v.*, + obj. *counter*[2].] An old game in which one player threw a counter on the ground, and another tried to hit it with his counter, or to get so near to it that he could span the space between them and touch both the counters. In either case he won; if not, his counter remained where it fell, and became a mark for the first player, and so alternately till the game was won. The game was apparently similar to that of pitching pennies, and it was also called *span-farthing* and *span-feather*. *Halliwell.*

> Tell the king from me that, for his father's sake, Henry the Fifth, in whose time boys went to *span-counter* for French crowns, I am content he shall reign. *Shak.*, 2 Hen. VI., iv. 2. 166.

span-dogs (span'dogz), *n. pl.* A pair of iron bars linked together at one end and having sharp hooks at the other, used for grappling timber. See cut under *dog*.



spandrel (span'drel), *n.* [Also *spandril*, formerly *splaundrel*, *spaundere;* origin obscure.] In *arch.*, the triangular space comprehended between the outer curve or extrados of an arch, a horizontal line drawn through its apex, and a vertical line through its springing; also, the wall-space between the outer moldings of two arches and a horizontal line or string-course above them, or between these outer moldings and the intrados of another arch rising above and inclosing the two. In medieval architecture the spandrels are often ornamented with tracery, sculptured foliage, and the like. See cut on following page.

spandrel-wall (span'drel-wâl), *n.* A wall built on the extrados of an arch, filling in the spandrel.

spandy (span'di), *adv.* A dialectal extension of *span*[3]. [Colloq., New Eng.]

Spaniard (span′yärd), *n.* [= D. *Spanjaard*; with suffix *-ard* (cf. G. Dan *Spanier* = Sw. *Spanior*, with suffix cognate with *-er*[1]), < *Spain* (G. *Spanien*, etc.), < L. *Hispania*, Spain, < *Hispani*, the inhabitants of Hispania or Spain. The Rom. adj. is F. *espagnol* (> ME. *Spainolde*, n.) = Sp. *Español* = Pg. *Hespanhol* = It. *Spagnuolo*, < ML. NL. *Hispaniolus*, < L. *Hispania*, Spain (whence ult. E. *spaniel*). The L. adjectives are *Hispanus*, *Hispaniensis*, and *Hispanicus* (see *Hispanic*).] A native or a citizen of Spain, a kingdom of southwestern Europe, forming the greater part of the Iberian peninsula; in general, a member of the Spanish race, of mixed Celtic, Latin, Gothic, Arabic, and other elements, but now ranked as one of the Latin peoples.

spaniel (span′yel or span′el), *n.* and *a.* [Early mod. E. also *spannel*; < ME. *spaniel*, *spanzelle*, *spaynyel*, *spaynel*, *spanezeole*, < OF. *espagneul*, *espagnol*, F. *épagneul*, a spaniel, orig. OF. *chien espagnol*, F. *chien épagneul*, a Spanish dog; < Sp. *Español*, Spanish: see *Spaniard*.] **I.** *n.* **1.** A dog of a domestic breed, of medium and small sizes, with a long silky and usually curly coat, long, soft, drooping ears, feathered tail and stern, of docile, timid, and affectionate disposition, much used for sporting purposes and as pets. The most usual colors are liver and white, red and white, or black and white, in broken or massed areas, sometimes deep brown or black on the face or breast, with a tan mark over the eye. Spaniels sport or are bred into many strains, and three classes of them are sometimes distinguished: *land-* or *field-spaniels*, including the cocker and springer; *water-spaniels*; and *toy spaniels*, as the King Charles and the Blenheim. The English spaniel is a superior and very pure breed; and, although the name *spaniel* would seem to indicate a Spanish origin, it is most probably indigenous. This dog was used in the days of falconry to start the game. The King Charles is a small black-and-tan variety of the spaniel; the Blenheim is similar, but white marked with red or yellow; both should have a rounded head with short muzzle, full eyes, and well-fringed ears and feet. The Maltese dog and the lion-dog are also small toy spaniels, used as lap-dogs. The water-spaniels, large and small, differ from the common spaniel in the roughness of their coats, and in uniting the aquatic propensities of the Newfoundland dog with the fine hunting qualities of their own race. Leading strains of the springers are the Clumber, Norfolk, and Sussex, in different colors.

2. Figuratively, a mean, cringing, fawning person; a blindly submissive follower: from the characteristics of the spaniel in relation to its master, or when in a state of fear.

He, unhappy man! whom your advancement
Hath ruin'd by being *spaniel* to your fortunes,
Will curse he train'd me hither. *Ford*, Fancies, iii. 3.

II. *a.* Like a spaniel; fawningly submissive; mean; servile; cringing.

Low-crooked court'sies, and base *spaniel*-fawning.
Shak., J. C., iii. 1. 43.

spaniel (span′yel or span′el), *v.* [< *spaniel*, *n.*] **I.** *intrans.* To fawn; cringe; be obsequious.

Largess his hands could never skill of *sparefulness*.
Sir P. Sidney, Arcadia, ii.

sparely (spār'li), *adv.* [< ME. *sparliche* (= MHG. *sperliche*); < *spare*[1] + *-ly*[2].] Sparingly; scantily; thinly; leanly.

Ye valleys low, . . .
On whose fresh lap the swart-star *sparely* looks.
Milton, Lycidas, l. 138.

spareness (spār'nes), *n.* [Cf. AS. *spærnes*, frugality.] The state of being spare, lean, or thin; ★leanness.

sparer (spār'ėr), *n.* [< ME. *sparare*; < *spare*[1], *v.*, + *-er*[1].] One who spares, or avoids unnecessary expense; a frugal spender. [Rare.]

By nature far from profusion, and yet a greater *sparer* than a saver. *Sir H. Wotton.*

sparerib (spār'rib), *n.* [Formerly also *spear-rib*; < *spare*[1] + *rib*[1].] A cut of pork consisting of the upper part of a row of ribs with the meat adhering to them. Sparerib roasted or broiled is esteemed a delicacy.

Sparganium (spär-gā'ni-um), *n.* [NL. (Tournefort, 1700), < L. *sparganion*, < Gr. σπαργάνιον, a plant, bur-reed, so called from the ribbon-like leaves, dim. of σπάργανον, a fillet, a swaddling-band, < σπαργεῖν, swathe.] A genus of monocotyledonous plants, type and only genus of the family *Sparganiaceæ*. It is characterized by flowers in heads in the axils of leaf-like bracts, hyaline scales of the perianth, oblong or wedge-shaped anthers, and sessile ovary. There are about 10 species, natives of both hemispheres. Five polymorphous species occur in the northeastern United States. They are aquatic herbs, sending up from

Bur-reed (*Sparganium curycarpum*).
1. Flowering plant. 2. Part of the inflorescence, showing the globular female head.

slender rootstocks erect or floating smooth spongy stems, and alternate entire linear leaves, usually with a sheathing base, stiffly ascending at a wide angle with the stem (whence they were formerly called *reed-grass*). The flowers form globular heads, the upper staminate, the lower pistillate, in fruit becoming spherical compact bur-like bodies composed of many sharp-pointed spongy nutlets (whence the popular name *bur-reed*). They are sometimes planted along the margin of water. The stems have been used to make paper, and the roots of *S. ramosum* and *S. simplex* were once in repute as a remedy for snake-bites.

sparganosis (spär-ga-nō′sis), *n.* [NL., as if < Gr. σπαργάνωσις, wrapping in swaddling-clothes (see *Sparganium*); prop. *spargosis*, < Gr. σπάργωσις, a swelling, distention: see *spargosis*.] Same as *spargosis*.

sparge (spärj), *v. t.*; pret. and pp. *sparged*, ppr. *sparging*. [Sc. *spairge;* < L. *spargere*, strew, sprinkle; cf. *asperge*, *asperse*, *disperse*, etc.] **1.** To sprinkle; scatter.

> Wha in yon cavern, grim and sootie,
> Closed under hatches,
> *Spairges* about the brunstane cootie.
> *Burns*, Address to the De'il.

2. To throw water upon in a shower of small drops. See *sparger*.

spargefaction† (spär-jē-fak′shon), *n.* [< L. *spargere*, strew, sprinkle, + *factio(n-)*, < *facere*, do, make.] The act of sprinkling. *Swift*, Tale of a Tub, iv.

sparger (spär′jèr), *n.* [< *sparge* + *-er*[1].] **1.** A sprinkler; usually, a cup with a perforated lid, or a pipe with a perforated nozle, used for damping paper, clothes, etc.—**2.** In *brewing*, a perforated cylinder, or a series of disks, for discharging hot water in a fine shower over grain falling into a mash-tub.

spargett, spargeting†. Same as *parget, pargeting*.

spargosis (spär-gō′sis), *n.* [NL., < Gr. σπάργωσις, a swelling, distention, < σπαργᾶν, be full to bursting, swell.] In *pathol.*: (*a*) Distention of the breasts with milk. (*b*) Same as *pachydermia*. Also *sparganosis*.

sparhawk (spär′hâk), *n.* A contracted form of *sparrow-hawk*. *Chaucer*, Parliament of Fowls, l. 338.

Sparidæ (spar′i-dē), *n. pl.* [NL., < *Sparus* + *-idæ*.] A family of acanthopterygian fishes, typified by the genus *Sparus*, to which different limits have been assigned; the sea-breams. (*a*) In the early system of Bonaparte, same as Cuvier's fourth family of acanthopterygian fishes (*Sparoides*), which included, besides the true *Sparidæ*, many other fishes. (*b*) In Günther's system, a family of *Acanthopterygii perciformes*, having ventrals perfect, no bony stay for the preoperculum, a lateral line, and either a series of trenchant teeth in the jaws or molars on the sides. (*c*) In Jordan and Gilbert's classification, acanthopterygian fishes of the ordinary type with the supramaxillary bones slipping under the preorbital. It thus included not only the true *Sparidæ*, but the *Pristopomidæ*, *Lutjanidæ*, *Pimelepteridæ*, and *Lobotidæ*. (*d*) By Gill restricted to fishes of an oblong compressed form with peculiar scales, continuous lateral line, head compressed, supramaxillary bones retractile under the suborbitals, dorsal with the spinous part depressible in a groove and about as long as the soft part, pectorals with lower rays branched, and ventrals subbrachial and complete. The family thus limited comprises numerous species, among which are some of the most esteemed of the temperate seas, such as the giltheads of Europe, and the sheepshead and scup of the eastern American coast. Also *Sparoidæ*. See cuts under *Pimelepterus*, *porgy*, *Scorpis*, *scup*, and *sheepshead*.

sparidal (spar′i-dal), *a.* Same as *sparoid*.

Sparinæ (spā-rī′nē), *n. pl.* [NL., < *Sparus* + *-inæ*.] A subfamily of sparoid fishes, typified by the genus *Sparus*, to which various limits have been assigned. (*a*) The genera *Sparus*, *Sargus*, and *Charax*: the *Sparini* of Bonaparte. (*b*) By Jordan and Gilbert used for sparoids having molar teeth on the sides of the jaws, none on vomer, palatines, or tongue, entire opercle, and few pyloric cæca, including *Sparus*, *Sargus*, or *Diplodus*, and various other genera.

sparine (spar′in), *a.* and *n.* [< *sparus* + *-ine*[1].] **I.** *a.* Sparoid, in a narrow sense; closely resembling a sparus; belonging to the *Sparinæ*.

II. *n.* A sparoid fish of the subfamily *Sparinæ*.

sparing (spär′ing), *n.* [< ME. *sparynge;* verbal n. of *spare*[1], *v.*] **1.** Parsimony.

> *Sparynge.* Parcimonia. *Prompt. Parv.*, p. 467.

2. *pl.* That which is saved by frugality or economy; savings. [Rare.]

> The *sparings* of the whole week which have not been laid out for chances in the lottery are spent for this evening's amusement. *Howells*, Venetian Life, v.

3†. The state of being spared from harm or death.

> If the Lord give you *sparing* to-morrow, let me hear four words of comfort from you for God's sake.
> *J. Careless*, in Bradford's Letters (Parker Soc., 1853), II. 241.

sparing (spär′ing), *p. a.* [Ppr. of *spare*[1], *v.*] **1.** Inclined to spare or save; economical; frugal; chary; grudging.

> Too near and *sparing* for a soldier,
> Too gripping, and too greedy.
> *Fletcher* (*and another*?), Prophetess, i. 2.
>
> Defer not to do Justice, or be *sparing* of Mercy.
> *Baker*, Chronicles, p. 166.

2. Of a spare amount, quantity, or extent; not abundant or lavish; limited; scanty; restrained: as, a *sparing* diet; *sparing* applause.

> The use of confutation in the delivery of sciences ought to be very *sparing*. *Bacon*, Advancement of Learning, ii.

3†. Inclined to spare from harm or hardship; not oppressive; forbearing.

> Their king . . . was *sparing* and compassionate towards his subjects. *Bacon.*

sparingly (spär′ing-li), *adv.* In a sparing manner; with frugality, moderation, scantiness, reserve, forbearance, or the like; sparsely.

> Touch this *sparingly*, as 'twere far off.
> *Shak.*, Rich. III., iii. 5. 93.

sparingness (spär′ing-nes), *n.* The character of being sparing or inclined to spare; especially, frugality, scantiness, or the like: as, the *sparingness* of one's diet.

> A year afterward he entered the ministry again, and lived with the utmost *sparingness*.
> *George Eliot*, Felix Holt, vi.

★**spark**[1] (spärk), *n.* [< ME. *sparke, sperke, sparc, spærc, spearke,* < AS. *spearca, spærca* = MD. *sparcke, spercke*, D. *spark* = MLG. LG. *sparke* (> OF. *esparque*), a spark; perhaps so called from the crackling of a firebrand: cf. Icel. Sw. *spraka* = Dan. *sprage*, crackle, Lith. *spragėti*, crackle, Gr. σφάραγος, a crackling, Skt. √ *sphūrj*, rumble.] **1.** A particle of ignited substance emitted from a body in combustion; a fiery particle thrown off by burning wood, powder, etc., or by friction, as from flint and steel.

> He muhte . . . blowen so litheliche thet sum *sperke* muhte acwikien. *Ancren Riwle*, p. 96.
>
> Man is born unto trouble, as the *sparks* fly upward.
> Job v. 7.

Hence—**2.** A scintillating or flying emanation, literally or figuratively; anything resembling a spark of fire: as, *sparks* from a gem; a *spark* of wit.

> To try if it were possible to get a *spark* of human spirit out of you. *Scott*, Woodstock, v.
>
> For all the haft twinkled with diamond *sparks*.
> *Tennyson*, Passing of Arthur.

3. A small diamond used with many others to form a setting or frame, as to a cameo or a miniature painting; also, a distinct crystal of diamond with the natural curved edges, suitable for glaziers' use.

> This madonna invites me to a banquet for my discourse, t'other . . . sends me a *spark*, a third a ruby, a fourth an emerald. *Shirley*, Bird in a Cage, ii. 1.
>
> These writing diamonds are *sparks* set in steel tubes much like everpoint pencils. *Lea*, Photography, p. 427.

4. A separate bit or particle of fire or burning matter in an otherwise inert body or mass; hence, a bit of anything, material or immaterial, comparable to this in its nuclear character or possible extension of activity.

> If any *spark* of life be unquench'd in her,
> This will recover her.
> *Beau. and Fl.*, Knight of Malta, iii. 2.
>
> If the true *spark* of religious and civil liberty be kindled, it will burn.
> *D. Webster*, Speech, Bunker Hill Monument, June 17, 1825.

Electric spark, the luminous effect produced when a sudden disruptive electrical discharge takes place between two charged conductors, or between two conductors at different electric potentials. The length of the spark depends primarily upon the difference of potential of the two charged bodies; it is hence in general a conspicuous phenomenon with high potential frictional electricity, and not with ordinary voltaic currents. See *electricity*.—**Fairy sparks.** See *fairy*.

spark[1] (spärk), *v.* [< ME. *sparken*, < AS. *spearcian* = MLG. LG. *sparken*, emit sparks; from the noun: see *spark*[1], *n.*] **I.** *intrans.* **1.** To emit sparks, as of fire or electricity; sparkle or scintillate. *Spenser.*—**2.** In *elect.*, to produce sparks at points where the continuity of the circuit is interrupted. The production of sparks is due to the formation of a small arc between the extremities of the broken conductor, and also to self-induction in the circuit. Sparking often takes place between the collecting brushes and the commutator of the dynamo. It is injurious to the machine, aside from the actual dissipation of energy which it involves. It also occurs to an injurious degree in other electrical apparatus in which currents are frequently interrupted. Various measures are resorted to for the purpose of reducing it to a minimum or avoiding it altogether. See *spark-arrester*, 3.

> There is no *sparking* at the brushes.
> *S. P. Thompson*, Dynamo-Elect. Mach., p. 113.

II. *trans.* **1.** To affect by sparks, as of electricity; act upon by the emission or transmission of sparks. [Recent.]

> The insulation is apt to be *sparked* through and spoiled.
> *Elect. Rev.* (Eng.), XXIV. 550.
>
> Whenever a large Leyden jar is *sparked* through the coil. *Philos. Mag.*, XXVII. 339.

2. To splash with dirt. *Halliwell.* [Prov. Eng. or Scotch.]

spark[2] (spärk), *n.* [Usually associated with *spark*[1], *sparkish*, *sparkling*, etc., but perhaps a var. of *sprack* (cf. ME. *sparklich*, var. of *sprackliche*), < Icel. *sparkr*, usually transposed *sprækr*, sprightly: see *sprack*.] **1.** A person of a gay or sprightly character; a gay, lively, showy man (or, rarely, in former use, woman); a "blade" or roysterer.

> Robbin Hood upon him set
> With his couragious *sparkes*.
> *True Tale of Robin Hood* (Child's Ballads, V. 358).
>
> I will wed thee
> To my great widdowes daughter and sole heire,
> The louely *sparke*, the bright Laodice.
> *Chapman*, Widdowes Teares, i. (*Davies.*)
>
> Their worthy father . . . was, at his years, nearly as wild a *spark*. *Sheridan*, School for Scandal, i. 2.

2. A lover; a gallant; a beau. [Colloq.]

> Fly to your *spark;* he'll tell you more of the matter.
> *Goldsmith*, She Stoops to Conquer, iii.

spark[2] (spärk), *v.* [< *spark*[2], *n.*] **I.** *intrans.* To play the spark or gallant; court. [Colloq.]

> A sure sign that his master was courting, or, as it is termed, *sparking*, within. *Irving*, Sketch-Book, p. 432.
>
> The boys that do a good deal of *sparking* and the girls that have a lot of beaux don't always get married first.
> *E. Eggleston*, The Graysons, xxxiii.

II. *trans.* To pay attention to, especially with a view to marriage; court; play the gallant to, in a general sense: as, he is *sparking* Miss Doe; to *spark* a girl home. [Colloq.]

★**spark-arrester** (spärk′a-res″tèr), *n.* **1.** A fender of wire netting.—**2.** A netting or cage of wire placed over the smoke-stack of a steam-engine. In some arresters a deflector is placed in the stack, against which the sparks strike, and fall into a reservoir below. Also called *spark-consumer*.

3. A device for preventing injurious sparking in electrical apparatus at points where frequent interruptions of the circuit occur, as in telegraph-keys, relays, and similar instruments. It consists in some cases of a spark-coil or high-resistance connection across the point of interruption, so that the circuit is never actually broken, but only greatly reduced. In others it is a condenser whose plates are connected each with one extremity of the broken circuit. In this case the energy of the current induced on breaking is expended in charging the condenser. Also *sparker*.

★**spark-coil** (spärk′koil), *n.* See *spark-arrester*, 3.

spark-condenser (spärk′kon-den″sèr), *n.* In *elect.*, an instrument having a glass cage in which a spark may be passed between the battery connections. It is used for burning metals or obtaining the spectra of gases, and is designed to isolate the atmosphere in which the experiment is conducted, so as to eliminate accidental disturbing causes, and also to enable the experiment to take place in an atmosphere of any required condensation or tenuity.

spark-consumer (spärk′kon-sū″mèr), *n.* In a steam-engine, a spark-arrester.

sparked (spärkt), *a.* [< *spark*[1] + *-ed*[2].] Variegated. *Halliwell.* [Prov. Eng.]

sparked-back (spärkt′bak), *a.* Having a streaked or variegated back; streaked-back: as, the *sparked-back* plover, the turnstone. [Local, Massachusetts.]

sparker (spär′kèr), *n.* [< *spark*[1] + *-er*[1].] Same as *spark-arrester*, 3.

sparkful† (spärk′fûl), *a.* [< *spark*[1] + *-ful*.] Sparkish.

> Hitherto will our *sparkefull* youth laugh at their great grandfather's English. *Camden*, Remains, Languages.

sparkish (spär′kish), *a.* [< *spark*[1] + *-ish*[1]. Cf. *spark*[2].] Gay; jaunty; sprightly; showy; fine.

> I have been detained by a *sparkish* coxcomb, who pretended a visit to me. *Wycherley*, Country Wife, iv. 2.
>
> A daw, to be *sparkish*, trick'd himself up with all the gay feathers he could muster. *Sir R. L'Estrange.*

★**sparkle** (spär′kl), *v.*; pret. and pp. *sparkled*, ppr. *sparkling*. [Early mod. E. also *sparcle, sparckle;* < ME. *sparklen, spearclen, sperclen* (= MD. *sparckelen*); freq. of *spark*[1]. Cf. *sparkle*, *n.*] **I.** *intrans.* **1.** To emit sparks; send off small ignited particles, as burning fuel, etc.—**2.** To shine as if giving out sparks; glitter; glisten; scintillate, literally or figuratively: as, a brilliant *sparkles;* a *sparkling* beauty; *sparkling* wit.

> The Sea seemed all of a Fire about us; for every sea that broke *sparkled* like Lightning.
> *Dampier*, Voyages, I. 414.
>
> The rosy sky,
> With one star *sparkling* through it like an eye.
> *Byron*, Don Juan, ii. 183.

Sparkling heat, such a heat as produces sparks; especially, a degree of heat in a piece of iron or steel that causes it to sparkle or emit sparks under the hammer; a welding-heat.—**Sparkling wine,** wine characterized by the presence or the emission of carbonic-acid gas in little bubbles which sparkle or glisten in the light.=**Syn. 1** and **2.** *Scintillate, Glitter,* etc. (see *glare*[1], *v. i.*), coruscate.

II. *trans.* **1.** To emit with coruscations; throw out sparklingly.

> The bright glister of their beames cleare
> Did *sparckle* forth great light.
> *Spenser,* F. Q., III. i. 32.

2. To scatter; disperse. [Obsolete or prov. Eng.]

> The riches of Darius was left alone, and lay *sparkled* abroade ouer all the fields.
> *J. Brende,* tr. of Quintus Curtius, iii. 43.

3†. To sprinkle; spatter.

> The pauement of the temple is all *sparcled* with bludde.
> *Peter Martyr* (tr. in Eden's First Books on America, [ed. Arber, p. 196).

sparkle (spär'kl), *n.* [< ME. *sparkle, sparcle,* with dim. *-le, -el,* < *spark*[1]; or < *sparkle, v.*] **1.** A spark; an ignited or a luminous particle, or something comparable to it; a scintillation; a gleam.

> Foure gleedes han we, whiche I shal devyse,
> Avaunting, liyng, anger, coveitise,
> Thise foure *sparkles* longen unto elde.
> *Chaucer,* Prol. to Reeve's Tale, l. 31.

> And drove his heel into the smoulder'd log,
> That sent a blast of *sparkles* up the flue.
> *Tennyson,* Morte d'Arthur.

2. The act or state of sparkling; emission of sparks or scintillations; sparkling luminosity or luster: used literally or figuratively.

> Swift as the *sparkle* of a glancing star
> I shoot from heaven, to give him safe convoy.
> *Milton,* Comus, l. 80.

> A zest and *sparkle* ran through every part of the paper.
> *G. S. Merriam,* S. Bowles, II. 359.

sparkleberry (spär'kl-ber$''$i), *n.* Same as *farkleberry.*

sparkler (spärk'lėr), *n.* [< *sparkle* + *-er*[1].] **1.** A thing which or a person who sparkles; that which or one who gives off scintillations, as of light, beauty, or wit: often applied specifically to gems, especially the diamond.

> But what would you say, should you see a *Sparkler* shaking her elbow for a whole night together, and thumping the table with a dice-box? *Addison,* Guardian, No. 120.

> It [Mercury] keeps so near the sun . . . that very few people have ever seen the brilliant *sparkler.*
> *H. W. Warren,* Astronomy, p. 113.

2. One of various species of tiger-beetles (*Cicindela*): so called in allusion to their shining or sparkling appearance when running in the sunshine. See cuts under *Cicindela.*

sparkless (spärk'les), *a.* [< *spark*[1] + *-less.*] Free from sparks; not emitting sparks: as, a *sparkless* commutator. *Electric Review* (Eng.), XXVI. 203.

sparklessly (spärk'les-li), *adv.* Without the emission of sparks.

sparklet (spärk'let), *n.* [< *spark*[1] + *-let.*] A small spark, or minute sparkle; a scintillating speck. [Rare.]

sparkliness† (spärk'li-nes), *n.* Sparklingness; sparkling vivacity. *Aubrey,* Lives (John Suckling).

sparklingly (spärk'ling-li), *adv.* In a sparkling manner; with twinkling or vivid brilliancy.

sparklingness (spärk'ling-nes), *n.* The quality of being sparkling; vivid and twinkling luster.

spark-netting (spärk'net$''$ing), *n.* A spark-arrester or spark-consumer.

sparling[1] (spär'ling), *n.* [Also *sperling, spirling, sporling, spurling;* < ME. *sparlynge, sperlyng, sperlynge, spyrlynge* = MLG. *sperlink* = G. *spierling* (> OF. *esperlanc, esperlan,* F. *éperlan;* ML. *sperlingus*), a smelt; cf. D. *spiering,* a smelt.] **1.** A smelt. [Prov. Eng.]

> For sprats and *spurlings* for your house.
> *Tusser,* Husbandry.

2. A samlet; a smolt. [Wales.]

sparling[2] (spär'ling), *n.* [Also *spurling;* < *spear*[1] + *-ling,* from the sharp, picked bill.] A tern or sea-swallow. [Prov. Eng.]

sparling-fowl (spär'ling-foul), *n.* The goosander or merganser, especially the female. *J. Latham.*

sparliret, *n.* [ME., also *sparlyre, sperlire, sparlyuer, sperlyuer,* the calf of the leg, a muscle, < AS. *spærlira, sperlira, spearlira,* < *spær,* spare, + *lira,* fleshy part of the body without fat or bone: see *spare*[1] and *lire*[2].] The calf of the leg.

> Smyit thee the Lord with the moost yuel biel in knees, and in *sparlyuers,* *Wyclif,* Deut. xxviii. 35.

spar-maker (spär'mā$''$kėr), *n.* A carpenter whose special business is the making of masts, yards, etc.

Sparmannia (spär-man'i-ạ), *n.* [NL. (Linnæus filius, 1781), named after Andreas *Sparmann* or *Sparrmann,* a Swedish naturalist of the 18th century.] An untenable name for *Vossianthus,* a genus of plants of the family *Tiliaceæ,* the linden family. It is characterized by the outer stamens being without anthers, the numerous inner ones perfect, and by a globose or ovoid capsule which is echinate with rigid bristles. There are three species, natives of tropical or southern Africa. They are shrubs or trees with soft stellate pubescence, bearing toothed or lobed heart-shaped leaves and white flowers in small terminal umbelliform cymes which are surrounded by an involucre of short bracts. *Vossianthus Africanus* (*Sparmannia Africana* of Linnæus filius) is a handsome greenhouse-shrub reaching from 6 to 12 feet high, with ornamental long-stalked leaves and downy white flowers with yellow and brown sterile stamens. It produces a fiber of very fine texture, known as *African hemp.*

sparoid (spā'roid), *a.* and *n.* [< NL. *Sparus* + *-oid.*] **I.** *a.* Resembling a sea-bream; of or pertaining to the *Sparidæ* in a broad sense. Also *sparidal.*—**Sparoid scales,** scales characteristic of sparoid fishes—thin, wide, with lines of growth proceeding from their hind border. *Agassiz.*

II. *n.* A sparoid fish.

Sparoidæ (spạ-roi'dē), *n. pl.* [NL.] Same as *Sparidæ.*

sparplet (spär'pl), *v. t.* [Also *sparble;* < ME. *sparplen, sparpyllen,* < OF. *esparpeiller,* F. *éparpiller,* scatter, fly off like a butterfly,=Pr. *esparpalhar* = It. *sparpagliare,* scatter, fly off like a butterfly. Cf. *disparple.*] To scatter; spread abroad; disperse.

> Thei made the renges to *sparble* a-brode.
> *Merlin* (E. E. T. S.), iii. 396.

sparret, *n.* and *v.* An obsolete form of *spar*[1].

sparrer (spär'ėr), *n.* One who spars; one who practises boxing. *Thackeray,* Adventures of Philip, vii. ★

sparrow (spar'ō), *n.* [< ME. *sparowe, sparuwe, sparewe, sparwe,* < AS. *spearwa, spearewa,* in early glosses *spearua,* = OHG. *sparo* (*sparw-*), *sparwe,* MHG. *spar* (MHG. dim. *sperlinc, sperling*) = Icel. *spörr* = Sw. *sparf* = Dan. *spurv* = Goth. *sparwa,* a sparrow; prob. from the root of *spur, spurn,* 'kick, quiver': see *spur.* Cf. MD. *sparwer, sperwer,* D. *sperwer* = MLG. *sparwer, sperwer* = OHG. *sparwari, sparwāri,* MHG. *sperwære, sparwære,* G. *sperber* (cf. It. *sparviere, sparaviere* = Pr. *esparvier* = OF. *espervier,* F. *épervier,* in ML. *sparvarius, sparaverius, esparvarius,* < OHG., cf. Sp. *esparaván*), a sparrow-hawk, lit. 'sparrow-eagle,' the second element being OHG. *aro* (in comp. *-ari*), eagle: see *earn*[3]. Cf. *sparver, spavin.*] **1.** The house-sparrow, *Passer domesticus,* a fringilline bird of Europe, which has been imported and naturalized in America, Australia, and other countries. It is about 6 inches long and 9¼ in extent of wings. The upper parts of the male are ashy-gray, boldly streaked on the back with black and bay; there is a dark-chestnut or mahogany spot on each side of the neck; the lesser wing-coverts are chestnut; the median are tipped with white, forming a wing-bar; the greater coverts and inner secondaries have a black field bordered with gray; and the lower parts are ashy or gray, with jet-black on the throat, spreading on the breast, and bordered on the side of the neck with white. The female is similar, but more plainly feathered, lacking the distinctive head-markings of the male. The sparrow is a conirostral granivorous bird, whose food is principally seeds and grain, yet it has been introduced in many countries for the purpose of destroying noxious insects. It is extremely hardy, pugnacious, and prolific, rearing several large broods annually. Of all birds the sparrow naturally attaches itself most closely to man, and easily modifies its habits to suit artificial conditions of environment. It is thus one of several animals, as rats, mice, and other vermin, well fitted to survive under whatever conditions man may offer or enforce; hence it wins in competition with the native birds of the foreign countries where it naturalizes, without as readily developing counteractive agencies to check its increase. It speedily becomes a pest wherever introduced, and seldom destroys noxious insects to any appreciable extent. It was brought into the United States from Germany about 1869, and is now probably more numerous than any single native bird. In New York city thousands of sparrows are sold and eaten as reed-birds. See cut under *Passer*[2].

2. Some or any fringilline bird resembling the sparrow, as *Passer montanus,* the tree-sparrow; one of various finches and buntings, mostly of plain coloration. In the United States the name is given, with a qualifying word, to very many small sparrow-like birds, mostly of homely streaked coloration. Chipping- or field-sparrows belong to the genus *Spizella;* crown-sparrows to *Zonotrichia;* fox-sparrows to *Passerella;* grasshopper-sparrows to *Coturniculus;* the grass-sparrow to *Poœcetes;* the lark-sparrow to *Chondestes;* sage-sparrows to *Amphispiza;* savanna-sparrows to *Passerculus;* seaside sparrows to *Ammodromus;* snow-sparrows to *Junco;* song-sparrows to *Melospiza.* See cuts under *Chondestes, Coturniculus, Embernagra, field-sparrow, grassfinch, sage-sparrow, savanna-sparrow, snowbird,* and *song-sparrow.*

3. Some little bird likened to or mistaken for a sparrow. Thus, the hedge-sparrow is the hedge-chanter, *Accentor modularis,* and some other warblers are loosely called *sparrows.*—**Bush-sparrow,** the hedge-sparrow, *Accentor modularis.*—**English sparrow,** the common European house-sparrow, *Passer domesticus:* so called in the United States. See def. 1. — **Green-tailed sparrow,** Blanding's finch. See *finch*[1].—**Java sparrow,** the rice-bird of Java, *Amadina* (*Munia* or *Padda*) *oryzivora,* about as large as the bobolink, of a bluish-gray color with pink bill and white ear-coverts: a well-known cage-bird. — **Sandwich sparrow,** a variety of the common savanna-sparrow found in Alaska. — **White-throated sparrow,** a crown-sparrow. (See also *field-sparrow, hedge-sparrow, hill-sparrow, house sparrow, reed-sparrow, satin-sparrow, water-sparrow,* and other compounds noted in def. 2.)

Java Sparrow (*Padda oryzivora*).

sparrow-bill (spar'ō-bil), *n.* **1.** The bill of a sparrow.—**2.** A kind of shoe-nail: the original form of *sparable.*

> Hob-nailes to serve the man i' th' moone,
> And *sparrowbils* to cloute Pan's shoone.
> *Dekker,* Londons Tempe.

sparrowbolt (spar'ō-bl), *n.* Same as *sparrow-bill,* 2, *sparable.*

sparrow-grass (spar'ō-gràs), *n.* [A corruption, simulating *sparrow* + *grass,* of *sparagrass,* itself a corruption of *sparagus* for *asparagus.*] Asparagus. [Prov. or vulgar.]—**French sparrow-grass,** the sprouts of the spiked star-of-Bethlehem, *Ornithogalum Pyrenaicum,* sold to be eaten as asparagus. *Prior,* Popular Names of British Plants. [Prov. Eng.]

sparrow-hawk (spar'ō-hâk), *n.* [Also contr. *sparhawk;* < ME. *spar-hauk, sperhauk,* < AS. *spearhafoc, spearhabuc, spærhabuc* (= Icel. *sparrhaukr* = Sw. *sparfhök* = Dan. *spurvehög*), < *spearwa,* sparrow, + *hafoc,* hawk: see *sparrow* and *hawk*[1]. For the D., G., and Rom. names for 'sparrow-hawk,' see under *sparrow.*] **1.** One of several small hawks which prey on sparrows and other small birds. (*a*) A hawk of the genus *Accipiter* or *Nisus.* In Great Britain the name is appropriated to *A. nisus,* or *Nisus fringillarius* about 12 inches long, closely related to the sharp-shinned hawk of America. (*b*) In the United States, a hawk of the genus *Falco* and subgenus *Tinnunculus,* especially *F. (T.) sparverius,* which abounds in nearly all parts of the country, and is known in books as the *rusty-crowned falcon* and *prairie-hawk.* It is 10 or 11 inches long, and from 20 to 23 in extent of wings. The adult is ashy-blue on the crown, with a chestnut spot; on the back cinnamon-rufous, the male having few black marks or none, and the female numerous black bars. The wing-coverts in the male are ashy-blue, usually spotted with black; in the female cinnamon barred with black. The tail is bright-chestnut, in the male with a broad subterminal black band, and the outer feathers mostly white with black bars; in the female barred throughout with black. The under parts are white, variously tinted with buff or tawny, in the male with few black spots if any; in the female with many dark-brown stripes. The bill is dark horn-blue; the cere and feet are yellow or orange. It is an elegant and spirited falcon, breeding in hollows of trees, building no nest, but often taking possession of a woodpecker's hole. The female lays five, six, or seven

subspheroidal eggs, 1¼ inches long by 1⅛ inches broad, of a buffy or pale-yellowish ground-color, spotted and splashed all over with dark brown. Several similar sparrow-hawks inhabit America, and various other species, of both the genera named, are found in most parts of the world.

2. In *silver-working*, a small anvil with two horns (one flat-sided and pyramidal, the other conical in form), held between the knees of the workman, for use in flanging, making bezels, etc.

sparrow-owl (spar'ō-oul), *n.* Any one of many small owls of the genus *Glaucidium*. Two occur in western parts of the United States, *G. gnoma*, the gnome-owl, and *G. ferrugineum*. See cut under *Glaucidium*.

sparrow-tail (spar'ō-tāl), *n.* and *a.* **I.** *n.* Something formed like a sparrow's tail; a swallow-tail.

These long-tailed coats [in 1786] . . . were cut away in front to a *sparrow-tail* behind. *Fairholt*, Costume, I. 401.

II. *a.* Having a long skirt cut away at the sides and squared off at the end: as, a *sparrow-tail* coat (now usually called *swallow-tail*).

The lawyers in their blue *sparrow-tail* coats with brass buttons, which constituted then [about 1840] a kind of professional uniform, moved about with as much animation as uneasy jay-birds. *E. Eggleston*, The Graysons, xxvi.

sparrow-tongue† (spar'ō-tung), *n.* The knot-grass, *Polygonum aviculare*.

sparrowwort (spar'ō-wėrt), *n.* 1. Any plant of the genus *Passerina*.—2. A South African species of heath, *Erica Passerinæ*.

sparry (spär'i), *a.* [< *spar*[2] + *-y*[1].] Resembling spar; consisting of or abounding with spar; spathose.

As the rude cavern's *sparry* sides
When past the miner's taper glides. *J. Baillie.*

The rock . . . is a *sparry* iron ore, which turns reddish brown on exposure to the weather.
J. Croll, Climate and Time, p. 308.

Sparry iron, sparry iron ore, a carbonate of iron: same as *siderite*, 2. The clay-ironstones, or the clay-bands and black-bands of the coal and other formations, belong to this family of iron ores.

sparsate (spär'sāt), *a.* [< *sparse* + *-ate*[1].] In *entom.*, thinly scattered; sparse: as, *sparsate* punctures. [Rare.]

sparse (spärs), *a.* [< OF. *espars*, F. *épars* = Pg. *esparso*, scattered, < L. *sparsus*, pp. of *spargere*, scatter, sprinkle (> It. *spargere* = Sp. *esparcir* = Pg. *espargir*, scatter): see *sparge*. Cf. *sparse*, *v.*, *sperse*, *disperse*.] 1. Thinly scattered; dispersed round about; existing at considerable intervals; as used of population or the like, not dense. [*Sparse* has been regarded, falsely, as an Americanism, and has been objected to as being exactly equivalent to *scattered*, and therefore unnecessary. As a merely qualifying adjective, however, it is free from the possible ambiguity inherent in the participial form and consequent verbal implication of *scattered*.]

A *sparse* remnant of yellow leaves falling slowly athwart the dark evergreens. *George Eliot*, Middlemarch, ix.

The *sparse* populations of new districts.
Sir C. W. Dilke, Probs. of Greater Britain, ii. 1.

Halley . . . was one of the first to discuss the possible luminosity of *sparse* masses of matter in space.
Nineteenth Century, XXVI. 788.

2. In *bot.*, scattered; placed distantly or irregularly without any apparent or regular order: applied to branches, leaves, peduncles, etc.—3. In *zoöl.*, spare or remote, as spots or other markings; scattered irregularly; few or scanty, as hairs or other appendages.

sparse† (spärs), *v. t.* [< OF. *esparser*, *esparcer*, < L. *sparsus*, pp. of *spargere*, scatter: see *sparse*, *a.* Cf. *sperse*, *disperse*, *sparge*.] To disperse; scatter.

As when the hollow flood of aire in Zephires checks doth swell,
And *sparseth* all the gathered clouds.
Chapman, Iliad, xi. 268.

He [God] opens his hand wide, he *sparseth* abroad his blessings, and fills all things living with his plenteousness. *Rev. T. Adams*, Works, II. 418.

sparsedly† (spär'sed-li), *adv.* In a scattered manner; dispersedly; sparsely. *Imp. Dict.*

sparsely (spärs'li), *adv.* 1. In a scattered or sparse manner; scantily; widely apart, as regards population, etc.; thinly.

The country between Trinity river and the Mississippi is *sparsely* settled, containing less than one inhabitant to the square mile. *Olmsted*, Texas, p. 365.

2. In *bot.* and *zoöl.*, so as to be sparse, thin, few, or scanty; sparely or sparingly. See *sparse*, *a.*, 2, 3.

sparseness (spärs'nes), *n.* The state of being sparse; scattered condition; wide separation: as, *sparseness* of population.

The *sparseness* of the wires in the magnet coils and the use of the single cup battery were to me . . . obvious marks of defect. *The Century*, XXXV. 931.

sparsile (spär'sil), *a.* [< LL. *sparsilis*, < L. *sparsus*, pp. of *spargere*, scatter: see *sparse*.] Scattered; sparse.—**Sparsile star**, in *astron.*, a star not included in a constellation-figure.

sparsity (spär'si-ti), *n.* [< *sparse* + *-ity*.] The state of being sparse or scattered about; freedom from closeness or compactness; relative fewness.

At receptions where the *sparsity* of the company permits the lady of the house to be seen, she is commonly visible on a sofa, surrounded by visitors in a half-circle.
Howells, Venetian Life, xxi.

spart (spärt), *n.* [= F. *sparte* = Sp. Pg. *esparto* = It. *sparto*, < L. *spartum*, < Gr. σπάρτον, Spanish broom; a particular use of σπάρτον, a rope, cable; cf. σπάρτη, a rope. Cf. *esparto*.] 1†. A plant of the broom kind; broom.

The nature of *spart* or Spanish broome.
Holland, tr. of Pliny, bk. xix. (*Davies.*)

2. A rush, *Juncus articulatus*, and other species. [Prov. Eng.]

spartaite (spär'tā-īt), *n.* [< *Sparta* (see def.) + *-ite*[2].] A variety of calcite or calcium carbonate, containing some manganese. It is found in Sparta, Sterling Hill, New Jersey.

Spartan (spär'tan), *a.* and *n.* [< L. *Spartanus*, < *Sparta*, < Gr. Σπάρτη, Sparta, Lacedæmon.] **I.** *a.* 1. Of or pertaining to Sparta or Lacedæmon, the capital of Laconia, or the ancient kingdom of Sparta or Lacedæmon (Laconia), in the Peloponnesus; Lacedæmonian; specifically, belonging to the branch of the ancient Dorian race dominant in Laconia.—2. Noting characteristics distinctive of, or considered as distinctive of, the ancient Spartans.

Lycurgus . . . sent the Poet Thales from Creet to prepare and mollifie the *Spartan* surlinesse with his smooth songs and odes, the better to plant among them law and civility. *Milton*, Areopagitica.

Spartan dog, a bloodhound; hence, a cruel or bloodthirsty person.

O *Spartan dog*,
More fell than anguish, hunger, or the sea!
Shak., Othello, v. 2. 361.

II. *n.* A native or an inhabitant of Sparta or Laconia; a Lacedæmonian; specifically (as opposed to *Lacedæmonian* in a narrower sense), a member of that branch of the ancient Dorian race which conquered Laconia and established the kingdom of Sparta, celebrated for its military success and prestige, due to the rigid discipline enforced upon all Spartans from early childhood; a Spartiate.

Spartanism (spär'tan-izm), *n.* [< *Spartan* + *-ism*.] The distinguishing spirit or a characteristic practice or quality of the ancient Spartans. See *Spartan*.

sparteine (spär'tē-in), *n.* [< *Spart(ium)* + *-e-ine*.] A liquid alkaloid ($C_{15}H_{26}N_2$) obtained from the broom, *Cytisus* (*Spartium*) *scoparius*. In small doses (.02 to .05 gram) it stimulates the action of the vagus, and is used medicinally in the form of the sulphate in place of digitalis; it acts more quickly than the latter drug, but not as powerfully.

sparterie (spär'tėr-i), *n.* [< F. *sparterie*, < Sp. *espartería*, < *esparto*, Spanish grass, broom: see *esparto*, *spart*.] In *com.*, a collective name for articles manufactured from esparto and its fiber, as mats, nets, cordage, and ropes.

spart-grass (spärt'gras), *n.* Same as *spart*, 2; also, a cord-grass, *Spartina stricta*. *Britten and Holland*, Eng. Plant Names.

sparth†, *n.* [< ME. *sparth*, *sparthe*, *sperthe*, an ax, a battle-ax, < Icel. *spartha*, a kind of Irish ax; perhaps akin to *spear*.] A battle-ax, or perhaps in some cases a mace.

He hath a *sparth* of twenti pound of wighte.
Chaucer, Knight's Tale, l. 1662.

At his saddle-gerthe was a good steel *sperthe*,
Full ten pound weight and more.
Scott, Eve of St. John.

Spartiate (spär'ti-āt), *n.* [F., < L. *Spartiates*, < Gr. Σπαρτιάτης, a Spartan, < Σπάρτη, Sparta: see *Spartan*.] A citizen of Sparta; an ancient Laconian of the Dorian race. See *Spartan*.

Aristotle recognizes only one thousand families of the ancient *Spartiates;* and their landed possessions, the very groundwork of their state and its discipline, had in great measure passed into the hands of women.
Von Ranke, Univ. Hist. (trans.), p. 360.

Spartina (spär'ti-nä), *n.* [NL. (Von Schreber, 1789), so called from the tough leaves; < Gr. σπαρτίνη, a cord, < σπάρτη, σπάρτον, a rope or cord.] A genus of grasses, of the tribe *Chlorideæ*. It is characterized by flowers with three glumes and a thread-shaped two-cleft style, grouped in dense one-sided commonly numerous and divergent panicled spikes with the rachis prolonged beyond the uppermost spikelet. There are 7 species, natives mostly of salt-marshes; one, *S. stricta*, is widely dispersed along the shores of America, Europe, and Africa; four others are found in the United States, one in South America beyond the tropics, and one in the islands of Tristan da Cunha, St. Paul, and Amsterdam. They are rigid reed-like grasses rising from a tufted or creeping base, with scaly rootstocks, very smooth sheaths, and long convolute leaves sometimes flattened at the base. Book-names for the species are *marsh-grass*, *cord-grass*, and *salt-grass;* four of them are among the most conspicuous maritime grasses of the United States. *S. polystachya*, the largest species, a stately plant with a broad stiff panicle often of fifty spikes, is known locally on the coast as *creek-thatch* and *creek-stuff*, from its growth in creeks or inlets of salt water, and from its use, when cut, as a cover for stacks of salt-hay and as bedding in stables. (See also *salt reed-grass*, under *reed-grass*.) *S. cynosuroides* is the cord-grass of fresh-water lakes and rivers, smaller, attaining a height of about 6 feet; it occurs from the Atlantic westward, and in great quantities along the Mississippi; a superior brown wrapping-paper has been made from it. *S. patens*, a low turf-forming species with diminutive three- to five-forked inflorescence, sometimes called *rush salt-grass*, covers large tracts of salt-marsh on the Atlantic coast, is recommended for binding wet sands, and yields a tough fiber from its leaves. *S. stricta*, the salt-marsh grass, with very different inflorescence, bears its numerous branches rigidly appressed into a single long and slender erect spike, or sometimes two, when it is called *twin-spike grass*. It is said to be also used as a durable thatch; it is succulent and is eagerly eaten by cattle, imparting to their milk, butter, and flesh a strong rancid flavor locally known as a "thatchy" taste.

Spartium (spär'shi-um), *n.* [NL. (Linnæus, 1737), < L. *spartum*, *sparton*, < Gr. σπάρτος, Spanish broom: see *spart*, *esparto*.] A genus of leguminous plants, of the tribe *Genisteæ*, type of the subtribe *Spartieæ*. It is distinguished from the related genus *Genista* by a somewhat spathaceous calyx with very short teeth, by acuminate and incurved keel-petals, and by a narrower pod. The only species, *S. junceum*, is a native of the Mediterranean region and of the Canary Islands, known as *Spanish broom*, now naturalized in various parts of tropical America and long cultivated in gardens. It is a shrub with numerous long, straight, rush-like branches, which are green, polished, and round—not angular like the similar branches of the Irish broom. They are commonly without leaves; when these are present, they are composed each of a single leaflet and are without stipules. The handsome pea-like flowers form terminal racemes; they are yellow, fragrant, and highly attractive to bees, and are the source of a yellow dye. The branches are used to make baskets and fasten vines in vineyards; they yield by maceration a fiber which is made into cord and thread, and in Italy and Spain into cloth. The seeds in small doses are diuretic and tonic; in large, emetic and cathartic.

spartoi (spär'tō), *n.* Same as *esparto*.

spar-torpedo (spär'tôr-pē″dō), *n.* A torpedo secured to the end of a spar, rigged outboard of a vessel, and arranged to be fired on coming into contact with another vessel. Sometimes called *pole-torpedo*.

Sparus (spā'rus), *n.* [NL. (Linnæus, 1766), < L. *sparus*, < Gr. σπάρος, a kind of fish, the gilthead.] 1. The name-giving genus of *Sparidæ*, whose longest-known representative is the gilthead of Europe: used at first in a very comprehensive sense, embracing many heterogeneous species belonging to a number of modern families, but now restricted to the gilthead and very closely related species, typical of the family *Sparidæ*. See cut under *porgy*.—2. [*l. c.*] A fish of this or some related genus; a spar.

sparve (spärv), *n.* [A dial. form of *sparrow*, ult. < AS. *spearwa*: see *sparrow*.] A sparrow: still locally applied to the hedge-sparrow, *Accentor modularis*. [Cornwall, Eng.]

sparver† (spär'vėr), *n.* [Also *esparver;* early mod. E. also *sparvier*, *sparviour*, *sperver*, *sparvill;* < OF. *espervier*, *esprevier*, the furniture of a bed; perhaps a transferred use of *esparvier*, *espervier*, a sweep-net, which is a fig. use of *espervier*, a sparrow-hawk: see *sparrow*, and cf. *pavilion*, ult. < L. *papilio*(*n-*), a butterfly.] 1. The canopy of a bed, or the canopy and curtains taken together.

I will that my . . . daughter have the *sparver* of my bedde. *Sir T. Elyot*, The Governour, App. A.

2. In *her.*, a tent.

sparviour†, *n.* Same as *sparver*.

sparwe†, *n.* A Middle English form of *sparrow*.

spary† (spär'i), *a.* [< *spare*[1] + *-y*[1].] Sparing.

Homer, being otherwise *sparie* ynough in speaking of pictures and colours, yet commendeth the ships painted therwith. *Holland*, tr. of Pliny, xxxiii. 7.

★**spasm** (spazm), *n.* [Early mod. E. *spasme;* < F. *spasme* = Pr. *espasme* = Sp. Pg. *espasmo* = It. *spasimo*, *spasmo*, < L. *spasmus*, < Gr. σπασμός, also σπάσμα, a spasm, < σπᾶν, draw, pull, pluck, tear, rend. Cf. *span*[1], *space*, from the same ult. root.] 1. Excessive muscular contraction. When this is persistent, it is called *tonic spasm;* when it consists of alternating contractions and relaxations, it is called *clonic spasm*. A spasm of one side of the body is called *hemispasm;* a spasm of some particular part, as one arm, or one side of the face, is called a *monospasm*.

2. In general, any sudden transitory movement of a convulsive character, voluntary or involuntary; an abnormally energetic action or phase of feeling; a wrenching strain or effort:

as, a *spasm* of industry, of grief, of fright, etc.; a *spasm* of pain or of coughing.

The *spasms* of Nature are centuries and ages, and will tax the faith of short-lived men. Slowly, slowly the Avenger comes, but comes surely. *Emerson*, Fugitive Slave Law.

Bronchial spasm, the spasmodic contraction of the muscular coat of the bronchial tubes which is the essential element of asthma.—**Carpopedal, clonic, cynic, histrionic spasm.** See the adjectives.—**Functional spasm,** a general term for the nervous disorders of artisans and writers, as writers' cramp, etc. Usually called *occupation neurosis.*—**Habit spasm,** a trick of winking, jerking the head, sudden brief grinning, making a sudden short vocal noise, running out the tongue, and similar acts of half-voluntary aspect, occurring at intervals long or short. Also called *habit chorea.*—**Inspiratory spasm,** a spasmodic contraction of all or nearly all the inspiratory muscles.—**Mobile spasm,** tonic spasm of varying intensity in the various muscles of a part, causing slow, irregular movements of the part, especially conspicuous in the hands. Sometimes the movements are quick. In rare cases it comes on without preceding hemiplegia; it may then, as in other cases, be called *athetosis.* Also called, when following hemiplegia, *spastic hemiplegia* and *post-hemiplegic chorea.*—**Nictitating spasm.** See *nictitate.*—**Nodding spasm.** Same as *salaam convulsion* (which see, under *salaam*).—**Retrocollic spasm.** See *retrocollic.*—**Saltatorial spasm,** a form of clonic spasm of the legs, coming on when the patient attempts to walk, causing jumping movements.—**Spasm of accommodation,** spasm of the ciliary muscle, producing accommodation for near objects.—**Spasm of the chest,** angina pectoris.—**Spasm of the glottis,** spasmodic contraction of the laryngeal muscles such as to close the glottis. See *child-crowing,* and *laryngismus stridulus* (under *laryngismus*).—**Tetanic spasm.** Same as *tonic spasm.*

spasmatic (spaz-mat'ik), *a.* [= F. *spasmatique* = Sp. *espasmático,* < ML. *spasmaticus,* < Gr. σπάσμα(τ-), a spasm: see *spasm.*] Same as *spasmodic.*

spasmatical (spaz-mat'i-kal), *a.* [< *spasmatic* + *-al.*] Same as *spasmodic.*

The Ligaments and Sinews of my Love to you have been so strong that they were never yet subject to such *spasmatical* Shrinkings and Convulsions.
Howell, Letters, ii. 20.

spasmatomancy (spaz'mă-tō-man-si), *n.* [< Gr. σπάσμα(τ-), a spasm, + μαντεία, divination.] Divination from spasmodic or involuntary movements, as of the muscles, features, or limbs.

The treatises [on physiognomy] also contain occasional digressions on onychomancy, . . . *spasmatomancy*, etc.
Encyc. Brit., XIX. 4.

spasmodic (spaz-mod'ik), *a.* and *n.* [= F. *spasmodique* = Sp. *espasmódico* = Pg. *espasmodico* = It. *spasmodico,* < NL. **spasmodicus,* < Gr. σπασμώδης, σπασματώδης, convulsive, spasmodic, < σπασμός, σπάσμα(τ-), a spasm, + εἶδος, form.] **I.** *a.* 1. Pertaining to, of the nature of, or characterized by spasm; affected by spasm or spasms; convulsive: as, *spasmodic* movements; *spasmodic* asthma; a *spasmodic* person.—2. Attended by or manifesting procedure by fits and starts; jerky; overstrained; high-strung; rhapsodical: as, *spasmodic* action or efforts; *spasmodic* utterance or literature.—**Spasmodic asthma,** true asthma caused by spasm of the bronchial tubes, as distinguished from other forms of paroxysmal dyspnœa, as from heart disease.—**Spasmodic cholera,** Asiatic cholera with severe cramps.—**Spasmodic croup.** See *croup*[1].—**Spasmodic school,** a group of British authors of the middle of the nineteenth century, including Philip Bailey, George Gilfillan, and Alexander Smith, whose writings were considered to be distinguished by an overstrained and unnatural style. The name, however, properly has a much more extensive scope, being exemplified more or less in nearly all times and countries, both in literature and in art.

The so-called *spasmodic school* of poetry, whose peculiarities first gained for it a hasty reputation, and then, having suffered under closer critical examination, it almost as speedily dropped out of mind again.
Encyc. Brit., XXII. 172.

Spasmodic stricture, a stricture, as of the urethra, vagina, or rectum, caused by spasmodic muscular contraction, and not permanent, or involving any organic lesion.—**Spasmodic tabes,** spastic paraplegia, or lateral sclerosis.

II. *n.* Same as *antispasmodic.* [Rare.]

spasmodical (spaz-mod'i-kal), *a.* [< *spasmodic* + *-al.*] Same as *spasmodic.*

spasmodically (spaz-mod'i-kal-i), *adv.* In a spasmodic manner; by fits and starts; by spasmodic action or procedure.

Gradual oscillations of the land are, in the long run, of far greater importance in the economy of nature than those abrupt movements which occur *spasmodically.*
Huxley, Physiography, p. 205.

spasmodist (spaz'mō-dist), *n.* [< *spasmod-ic* + *-ist.*] One who acts spasmodically; a person whose work is of a spasmodic character, or marked by an overstrained and unnatural manner. [Rare.]

De Meyer and the rest of the *spasmodists* [in music].
Poe, Marginalia, xxxvii. (*Davies.*)

spasmology (spas-mol'ō-ji), *n.* [< Gr. σπασμός, a spasm, + -λογία, < λέγειν, speak: see *-ology.*] In *pathol.*, scientific knowledge of spasms.

spasmotoxin (spas-mō-tok'sin), *n.* [< Gr. σπασμός, a spasm, + E. *toxin.*] A toxin of unknown composition, obtained by Brieger in 1887 from cultures of bacillus tetani.

spasmus (spas'mus), *n.* [L.: see *spasm.*] Spasm.—**Spasmus nutans.** Same as *salaam convulsion* (which see, under *salaam*).

spastic (spas'tik), *a.* [< Gr. σπαστικός, drawing, pulling, stretching, < σπᾶν, draw, pull: see *spasm.*] 1. In *med.*, pertaining or relating to spasm; spasmodic: as, *spastic* contractions; *spastic* remedies.—2. In *zoöl.*, convulsive, as an infusorian; of or pertaining to the *Spastica.*—**Spastic albuminuria,** albuminuria dependent upon a convulsive attack.—**Spastic anemia,** local anemia or ischemia from spastic contraction of the arteries of the part.—**Spastic hemiplegia,** mobile spasm following hemiplegia. See under *spasm.*—**Spastic infantile paralysis.** See *paralysis.*—**Spastic paralysis,** paralysis with muscular rigidity and increase of reflexes.—**Spastic spinal paralysis, spastic pseudoparalysis, spastic pseudoparesis.** See *paralysis.*

Spastica (spas'ti-kạ), *n. pl.* [NL., < Gr. σπαστικός, drawing, pulling, stretching: see *spastic.*] In Perty's system of classification, a division of ciliate infusorians, containing those which contract and change form with a jerk. There were 4 families—*Urceolarina, Ophrydina, Vorticellina,* and *Vaginifera.*

spastically (spas'ti-kạl-i), *adv.* In a spastic manner.

spasticity (spas-tis'i-ti), *n.* [< *spastic* + *-ity.*] 1. A state of spasm.—2. Tendency to or capability of suffering spasm.

spat[1] (spat), *n.* [A var. of *spot.*] A spot; stain; place. [Scotch.]

spat[1] (spat), *v. t.*; pret. and pp. *spatted,* ppr. *spatting.* [A var. of *spot,* prob. in part < D. *spatten,* spot: see *spot.* Cf. *spatter.*] To spatter; defile.

Thy mind is spotted, *spatted*, spilt;
Thy soule is soyld with sinne.
Kendall, Flowers of Epigrammes (1577). (*Nares.*)

spat[2] (spat), *n.* [Prob., like the similar D. *spat,* a speck, spot, = Sw. *spott,* spittle, etc. (see *spot*), from the root of *spit*[2] (cf. *spat*[1]): see *spit*[2].] The spawn of shell-fish; specifically, the spawn of the oyster; also, a young oyster, or young oysters collectively, up to about the time of their becoming set, or fixed to some support. See *spawn*, *n.*, 2.

Oyster *spat* may be reared from artificially fertilized eggs.
The American, VII. 75.

spat[2] (spat), *v.*; pret. and pp. *spatted,* ppr. *spatting.* [< *spat*[2], *n.*] **I.** *intrans.* To spawn, as an oyster; shed spat.

The surfaces upon which *spatting* occurs must be kept as free as possible from sediment and organic growths.
Science, VI. 465.

II. *trans.* To shed or emit (spawn), as an oyster.

spat[3] (spat), *n.* [In the sense 'blow' (def. 1), cf. *spot;* in part prob. imitative, like *pat.*] 1. A light blow or slap. [Local.]—2. A large drop; a spatter: as, two or three *spats* of rain fell.—3. A petty contest; a little quarrel or dissension. [U. S.]

They was pretty apt to have *spats.*
H. B. Stowe, Oldtown, p. 33.

spat[3] (spat), *v.*; pret. and pp. *spatted,* ppr. *spatting.* [< *spat*[3], *n.*] **I.** *trans.* To give a light blow to, especially with the flat of the hand; strike lightly; slap: as, to *spat* dough; to *spat* one's hands together.

The little Isabel leaped up and down, *spatting* her hands.
S. Judd, Margaret.

II. *intrans.* To engage in a trivial quarrel or dispute; have a petty contest. [U. S.]

spat[4] (spat). A preterit of *spit*[2].

spat[5] (spat), *n.* [Also *spatt;* usually or only in pl. *spats, spatts;* abbr. of *spatterdashes.*] A gaiter or legging. [Scotland and North of England.]

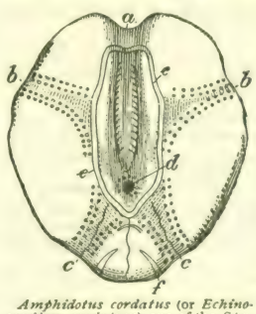
Cloth gaiters seem to have revived, after about thirty years of disuse, and are now called *spats.*
N. and Q., 7th ser., VI. 87.

A pair of black *spats* covering broad flat feet.
N. Macleod, The Starling, iii.

Spatangida (spā-tan'ji-dạ), *n. pl.* [NL., < *Spatangus* + *-ida.*] The spatangoid sea-urchins, as distinguished from *Clypeastrida.* See *Spatangoida.*

Spatangidæ (spā-tan'ji-dē), *n. pl.* [NL., < *Spatangus* + *-idæ.*] A family of irregular sea-urchins, typified by the genus *Spatangus;* the heart-urchins. The mouth is eccentric, transverse, or reniform, and without dentary apparatus; there are petaloid ambulacra, of which the anterior one is unpaired; semitæ or fascioles are always present; and the figure is oval or cordate. This is the leading family of the order, divided mainly by the characters of the ambulacra and semitæ into several subfamilies (some of which rank as separate families with some authors), as *Ananchytinæ, Brissinæ, Leskiinæ,* and others. See cuts under *Spatangoida* and *Spatangus,* with others there noted. Also called *Brissidæ.*

Spatangina (spat-an-jī'nạ), *n. pl.* [NL., < *Spatangus* + *-ina*[2].] 1. The spatangoid sea-urchins, as an order of petalostichous echinoids contrasted with *Clypeastrina.*—2. Same as *Spatanginæ.*



Spatanginæ (spat-an-jī'nē), *n. pl.* [NL., < *Spatangus* + *-inæ.*] One of several subfamilies of *Spatangidæ,* including the genus *Spatangus* and closely related forms, as *Lovenia, Breynia,* etc.

spatangite (spā-tan'jīt), *n.* [< *Spatangus* + *-ite*[2].] A fossil spatangoid. See *Dysasteridæ,* and cut under *Ananchytes.*

spatangoid (spā-tang'goid), *a.* and *n.* [< *Spatangus* + *-oid.*] **I.** *a.* Resembling a heart-urchin; related to *Spatangus;* of or pertaining to the *Spatangidæ* in a broad sense.

II. *n.* A spatangoid sea-urchin; a heart-urchin.

Spatangoida, Spatangoidea (spat-ang-goi'dạ, -dē-ạ), *n. pl.* [NL.: see *spatangoid.*] The *Spatangidæ,* in a broad sense, as an order of petalostichous sea-urchins: synonymous in some uses with *Petalosticha,* but usually restricted to exclude the clypeastroids or flat sea-urchins: then also called *Spatangida* and *Spatangina.* The forms are numerous; most of them fall in the family *Spatangidæ* as usually limited, from which the *Cassidulidæ* are distinguished by the absence of semitæ and other approaches to the regular sea-urchins. The form of the spatangoids is various, and only a part of them have a cordate figure. Some are quite elongate, and may even bear a sort of beak or rostrum, as in the genus *Pourtalesia.* The tendency is away from radiism and toward a sort of bilateral symmetry, as evidenced by the disposition of five ambulacra in two groups, an anterior trivium—under the odd ambulacrum of which is the mouth—and a posterior bivium, in relation with which is the anus. The odd anterior ambulacrum often aborts, leaving apparently but four ambulacra on the upper surface; in other cases it is disproportionally enlarged. The ambulacra are always petaloid; semitæ are not recognized outside this group, and occur nearly throughout it (but not in *Cassidulidæ* and the fossil *Dysasteridæ*); the spines are very variable, and few or many, but always slender or fine, sometimes like hairs of great length. The genital and ocular plates are centric; there are no Polian vesicles, and four kinds of pedicels or tube-feet occur, of which the semital are always different from the two or three kinds of ambulacral feet. See cuts under *Ananchytes, Echinocardium, petalostichous, semita,* and *Spatangus.*

Amphidotus cordatus (or *Echinocardium cordatum*), one of the *Spatangoida,* viewed from above.
a, anterior ambulacrum, forming with *b*, *b*, anterolateral ambulacra, the trivium; *c*, *c*, two posterolateral ambulacra, forming the bivium; *d*, madreporic tubercle surrounded by genital pores; *e*, intrapetalous semita or fasciole; *f*, circumanal semita.

Spatangus (spā-tang'gus), *n.* [NL., < Gr. σπατάγγης, a sea-urchin.] 1. The representative genus of the family *Spatangidæ,* and a type form of the irregular sea-urchins called *Spatangoida.*—2. [*l. c.*] A species of this genus: as, the violet *spatangus, S. purpureus.*

Violet Spatangus (*S. purpureus*). One half shown with its spines removed.

spatch-cock (spach'kok), *n.* [Usually supposed to stand for **despatch-cock,* meaning 'a cock quickly done'; but such a formation is irregular, and no record of it exists. There is prob. some confusion with *spitchcock,* q. v.] A fowl killed and immediately broiled, as for some sudden occasion. [Colloq., Eng.]

spate (spāt), *n.* [Also *spait, speat;* appar. < Ir. *speid,* a great river-flood.] A natural outpour of water; a flood; specifically, a sudden flood or freshet, as in a swollen river. [Originally Scotch.]

Down the water wi' speed she rins,
While tears in *spaits* fa' fast frae her e'e.
Jock o' the Side (Child's Ballads, VI. 82).

Mr. Scrope held that whole spawning-beds are swept away by *spates* on the Tweed.
Quarterly Rev., CXXVI. 361.

The Avon . . . running yellow in *spate,* with the recent heavy rains.
W. Black, House-boat, xix.

spate-bone†, *n.* Same as *spade-bone.*

Some afterwards set up on a window a painted Mastiff-dog gnawing the *spate-bone* of a shoulder of mutton.
Fuller, Ch. Hist., V. i. 32. (*Davies.*)

spatha (spā'thạ), *n.*; pl. *spathæ* (-thē). [< L. *spatha*, < Gr. *σπάθη*, a broad flat blade, a broadsword: see *spathe*.] 1. A broadsword, thin, pointed, and double-edged, such as was used by the Franks and kindred peoples.

The British swords, called *spathæ*, were large, long, and heavy. *Encyc. Brit.*, IX. 69.

2. In *bot.*, same as *spathe*.

spathaceous (spā-thā'shius), *a.* [< *spathe* + *-aceous*.] In *bot.*, spathe-bearing; furnished with or of the nature of a spathe.

spathal (spā'thạl), *a.* [< *spathe* + *-al*.] In *bot.*, inclosed in or furnished with a spathe: as, *spathal* flowers.

spathe (spāᴛʜ), *n.* [< L. *spatha*, < Gr. *σπάθη*, a broad flat blade, a broadsword, a broad rib, the shoulder-blade, the stem of a leaf, the spathe of a flower, a spatula. Hence ult. (< Gr.) E. *spade*[1], *spade*[2], *spatula*, *spatule*, *spattle*[2], *spaddle*, *spittle*[3], etc.] 1. In *bot.*, a peculiar often large and colored bract, or pair of bracts, which subtend or envelop a spadix, as in palms and arums. The name is also given to the peculiar several-leafed involucre of iris and allied plants. See *spadix*, 1, and cuts under *Araceæ*, *Indian turnip* (under *Indian*), *Monstera*, *Peltandra*, and *Symplocarpus*.

2. In *zoöl.*, some spatulate or spoon-shaped part.

spathebill (spāᴛʜ'bil), *n.* The spoon-billed sandpiper, *Eurynorhynchus pygmæus*. *G. Cuvier* (trans.). See cut under *Eurynorhynchus*.

spathed (spāᴛʜd), *a.* [< *spathe* + *-ed*[2].] In *bot.*, surrounded or furnished with a spathe; spathaceous.

Spathegaster (spath-ē-gas'tėr), *n.* [NL. (Hartig, 1840), < Gr. *σπάθη*, a blade, + *γαστήρ*, the stomach.] 1. A spurious genus of hymenopterous gall-insects, containing dimorphic forms of *Neuroterus*, the name being retained as distinctive of such forms.—2. A genus of syrphid flies. *Schiner*, 1868. Also *Spatigaster* (Schiner, 1862), *Spathiogaster* (Loew, 1843), *Spazigaster* and *Spazogaster* (Rondani, 1843).

spathegastric (spath-ē-gas'trik), *a.* [< *Spathegaster* + *-ic*.] Pertaining to *Spathegaster* (sense 1): as, a *spathegastric* form.

Spathelia (spā-thē'li-ạ), *n.* [NL. (Linnæus, 1763), perhaps so called from its resemblance to a palm-tree; < Gr. *σπάθη*, a blade, spathe, petiole of a palm-tree: see *spathe*.] A genus of dicotyledonous sympetalous trees, of the family *Rutaceæ*, type and only genus of the tribe *Spathelieæ*. It is characterized by polygamous flowers without the disk usually present in the order, five stamens alternate to the petals, and a three-angled ovary with two pendulous ovules in each of its three cells. There are two species, natives of the West Indies. They are lofty and handsome trees with an erect unbranched trunk. They bear odd-pinnate alternate leaves, composed of numerous linear-oblong or sickle-shaped leaflets with a toothed or gland-bearing margin, and cymose clusters of red short-pedicelled flowers, disposed in elongated terminal panicles. The fruit is a somewhat elliptical three-angled and three-winged drupe, with a three-celled and three-seeded stone perforated with resin-bearing canals. *S. simplex* is the May-pole, mountain-pride, or mountain-green of the West Indies, a handsome tree with slender trunk rising from 20 to 50 feet, its leaves and its powdery inflorescence each several feet long. See *May-pole*, 3.

spathella (spā-thel'ạ), *n.* [NL., dim. of L. *spatha*, a blade, NL. a spathe: see *spathe*.] In *bot.*: (*a*†) A glume in grasses. (*b*) See *spathilla*.

spathic (spath'ik), *a.* [< G. *spath*, spar (see *spaad*), + *-ic*.] In *mineral.*, having an even lamellar or flatly foliated structure.—**Spathic iron**, spathic iron ore, carbonate of iron: same as *siderite*, 2.

spathiform (spath'i-fôrm), *a.* [< G. *spath*, spar, + L. *forma*, form.] Resembling spar in form: as, the ocherous and *spathiform* varieties of uranite.

spathilla (spā-thil'ạ), *n.*; pl. *spathillæ* (-ē). [NL., dim. of *spatha*, a spathe: see *spathe*. Cf. *spathella*.] In *bot.*, a secondary or diminutive spathe in a spathaceous inflorescence, as in palms. Also, sometimes, *spathella*.

When the spadix is compound or branching, as in Palms, there are smaller spathes, surrounding separate parts of the inflorescence, to which the name *spathellæ* has sometimes been given. *Encyc. Brit.*, IV. 120.

spathing (spā'ᴛʜing), *n.* Same as *spaying*.

spathiopyrite (spath″i-ō-pī'rīt), *n.* [< Gr. *σπάθιον*, dim. of *σπάθη*, a broad blade, + E. *pyrite*.] Same as *safflorite*.

spathose[1] (spā'thōs), *a.* [< *spathe* + *-ose*.] In *bot.*, relating to or formed like a spathe; spathaceous; spathal.

spathose[2] (spath'ōs), *a.* [< G. *spath*, spar (see *spathic*), + *-ose*.] In *mineral.*, sparry; of the nature of spar; occurring in broad plates or lamellæ; foliated in texture.—**Spathose iron**, spathic iron.

spathous (spā'thus), *a.* [< *spathe* + *-ous*.] In *bot.*, same as *spathose*[1].

spathulate (spath'ū-lāt), *a.* Same as *spatulate*.

Spathulea (spā-thū'lē-ạ), *n.* Same as *Spatula*, 3.

Spathura (spā-thū'rạ), *n.* [NL. (Gould, 1850), < Gr. *σπάθη*, a blade, + *οὐρά*, a tail.] A remarkable genus of *Trochilidæ*, containing hummingbirds with the lateral tail-feathers long-exserted, narrowed, and then dilated into a spatule or racket at the end, and with conspicuous leg-muffs. There are 4 or 5 species, as *S. underwoodi*, also called *Steganurus spatuligera*.

Racket-tailed Humming-bird (*Spathura underwoodi*).

spatial (spā'shạl), *a.* [Also *spacial*; < L. *spatium*, space: see *space*.] Of, pertaining to, or relating to space; existing in or connected with space.

We have an Intuition of objects in space: that is, we contemplate objects as made up of *spatial* parts, and apprehend their *spatial* relations by the same act by which we apprehend the objects themselves.
Whewell, Philos. of Inductive Sciences, I. p. xx.

The ascertaining of a fixed *spatial* order among objects supposes that certain objects are at rest or occupy the same position. *J. Sully*, Outlines of Psychol., p. 160.

To analyze the United States of America as a *spacial* extent. *H. N. Day*, Logic, p. 175.

spatiality (spā-shi-al'i-ti), *n.* [Also *spaciality*; < *spatial* + *-ity*.] Spatial character; extension.

So far, all we have established or sought to establish is the existence of the vague form or quale of *spatiality* as an inseparable element bound up with the other qualitative peculiarities of each and every one of our sensations.
W. James, Mind, XII. 10.

spatially (spā'shạl-i), *adv.* Having reference to or as regards space. Also written *spacially*.

Usually we have more trouble to discriminate the quality of an impression than to fix it *spatially*.
J. Ward, Encyc. Brit., XX. 52.

Objects of different sense-organs, experienced together, do not in the first instance appear either inside or alongside or far outside of each other, neither *spatially* continuous nor discontinuous, in any definite sense of these words. *W. James*, Prin. of Psychol., II. 181.

spatiate† (spā'shi-āt), *v. i.* [< L. *spatiatus*, pp. of *spatiari* (> G. *spazieren*), walk about, go, proceed, < *spatium*, room, space: see *space*. Cf. *expatiate*.] To rove; ramble; expatiate.

Confined to a narrow chamber, he could *spatiate* at large through the whole universe. *Bentley*.

spatilomancy (spā-til'ō-man-si), *n.* [< Gr. *σπατίλη*, excrement, + *μαντεία*, divination.] Divination by means of animal excrements and refuse.

spatious†, *a.* An obsolete spelling of *spacious*.

spatt, *n.* See *spat*[5].

spatter (spat'ėr), *v.* [Freq. of *spat*[1], or, with variation, of *spot*: see *spat*[1], *spot*.] **I.** *trans.* 1. To scatter or throw about carelessly, as some fluid or semi-fluid substance; dash or splash so as to fall in spreading drops or small quantities: as, to *spatter* water or mud over a person; to *spatter* oaths or calumnies.

Where famish'd dogs, late guardians of my door,
Shall lick their mangled master's *spatter'd* gore.
Pope, Iliad, xxii. 97.

2. To dash or splash upon; bespatter, literally or figuratively: as, to *spatter* a person with water, mud, or slander.

Reynard, close attended at his heels
By panting dog, tir'd man, and *spatter'd* horse.
Cowper, Needless Alarm, l. 125.

II. *intrans.* 1†. To sputter; act or talk in a sputtering manner.

The Grave *spattered* and shook his Head, saying, 'Twas the greatest Error he had committed since he knew what belonged to a Soldier. *Howell*, Letters, I. iv. 15.

That mind must needs be irrecoverably deprav'd which, either by chance or importunity tasting but once of one just deed, *spatters* at it, and abhorrs the relish ever after.
Milton, Eikonoklastes, ii.

2. To undergo or cause scattering or splashing in drops or small quantities.

The colour *spatters* in fine drops upon the surface of the buttons. *Spons' Encyc. Manuf.*, I. 562.

spatter (spat'ėr), *n.* [< *spatter*, *v.*] 1. The act of spattering, or the state of being spattered; a spattering or splashing effect.

She . . . sometimes exposed her face to the chill *spatter* of the wind. *Hawthorne*, Seven Gables, xvii.

2. A quick succession of not very loud sounds, such as is produced by the spattering of some substance.

A *spatter* of musketry was heard, which proceeded from the last of the enemy leaving the place.
W. H. Russell, Diary in India, II. 378.

3. That which is spattered; a small splash, as of something thrown or falling in drops: as, a *spatter* of milk, ink, or mud on one's clothes.

The sun dripped through
In *spatters* of wasted gold.
St. Nicholas, XVIII. 987.

spatterdash (spat'ėr-dash), *n.* [< *spatter* + *dash*.] A covering for the legs, used to protect the stockings, trousers, etc., from mud and wear. In modern military uniform the name is applied to several kinds of gaiters, and to the water-proof leggings or shields to the trousers of some French mounted troops. Also *splatterdash*.

Here 's a fellow made for a soldier: there 's a leg for a *spatterdash*, with an eye like the king of Prussia.
Sheridan (?), The Camp, i. 2.

spatter-dock (spat'ėr-dok), *n.* The yellow pond-lily, *Nymphæa* (*Nuphar*) *advena*; also extended to other species of the genus. See *Nymphæa*[1], 1, and *pond-lily*, 1. [U. S.]

spatterwork (spat'ėr-wėrk), *n.* A method of producing a figure or design upon a surface of any kind by spattering coloring matter upon the exposed parts of it; any work or object, or objects collectively, showing an effect so produced.

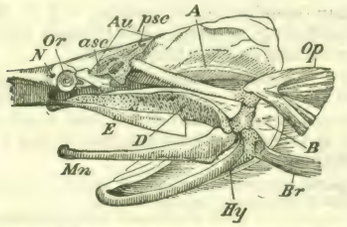
spattle[1] (spat'i), *n.* [< ME. *spattle*, *spettle*, *spatel*, *spotil*, *spotele*, later *spatyll* (= OFries. *spedel*, *spedla*), < AS. *spātl*, spittle, < *spǣtan*, spit: see *spit*[2]. Cf. *spittle*[1].] Spittle. *Bp. Bale*.

He spette in to erthe, and made clay of the *spotle*.
Wyclif, John ix. 6.

spattle[2] (spat'l), *n.* [Formerly also *spatule*; < OF. *spatule*, *espatule*, F. *spatule* = Sp. *espátula* = Pg. *spatula* = It. *spatola*, < L. *spatula*, *spathula*, a blade, spatula: see *spatula*. Doublet of *spatula*, *spittle*[3].] 1. A flat blade for stirring, mixing, or molding plastic powdered or liquid substances; a spatula.—2. Specifically, in *pottery*, a tool for mottling a molded article with coloring matter.

spattling-machine (spat'ling-mạ-shēn′), *n.* A machine, consisting of a reservoir with sieves through which the liquid is caused to fall to divide it into spray, for sprinkling a colored glaze to form party-colored ware.

spatula (spat'ū-lạ), *n.* [< L. *spatula*, also *spathula*, dim. of *spatha*, < Gr. *σπάθη*, a broad blade, a spatula, a paddle: see *spade*[1], *spathe*. Cf. *spatule*, *spattle*[2], *spittle*[3].] 1. A broad flat blade or strip of metal or wood, with unsharpened edges and a commonly rounded outer end (which may be spoon-shaped), and a handle: used for spreading, smoothing, scraping up, or stirring substances, comminuting powders, etc. Spatulas are usually set in handles like those of table-knives, and are of many shapes, sizes, and materials. Those used by druggists, painters, etc., are comparatively long and narrow, straight, and made of more or less flexible steel. Fresco-painters use a trowel-shaped or spoon-shaped spatula for spreading wax or mortar upon the surface which is to receive the painting.



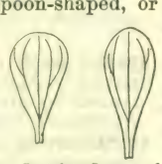
2. [*cap.*] [NL. (Boie, 1822).] A genus of *Anatinæ*, having the bill much longer than the head or tarsus, twice as wide at the end as at the base, there broadly rounded and spoon-shaped, with narrow prominent nail and numerous protrusive lamellæ; the shoveler-ducks or souchets. The tail is short and pointed, of fourteen feathers. *S. clypeata* is the common shoveler (see cut under *shoveler*), *S. rhynchotis* is Australian, *S. platalea* is South American, *S. capensis* is South African, and *S. variegata* inhabits New Zealand. Also *Rhynchaspis*, *Clypeata*, and *Spathulea*.—**Spatula mallei**, in *anat.*, the flattened extremity of the handle of the malleus attached to the umbo of the membrana tympani. See cut under *tympanic*.

spatulamancy (spat'ū-lạ-man-si), *n.* [Prop. **spatulomancy*, < L. *spatula*, a blade, + *μαντεία*, divination.] A method of divination by a sheep's shoulder-blade.

Spatulamancy (called in Scotland Slinneanch [divination]) by reading the speal bone or the blade bone of a shoulder of mutton well scraped.
Ribton-Turner, Vagrants and Vagrancy, p. 78.

spatular (spat′ū-lär), *a.* [< *spatula* + *-ar*3.] Like a spatula in form; spatulate.

Spatularia (spat-ū-lā′ri-ạ̈), *n.* [NL. (Shaw), < L. *spatula*, a spatula: see *spatula*.] In *ichth.*,



Skull of *Spatularia*, with the long beak removed, the anterior (*asc*) and posterior (*psc*) semicircular canals exposed; *Au*, auditory chamber; *Or*, orbit of eye; *N*, nasal sac; *Hy*, hyoidean apparatus; *Br*, representatives of branchiostegal rays; *Op*, operculum; *Mn*, mandible; *A B*, suspensorium; *D*, palatoquadrate cartilage; *E*, maxilla.

a genus of ganoid fishes: same as *Polyodon*, 1. See also cut under *paddle-fish*.

Spatulariidæ (spat″ū-lā-rī′i-dē), *n. pl.* [NL., < *Spatularia* + *-idæ*.] In *ichth.*, a family of ganoid fishes, named from the genus *Spatularia:* same as *Polyodontidæ*. Also *Spatularidæ*. See cuts under *paddle-fish* and *Psephurus*.

spatulate (spat′ū-lāt), *a.* [< NL. *spatulatus*, < *spatula*, a spatula: see *spatula*.] Shaped like a spatula; in *zoöl.* and *anat.*, spoon-shaped, or rounded more or less like the outlines of a spoon; spatuliform; in *bot.*, shaped like a spatula; resembling a spatula in shape, being oblong or rounded with a long narrow attenuate base: as, a *spatulate* leaf, petal, or other flattened organ. Also *spathulate*. See cuts under *Eurynorhynchus*, *paddle-fish*, *Parotia*, *Prioniturus*, *Spathura*, and *shoveler*2.

Spatulate Leaves of *Callitriche heterophylla*.

The large basal joint of the sixth appendage [of *Limulus*] is almost devoid of spines, and bears a curved, *spatulate* process. *Huxley*, Anat. Invert., p. 229.

spatulation (spat-ū-lā′shọn), *n.* [< *spatulate* + *-ion*.] Spatulate shape or formation; appearance as of a spatula; spoon-shaped figure or arrangement. See cuts noted under *spatulate*.

The lateral [tail-]feathers [of some humming-birds] may . . . suddenly enlarge into a terminal *spatulation*, as in the forms known as "Racquet-tails." *Encyc. Brit.*, XII. 359.

spatule (spat′ūl), *n.* [< F. *spatule*, < L. *spatula*, a blade, spatula: see *spattle*2, *spatula*.] 1†. Same as *spattle*2.

Stirring it thrice a day with a *spatule*.
Holland, tr. of Pliny, xxiii. 17.

2. In *zoöl.*, a spatulate formation or spatuliform part; specifically, in *ornith.*, the racket at the end of the tail-feathers, as of the motmots or sawbills and certain parrakeets and humming-birds. See cuts under *Momotus*, *Prioniturus*, and *Spathura*.

spatuliform (spat′ū-li-fôrm), *a.* [< L. *spatula*, a blade, spatula, + *forma*, form.] Spatulate in form; spoon-shaped.

spatuligerous (spat-ū-lij′ẹ-rus), *a.* [< L. *spatula*, a blade, spatula, + *gerere*, carry.] In *zoöl.*, bearing or provided with a spatule or racket.

spaud, *v.* A dialectal form of *spald*1.

spauder (spâ′dėr), *n.* [Also *spawder* (?) (Sc. *spelder*), also *splauder*, spread; freq. of *spaud*, *spald:* see *spald*1.] An injury to animals arising from their legs being forced too far asunder on ice or slippery roads. [Prov. Eng.]

spaul (spâl), *n.* See *spall*2.—**Black spaul.** Same as *symptomatic anthrax* (which see, under *anthrax*).

spauld†, *n.* An obsolete variant of *spall*2.

spave (spāv), *v. t.* A dialectal variant of *spay*1.

spaviet (spav′i-et), *a.* A Scotch form of *spavined*.

My *spaviet* Pegasus will limp.
Burns, First Epistle to Davie.

spavin (spav′in), *n.* [Early mod. E. also *spaven;* < ME. *spaveyne*, < OF. *espavent*, *esparvain*, F. *éparvin* = OIt. *spavano*, It. *spavenio* = Sp. *esparaván* = Pg. *esparavão*, *esparvão*, spavin; perhaps so called in allusion to the hopping or sparrow-like motion of a horse afflicted with spavin; cf. Sp. *esparaván*, a sparrow-hawk, < OHG. *sparo*, *sparwe* = AS. *spearwa* = E. *sparrow:* see *sparrow*. But this explanation is uncertain, resting on the mere resemblance of form.] 1. A disease of horses affecting the hock-joint, or joint of the hind leg between the knee and the fetlock. See *bog-spavin*, *blood-spavin*, *bone-spavin*.—2. In *coal-mining*, the clay underlying the coal. Also called *under-clay*, *coal-clay*, *seat*, *seat-clay*, etc. [Yorkshire, Eng.]

spavined (spav′ind), *a.* [< *spavin* + *-ed*2.] Affected with spavin; hence, figuratively, halting; crippled; very lame or limping.

A blind, *spavined*, galled hack, that was only fit to be cut up for a dog-kennel. *Goldsmith*, Vicar, xiv.

If they ever praise each other's bad drawings, or broken-winded novels, or *spavined* verses, nobody ever supposed it was from admiration. *O. W. Holmes*, Autocrat, i.

spawt, *n.* An obsolete form of *spa*.

spawder, *n.* See *spauder*.

spawl1, *n.* and *v.* See *spall*1.

spawl2, *n.* See *spall*2.

spawl3 (spâl), *n.* [A contr. of *spattle*1.] Saliva or spittle thrown out carelessly; slaver.

The new-born infant from the cradle takes,
And first of spittle she lustration makes;
Then in the *spawl* her middle finger dips,
Anoints the temples, forehead, and the lips.
Dryden, tr. of Persius's Satires, ii.

spawl3 (spâl), *v. i.* [Formerly also *spall;* < *spawl*3, *n.*] To throw saliva from the mouth so as to scatter it; eject spittle in a careless, dirty manner: sometimes with indefinite *it*.

There was such spitting and *spalling*, as though they had been half choked.
Harrington's Apology (1596). (*Nares.*)

In disgrace,
To spit and *spawl* upon his sunbright face.
Quarles, Emblems, iii. 2.

Why must he sputter, *spawl*, and slaver it? *Swift.*

spawld, *n.* A Scotch variant of *spald*2 for *spall*2.

spawn (spân), *v.* [Early mod. E. *spaune;* < ME. *spawnen*, *spanen*, < OF. *espaundre*, *espandre*, also *espandir*, shed, spill, pour out, spawn, same as *espanir*, blow, bloom as a flower, lit. expand, F. *épandre*, spread, = It. *spandere*, spill, scatter, shed, < L. *expandere*, spread out, shed abroad: see *expand*. Cf. *spannishing*.] **I.** *trans.* To produce or lay (eggs): said of a female fish, and by extension of other animals; hence, to generate. It is sometimes applied, in contempt, to human beings.

What practices such principles as these may *spawn*, when they are laid out to the sun, you may determine.
Swift.

II. *intrans.* 1. To produce or lay eggs of the kinds called *spawn*, as a fish, frog, mollusk, or crustacean; by extension, to produce offspring: said of other animals, and, in contempt, of human beings.

The Trout usually *spawns* about October or November.
I. Walton, Complete Angler, p. 75.

2. To issue, as the eggs or young of a fish: by extension applied to other animals, and to human beings, in contempt.

The beguiling charms of distinctions and magnificent subtleties have *spawned* into prodigious monsters, and the birth of error. *Evelyn*, True Religion, II. 176.

It is so ill a quality, and the mother of so many ill ones that *spawn* from it, that a child should be brought up in the greatest abhorrence of it. *Locke.*

spawn (spân), *n.* and *a.* [Early mod. E. *spaune;* < *spawn*, *v.*] **I.** *n.* 1. The eggs or ova of various oviparous animals, as amphibians, fishes, mollusks, crustaceans, etc., when small and numerous, or extruded in more or less coherent masses; female roe. The number of individual eggs in spawn varies much, and is sometimes prodigiously great: thus, it has been estimated that the spawn of a single codfish may contain several million eggs. In oviparous fishes the eggs are spawned directly into the water, fecundated as they flow out, or afterward, by the milt of the male, and left to hatch by themselves. Fish-spawn is also easily procured by the process of stripping the female, and artificially fecundated by the same process applied to the male, the spawn and milt being mixed together in the water of a vessel made for the purpose. In ovoviviparous fishes the spawn is impregnated in the body of the female, as is usual with the eggs of higher animals. Frogs and toads lay a quantity of spawn consisting of a jelly-like mass in which the eggs are embedded, and it is fertilized as it flows forth. Some shell-fish extrude spawn in firm gelatinous masses, as the common sea-snail, *Natica heros*. (See *sand-saucer*.) The mass of eggs (called *coral* or *berry*) that a lobster carries under her tail is the spawn or roe of that crustacean; and in various other crustaceans and some fishes the spawn is carried to hatching in special brood-pouches (see *opossum-shrimp*), which are sometimes in the male instead of the female, as in the sea-horse (see *Hippocampidæ*). Anadromous fishes are those which leave the sea and run up rivers to spawn; a few fishes are catadromous, or the converse of this. The name *spawn* is seldom or never given to the eggs of scaly reptiles, birds, or mammals; but the term has sometimes included milt. See *spawning*.
2. The spat of the oyster, from the time of the discharge of the egg until the shell is visible and the creature has become attached.—3. Offspring of fish; very small fish; fry.—4. Offspring in general; a swarming brood: applied, mostly in contempt, to human beings.

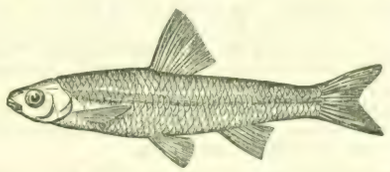
To Sem the East, to Cham the South, the West
To Iapheth falls; their seuerall scopes exprest:
Their fruitful *Spawn* did all the World supply.
Sylvester, tr. of Du Bartas's Weeks, ii., The Colonies, Arg.

Howe'er that common *spawn* of ignorance,
Our fry of writers, may beslime his fame.
B. Jonson, Poetaster, Ind.

5. In *bot.*, the mycelium of fungi; the white fibrous matter forming the matrix from which fungi are produced. Certain species of edible fungi, as *Agaricus campestris*, are propagated artificially by sowing the spawn in prepared beds of horse-droppings and sand.

By this time these will be one mass of natural *spawn*, having a grey mouldy and thready appearance, and a smell like that of mushrooms.
Cooke and Berkeley, Fungi, p. 257.

The agarics have an abundant mycelium, known to gardeners as the *spawn*, consisting of white, cottony filaments, which spread in every direction through the soil.
Amer. Cyc., XII. 70.



To shoot spawn. See *shoot*.

II. *a.* Containing spawn; spawning, or about to spawn; ripe, as a fish.

spawn-brick (spân′brik), *n.* In *bot.*, brick-shaped masses of mold or compressed horse-droppings containing mushroom-spawn, and used for the artificial sowing or stocking of a mushroom-bed.

The [mushroom-]bed will be ready for spawning, which consists of inserting small pieces of *spawn bricks* into the sloping sides of the bed, about 6 inches asunder.
Encyc. Brit., XII. 284.

spawn-eater (spân′ē″tėr), *n.* A spawn-eating fish, or other animal which habitually feeds upon spawn, to the detriment of the fisheries or of fish-culture; especially, a cyprinoid fish,

Spawn-eater (*Notropis hudsonius*).

Notropis hudsonius, found in streams along the coast from New York to Virginia. This is one of the largest minnows, from 4 to 8 inches long, of a pale coloration, the sides with a broad silvery band, and usually a dusky spot at the base of the caudal fin. It is sometimes called *smelt*.

spawned (spând), *p. a.* 1. Having emitted spawn; spent, as a fish.—2. Extruded or deposited, as spawn.

spawner (spâ′nėr), *n.* [< *spawn* + *-er*1.] 1. That which spawns, as the female of fish, frogs, oysters, etc.; a ripe fish about to spawn: correlated with *milter*.

There the *Spawner* casts her eggs, and the Melter hovers over her all that time that she is casting her Spawn, but touches her not.
I. Walton, Complete Angler (ed. 1653), p. 147.

2. In *fish-culture*, a spawn-gatherer. [Recent.]

spawn-fungus (spân′fung″gus), *n.* See *fungus*.

spawn-hatcher (spân′hach″ėr), *n.* An apparatus for the artificial hatching of the ova of fish. It consists essentially of a box, or a series of boxes, fitted with trays with perforated bottoms to receive the spawn, and arranged for the supply of a regulated current of fresh water.

spawning (spâ′ning), *n.* [Verbal n. of *spawn*, *v.*] The act or process of emitting and fecundating spawn. It consists essentially in the emission by the female of her eggs, and by the male of his milt, in such a manner that they may come in contact with each other, and that the eggs may be placed in a position favorable to their development. The manner, time, and place in which this is performed vary with the species. Some kinds bury their eggs in sand or gravel; some attach them to weeds, sticks, or stones; some build nests of stones or other material; and others drop their eggs carelessly through the water. Fish spawn at all seasons of the year, every species having its appropriate time. Rapid streams, quiet lakes, and sea-bottoms are among the places of deposit. In some cases nests are constructed somewhat elaborately. With the laying of the eggs the care of the parents for their offspring generally ends. Not unfrequently both sire and dam immediately devour their yet unhatched descendants. A few species guard their eggs during incubation, and in some rare cases this care continues after the young fishes are hatched.

spawning-bed (spâ′ning-bed), *n.* A bed or nest made in the bottom of a stream, as by salmon and trout, in which fish deposit their spawn and milt.

spawning-ground (spâ′ning-ground), *n.* A water-bottom on which fish deposit their spawn; hence, the body or extent of water to which they resort to spawn; a breeding-place.

spawning-screen (spâ'ning-skrēn), *n.* In *fish-culture*, a frame or screen on which the spawn of fish is collected.

spawn-rising (spân'rī″zing), *n.* In *fish-culture*, the increase in size of spawn after the milt has been added.

spay[1] (spā), *v. t.* [Early mod. E. also *spaie;* dial. *spave, spaive, speave;* supposed to be < Gael. *spoth* = Manx *spoiy* = Bret. *spachein, spaza,* castrate, geld; cf. W. *yspaddu,* exhaust, empty, *dyspyddu,* drain, exhaust; perhaps connected with L. *spado,* < Gr. σπάδων, a eunuch, < σπᾶν, draw, extract: see *spade*[4].] To castrate (a female) by extirpating the ovaries. The process corresponds to castration or emasculation of the male, incapacitating the female from breeding, or making her barren. Applied to hens, it corresponds to the caponizing of a cock. It is also practised on other animals, as swine. The animals fatten more readily, and the flesh is improved. Compare *Battey's operation,* under *operation.*

spay[2] (spā), *n.* [Also *spaie;* perhaps < OF. **espeis, espois,* F. *épois,* branches of a stag's horns, < G. *spitz,* a point (cf. G. *spitz-hirsch,* a stag whose horns have begun to grow pointed): see *spit*[2], *spitz.* Cf. *spittard,* a two-year-old hart.] The male red-deer or hart in his third year.

spay[3], *v.* See *spae.*

spayeret, spayret, *n.* See *spare*[2].

Spea (spē'ä), *n.* [NL. (Cope, 1863), < Gr. σπέος, a cave.] A genus of spade-footed toads (*Scaphiopodidæ* or *Pelobatidæ*), representing a low type of organization, and peculiar to America. Several species, as *S. hammondi* and *S. bombifrons,* inhabit arid regions in the western United States and Mexico, being adapted to dry climate by the rapidity of their metamorphosis. During rains in summer they come out of their holes in the ground, and lay their eggs in rain-pools, where the tadpoles are soon seen swimming. These get their legs very promptly, and go hopping about on dry land. They are very noisy in the spring, like the common spade-foots.

speak (spēk), *v.*; pret. *spoke* (*spake* archaic or poetical), pp. *spoken* (*spoke* obs. or vulgar), ppr. *speaking.* [< ME. *speken* (pret. *spake, spak, spec, spæc,* pp. *spoken, spoke,* earlier *spæken, speokene, i-speken, ispeke*), < late AS. *specan,* earlier *sprecan* (pret. *spæc,* pl. *spǣcon,* earlier *spræc,* pl. *sprǣcon,* pp. *specen,* earlier *sprecen*) = OS. *sprecan* = OFries. *spreka* = D. *spreken* = MLG. LG. *spreken* = OHG. *sprehhan,* MHG. G. *sprechen,* speak; cf. MHG. *spehten,* chatter, G. dial. *spächten,* speak; root unknown. Hence ult. *speech,* and perhaps *spook.*] **I.** *intrans.* 1. To use articulate utterance in the tones of the speaking-voice, in distinction from those of the singing-voice; exert the faculty of speech in uttering words for the expression of thought.

Sire, are hi beo [ere they be] to dithe awreke
We mote ihere the children *speke.*
King Horn (E. E. T. S.), p. 69.

Their children *spake* half in the speech of Ashdod, and could not *speak* in the Jews' language. Neh. xiii. 24.

Many good scholars *speak* but fumblingly.
B. Jonson, Discoveries.

2. To make an oral address, as before a magistrate, a tribunal, a public assembly, or a company; deliver a speech, discourse, argument, plea, or the like: as, to *speak* for or against a person or a cause in court or in a legislature.

Then Agrippa said unto Paul, Thou art permitted to *speak* for thyself. Acts xxvi. 1.

Lord Sandwich, by a most inconceivable jumble of cunning, *spoke* for the treaty. *Walpole,* Letters, II. 278.

3. To make oral communication or mention; talk; converse: as, to *speak* with a stranger; to *speak* of or about something; they do not *speak* to each other.

Than eche toke other be the hande, and wente *spekynge* of many thinges till thei com to the hostell of Vlfin and Bretell. *Merlin* (E. E. T. S.), iii. 467.

I must thank him only,
Lest my remembrance suffer ill report;
At heel of that, defy him. . . .
Would we had *spoke* together.
Shak., A. and C., ii. 2. 167.

4. To communicate ideas by written or printed words; make mention or tell in recorded speech.

I *speak* concerning Christ and the church. Eph. v. 32.

The Scripture *speaks* only of those to whom it speaks.
Hammond.

The Latin convent is thought to have been on mount Gihon, though some seem to *speak* of that hill as beyond the pool of Gihon. *Pococke,* Description of the East, II. i. 10.

5. To make communication by any intelligible sound, action, or indication; impart ideas or information by any means other than speech or writing; give expression or intimation.

And let the kettle to the trumpet *speak,*
The trumpet to the cannoneer without.
Shak., Hamlet, v. 2. 286.

That brow in furrow'd lines had fix'd at last,
And *spake* of passions, but of passion past.
Byron, Lara, i. 5.

Abate the stride, which *speaks* of man.
Tennyson, Princess, ii.

6. Of an organ-pipe, to emit or utter a tone; sound.—7. *Naut.,* to make a stirring and lapping sound in driving through the water: said of a ship.

At length the sniffler reached us, and the sharp little vessel began to *speak,* as the rushing sound through the water is called; while the wind sang like an Eolian harp through the taut weather-rigging.
M. Scott, Tom Cringle's Log, viii.

8. To bark when ordered: said of dogs.—**Ill spoken.** See *well* or *ill spoken,* below.—**Properly speaking.** See *properly.*—**So to speak.** See *so*[1].—**Speaking acquaintance.** (*a*) A degree of acquaintance extending only to formal intercourse.

Between them and Mr. Wright [the Rector] there was only a *speaking acquaintance.*
Trollope, Belton Estate, I. 33.

(*b*) A person with whom one is only sufficiently acquainted to interchange formal salutations or indifferent conversation when meeting casually.—**Speaking terms,** a relation between persons in which they speak to or converse with each other; usually, an acquaintance limited to speaking in a general way or on indifferent subjects. *Not to be on speaking terms* is either to be not sufficiently acquainted for passing speech or salutation, or to be so much estranged through disagreement as to be debarred from it.

Our poorer gentry, who never went to town, and were probably *not on speaking terms* with two out of the five families whose parks lay within the distance of a drive.
George Eliot, Felix Holt, i.

To speak by the card. See *card*[1].—**To speak for.** (*a*) To speak in behalf or in place of; state the case, claims, or views of.

The general and his wife are talking of it;
And she *speaks for* you stoutly.
Shak., Othello, iii. 1. 47.

There surely I shall *speak for* mine own self.
Tennyson, Lancelot and Elaine.

(*b*) To afford an indication of; intimate; denote.

Every half mile some pretty farmhouse was shining red through clumps of trees, the many cattle-sheds *speaking for* the wealth of the owner. *Froude,* Sketches, p. 93.

To speak holiday†. See *holiday, a.*—**To speak in lutestring†.** See *lutestring*[2].—**To speak like a book.** See *book.*—**To speak of.** (*a*) See def. 3. (*b*) To take or make account of; mention as notable or of consequence; deserve mention.

Those Countries neerest Tigris Spring,
In those first ages were most flourishing,
Most *spoken-of.*
Sylvester, tr. of Du Bartas's Weeks, ii., The Colonies.

Strangers . . . that pay to their owne Lords the tenth, and not to the owner of those liberties any thing to *speake of.* *Capt. John Smith,* Works, II. 244.

To speak out, to speak loud or louder; hence, to speak freely, boldly, or without reserve; disclose what one knows or thinks about a certain matter.—**To speak to.** (*a*) To answer for; attest; account for.

For a far longer time than they, the modern observatories, can directly *speak to.* *Piazzi Smyth,* Pyramid, p. 74.

(*b*) To admonish or rebuke. [Colloq. and euphemistic.]

"Papa," he exclaimed, in a loud, plaintive voice, as of one deeply injured, "will you *speak to* Giles? . . . If this sort of thing is allowed to go on, . . . it will perfectly ruin the independence of my character."
Jean Ingelow, Off the Skelligs, xix.

To speak to one's heart. See *heart.*—**To speak up,** to express one's thoughts freely, boldly, or unreservedly; speak out.

Speak up, jolly blade, never fear.
Robin Hood and Little John (Child's Ballads, V. 221).

To speak well for, to be a commendatory or favorable indication of or with regard to: as, his eagerness *speaks well for* him, or *for* his success.—**Well or ill spoken,** given to speaking well or ill; given to using decorous or indecorous speech, in either a literal or a moral sense.

Thou speak'st
In better phrase and matter than thou didst. . . .
Methinks you're *better spoken.* *Shak.,* Lear, iv. 6. 10.

He was wise and discreete and *well spoken,* having a grave & deliberate utterance.
Bradford, Plymouth Plantation, p. 413.

=**Syn.** *Speak, Talk.* *Speak* is more general in meaning than *talk.* Thus, a man may *speak* by uttering a single word, whereas to *talk* is to utter words consecutively; so a man may be able to *speak* without being able to *talk.* *Speak* is also more formal in meaning: as, to *speak* before an audience; while *talk* implies a conversational manner of speaking.

II. *trans.* 1. To utter orally and articulately; express with the voice; enunciate.

And thei seide, "That he is, for this thre dayes he *spake* no speche, ne neuer shall *speke* worde."
Merlin (E. E. T. S.), i. 94.

They sat down with him upon the ground seven days and seven nights, and none *spake* a word unto him.
Job ii. 13.

2. To declare; utter; make known by speech; tell, announce, or express in uttered words.

Grant unto thy servants that with all boldness they may *speak* thy word. Acts iv. 29.

One that, to *speak* the truth,
Had all those excellencies that our books
Have only feign'd.
Middleton, Anything for a Quiet Life, i. 1.

I am come to *speak*
Thy praises. *Bryant,* Hymn to Death.

3. To use in oral utterance; express one's self in the speech or tongue of: as, a person may read a language which he cannot *speak.*

The Arabic language is *spoke* very little north of Aleppo.
Pococke, Description of the East, II. i. 154.

4. To accost or address in speech; specifically (*naut.*), to accost at sea; hail and hold communication with by the voice, as a passing vessel.

About six bells, that is three o'clock P. M., we saw a sail on our larboard bow. I was very desirous, like every new sailor, to *speak* her.
R. H. Dana, Jr., Before the Mast, p. 10.

5. To say, either in speech or in writing; use as a form of speech.

A beavie of ladyes is *spoken* figuratively for a company or troupe: the terme is taken of Larkes.
Spenser, Shep. Cal., April, Glosse.

6. To produce by means or as a result of speech; bring about or into being by utterance; call forth.

They sung how God *spoke* out the World's vast Ball;
From Nothing and from No where call'd forth All.
Cowley, Davideis, i.

7. To mention as; speak of as being; call. [Obsolete or rare.]

Mayst thou live ever *spoken* our protector!
Fletcher, Valentinian, v. 8.

8. To make known as if by speech; give speaking evidence of; indicate; show to be; declare.

Whatever his reputed parents be,
He hath a mind that *speaks* him right and noble.
Fletcher, Spanish Curate, i. 1.

And for the heaven's wide circuit, let it *speak*
The Maker's high magnificence.
Milton, P. L., viii. 101.

Eleanor's countenance was dejected, yet sedate; and its composure *spoke* her inured to all the gloomy objects to which they were advancing.
Jane Austen, Northanger Abbey, xxiv.

To speak a ship. See def. 4, above.—**To speak daggers.** See *dagger*[1].—**To speak** (a person) **fair,** to address in fair or pleasing terms; speak to in a friendly way.

Oh run, dear friend, and bring the lord Philaster! *speak* him *fair;* call him prince; do him all the courtesy you can. *Beau. and Fl.,* Philaster, v. 3.

To speak for, to establish a claim to by prior assertion; ask or engage in advance: as, we have *spoken for* seats; she is already *spoken for.*—**To speak one's mind,** to express one's opinion, especially with emphasis.

The Romans had a time once every year, when their Slaves might freely *speake their minds.*
Milton, On Def. of Humb. Remonst.

To speak out, to utter openly; proclaim boldly.

But strait I'l make his Dumbness find a Tongue
To *speak out* his imposture, and thy wrong.
J. Beaumont, Psyche, ii. 164.

=**Syn.** *Tell, State,* etc. See *say*[1].

speakable (spē'ka-bl), *a.* [< *speak* + *-able.*] 1. Capable of being spoken; fit to be uttered.

The other, . . . heaping oaths upon oaths, . . . most horrible and not *speakable,* was rebuked of an honest man. *Ascham,* Toxophilus, i.

2†. Having the power of speech. [Rare.]

Redouble then this miracle, and say
How cam'st thou *speakable* of mute?
Milton, P. L., ix. 563.

speaker (spē'kėr), *n.* [< ME. *speker, spekere* (= OFries. *spreker* (in *forspreker*) = D. MLG. *spreker* = OHG. *sprāhhari, sprāchari, sprehhari, sprehheri, sprechari,* MHG. *sprechære, sprecher,* G. *sprecher,* a speaker); < *speak* + *-er*[1].] 1. One who speaks or utters words; one who talks or converses; one who makes a speech or an address; specifically, one who engages in or practises public speaking.

Thei seyn also that Abraham was Frend to God, and that Moyses was famileer *spekere* with God.
Mandeville, Travels, p. 136.

Bearers far more strange of the Roman name, though no *speakers* of the Roman tongue, are there in special abundance. *E. A. Freeman,* Venice, p. 57.

2. A proclaimer; a publisher. [Rare.]

After my death I wish no other herald,
No other *speaker* of my living actions.
Shak., Hen. VIII., iv. 2. 70.

3. [*cap.*] The title of the presiding officer in the British House of Commons, in the House of Representatives in the Congress of the United States, in the lower houses of State legislatures in the United States, and in British colonial legislatures; also of the Lord Chancellor of Great Britain as presiding officer of the House of Lords. The Speaker of the House of Commons is elected in each Parliament from its members, with the royal concurrence, generally without regard to politics, and may preside in successive Parliaments of opposite political character. His powers (which have been much diminished in the course of time) are limited to the pres-

ervation of order and the regulation of debate under the rules of the House, the use of the casting-vote in case of an equal division, and speaking in general committee. The Speaker in the House of Representatives (as also in the State legislatures) is usually a leader of the party having a majority of the members, and has, in addition to the powers of the British Speaker, the power of appointing all committees, and the right, as a member, of participating in general debate after calling another member to the chair, and of voting on all questions—rights exercised, however, only on important occasions. He is thus in a position to control the course of legislation to an important extent, and the office is consequently regarded as of great power and influence.

I hear that about twelve of the Lords met and had chosen my Lord Manchester *speaker* of the House of Lords.
Pepys, Diary, April 26, 1660.

In the Lower House the *Speaker* of the Tudor reigns is in very much the same position as the Chancellor in the Upper House; he is the manager of business on the part of the crown, and probably the nominee either of the king himself or of the chancellor.
Stubbs, Medieval and Modern Hist., p. 272.

Not only that the Standing Committees are the most essential machinery of our governmental system, but also that the *Speaker* of the House of Representatives is the most powerful functionary of that system.
W. Wilson, Cong. Gov., p. 103.

4. A title, and hence a general name, for a book containing selections for practice in declamation, as at school. [U. S.]

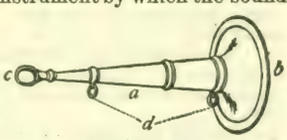
speakership (spē′kėr-ship), *n.* [< *speaker* + *-ship.*] The office of Speaker in a legislative body.

speaking (spē′king), *p. a.* Adapted to inform or impress as if by speech; forcibly expressive or suggestive; animated or vivid in appearance: as, a *speaking* likeness; *speaking* gestures.

A representation borrowed, indeed, from the actual world, but closer to thought, more *speaking* and significant, more true than nature and life itself. *J. Caird.*

The smallness of Spalato, as compared with the greatness of ancient Salona, is a *speaking* historical lesson.
E. A. Freeman, Venice, p. 172.

Speaking demurrer, in *law*, a demurrer which alleges or suggests a fact which to be available would require evidence, and which therefore cannot avail on demurrer.



speakingly (spē′king-li), *adv.* In a speaking manner; so as to produce the effect of speech; very expressively.

A Mute is one that acteth *speakingly*,
And yet sayes nothing. *Brome*, Antipodes, v. 4.

speaking-machine (spē′king-ma-shēn″), *n.* A mechanical contrivance for producing articulate sounds automatically; a speaking automaton.

Kempelen's and Kratzenstein's *speaking-machine*, in the latter part of the last century; the *speaking-machine* made by Fabermann of Vienna, closely imitating the human voice. *Encyc. Brit.*, XV. 208.

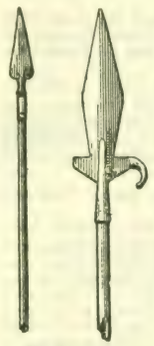
speaking-trumpet (spē′king-trum″pet), *n.* A trumpet-shaped instrument by which the sound of the human voice is reinforced so that it may be heard at a great distance or above other sounds, as in hailing ships at sea or giving orders at a fire. In the United States navy a speaking-trumpet is the badge of the officer of the deck at sea.

Speaking-trumpet.
a, tube; *b*, bell; *c*, mouthpiece; *d*, rings for a band by which the trumpet may be attached to the person.

speaking-tube (spē′king-tūb), *n.* A tube of sheet-tin, gutta-percha, or other material, serving to convey the voice to a distance, as from one building to another, or from one part of a building to another, as from an upper floor to the street-door, or from the rooms of a hotel to the office. It is commonly used in connection with an annunciator, and is usually fitted at each end with a whistle for calling attention.

speaking-voice (spē′king-vois), *n.* The kind of voice used in speaking: opposed to *singing-voice*, or the kind of voice used in singing. The singing-voice and the speaking-voice differ in several respects: (*a*) in pitch and inflection, which are arbitrary in singing, but conformed to the thought in speaking; (*b*) in succession of tones, the tones of music being discrete, while those of speech are concrete; (*c*) in time and emphasis, which in music are more arbitrary and less conformed to the thought than in speech. So great is the difference that many persons who have a good voice for one use have a very poor voice for the other.

speal[1] (spēl), *n.* Same as *spell*[4], *spill*[2].



speal[2]†, *n.* An obsolete variant of *spall*[2].

speal-bone (spēl′bōn), *n.* The shoulder-blade. —**Reading the speal-bone**, scapulimancy; divination by means of a shoulder-blade. *E. B. Tylor*, Prim. Cult., I. 125. Compare *spatulamancy.*

spean (spēn), *n.* [< ME. *spene*, < AS. *spana*, teat, udder; cf. *spanan*, wean: see *spane.*] An animal's teat. [Old and prov. Eng.]

It hath also four *speanes* to her paps.
Topsell, Four-footed Beasts, p. 38. (*Halliwell.*)

★ **spear**[1] (spēr), *n.* [< ME. *spere*, pl. *speres*, *speren*, < AS. *spere* = OS. *sper* = OFries. *sper*, *spiri* = MD. *spere*, D. *speer* = MLG. *sper*, *spere* = OHG. MHG. *sper*, G. *speer* (> OF. *espier*) = Icel. *spjör*, pl., = Dan. *spær*, a spear (the L. *sparus*, a small missile weapon, dart, hunting-spear, is prob. < Teut.); perhaps akin to *spar*, a beam, bar: see *spar*[1]. In def. 7 prob. confused with *spire*[1].] **1.** A weapon consisting of a penetrating head attached to a long shaft of wood, designed to be thrust by or launched from the hand at an enemy or at game. Spears have been used as warlike weapons from the earliest times, and were the principal reliance of many ancient armies, as those of the Greeks, while in others they were used coördinately with the bow and the sword. They are represented by the bayonet in modern armies, though some use is still made of spears, of which javelins and lances are lighter, and pikes heavier, forms. Compare cuts under *bayonet* and *pike.*

Hunting-spears, 15th or 16th century.

Whan thei were ouer, thei smyten in a-monge hem so vigorously that oon myght here the crassinge of *speres* half a myle longe. ★
Merlin (E. E. T. S.), ii. 155.

They shall beat their swords into plowshares, and their *spears* into pruninghooks. Isa. ii. 4.

2. A man armed with a spear; a spearman.

Earl Doorm
Struck with a knife's haft hard against the board,
And call'd for flesh and wine to feed his *spears.*
Tennyson, Geraint.

3. A sharp-pointed instrument with barbed tines, generally three or four, used for stabbing fish and other animals; a fish-gig.—**4.** An instrument like or suggestive of an actual spear, as some articles of domestic or mechanical use, one of the long pieces fixed transversely to the beam or body of chevaux-de-frise, in some parts of England a bee's sting, etc.—**5.** One of the pieces of timber which together form the main rod of the Cornish pumping-engine.—**6.** The feather of a horse. Also called the *streak of the spear.* It is a mark in the neck or near the shoulder of some barbs, which is reckoned a sure sign of a good horse.

7. A spire: now used only of the stalks of grasses: as, a *spear* of wheat.

Tell me the motes, dust, sands, and *speares*
Of corn, when Summer shakes his eares.
Herrick, To Find God.

The *speare* or steeple of which churche was fired by lightening.
Lambarde, Perambulation (1596), p. 287. (*Halliwell.*)

Holy spear. Same as *holy lance.* See *lance*[1].—**Spear pyrites**, a variety of marcasite.—**Spear side**, occasionally **spear half**, a phrase sometimes used to denote the male line of a family, in contradistinction to *distaff* or *spindle side* (or *half*), the female line. See *distaff side*, under *distaff.*

A King who by the spindle-side sprang from both William and Cerdic, but who by the *spear-side* had nothing to do with either.
E. A. Freeman, Norman Conquest, V. 168.

To sell under the spear†, to sell by auction: from the ancient Roman practice of setting a spear (*hasta*) in the ground at an auction, originally as a sign of the sale of military booty.

My lords the senators
Are *sold* for slaves, their wives for bondwomen, . . .
And all their goods, *under the spear*, at outcry.
B. Jonson, Catiline, ii.

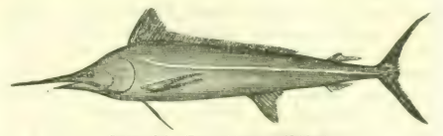
spear[1] (spēr), *v.* [< *spear*[1], *n.*] **I.** *trans.* To pierce or strike with a spear or similar weapon: as, to *spear* fish.

The [Australian] youngsters generally celebrated the birth of a lamb by *spearing* it.
C. Reade, Never too Late to Mend, li.

The Mayfly is torn by the swallow, the sparrow *spear'd* by the shrike. *Tennyson*, Maud, iv. 4.

II. *intrans.* To shoot into a long stem; germinate, as barley. See *spire*[1].

The single blade [of wheat] *spears* first into three, then into five or more side-shoots. *Science*, VII. 174.



spear[2]† (spēr), *v.* An obsolete form of *speer*[1].

spear-billed (spēr′bild), *a.* Having a long, straight, and sharp bill, beak, or rostrum: as, the *spear-billed* grebes of the genus *Æchmophorus.* See cut under *Æchmophorus.* *Coues.*

spear-dog (spēr′dog), *n.* The common piked dog-fish, *Squalus acanthias* or *Acanthias vulgaris.* [Local, Eng.]

spear-fish (spēr′fish), *n.* **1.** A catostomoid fish of the genus *Carpiodes*, *C. cyprinus*, a kind of carp-sucker, also called *sailfish*, *skimback*, and *quillback.* It is common from the Mississippi valley to Chesapeake Bay.—**2.** The bill-fish, *Tetrapturus albidus*, belonging to the family *Istiophoridæ*, or sailfishes. The dorsal fin is low or moderately developed, and the ventrals are represented

Spear-fish (*Tetrapturus albidus*).

only by spines. It inhabits American waters as far north as New England in summer, and is not seldom taken in the sword-fishery. In tropical seas its horizon is about 100 fathoms deep. The spear-fish is related to the sword-fish (though of another family), and has a similar beak or sword. It attains a length of six or eight feet. In the West Indies its Spanish name is *aguja.* Compare cut under *sailfish.*

spear-flower (spēr′flou″ėr), *n.* A tree or shrub of the large tropical and subtropical genus *Icacorea* of the *Myrsinaceæ.* The species are mostly handsome with white or red flowers and pea-form fruit, often blue. The name translates *Ardisia*, a proposed name which alludes to the sharp segments of the calyx.

spear-foot (spēr′fůt), *n.* The off or right hind foot of a horse.

spear-grass (spēr′gràs), *n.* **1.** A name of various species of *Agrostis*, bent-grass, of *Agropyron repens*, quitch-grass, of *Alopecurus agrestis*, foxtail, and perhaps of some other grasses. The spear-grass of Shakspere, according to Ellacombe, is the quitch-grass; according to Prior, it is the common reed, *Trichoon Phragmites.* [Old or prov. Eng.]

To tickle our noses with *spear-grass* to make them bleed. *Shak.*, 1 Hen. IV., ii. 4. 340.

2. The June-grass, or Kentucky blue-grass, *Poa pratensis* (see cut under *Poa*); also other species of the genus. *P. annua* is the low or annual spear-grass. It is so called from the lance-shaped spikelets. (See *meadow-grass.*) The name is said to be applied also to the porcupine-grass, on account of its awns. [U. S.]

3. In New Zealand, a name of one or two plants of the umbelliferous genus *Aciphylla:* so called from their long grass-like leaflets, which have hard and sharp points.

spear-hand (spēr′hand), *n.* The right hand or the right side, as distinguished from the *shield-hand.*

spear-head (spēr′hed), *n.* The head of a spear. It is always pointed, and of iron or steel among people who know the use of iron, but anciently of bronze, and among some savage peoples of stone, bone, or the like. The form varies from that of a long double-edged blade which with its socket is two feet or more in length, as was common in throwing-spears of the Franks and Saxons, to the head of the fourteenth-century lance, which was a mere pointing of the wooden shaft with steel and only a few inches in length. The spear head is often barbed, sometimes serrated or wavy, etc. Compare *coronal*, 2, also *pilum*, *lance*[1], *javelin.*

spear-hook (spēr′hůk), *n.* Same as *spring-hook.*

spear-javelin (spēr′jav″lin), *n.* Same as *framea*, 1.

spear-leafed lily. See *lily*, 1.

spear-lily (spēr′lil″i), *n.* A plant of one of three species of the Australian genus *Doryanthes* of the *Amaryllidaceæ.* It has partly the habit of *Agave*, having a cluster of over one hundred sword-shaped leaves at the base, an erect stem, in *D. excelsa* from 10 to 18 feet high, with a dense terminal head of red flowers. The leaves of that species contain a fiber suitable for rope- and paper-making.

spearman (spēr′man), *n.*; pl. *spearmen* (-men). [< ME. *sperman*; < *spear*[1] + *man.*] **1.** One who uses or is armed with a spear; especially, a soldier whose spear is his principal weapon. Compare *lancer*, *lansquenet*, *pikeman*[1].

Wily as an eel that stirs the mud
Thick overhead, so baffling *spearman's* thrust.
Browning, Ring and [Book, II. 162.

2. A book-name for any leaf-beetle of the genus *Lydella.* The Colorado potato-beetle, *L. decemlineata*, is the ten-lined spearman. See cut under *beetle.*

spearmint (spēr′-mint), *n.* [Said to be a corruption of *spire-mint*, with ref. to the pyramidal inflorescence.] An

Spearmint (*Mentha spicata*), upper part of the stem with the inflorescence. *a*, a flower.

aromatic plant, *Mentha plicata*, the common **garden-mint**, or **mint proper**. It is known chiefly in gardens, or as an escape from them, in both hemispheres, but it is native in Europe and the Canary Islands. Its properties are those of peppermint, and it yields an oil like that of the latter, but with a more pleasant flavor.—**Spirit of spearmint**. See *spirit*.

spear-nail (spēr'nāl), *n.* A form of nail with a spear-shaped point.

spear-plate (spēr'plāt), *n.* Same as *strapping-plate*.

spear-thistle (spēr'this‴l), *n.* See *thistle*.

spear-widgeon (spēr'wij‴on), *n.* 1. The red-breasted merganser, *Mergus serrator*. Also called *shelduck*.—2. The goosander, *Mergus merganser*. [Irish in both uses.]

spearwood (spēr'wụd), *n.* One of two Australian trees, *Eucalyptus Doratoxylon* in the southwest, and *Acacia Doratoxylon* in the interior, or the wood of the same, sought by the natives for spear-shafts.

spearwort (spēr'wėrt), *n.* [< ME. *spereworte, sperewurt*, < AS. *sperewyrt*, < *spere*, spear, + *wyrt*, wort: see *spear*[1] and *wort*[1].] The name of several species of crowfoot or *Ranunculus* with lance-shaped leaves. *R. Lingua*, the greater spearwort, is found in Europe and temperate Asia; *R. Flammula*, the lesser spearwort (also called *banewort*), through the north temperate zone; *R. ophioglossifolius*, the snake's-tongue or adder's-tongue spearwort, in southwestern Europe; *R. obtusiusculus*, the water-plantain spearwort, in North America.

speat, *n.* Same as *spate*.

speave, *v. t.* A dialectal form of *spay*[1].

spec[1] (spek), *n.* A colloquial abbreviation of *speculation*.

They said what a wery gen'rous thing it was o' them to have taken up the case on *spec*, and to charge nothing at all for costs unless they got 'em out of Mr. Pickwick.
Dickens, Pickwick, xxxiv.

spec.[2] In *nat. hist.*, an abbreviation of *specimen:* with a plural *specs.*, sometimes *specc.* Compare *sp.*

specet, *n.* A Middle English form of *spice*[1].

special (spesh'al), *a.* and *n.* [< ME. *special, speciall, speciale, specyal, specyalle*, < OF. *special, especial*, F. *spécial* = Pr. *special, especial* = Sp. *especial* = Pg. *especial* = It. *speziale*, special, < L. *specialis*, belonging to a species, particular, < *species*, kind, species: see *species*. Doublet, *especial*.] **I.** *a.* 1. Of or pertaining to a species or sort; of a particular kind or character; distinct from other kinds; specifically characteristic.

Crist! kepe us out of harme and hate,
For thin hooli spirit so *special*.
Hymns to Virgin, etc. (E. E. T. S.), p. 57.

A *special* idea is called by the schools a species.
Watts, Logic, I. iii. § 3.

A certain order of artistic culture should be adopted, answering to the order of development of the *special* sensibilities and faculties concerned.
J. Sully, Outlines of Psychol., p. 553.

2. Of or pertaining to one or more of a kind; peculiar to an individual or a set; not general; particular; individual.

He spekis thus in his *speciall* spell,
And of this matere makis he mynde.
York Plays, p. 471.

For the question in hand, whether the commandments of God in Scripture be general or *special*, it skilleth not.
Hooker, Eccles. Polity, iii. 7.

The *special* charm of Oxford for Shelley lay in the comparative freedom of the student's life.
E. Dowden, Shelley, I. 56.

3. Peculiar or distinct of the kind; of exceptional character, amount, degree, or the like; especially distinguished; express; particular.

Thei suffre no Cristene man entre in to that Place, but zif it be of *specyalle* grace of the Soudan.
Mandeville, Travels, p. 66.

Can such things be,
And overcome us like a summer's cloud,
Without our *special* wonder?
Shak., Macbeth, iii. 4. 112.

It is a fair and sensible paper, not of *special* originality or brilliancy. *O. W. Holmes*, Emerson, i.

Other groups of phenomena require *special* study.
H. Spencer, Study of Sociol., p. 382.

4. Specifically, limited as to function, operation, or purpose; designed for specific application or service; acting for a limited time or in a restricted manner; not general of the kind named: as, *special* legislation; *special* pleading; a *special* agent, constable, or correspondent; *special* employment; a *special* dictionary.

Too all his ost he gave a *speciall* charge,
Ayenst that day that he shuld fight alone.
Generydes (E. E. T. S.), l. 3221.

To Eltham will I, where the young king is,
Being ordain'd his *special* governor.
Shak., 1 Hen. VI., i. 1. 171.

Estate tail special. See *estate*.—**Heir special.** See *heir*.—**Special act.** See *statute*.—**Special administrator**, an administrator appointed without full powers of administration, but for some special purpose, as to collect and hold assets and pay urgent debts pending a contest as to the probate of a will. Also called a *temporary administrator*, a *collector*, or an *administrator ad colligendum*.—**Special agent**, an agent authorized to transact in the service or interest of his principal only a particular transaction or a particular kind of business, as distinguished from a *general agent:* as, a *special agent* of the revenue department.—**Special anatomy.** See *anatomy*.—**Special assignment.** See *partial assignment*, under *partial*.—**Special bail.** See *bail*[2], 3.—**Special bailiff, bastard, case.** See the nouns.—**Special carrier.** See *carrier*[1], 2.—**Special commission**, in *law*, a commission of oyer and terminer issued by the crown to the judges for the trial of specified cases.—**Special constable, contract, damages, demurrer, deposit, edict, homology, hospital, injunction, issue, jury, license**, etc. See the nouns.—**Special linear complex**, the aggregate of all the lines of space that cut a given line.—**Special logic**, the rules for thinking concerning a certain kind of objects.

Such *special logics* only exhibit the mode in which a determinate matter or object of science, the knowledge of which is presupposed, must be treated, the conditions which regulate the certainty of inferences in that matter, and the methods by which our knowledge of it may be constructed into a scientific whole.
Sir W. Hamilton, Logic, iii.

Special orders, paper, partner, plea, pleader, pleading, property, providence, retainer, sessions, statute, tail, verdict, etc. See the nouns.—**Special trust**, an active trust; a trust which involves specific duties on the part of the trustee, as distinguished from a *general* or *naked trust*, in which he holds only a legal title and it may be possession, but the entire right of disposal is in the beneficiary.—**Syn.** *Special, Especial, Particular, Peculiar, Specific. Special* is more common than *especial*, which has the same meaning; but *especially* is for rhythmical reasons (because it occurs most frequently at the beginning of a dependent clause, where usually an unaccented particle occurs, and where, therefore, a word with an accent on the first syllable is instinctively avoided) much more common than *specially*. The *special* comes under the *general*, as the *particular* comes under the *special*. A *special* favor is one that is more than ordinary; a *particular* favor is still more remarkable; a *peculiar* favor comes very closely home. When we speak of any *particular* thing, we distinguish it from all others; when we speak of a *specific* fault in one's character, we name it with exactness; a *special* law is one that is made for a *particular* purpose or a *peculiar* case; a *specific* law is either one that we name exactly or one that names offenses, etc., exactly.

II. *n.* 1. A special or particular person or thing. Specifically—(*a*) A particular thing; a particular.

Thir 's all the *specials* I of speake.
Raid of the Reidswire (Child's Ballads, VI. 138).

(*b*†) A private companion; a paramour or concubine.

Specyal, concubyne, the womann (speciall or leman). Concubina. *Prompt. Parv.*, p. 468.

Syr Roger of Donkester,
That was her owne *speciall*.
Lytell Geste of Robyn Hode (Child's Ballads, V. 123).

2. A person or thing appointed or set apart for a special purpose or occasion, as a constable, a railway-train, an examination, a dispatch, etc.: as, they traveled by *special* to Chicago; the *specials* were called out to quell the riot.

What are known as *specials* are being held this week. These are for men who partially failed at the last regular examinations. *Lancet*, 1890, II. 796.

In special, in a special manner; especially; particularly. [Obsolete or archaic.]

Se that thow *in special*
Requere noght that is ageyns hire nam.
Chaucer, Troilus, i. 901.

But yf vertue and nurture were withe alle;
To yow therfore I speke *in specyalle*.
Babees Book (E. E. T. S.), p. 1.

specialisation, specialise. See *specialization, specialize*.

specialism (spesh'al-izm), *n.* [< *special* + *-ism*.] Devotion to a special branch or division of a general subject or pursuit; the characteristic pursuit or theme of a specialist; restriction to a specialty. [Recent.]

Special hospitals and *specialism* in medical practice are in danger of being carried too far. *Lancet*, 1889, II. 1049.

All *specialism* of study, one-sidedness of view, and division of labor is dangerous [according to Comte].
N. A. Rev., CXX. 259.

specialist (spesh'al-ist), *n.* [< *special* + *-ist*.] A person who devotes himself to a particular branch of a profession, science, or art; one who has a special knowledge of some particular subject: thus, ophthalmologists, neurologists, or gynecologists are *specialists* in medicine.

Specialists are the coral-insects that build up a reef.
O. W. Holmes, Poet at the Breakfast-table, iii.

specialistic (spesh-a-lis'tik), *a.* [< *specialist* + *-ic*.] Of or pertaining to a specialist or specialism. [Recent.]

The learned *specialistic* mind takes in the facts of one or two creeds or departments. *Athenæum*, No. 3273, p. 87.

speciality (spesh-i-al'i-ti), *n.*; pl. *specialities* (-tiz). [< OF. *specialité, especialite*, F. *spécialité* = Sp. *especialidad* = Pg. *especialidade* = It. *specialità* (> D. *specialiteit* = G. *specialität* = Sw. Dan. *specialitet*), < L. *specialita(t-)s*, particularity, peculiarity, < *specialis*, particular, special: see *special*. Cf. *specialty*, a doublet of *speciality*, as *personalty, realty*, etc., are of *personality, reality*, etc.] 1. A special characteristic or attribute; a distinctive feature, property, or quality; a condition or circumstance especially distinguishing a class or an individual. [In this abstract sense *speciality* is preferable to the form *specialty*, on the analogy of *personality, reality*, and other words of similar tenor as related to *personalty, realty*, etc. The distinction, so far as it exists, is accidental; the syncopated form, in these pairs, is more vernacular, the full form more recent and artificial.]

It is the *speciality* of all vice to be selfishly indifferent to the injurious consequences of our actions, even . . . to those nearest to us. *F. P. Cobbe*, Peak in Darien, p. 32.

The *specialities* of nature, chiefly mental, which we see produced, . . . must be ascribed almost wholly to direct equilibration. *H. Spencer*, Prin. of Biol., § 170.

2. A special matter or thing; a characteristic or distinctive object, pursuit, diversion, operation, product, or the like; a specialty. See *specialty*, 6.

The *speciality* of the sport was to see how some for his slackness had a good bob with the bag.
Laneham, quoted in Strutt's Sports and Pastimes, p. 191.

The small State of Rhode Island, whose *speciality* has always been the manufacture of ordnance.
Comte de Paris, Civil War in America (trans.), I. 187.

specialization (spesh‴al-i-zā'shon), *n.* [< *specialize* + *-ation*.] 1. The act or process of specializing; a making or fixing of special differences or requirements; differentiation.

In the history of Law the most important early *specialisation* is that which separates what a man ought to do from what he ought to know.
Maine, Early Law and Custom, p. 18.

2. The state of being or becoming specialized; a condition of fixed or developed differentiation, as of parts, organs, or individuals, with reference to form, appearance, function, etc.

That there is [in women] . . . a mental *specialization* joined with the bodily *specialization* is undeniable; and this mental *specialization*, though primarily related to the rearing of offspring, affects in some degree the conduct at large. *H. Spencer*, Study of Sociol., p. 375.

3. In *biol.*, that evolutionary process whereby parts or organs primitively indifferent or of common character become differentiated in form or function (usually in both); also, the result of such process or course of development; adaptive modification. The most exact synonym is *differentiation* (which see). It is common to say *differentiation* of structure, but *specialization* of function, giving to the former word a morphological and to the latter a physiological significance. Since, however, change of form almost always implies change in use of the parts thus modified in adaptation to different purposes, the two words come to the same thing in the end, and may be interchanged. The whole course of biological evolution is from the most general to some particular form and function, or from that which is simple, primitive, indifferent, and low in the scale of organization to that which is a complex of particulars and thus highly organized. Such specialization is expressed both in the structure of any of the higher animals and plants, regarded as wholes to be compared with other wholes, and in the structure of their several parts, organs, or tissues, compared with one another in the same animal or plant, and compared with the corresponding parts, organs, or tissues in different animals and plants. The actual ways in which or means by which specialization is known or supposed to be effected are among the broadest problems in biology. See biological matter under *evolution, Darwinism, selection, survival, variation, species, protoplasm, morphology, homology, analogy, heredity, environment*, and words of like bearing on the points in question.

All physiologists admit that the *specialization* of organs, inasmuch as they perform in this state their functions better, is an advantage to each being.
Darwin, Origin of Species, p. 122.

This [frizzly] character of hair must be a *specialization*, for it seems very unlikely that it was the attribute of the common ancestors of the human race.
W. H. Flower, Pop. Sci. Mo., XXVIII. 320.

Also spelled *specialisation*.

specialize (spesh'al-īz), *v.*; pret. and pp. *specialized*, ppr. *specializing*. [= F. *spécialiser;* as *special* + *-ize*.] **I.** *trans.* 1. To make individually or generically special or distinct; make specifically distinct; differentiate from other kinds in form, adaptation, or characteristics, as by a process of physical development; limit to a particular kind of development, action, or use. See *specialization*, 3.

The sensitiveness of the filaments [of *Dionæa Muscipula*] is of a *specialised* nature, being related to a momentary touch rather than to prolonged pressure.
Darwin, Insectiv. Plants, p. 292.

The eye is a highly *specialized* organ, admirably adapted for the important function which it fulfils.
Stokes, Light, p. 90.

Prudence may be said to be merely Wisdom *specialized* by the definite acceptance of Self-interest as its sole ultimate end. *H. Sidgwick*, Methods of Ethics, p. 304.

2†. To mention specially or in detail; particularize; specify.

Our Saviour *specialising* and nominating the places.
Sheldon, Miracles (1616), p. 261.

II. *intrans.* To act in some special way; pursue a special course or direction; take a specific turn or bent.

That some cells have *specialised* on the amœboid character is seen in the so-called myeloplaxes.
Lancet, 1889, II. 635.

Also spelled *specialise*.

specializer (spesh′al-ī-zėr), *n.* One who makes a specialty of anything; a specialist. Also spelled *specialiser*. *The Nation.*

specially (spesh′al-i), *adv.* [< ME. *specially, specialliche*; < *special* + *-ly*[2]. Doublet of *especially*.] 1. In a special manner; specifically; particularly; exceptionally; especially.

Thay suld be clene of euery vyce,
And, *speciallie*, of Couatyce.
Lauder, Dewtie of Kyngis (E. E. T. S.), l. 461.

The earth . . . of Scripture generally is *specially* the dry land. *Dawson*, Nature and the Bible, p. 101.

2. For a particular reason or purpose; by special or exceptional action or proceeding: as, a meeting *specially* called; an officer *specially* designated.

The Latin tongue lived on in Britain after the withdrawal of the legions, but it lived on, as it lives on in modern countries, as a book-language *specially* learned.
E. A. Freeman, Amer. Lects., p. 124.

specialty (spesh′al-ti), *n.*; pl. *specialties* (-tiz). [< ME. *specialte*, < OF. *specialte, especiaute, especialte, especiaute*, etc., a more vernacular form of *specialite, especialite*, etc., speciality: see *speciality*.] 1. The fact or condition of being special or particular; particularity of origin, cause, use, significance, etc. [Rare.]

And that they that be ordeynyd to sette messys bryng them be ordre and continuelly tyl alle be serued, and not inordinatly, And thorow affeccion to personys or by *specialte*. *Babees Book* (E. E. T. S.), p. 330.

It is no denial of the *specialty* of vital or psychical phenomena to reduce them to the same elementary motions as those manifested in cosmic phenomena.
G. H. Lewes, Probs. of Life and Mind, II. vi. § 35.

2. The special or distinctive nature of anything; essence; principle; groundwork. [Rare.]

The *specialty* of rule hath been neglected.
Shak., T. and C., i. 3. 78.

3. A special quality or characteristic; a distinguishing feature; a speciality. See *speciality*, 1.

The Last Supper at San Marco is an excellent example of the natural reverence of an artist of that time, with whom reverence was not, as one may say, a *specialty*.
H. James, Jr., Trans. Sketches, p. 298.

4. A special or particular matter or thing; something specific or exceptional in character, relation, use, or the like.

Acosta numbreth diuerse strange *specialties*, excepted from the generall Rules of Natures wonted course.
Purchas, Pilgrimage, p. 872.

5. A special employment or pursuit; a distinct occupation or division of duty or interest; that which one does especially, either by choice or by assignment.

As each individual selects a special mode of activity for himself, and aims at improvement in that *specialty*, he finds himself attaining a higher and still higher degree of aptitude for it.
Dr. Carpenter, Correlation and Conserv. of Forces, p. 410.

6. A special product or manufacture; something made in a special manner or form, or especially characteristic of the producer or of the place of production: as, a dealer in *specialties*; also, an article to which a dealer professes to pay special attention or care, or which is alleged to possess special advantages in regard to quality, quantity, or price: as, fountain-pens a *specialty*. See the second quotation under *speciality*, 2.—7. In *law*, an instrument under seal, containing an express or implied agreement for the payment of money. The word has also been loosely used to include obligations or debts upon recognizance, judgments and decrees, and statutes, because these, being matter of record, rank in solemnity, conclusiveness, and endurance with free contracts under seal.

Let *specialties* be therefore drawn between us.
Shak., T. of the S., ii. 1. 127.

All instruments under seal, of record, and liabilities imposed by statute, are *specialties* within the meaning of the Stat. 21 James I. *Wood*, On Limitation of Actions, § 29.

specie (spē′shiē or -shē), *n.* [L. *specie*, abl. of *species*, kind, formerly much used in the phrase *in specie*, in kind, in ML. in coin: see *species*.] 1. As a Latin noun, used in the phrase *in specie*: (*a*) In kind.

So a lion is a perfect creature in himself, though it be less than that of a buffalo, or a rhinocerote. They differ but *in specie*; either in the kind is absolute; both have their parts, and either the whole. *B. Jonson*, Discoveries.

You must pay him *in specie*, Madam; give him love for his wit. *Dryden*, Mock Astrologer, v. 1.

Uneconomical application of punishment, though proper, perhaps, as well *in specie* as in degree.
Bentham, Introd. to Morals and Legislation, xvi. 54, note.

(*b*) In coin. See def. 2. Hence, as an English noun—2. Coin; metallic money; a medium of exchange consisting of gold or silver (the precious metals) coined by sovereign authority in pieces of various standard weights and values, and of minor coins of copper, bronze, or some other cheap or base metal: often used attributively. The earliest coinage of specie is attributed to the Lydians, about the eighth century B. C. Previously, and long afterward in many countries, pieces of silver and gold (the latter only to a small extent) were passed by weight in payments, as lumps of silver are still in China. The use of specie as a measure of price is based upon the intrinsic value of the precious metals as commodities, which has diminished immensely since ancient times, but is comparatively stable for long periods under normal circumstances. In modern civilized communities specie or bullion is largely used by banks as a basis or security for circulating notes (bank-notes) representing it. In times of great financial disturbance this security sometimes becomes inadequate from depletion or through excessive issues of notes, and a general suspension of specie payments takes place, followed by great depreciation of the paper money. General suspensions of specie payments occurred in the United States in 1837, 1857, and 1861, the last, due to the civil war, continuing till 1879. Specie payments by British banks were suspended by law, in consequence of the French wars, from 1797 to 1823, but were actually resumed by the Bank of England in 1821. Similar interruptions of solvency have occurred in the other European countries, resulting in some in the substitution of depreciated paper money for specie in ordinary use and reckoning.—**Specie circular**, in *U. S. hist.*, a circular issued by the Secretary of the Treasury in July, 1836, by direction of President Jackson, ordering United States agents to receive in future only gold and silver or Treasury certificates in payment for government lands.

species (spē′shēz), *n.*; pl. *species*. [In ME. *spece, spice*, species, kind, spice (see *spice*[1]); in mod. E. directly from the L.; = F. *espèce*, species (*espèces*, coin), = Sp. Pg. *especie* = It. *specie* = G. Dan. Sw. *species*, species (D. *specie* = Dan. *specie*, specie), < L. *species*, a seeing, sight, usually in passive sense, look, form, show, display, beauty, an apparition, etc., a particular sort, a species, LL. a special case, also spices, drugs, fruits, provisions, etc., ML. also a potion, a present, valuable property, NL. also coin, < *specere*, look, see, = OHG. *spehōn*, MHG. *spehen* (> It. *spiare* = Pr. Sp. Pg. *espiar* = OF. *espier*, F. *épier*: see *spy*), G. *spähen*, spy, = Gr. σκέπτεσθαι, look, = Skt. √ *spaç*, later *paç*, see. Hence *special, especial, specie, specify, specious, spice*, etc. From the same L. verb are ult. E. *spectacle, aspect, expect, inspect, prospect, respect, suspect*, etc., *respite, despise, suspicion*, etc., and the second element in *auspice, frontispiece*, etc.] 1. An appearance or representation to the senses or the perceptive faculties; an image presented to the eye or the mind. According to the Roman Catholic doctrine of transubstantiation, the species, the outward and visible forms or the appearance of bread and wine in the eucharist, are the accidents only of bread and wine severally, the substance no longer existing after consecration. See *intentional species*, below.

The sun, the great eye of the world, prying into the recesses of rocks and the hollowness of valleys, receives *species* or visible forms from these objects.
Jer. Taylor, Works (ed. 1835), I. 782.

Wit . . . is no other than the faculty of imagination in the writer, which searches over all the memory for the *species* or ideas of those things which it designs to represent. *Dryden.*

By putting such a rubric into its Missal, the church of Milan sought to express nothing more than that the accidents or *species* of the sacrament are broken.
Rock, Church of our Fathers, i. 125.

2†. Something to be seen or looked at; a spectacle or exhibition; a show.

Shows and *species* serve best with the people. *Bacon.*

3. [Tr. of Gr. εἶδος.] In *logic*, and hence in ordinary language, a class included under a higher class, or, at least, not considered as including lower classes; a kind; a sort; a number of individuals having common characters peculiar to them.

Ther is a privee *spece* of pride that waiteth first to be salewed er he wol salewe. *Chaucer*, Parson's Tale.

Different essences alone . . . make different *species*.
Locke, Human Understanding, III. vi. 35.

It is well for thee that . . . we came under a convention to pardon every *species* of liberty which we may take with each other. *Scott*, Redgauntlet, letter iii.

A poor preacher being the worst possible *species* of a poor man. *W. M. Baker*, New Timothy, p. 222.

4. One of the kinds of things constituting a combined aggregate or a compound; a distinct constituent part or element; an instrumental means: as, the *species* of a compound medicine. [Now rare in this medical sense, and obsolete or archaic in others.]

In Algebra, *Species* are those Letters, Characters, Notes, or Marks which represent the Quantities in any Equation or Demonstration.
E. Phillips, New World of Words (ed. 1706).

5. In *biol.*, that which is specialized or differentiated recognizably from anything else of the same genus, family, or order; an individual which differs, or collectively those individuals which differ, specifically from all the other members of the genus, etc., and which do not differ from one another in size, shape, color, and so on, beyond the limits of (actual or assumed) individual diversity, as those animals and plants which stand in the direct relation of parent and offspring, and perpetuate certain inherited characters intact or with that little modification which is due to conditions of environment. *Species* is thus practically, and for purposes of classification, the middle term between *genus* on the one hand and *individual* (or *specimen*) on the other; and only the latter can be said in strictness to have material existence, so that *species*, like *genus*, etc., is in this sense an abstract conception. It is also an assured fact in biology that no given stock or lineage breeds perfectly true in all its individuals; the line of descent is always marked by modification of characters (due to the interaction between heredity and environment); the whole tendency of such modification is toward further specialization, in the preservation of the more useful and the extinction of the less useful or the useless characters, and thus to the gradual acquirement, by insensible increments, of differences impressed upon a plastic organism from without—which is as much as to say that new species have always been in process of evolution, and still continue to be so developed. (See biological senses of *evolution, selection, survival*, and *variation*.) Such evolution has in fact been arrested at some point for every species once existent whose members have perished in time past; and of those specific forms whose adaptation to their environment has fitted them to survive till the present some are tending to perpetuation and some to extinction, but all are subject to incessant modification, for better or worse. (See *atavism, reversion*, 2, *retrograde*, *a.*, 3, *degradation*, 7, 8, and *parasitism*, 2.) Such are the views taken by nearly all biologists of the present day, in direct opposition to the former opinion of a special creation, which proceeded upon the assumption that all species of animals and plants, such as we find them actually to be, came into existence by creative fiat at some one time, and have since been perpetuated with little if any modification. In consequence of the fact that the greatest as well as the least differences in organisms are of degree and not of kind, no rigorous and unexceptionable definition of *species* is possible in either the animal or the vegetable kingdom; and in the actual naming, characterizing, and classifying of species naturalists differ widely, some reducing to one or two species the same series of individuals which others describe as a dozen or twenty species. (See *lumper*, 3, *splitter*, 2.) This, however, is rather a nomenclatural than a doctrinal difference. The difficulty of deciding in many cases, and the impossibility of deciding in some, what degree of difference between given specimens shall be considered specific, and so formally named in the binomial system, have led to the introduction of several terms above and below the species (see *subgenus, subspecies, conspecies, variety, race*[3], 5 (*a*) (*b*), *intergrade*, *v. i.*), and also to a modification of the binomial nomenclature (see *polynomial*, 2, and *trinomial*). Two tests are commonly applied to the discrimination between good species and mere subspecies or varieties: (1) the individuals of thoroughly distinct species do not interbreed, or, if they are near enough to hybridize, their progeny is usually infertile, so that the cross is not in perpetuity: the horse and ass offer a good case in point; (2) the specific distinctions do not vanish by insensible degrees when large series of specimens from different geographical localities or geological horizons are available for comparison; for, should characters assumed to be distinctive, and therefore specific, be found to grade away under such scrutiny, they are by that fact proved to be non-specific, and the specimens in question are reducible to the rank of conspecies, subspecies, varieties, or races. Attempts which have been made to separate mankind into several species of the genus *Homo* fail according to both of the criteria above stated. To these may be added, in judging the validity of an alleged species, the third premise, that stable specific forms are evolved by or in the course of natural selection only; for all the countless stocks or breeds resulting from artificial selection, however methodically conducted, tend to revert when left to themselves, and also hybridize freely; they are not therefore in perpetuity except under cultivation, and are no species in a proper sense, though their actual differences may have become, under careful selection, far greater than those usually accounted specific or even generic. (See *dog, rose*[1].) Taking into account geological succession in time as well as geographical distribution in space, and proceeding upon accepted doctrines of the evolution of all forms of animal and vegetable life from antecedent forms, it is evident, first, that "species" is predicable only by means of the "missing links" in the chains of genetic relationships; for, were all organisms that have ever existed before our eyes in their actual evolutionary sequences, we should find no gap or break in the whole series; but, secondly, that development along numberless diverging lines of descent with modification has in fact resulted (through obliteration of the consecutive steps in the process) in the living fauna and flora of the globe, in respect of which not only specific, but generic, ordinal, and still broader distinctions are easily and certainly predicable. It does not appear that any animal or plant has always maintained what we now find its specific character to be; yet the persistence of some forms under no greater variation than that usually ac-

counted generic is established, as in the case of the genus *Lingula*, whose members have survived from the Silurian to the present epoch with only specific modification. In the animal kingdom probably about 250,000 species have been described, recorded, and formally named by a word following the name of the genus to which they are severally ascribed (see under *specific*); the actual number of species is doubtless much greater than this; some 200,000 species are insects (see *Insecta*), of which 80,000 or more belong to one order (see *Coleoptera*). These estimates are exclusive of merely nominal species. (See *synonym*.) The known species of flowering plants were summed up by Durand in his "Index Generum Phanerogamorum" (1888) as follows: dicotyledons, 78,200; monocotyledons, 19,600; gymnosperms, 2,420—in all, 100,220. No census has been made since, but the number now known must be much larger in all the groups. Of the number of cryptogams no reliable estimate can at present be given. The described species of fungi, as given in the sixteen volumes of Saccardo's work now published, number, before sifting, 52,157. Abbreviated *sp.*, with plural *spp.*

6†. Coin; metallic money; specie. See *specie*.

Rome possessed a much greater proportion of the circulating *species* of its time than any European city.
Arbuthnot, Ancient Coins.

Species, your honour knows, is of easier conveyance.
Garrick, Neck or Nothing, ii. 2.

He [Necker] affirms that, from the year 1726 to the year 1784, there was coined at the mint of France, in the *species* of gold and silver, to the amount of about one hundred millions of pounds sterling. *Burke*, Rev. in France.

7. One of a class of pharmaceutical preparations consisting of a mixture of dried herbs of analogous medicinal properties, used for making decoctions, infusions, etc. See under *tea*. —8. In *civil law*, the form or shape given to materials; fashion; form; figure. *Burrill*.— 9. In *math.*: (*a*) A letter in algebra denoting a quantity. [This meaning was borrowed by some early writers from the French of Viète, who derived it from a Latin translation of Diophantus, who uses εἶδος to mean a term of a polynomial in a particular power of the unknown quantity.] (*b*) A fundamental operation of arithmetic. See *the four species*, below.—**Disjunct species**, in *logic*. See *disjunct*.—**Intelligible species**. See *intentional species*.—**Intentional species**, a similitude or simulacrum of an outward thing; the vicarious object in perception and thought, according to the doctrine held and attributed to Aristotle by the medieval realists, beginning with Aquinas. Such species were divided into *sensible species* and *intelligible species*, which distinction and terminology, originating with Aquinas, were accepted by Scotus and others. The sensible species mediated between the outward object and the senses. They were metaphorically called *emanations*, but, being devoid of matter, are not to be confounded with the emanations of Democritus, from which they also differ in being related to other senses besides sight. So far as they belong to the outward thing they were called *impressed*, so far as they are perceived by the mind *expressed species*. From these sensible species the agent intellect, by an act of abstraction, was supposed to separate certain intelligible species, which the higher or patient intellect was able to perceive. These intelligible species so far as they belong to sense were called *impressed*, so far as they are perceived by the intellect *expressed species*. Species were further distinguished as *acquired*, *infused*, and *connatural*. The doctrine of intentional species was rejected by the nominalists, and exploded early in the seventeenth century, but not until the nineteenth was it generally acknowledged to be foreign to the opinion of Aristotle. —**Nascent species**, in *biol.*, a species of animal or plant in the act, as it were, of being born or produced; an incipient species, whose characters are not yet established in the course of its development.—**Sensible species**. See *intentional species*.—**Species anthelminticæ**, a mixture of equal parts of absinthium, tansy, camomile, and santonica.—**Species diureticæ**, a mixture of equal parts of roots of lovage, asparagus, fennel, parsley, and butcher's-broom.—**Species laxantes**. Same as *St. Germain tea* (which see, under *tea*).—**Species pectorales**. Same as *breast tea* (which see, under *tea*).—**Species sudorificæ**. Same as *wood tea* (which see, under *tea*). —**Subaltern species**, in *logic*, that which is both a species of some higher genus and a genus in respect of the species into which it is divided.—**The four species**, the four fundamental operations of arithmetic—addition, subtraction, multiplication, and division. This phrase, rare in English but common in German, seems to have been first so applied by the East Frisian mathematician Gemma in 1540. It was borrowed from logic, where since Petrus Hispanus four species of logical procedure are enumerated in all the old books. Thus, Wilson (1551) says: "There be fower kindes of argumentes, a perfeicte argument, an unperfeicte argument, an inductione, an example"; and Blundeville (1599): "There bee foure principall kindes or formes of argumentation, that is, a syllogisme, an induction, an enthymeme, and example."

species-cover (spē′shēz-kuv″ėr), *n.* The cover used in a herbarium to inclose and protect the species-sheets of a single species. Such covers are usually made of folded sheets of light-weight manila paper, a little larger than the species-sheets.

species-cycle (spē′shēz-sī″kl), *n.* In *bot.*, the complete series of forms needed to represent adequately the entire life-history of a species.

species-monger (spē′shēz-mung″gėr), *n.* In *nat. hist.*: (*a*) One who occupies himself mainly or exclusively in naming and describing species, without inclination to study, or perhaps without ability to grasp, their significance as biological facts; a specialist in species, who cares little or nothing for broader generalizations. (*b*) One who is finical in drawing up specific diagnoses, or given to distinctions without a difference. [Cant in both senses.]

species-paper (spē′shēz-pā″pėr), *n.* Same as *species-sheet*.

species-sheet (spē′shēz-shēt), *n.* One of the sheets or pieces of paper upon which the individual specimens of a species in a herbarium are mounted for preservation and display. They are usually made of heavy stiff white paper, the standard size of which is, in the United States, 16½ × 11½ inches, weighing about 24 pounds to the ream. Only a single species is placed on a sheet, and its label is placed in the lower right-hand corner.

specifiable (spes′i-fī-a-bl), *a.* [< *specify* + *-able*.] That may be specified; capable of being distinctly named or stated.

A minute but *specifiable* fraction of an original disturbance may be said to get through any obstacle.
Nature, XXXVIII. 592.

★**specific** (spē-sif′ik), *a.* and *n.* [< OF. *specifique*, F. *spécifique* = Sp. *especifico* = Pg. *especifico* = It. *specifico* (cf. G. *spezifisch*), < ML. *specificus*, specific, particular, < L. *species*, kind, + *-ficus*, < *facere*, make.] **I.** *a.* **1.** That is specified or defined; distinctly named, formulated, or determined; of a special kind or a definite tenor; determinate; explicit: as, a *specific* sum of money; a *specific* offer; *specific* obligations or duties; a *specific* aim or pursuit.

To be actuated by a desire for pleasure is to be actuated by a desire for some *specific* pleasure to be enjoyed by oneself. *T. H. Green*, Prolegomena to Ethics, § 282.

In addition to these broad differences, there are finer differences of *specific* quality within each sense.
J. Sully, Outlines of Psychol., p. 115.

2. Pertaining to or accordant with what is specified or determined; relating to or regarding a definite subject; conformable to special occasion or requirement, prescribed terms, or known conditions; having a special use or application.

It was in every way stimulating and suggestive to have detected a *specific* bond of relationship in speech and in culture between such different peoples as the English and the Hindus. *J. Fiske*, Evolutionist, p. 109.

3. Of or pertaining to a species. (*a*) Pertaining to a logical species. (*b*) In *zoöl.* and *bot.*, of or pertaining to species or a species; constituting a species; peculiar to, characteristic of, or diagnostic of a species; designating or denominating a species; not generic or of wider application than to a species: as, *specific* characters; *specific* difference; a *specific* name. See *generic*, *subgeneric*, *conspecific*, *subspecific*.

4. Peculiar; special.

Their style, like the style of Boiardo in poetry, of Botticelli in painting, is *specific* to Italy in the middle of the fifteenth century. *J. A. Symonds*, Italy and Greece, p. 251.

5. In *law*, having a certain or well-defined form or designation; observing a certain form; precise.—**6.** In *med.*, related to special infection, particularly syphilitic infection; produced by some distinct zymotic poison.—**Specific cause**, in *med.*, a cause which in operation will produce some special disease.—**Specific centers**, points or periods in the course of evolution at which an organism is supposed to become specifically differentiated from a common stock, having assumed or acquired its specific characters.—**Specific characters**, in *zoöl.* and *bot.*, the diagnostic marks of a species; differences, of whatever kind, which are peculiar to a species and serve to distinguish it from any other. The sum of such characters, or the total specific characteristics, are also spoken of as *the specific character*. Any one such mark or feature is *a specific character*.—**Specific denial**, in *law*, denial which itself rehearses what is denied, or which sufficiently specifies what particular part of the adversary's allegations are denied, as distinguished from a general denial of all his allegations.—**Specific difference**, in *logic*. See *difference*.—**Specific disease**, a disease produced by a special infection, as syphilis.—**Specific duty**, in a tariff, an impost of specified amount upon any object of a particular kind, or upon a specified quantity of a commodity, entered at a custom-house.—**Specific gravity**. See *gravity*.—**Specific heat**. See *heat*.—**Specific inductive capacity**. See *capacity* and *induction*, 6.—**Specific intent, legacy, lien**. See the nouns.—**Specific medicine** or **remedy**, a medicine or remedy that has a distinct effect in the cure of a certain disease, as mercury in syphilis, or quinine in intermittent fever.—**Specific name**, in *zoöl.* and *bot.*, the second term in the binomial name of an animal or a plant, which designates or specifies a member of a genus, and which is joined to the generic name to complete the scientific or technical designation. Thus, in the name *Felis leo*, *leo* is the specific name, designating the lion as a member of the genus *Felis*, and as specifically different from *Felis tigris*, the tiger, *Felis catus*, the wildcat, etc. Also called *nomen specificum*, and formerly *nomen triviale* or *trivial name*. See *binomial*, 2, and *nomen*.—**Specific performance, relief, resistance**. See the nouns.—**Specific rotatory power**. See *rotatory*.—**Syn. 1** and **2**. *Particular*, etc. See *special*.

II. *n.* Something adapted or expected to produce a specific effect; that which is, or is supposed to be, capable of infallibly bringing about a desired result; especially, a remedy which cures, or tends to cure, a certain disease, whatever may be its manifestations, as mercury used as a remedy for syphilis.

Always you find among people, in proportion as they are ignorant, a belief in *specifics*, and a great confidence in pressing the adoption of them.
H. Spencer, Study of Sociol., p. 20.

specifical (spē-sif′i-kal), *a.* [< *specific* + *-al*.] Same as *specific*. [Archaic.]

To compel the performance of the contract, and recover the *specifical* sum due. *Blackstone*, Com., III. ix.

specifically (spē-sif′i-kal-i), *adv.* **1.** In a specific manner; according to the nature of the species or of the case; definitely; particularly; explicitly; in a particular sense, or with a particularly differentiated application.

But it is rather manifest that the essence of spirits is a substance *specifically* distinct from all corporeal matter whatsoever. *Dr. H. More*, Antidote against Atheism, iii. 12.

Those several virtues that are *specifically* requisite to a due performance of this duty. *South*, Sermons.

2. With reference to a species, or to specific difference; as a species.

specificalness (spē-sif′i-kal-nes), *n.* The state of being specifical. [Rare.]

specificate† (spē-sif′i-kāt), *v. t.* [< ML. *specificatus*, pp. of *specificare*, specify: see *specify*.] To denote or distinguish specifically; specify.

Now life is the character by which Christ *specificates* and denominates himself. *Donne*, Sermons, vii.

specification (spes″i-fi-kā′shon), *n.* [= F. *spécification* = Sp. *especificación* = Pg. *especificação* = It. *specificazione*, < ML. *specificatio(n-)*, a specifying, enumeration, < *specificare*, specify: see *specify*.] **1.** An act of specifying, or making a detailed statement, or the statement so made; a definite or formal mention of particulars: as, a *specification* of one's requirements.

All who had relatives or friends in this predicament were required to furnish a *specification* of them.
Prescott, Ferd. and Isa., i. 7.

2. An article, item, or particular specified; a special point, detail, or reckoning upon which a claim, an accusation, an estimate, a plan, or an assertion is based: as, the *specifications* of an architect or an engineer, of an indictment, etc.; the *specification* of the third charge against a prisoner; statements unsupported by *specifications*.—**3.** The act of making specific, or the state of having a specific character; reference to or correlation with a species or kind; determination of species or specific relation.

For, were this the method, miracles would no more be miracles than the diurnal revolution of the sun, the growth and *specification* of plants and animals, the attraction of the magnet, and the like.
Evelyn, True Religion, II. 195.

Here we may refer to two principles which Kant put forward under the names of Homogeneity and *Specification*. *F. H. Bradley*, Ethical Studies, p. 68.

4. In *patent law*, the applicant's description of the manner of constructing and using his invention. It is required to be so explicit as to enable any person skilled in the art or science to make and use the same; and in the United States it forms part of the patent, which cannot therefore protect the inventor in anything not within the specification.

5. In *civil law*, the formation of a new property from materials belonging to another person. Specification exists where a person works up materials belonging to another into something which must be taken to be a new substance—for example, where whisky is made from corn. The effect is that the owner of the materials loses his property in them, and has only an action for the value of them against the person by whom they have been used. The doctrine originates in the civil law, but has been adopted by the common law, under the name of *confusion and accession*, at least where the person making the specification acts in good faith.—**Accusative of specification**. Same as *synecdochical accusative*. See *synecdochical*.—**Charge and specifications**. See *charge*.—**Law of specification**, in *Kantian philos.*, the logical principle that, however far the process of logical determination may be carried, it can always be carried further.—**Principle of specification**, in *Kantian philos.*: (*a*) The logical maxim that we should be careful to introduce into a hypothesis all the elements which the facts to be explained call for, or that *entium varietates non temere esse minuendas*, which is a counteracting maxim to Occam's razor. (*b*) Same as *law of specification*.

specificity (spes-i-fis′i-ti), *n.* [< *specific* + *-ity*.] The state of being specific, or of having a specific character or relation; specific affinity, cause, origin, or effect; specificness. [Recent.]

The suddenness, vigour, and *specificity* of their effects.
F. W. H. Myers, Proc. Lond. Soc. Psychic Research.

Are we any longer to allow to this disease [cowpox] any high degree of *specificity*? *Lancet*, 1889, I. 1130.

specificize (spē-sif′i-sīz), *v. t.*; pret. and pp. *specificized*, ppr. *specificizing*. [< *specific* + *-ize*.] To make specific; give a special or specific character to. [Recent.]

The richest *specificized* apparatus of nervous mechanism. *Alien. and Neurol.*, VI. 483.

specificness (spē-sif′ik-nes), *n.* The state or character of being specific.

specify (spes'i-fī), *v. t.*; pret. and pp. *specified*, ppr. *specifying*. [< ME. *specyfyen, specifien*, < OF. *specifier, especifier*, F. *spécifier* = Pr. Sp. Pg. *especificar* = It. *specificare* = D. *specificeren* = G. *specificiren* = Sw. *specificera* = Dan. *specificere*, < ML. *specificare*, make specific, mention specifically, < *specificus*, specific, particular: see *specific*.] 1. To mention specifically or explicitly; state exactly or in detail; name distinctly: as, to *specify* the persons concerned in a given act; to *specify* one's wants, or articles required.

Ther cowde no man the nowmber *specifie*.
Generydes (E. E. T. S.), l. 1953.

I nevere hadde to do more with the seyd John Wortes than is *specified* in the seyd instruccion.
Paston Letters, I. 20.

There is no need of *specifying* particulars in this class of uses. *Emerson*, Nature, p. 17.

2. To name as a requisite, as in technical specifications; set down in a specification.—3. To make specific; give a specific character to; distinguish as of a species or kind. [Rare.]

Be *specified* in yourself, but not *specified* by anything foreign to yourself. *F. H. Bradley*, Ethical Studies, p. 71.

=**Syn.** To indicate, particularize, individualize.

specillum (spē-sil'um), *n.*; pl. *specilla* (-ä). [L., < *specere*, look, behold: see *species*.] 1. In *med.*, a probe.—2. A lens; an eye-glass.

specimen (spes'i-men), *n.* [= F. *spécimen* = Sp. *especimen*, < L. *specimen*, that by which a thing is known, a mark, token, proof, < *specere*, see: see *species*.] 1. A part or an individual taken as exemplifying a whole mass or number; something that represents or illustrates all of its kind; an illustrative example: as, a collection of geological *specimens;* a wild *specimen* of the human or of the feline race; a *specimen* page of a book (a page shown as a specimen of what the whole is or is to be); a *specimen* copy of a medal.

The best *specimens* of the Attic coinage give a weight of 4.366 grammes (67.38+ grains Troy) for the drachma.
Trans. Amer. Philol. Ass., XVI. 117.

Curzola is a perfect *specimen* of a Venetian town.
E. A. Freeman, Venice, p. 205.

The leaf sculpture of the door jambs of the Cathedral of Florence affords *specimens* of the best Italian work of this sort [fourteenth century].
C. H. Moore, Gothic Architecture, p. 296.

2. In *zoöl.* and *bot.*, an individual animal or plant, or some part of one, prepared and preserved for scientific examination; an example of a species or other group; a preparation: as, a *specimen* of natural history; a *specimen* of the dog or the rose. Abbreviated *sp.* and *spec.*—3. A typical individual; one serving as a specially striking or exaggerated example of the kind indicated. [Jocose and colloq.]

There were some curious *specimens* among my visitors.
Thoreau, Walden, p. 163.

=**Syn.** *Specimen, Sample.* A *specimen* is a part of a larger whole employed to exhibit the nature or kind of that of which it forms a part, without reference to the relative quality of individual portions; thus, a cabinet of mineralogical *specimens* exhibits the nature of the rocks from which they are broken. A *sample* is a part taken out of a quantity, and implies that the quality of the whole is to be judged by it, and not rarely that it is to be used as a standard for testing the goodness, genuineness, or purity of the whole, and the like. In many cases, however, the words are used indifferently. *Sample* is more often used in trade: as, a *sample* of cotton or coffee.

speciological (spē″shi-ō-loj'i-kal), *a.* [< *speciology* + *-ic-al*.] Of or pertaining to speciology.

speciology (spē-shi-ol'ō-ji), *n.* [< L. *species*, species, + Gr. *-λογία*, < *λέγειν*, speak: see *-ology*.] In *biol.*, the science of species; the doctrine of the origin and nature of species.

speciosity (spē-shi-os'i-ti), *n.*; pl. *speciosities* (-tiz). [< OF. *speciosité* = Sp. *especiosidad* = Pg. *especiosidade* = It. *speziosità*, < LL. *speciosita(t-)s*, good looks, beauty, < L. *speciosus*, good-looking, beautiful, splendid: see *specious*.] 1†. The state of being specious or beautiful; a beautiful show or spectacle; something delightful to the eye.

So great a glory as all the *speciosities* of the world could not equalise.
Dr. H. More, On Godliness, III. vi. § 5. (*Encyc. Dict.*)

2. The state of being specious or plausible; a specious show; a specious person or thing. [Rare.]

Professions built so largely on *speciosity* instead of performance. *Carlyle.*

specious (spē'shus), *a.* [< ME. *specious*, < OF. *specieux*, F. *spécieux* = Sp. Pg. *especioso* = It. *spezioso*, < L. *speciosus*, good-looking, beautiful, fair, < *species*, form, figure, beauty: see *species*.] 1. Pleasing to the eye; externally fair or showy; appearing beautiful or charming; sightly; beautiful. [Archaic.]

The rest, far greater part,
Will deem in outward rites and *specious* forms
Religion satisfied. *Milton*, P. L., xii. 534.

2. Superficially fair, just, or correct; appearing well; apparently right; plausible; beguiling: as, *specious* reasoning; a *specious* argument; a *specious* person or book.

It is easy for princes under various *specious* pretences to defend, disguise, and conceal their ambitious desires.
Bacon, Political Fables, ii., Expl.

Thou *specious* Head without a Brain. *Prior*, A Fable.

He coined
A brief yet *specious* tale, how I had wasted
The sum in secret riot. *Shelley*, The Cenci, iii. 1.

3. Appearing actual, or in reality; actually existing; not imaginary. [Rare.]

Let me sum up, now, by saying that we are constantly conscious of a certain duration — the *specious* present — varying in length from a few seconds to probably not more than a minute, and that this duration (with its content perceived as having one part earlier and the other part later) is the original intuition of time.
W. James, Prin. of Psychol., I. 642.

4†. Pertaining to species or a species.—**Specious arithmetic**, algebra: so called by old writers following Viète. The phrase implies that algebra is computation by means of species, or letters denoting quantities; but the choice of the name was probably influenced by the beauty of algebraic processes.—**Specious logistic.** See *logistic*.

=**Syn.** 2. *Colorable, Plausible*, etc. See *ostensible*.

speciously (spē'shus-li), *adv.* In a specious manner; with an appearance of fairness or of reality; with show of right: as, to reason *speciously*.

My dear Anacreon, you reason *speciously*, which is better in most cases than reasoning soundly; for many are led by it and none offended.
Landor, Imag. Conv., Anacreon and Polycrates.

speciousness (spē'shus-nes), *n.* The state or quality of being specious; plausible appearance; fair external show: as, the *speciousness* of an argument.

5. *pl.* A pair of lenses set in a frame adjusted to the eyes, to correct or improve defective vision; also, sometimes, a similar frame with pieces of plain white or colored glass to protect the eyes from glare or dust: commonly called *a pair of spectacles*. The frame was in former times usually of horn or tortoise-shell, and afterward of

Spectacles.

A, spectacles with bows hinged to the shoulders on the rims connected by the nose or bridge. B, spectacles with hook-bows and with bridge and shoulders riveted to the lenses. C, detail showing construction of shoulder. D, side view, showing rim. In all the figures: *a*, bows; *b*, shoulders; *c*, rims; *d*, bridge.

silver; it is now usually of steel or of gold. It is made up of the "bridge," "rims" (or frames of the lenses), "bows," and "sides" or "temples"; but the bows are now often omitted. The frame is so constructed and adjusted as to rest on the nose and ears and hold the lenses in the proper position. Spectacles which are supported on the nose only, by means of a spring, are commonly called *eye-glasses*. Spectacles with convex lenses are for the aged, or far-sighted; and spectacles with concave lenses are for the near-sighted. In both cases the value of spectacles depends upon their being accurately adapted to the person's vision. Spectacles with colored lenses, as green, blue, neutral-tint, or smoke-color, are used to protect the eyes from a glare of light. *Divided spectacles* have each lens composed of two parts of different foci neatly united, one part for observing distant objects, and the other for examining objects near the eye. Another kind, called *periscopic spectacles*, are intended to allow the eyes considerable latitude of motion without fatigue. The lenses employed in this case are of either a meniscus or a concavo-convex form, the concave side being turned to the eye. Spectacles with glazed wings or frames partly filled with crape or wire gauze are used to shield the eyes from dust, etc.

He [Lord Crawford] sat upon a couch covered with deer's hide, and with *spectacles* on his nose (then a recent invention) was laboring to read a huge manuscript called the Rosier de la Guerre. *Scott*, Quentin Durward, vii.

6. *pl.* Figuratively, visual aids of any kind, physical or mental; instruments of or assistance in seeing or understanding; also, instruments or means of seeing or understanding otherwise than by natural or normal vision or perception: as, rose-colored *spectacles;* I cannot see things with your *spectacles*.

And even with this I lost fair England's view,
And bid mine eyes be packing with my heart,
And call'd them blind and dusky *spectacles*,
For losing ken of Albion's wished coast.
Shak., 2 Hen. VI., iii. 2. 112.

Subjects are to look upon the faults of princes with the *spectacles* of obedience and reverence to their place and persons. *Donne*, Sermons, ii.

Shakespeare . . . was naturally learn'd; he needed not the *Spectacles* of Books to read Nature; he look'd inwards, and found her there.
Dryden, Essay on Dram. Poesy (1693), p. 31.

7. *pl.* In *zoöl.*, a marking resembling a pair of spectacles, especially, though not necessarily, about the eyes: as, the *spectacles* of the cobra, which are on the back of the neck.

A pair of white *spectacles* on the eyes, and whitish about base of bill. *Coues*, Key to N. A. Birds, p. 815.

Compound spectacles. (*a*) Spectacles fitted for receiving extra colored glasses, or to which additional lenses can be attached to vary the power. (*b*) A form of spectacles having in each bow two half glasses differing in power or character; divided spectacles. See def. 5.—**Franklin spectacles.** Same as *pantoscopic spectacles* (which see, under *pantoscopic*).

spectacled (spek′ta-kld), *a.* [< *spectacle* + *-ed*^{2}.] 1. Furnished with or wearing spectacles.

The bleared sights
Are *spectacled* to see him. *Shak.*, Cor., ii. 1. 222.

Porphyro upon her face doth look,
Like puzzled urchin on an aged crone
Who keepeth closed a wondrous riddle-book,
As *spectacled* she sits in chimney-nook.
Keats, Eve of St. Agnes, xv.

2. In *zoöl.*: (*a*) Marked in any way that suggests spectacles or the wearing of spectacles: as, the *spectacled* bear or cobra. (*b*) Spectable or spectacular; being "a sight to behold"; spectral: as, the *spectacled* shrimp.—**Spectacled bear,** *Ursus* or *Tremarctos ornatus*, the only South American

Spectacled Bear (*Tremarctos ornatus*).

bear, having a light-colored mark on the face, like a pair of spectacles.—**Spectacled cobra,** any specimen of the common Indian cobra, *Naja tripudians*, which has the markings of the back of the hood well developed so as to resemble a pair of spectacles. See cut under *cobra-de-capello*.—**Spectacled coot, spectacled duck,** the surf-scoter or -duck, *Œdemia perspicillata;* the goggle-nose. [Connecticut.]—**Spectacled eider,** *Somateria* (*Arctonetta*) *fisheri*, an eider-duck of the northwest coast of America, having in the male the eyes set in silvery-white plumage rimmed with black.—**Spectacled goose, guillemot, snake, stenoderm.** See the nouns.—**Spectacled shrimp,** the specter- or skeleton-shrimp, a caprellid. See *Caprella*.—**Spectacled vampire.** Same as *spectacled stenoderm*.

spectacled-headed (spek′ta-kld-hed″ed), *a.* Having the head spectacled: applied to flies of the genera *Holcocephala* (family *Asilidæ*) and *Diopsis* and *Sphyracephala* (family *Diopsidæ*). See cut under *Diopsis*.

A queer-looking, *spectacled-headed*, predatory fly. . . . The head is unusually broad in front, the eyes being very prominent and presenting a spectacled or goggled appearance. *C. H. Tyler Townsend*, Proc. Entom. Soc. [of Washington, I. 254.

spectacle-furnace (spek′ta-kl-fėr″nās), *n.* A literal translation of the German *brillenofen*, which is a variety of the *spurofen*, a form of shaft-furnace of which the essential peculiarity is that the melted material runs out upon the inclined bottom of the furnace into a crucible-like receptacle or pot outside and in front of the furnace-stack. This sort of furnace has been used at Mansfeld and in the Harz, but apparently not in any English-speaking country.

spectacle-gage (spek′ta-kl-gāj), *n.* A device used in fitting spectacles to determine the proper distance between the glasses.

spectacle-glass (spek′ta-kl-glȧs), *n.* 1. Glass suited for making spectacles; optical glass.—2. A lens of the kind or form used in spectacles.—3†. A field-glass; a telescope.

A°. 1678 he added a *spectacle-glass* to the shadow-vane of the lesser arch of the Sea-quadrant.
Aubrey, Lives (Edmund Halley).

spectacle-maker (spek′ta-kl-mā″kėr), *n.* A maker of spectacles; one who makes spectacles, eye-glasses, and similar instruments. The Spectacle-makers' Company of London was incorporated in 1630.

spectacle-ornament (spek′ta-kl-ôr″na-ment), *n.* A name given to an ornament, often found in sculptured stones in Scotland, consisting of two disks connected by a band: the surface so marked out is often covered with interlaced whorl-ornaments.

spectacular (spek-tak′ū-lär), *a.* [< L. *spectaculum*, a sight, show (see *spectacle*), + *-ar*^{3}.] 1. Pertaining to or of the nature of a show or spectacle; marked or characterized by great display: as, a *spectacular* drama.

The *spectacular* sports were concluded.
Hickes, Sermon, Jan. 30, 1681.

2. Pertaining to spectacles or glasses for assisting vision. [Rare.]

spectacularity (spek-tak-ū-lar′i-ti), *n.* [< *spectacular* + *-ity*.] Spectacular character or quality; likeness to or the fact of being a spectacle or show.

It must be owned that when all was done the place had a certain *spectacularity;* the furniture and ornaments wore somehow the air of properties.
Howells, Private Theatricals, x.

spectacularly (spek-tak′ū-lär-li), *adv.* In a spectacular manner or view; as a spectacle.

The last test was, *spectacularly*, the best of the afternoon.
Sci. Amer., N. S., LVII. 360.

spectant (spek′tant), *a.* [< L. *spectan(t-)s*, ppr. of *spectare*, look at, behold, freq. of *specere*, look at, behold: see *spectacle*, *species*.] In *her.*: (*a*) At gaze. (*b*) Looking upward with the nose bendwise: noting any animal used as a bearing.

spectate (spek′tāt), *v. t.* and *i.* [< L. *spectatus*, pp. of *spectare*, see, behold: see *spectant*.] To look about or upon; gaze; behold. [Obsolete or archaic.]

Coming on the Bridge, a Gentleman sitting on the Coach civilly salutes the *Spectating* Company; the turning of the Wheels and motion of the Horses are plainly seen as if natural and Alive.
Quoted in *Ashton's* Social Life in Reign of Queen Anne, [I. 287.

Pg. *espectro* = It. *spettro*, an image, figure, ghost, < L. *spectrum*, a vision, appearance, apparition, image, < *specere*, see: see *species*, *spectacle*. Cf. *spectrum*.] 1. A ghostly apparition; a visible incorporeal human spirit; an appearance of the dead as when living. Specters are imagined as disembodied spirits haunting or revisiting the scenes of their mundane life, and showing themselves in intangible form to the living, generally at night, from some overpowering necessity, or for some benevolent or (more usually) malevolent purpose. They are sometimes represented as speaking, but more commonly as only using terrifying or persuasive gestures to induce compliance with their wishes. The word is rarely used for the dissociated soul of a living person.

The ghosts of traitors from the Bridge descend,
With bold fanatic *spectres* to rejoice.
Dryden, Annus Mirabilis, st. 223.

One of the afflicted,
I know, bore witness to the apparition
Of ghosts unto the *spectre* of this Bishop,
Saying, "You murdered us!"
Longfellow, Giles Corey, iii. 2.

A fine traditional *spectre* pale,
With a turnip head and a ghostly wail,
And a splash of blood on the dickey!
W. S. Gilbert, Haunted.

2. In *zoöl.*: (*a*) One of many names of gressorial orthopterous insects of the family *Phasmidæ*; a walking-stick or stick-insect; a specter-insect. (*b*) The specter-bat. (*c*) The specter-lemur. (*d*) A specter-shrimp.—**Specter of the Brocken**, an optical phenomenon named from the Brocken, a mountain of the Harz range, where it has been most frequently observed. It consists of the shadow of the observer cast at sunrise or sunset in apparently gigantic size upon the mist or fog about the mountain-summit. The shadow is sometimes inclosed in a prismatic circle called the *Brocken bow*, and again is bordered with a colored fringe. Howitt states that, if the fog is very dry, one sees not only one's self, but one's neighbor; if very damp, only one's self, surrounded by a rainbow-colored glory. Also *Brocken specter*.=**Syn. 1.** *Apparition*, *Phantom*, etc. See *ghost*.

specter-bat (spek′tėr-bat), *n.* The spectral bat, a South American leaf-nosed bat or vampire, *Phyllostoma spectrum*, or a similar species.

specter-candle (spek′tėr-kan″dl), *n.* A straight fossil cephalopod, as a baculite, belemnite, or orthoceratite. These and similar objects have often been superstitiously regarded, in ignorance of their origin and nature. See *bætylus*, *ealagrama*, and *thunder-stone*.

specter-crab (spek′tėr-krab), *n.* A glass-crab; one of the larval forms which were called *Phyllosomata*. See cut under *glass-crab*.

specter-insect (spek′tėr-in″sekt), *n.* Same as *specter*, 2 (*a*).

specter-lemur (spek′tėr-lē″mėr), *n.* The tarsier, *Tarsius spectrum*. See cut under *tarsier*.

specter-shrimp (spek′tėr-shrimp), *n.* A small læmodipod crustacean of the family *Caprellidæ*, as *Caprella tuberculata*; a skeleton-shrimp: so called from the singular form and aspect.

spectra, *n.* Plural of *spectrum*.

spectral (spek′tral), *a.* [= F. *spectral*, < L. *spectrum*, specter: see *specter*.] 1. Of or pertaining to a specter; resembling or having the aspect of a specter; ghostlike; ghostly.

Some of the *spectral* appearances which he had been told of in a winter's evening. *Scott*, Bride of Lammermoor, xiii.

To his excited fancy everything assumed a *spectral* look. The shadows of familiar things about him stalked like ghosts through the haunted chambers of his soul.
Longfellow, Hyperion, iv. 3.

Spectral in the river-mist
The ship's white timbers show.
Whittier, The Ship-builders.

2. Pertaining to spectra, or pertaining to the prismatic or diffraction spectrum; exhibiting the hues of the prismatic spectrum; produced by the aid of the spectrum: as, *spectral* colors; *spectral* analysis.

It is important to be able to observe the varying effects of pressure and density upon *spectral* phenomena.
J. N. Lockyer, Spect. Anal., p. 75.

3. In *zoöl.*, like or likened to a specter or apparition; suggestive of a ghost in any way: as, the *spectral* bat; *spectral* shrimps; *spectral* insects.—**Spectral lemur**, the tarsier.—**Spectral owl**, *Syrnium cinereum*, or *Strix cinerea*, the great gray owl of arctic America, remarkable for having more plumage in proportion to the size of the body than any other owl.

spectrality (spek-tral′i-ti), *n.*; pl. *spectralities* (-tiz). [< *spectral* + *-ity*.] The state of being spectral; a spectral being or object. [Rare.]

What is he doing here in inquisitorial sanbenito, with nothing but ghastly *spectralities* prowling round him?
Carlyle, Sterling, i. 1. (*Davies.*)

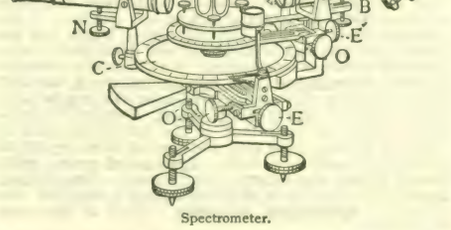
spectrally (spek′tral-i), *adv.* In a spectral manner; like a ghost or specter.

spectre, *n.* See *specter*.

spectrobolometer (spek″trō-bō-lom′e-tėr), *n.* [< NL. *spectrum*, spectrum, + E. *bolometer*.] An instrument consisting of a bolometer in combination with a spectroscope, used in the study of the distribution of heat in the solar spectrum and in similar investigations. The absorbing surface of the bolometer is an extremely slender strip of platinum, and it is so mounted that this can be moved at will to any desired part of the spectrum, the amount of heat received being measured, as usual, by the deflection of a galvanometer-needle.

spectrograph (spek′trō-graf), *n.* [< NL. *spectrum* + Gr. *γράφειν*, write.] An apparatus designed to give a representation of the spectrum from any source, particularly one in which photography is employed; a spectroscope in which a sensitive photographic plate takes the place of the eyepiece of the observing telescope.

spectrographic (spek-trō-graf′ik), *a.* [< *spectrograph* + *-ic*.] Pertaining to a spectrograph or the observations made with it; specifically, relating to the process or results of photography as applied to the study of spectra.



Spectrographic operations are, as Professor Young well says, much more sensitive to atmospheric conditions than are visual observations. *D. Todd*, Science, III. 727.

spectrography (spek-trog′ra-fi), *n.* [As *spectrograph* + *-y*³.] The art of using the spectrograph.

spectrological (spek-trō-loj′i-kal), *a.* [< *spectrology* + *-ic-al*.] Of or pertaining to spectrology; performed or determined by spectrology: as, *spectrological* analysis.

spectrology (spek-trol′ō-ji), *n.* [< NL. *spectrum* + Gr. *-λογία*, < *λέγειν*, speak: see *-ology*.] That branch of science which determines the constituent elements and other conditions of bodies by examination of their spectra.

spectrometer (spek-trom′e-tėr), *n.* [< NL. *spectrum*, spectrum, + L. *metrum*, measure.] An instrument used chiefly to measure the angular deviation of light-rays in passing through a prism, and hence to determine the refractive indices of the substance of which the prism is formed. Its essential parts are—(1) a tube B (see figure), having a slit at the further end through which the light is thrown by the mirror M, and a collimating lens at the other end to convert the divergent pencil into a parallel beam; (2) the prism P, which can be turned upon the central axis, its position being centered by two slides moved at right angles to each other by means of the screws E and E′; (3) the observing telescope A, the eyepiece of which is provided with cross-wires so that the position of a given line can be accurately fixed; the axis of the telescope can be made horizontal by the screw N. After the position of the prism has been accurately adjusted, usually so as to give the minimum deviation for the given ray, the angle of deviation is measured by the telescope moving with the graduating circle C, while the prism (with the vernier) is stationary. By the tangent screws at O and O′ the positions of the two circles can be adjusted more delicately. The instrument can also be used, like the ordinary reflecting goniometer (it is then a spectrometer-goniometer), to measure the angle between the two faces of the prism, which angle, with that of the minimum deviation, is needed to give the data for calculating the required refractive index. (See *refraction*.) If a diffraction-grating instead of a prism is employed, the telescope A is moved into the position A′, making a small angle with the tube B; the instrument may then be used to measure the wave-length of a given light-ray.

Spectrometer.

spectrometric (spek-trō-met′rik), *a.* [As *spectrometer* + *-ic*.] Pertaining to a spectrometer or the observations made with it.

spectromicroscopical (spek-trō-mī-krō-skop′i-kal), *a.* [< NL. *spectrum* + E. *microscopical*.] Pertaining to spectroscopic observations made in connection with the microscope.

The *spectro-microscopical* apparatus, especially in the hands of botanists, has become an important instrument in the investigation of the coloring matter of plants.
Behrens, Micros. in Botany (trans.), ii. 139.

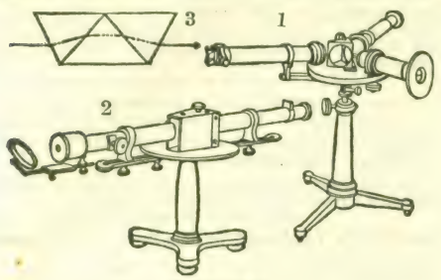
spectrophone (spek′trō-fōn), *n.* [< NL. *spectrum* + Gr. *φωνή*, sound.] An adaptation of the principle of the radiophone, devised by Bell to be used in spectrum analysis. It consists of a spectroscope the eyepiece of which is removed—the sensitive substances being placed in the focal point behind an opaque diaphragm containing a slit, while the ear is in communication with the substances by means of a hearing-tube. See the quotation.

Suppose we smoke the interior of our spectrophonic receiver, and fill the cavity with peroxide of nitrogen gas. We have then a combination that gives us good sounds in all parts of the spectrum (visible and invisible) except the ultra violet. Now pass a rapidly interrupted beam of light through some substances whose absorptive spectrum is to be investigated, and bands of sound and silence are observed in exploring the spectrum, the silent positions corresponding to the absorption bands.
A. G. Bell, in Philosoph. Mag., 5th ser., II. 527, 1881.

spectrophonic (spek-trō-fon′ik), *a.* [As *spectrophone* + *-ic*.] Of or pertaining to the spectrophone, or investigations made by means of it.

spectrophotometer (spek″trō-fō-tom′e-tėr), *n.* [< NL. *spectrum* + E. *photometer*.] An instrument used to compare the intensities of two spectra (as from the limb and center of the sun), or the intensity of a given color with that of the corresponding color in a standard spectrum. It is based upon the fact that the eye is very sensitive to slight differences of intensity between two similar colors when brought side by side. It consists essentially of a spectroscope arranged with total reflecting prisms, so that, for example, the spectra to be compared can be brought into immediate juxtaposition, while Nicol prisms in the path of the pencil of rays make it possible to diminish the intensity of the brighter light until the two exactly correspond. The angular position of the analyzing prism gives the means of deducing the required relation in intensity.

spectrophotometric (spek-trō-fō-tō-met′rik), *a.* [As *spectrophotometer* + *-ic*.] Pertaining to the spectrophotometer, to its use, or to observations made with it.



spectrophotometry (spek″trō-fō-tom′e-tri), *n.* [As *spectrophotometer* + *-y*³.] The art of using the spectrophotometer.

spectropolariscope (spek″trō-pō-lar′i-skōp), *n.* [< NL. *spectrum* + E. *polariscope*.] A combination of the spectroscope and the polariscope, an instrument sometimes used in the analysis of sugar. It is a modification of a form of the saccharimeter.

spectropyrometer (spek″trō-pī-rom′e-tėr), *n.* [< NL. *spectrum* + E. *pyrometer*.] An instrument devised by Crova for measuring high temperatures, based upon the principle that two incandescent bodies of the same radiating power have the same temperature when their spectra are identical in extent. It is essentially a form of spectrophotometer.

spectroscope (spek′trō-skōp), *n.* [< NL. *spectrum* + Gr. *σκοπεῖν*, view.] An instrument used to produce a spectrum of the light (or, more generally, the radiation) from any source by the passage of the rays through a prism or their reflection from a grating, and for the study of the spectrum so formed. In its common form the essential parts of the *prismatic spectroscope* are—(1) a tube with a slit at the further end (see fig. 1), through which the light enters, and at the other end a collimating lens which brings the rays into a parallel beam (the slit is formed between two parallel edges the distance between which can be varied at will); (2) a prism to refract and disperse the rays, or a series or train of prisms when greater dispersion is desired—a gain, however, which is accompanied by a serious diminution in the intensity of the light; (3) a telescope through which the magnified image of the spectrum thus formed is viewed. A third tube is usually added, containing a scale, which is illuminated by a small gas-flame and reflected from the surface of the prism into the telescope, thus giving the means of fixing the position of the lines observed. A small glass comparison prism is often placed in front of half the slit, and through it, by total reflection, a second beam of light can be introduced, the spectrum of which is seen directly over the other. An instrument which gives a spectrum when the source of the light is in a straight line with the eye—that is, which gives dispersion without deviation—is called a *direct-vision spectroscope* (see

fig. 2); this may be accomplished by combining two crown-glass prisms, with a third flint-glass prism of an angle of

Spectroscopes.

90° between them (fig. 3). For certain rays—for example, the yellow—there is no divergence while a spectrum is obtained, since the dispersion of the flint-glass prism in one direction is greater than that of the two crown-glass prisms in the opposite direction. Other forms of direct-vision spectroscope have also been devised. In the *grating spectroscope*, or *diffraction spectroscope*, a diffraction-grating (a series of very fine parallel lines ruled on glass or speculum-metal) takes the place of the prism; and the parallel rays falling upon it are reflected, and form a series of diffraction-spectra (see *diffraction*, *grating*[2], 2, and *interference*, 5), which are called *normal spectra* (see *spectrum*, 3), since the dispersion of the rays is proportional to their wave-length. A prism is sometimes used before the telescope to separate parts of the successive spectra which would otherwise overlap. If a Rowland grating (see *diffraction*) is employed, the arrangements can be much simplified, since the large concave surface of the grating forms an image directly, which may be received upon a screen, or for study upon a photographic plate, or viewed through an eyepiece with cross-wires to fix the position of the lines observed. The grating is supported at one end of a rigid bar, in practice about 21 feet in length, at the other end of which, and at the center of curvature of the concave surface, is the eyepiece or support for the sensitive plate. The ends of this bar rest on carriages moving on two rails at right angles to each other; and, as the end carrying the eyepiece is moved, the whole length of the spectrum (several feet) may be successively observed, the fixed beam of parallel rays from the slit falling upon the grating as its position is slowly turned. The whole apparatus is mounted on rigid supports in a room from which all light but that received through the slit is carefully excluded. A high degree of dispersion is thus obtained, combined with the advantage of the normal spectrum, and the further advantages that the amount of light employed is large, while the disturbing effect of the absorption of the material of the prisms is avoided. See further under *spectrum*.—**Analyzing spectroscope, integrating spectroscope,** terms applied to the spectroscope (Young) to describe its use, with or without a lens throwing an image of the luminous object upon the slit. In the former case, different parts of the slit are illuminated by light from different parts of the object, and their spectra can be separately compared, or, in other words, the light is thus analyzed; while in the second case, when the collimator is pointed toward the source of light, the combined effect of the whole is obtained.—**Half-prism spectroscope,** a spectroscope in which the beam of rays enters the prism at right angles to one face, and suffers dispersion only on emerging from the face opposite and inclined to it. The half-prism ordinarily employed is half of a compound prism such as is used in the direct-vision spectroscope.—**Rainband-spectroscope.** See *rainband*.

spectroscopy (spek′trō-skō-pi), *n.* [As *spectroscope* + *-y*[3].] That branch of science, more particularly of chemical and physical science, which is concerned with the use of the spectroscope and with spectrum analysis.

★**spectrum** (spek′trum), *n.*; pl. *spectra* (-trȧ). [< NL. *spectrum*, a spectrum, < L. *spectrum*, an appearance, an image or apparition: see *specter*.] 1†. A specter; a ghostly phantom.—2. An image of something seen, continuing after the eyes are closed, covered, or turned away. If, for example, one looks intently with one eye upon any colored object, such as a wafer placed on a sheet of white paper, and immediately afterward turns the same eye to another part of the paper, one sees a similar spot, but of a different color. Thus, if the wafer is red, the seeming spot will be green; if black, it will be changed into white. These images are also termed *ocular spectra*.

3. In *physics*, the continuous band of light (*visible spectrum*) showing the successive prismatic colors, or the isolated lines or bands of color, observed when the radiation from such a source as the sun, or an ignited vapor in a gas-flame, is viewed after having been passed through a prism (*prismatic spectrum*) or reflected from a diffraction-grating (*diffraction-* or *interference-spectrum*). The action of the prism (see *prism* and *refraction*) is to refract the light and at the same time to separate or disperse the rays of different wave-lengths, the refraction and dispersion being greater as the wave-length diminishes. The grating (see *grating*[2], 2), which consists usually of a series of fine parallel lines (say 10,000 or 20,000 to the inch) ruled on speculum-metal, diffracts and at the same time disperses the light-rays, forming a series of spectra whose lengths depend upon the closeness of the lines. If, now, a beam of white light is passed through a slit, and then by a collimator lens is thrown upon a prism, and the light from this received upon a screen, a colored band will be obtained passing by insensible degrees, from the less refrangible end, the red, to the more refrangible end, the violet, through a series of colors ordinarily described as red, orange, yellow, green, blue, indigo, and violet. A similar effect is obtained from a grating, with, however, this difference, that in the prismatic spectrum the red covers only a small part relatively of the colored band, since the action of the prism is to crowd together the less refrangible rays and separate the more refrangible rays of less wave-length, and thus distort the spectrum. The diffraction-spectrum, on the other hand, shows the red occupying about the same space as the blue and violet, and is called a *normal spectrum*. When the light from different sources is studied in the spectroscope, it is found, first, that a solid or a liquid when incandescent gives a continuous spectrum, and this is true of gases also at great pressures; second, bodies in the gaseous form give discontinuous spectra, consisting of colored bright lines (*line-spectrum*) or bands (*band-spectrum*), or of bands which under certain conditions appear as channeled spaces or flutings (*fluted spectrum*), and these lines or bands for a given substance have a definite position, and are hence characteristic of it; third, if light from an incandescent solid or liquid body passes through a gas (at a lower temperature than the incandescent body), the gas absorbs the same rays as those its own spectrum consists of; therefore, in this case, the result is a spectrum (*absorption-spectrum*) continuous, except as interrupted by black lines occupying the same position as the bright lines in the spectrum of the gas itself would occupy. An absorption-spectrum, showing more or less sharply defined dark bands, is also obtained when the light has passed through an appropriate liquid (as blood), or a solid such as a salt of didymium (see further under *absorption*). For example, the spectrum from a candle-flame is continuous, being due to the incandescent carbon particles suspended in the flame. If, however, the yellow flame produced when sodium is inserted in the flame of a Bunsen burner is examined, a bright-yellow line is observed, or if the dispersion is sufficient, two neighboring lines; if a lithium flame, then a red and a yellow line are seen; the strontium flame gives a more complex spectrum, consisting of a number of lines, chiefly in the red and yellow; and so of other substances. For substances like iron, and other metals not volatile except at very high temperatures, the heat of the voltaic arc is employed, and by this means their spectra, often consisting of a hundred or more lines, can be mapped out. Still again, if the light from the sun is studied in the same way, it is found to give a bright spectrum from red to violet, but crossed by a large number of dark lines called *Fraunhofer lines*, because, though earlier seen by Wollaston (1802), they were first mapped by Fraunhofer in 1814; this name is given especially to the more prominent of them, which he designated by the

Fixed Lines and Colored Spaces of Prismatic Spectrum (I.) and Normal Spectrum (II.).

letters A to H, etc. (See the figures.) These lines, as explained above, are due to the absorption by gases, either in the sun's atmosphere or in that of the earth. When the light is passed through a train of prisms, or reflected from a Rowland grating, and thus a very high degree of dispersion obtained, the rays are more widely separated and the spectrum can be more minutely examined. Studied in this way, it is found that the dark lines in the solar spectrum number many thousands, the greater part of which can be identified in the spectra of known terrestrial substances. Thus, the presence in the sun's atmosphere of thirty-six elements has been established (Rowland, 1891); these include sodium, potassium, calcium, magnesium, iron, copper, cobalt, silver, lead, tin, zinc, titanium, aluminium, chromium, silicon, carbon, hydrogen, etc. The radiation from the sun consists not only of those rays whose wave-length is such as to produce the effect of vision upon the eye, but also of others of greater wave-length than the red rays and less wave-length than the violet; the spectrum from such a source consequently includes, besides the luminous part, an invisible part (*invisible spectrum*) below the red, called the *infra-red* region, and another beyond the violet, called the *ultra-violet*. The first region is also present in the spectrum from any hot body, and the latter in that from a body at a high temperature—for example the incandescent carbons of an arc electric light. Rubens and Nichols, by means of the bolometer, have proved the existence of rays having a wave-length more than fifty times that of the luminous red rays. While the visible spectrum includes rays separated by only about one octave (since the wave-length for the extreme red is approximately twice that of the extreme violet), the full spectrum, from the extreme ultra-violet to the longest waves recognized by the bolometer, embraces several octaves. In other words, it extends from rays having a wave-length of 0.10 of a micron to those whose wave-length is 50 microns (1 micron = $\frac{1}{1000}$ millimeter), and it is certain that the limits have not yet been reached in either direction. The invisible regions of the spectrum cannot be directly studied by the eye, but they can be explored, first by photography, it being possible to prepare suitable plates which are sensitive to the infra-red as well as others sensitive to ultra-violet rays, and such photographs show the presence of many additional absorption-lines. The invisible infra-red region (*heat-spectrum*) can also be explored by the thermopile, the bolometer, or the radiometer, the distribution of the heat thus examined, and a thermogram of the spectrum constructed in which the presence of "cold" absorption-bands is noted. Still again, the method of phosphorescence is employed to give a phosphorograph of the spectrum, while fluorescence is made use of in studying the ultra-violet region. In studying the invisible heat-spectrum lenses and prisms of rock-salt must be used, because the dark rays of long wave-length are largely absorbed by glass; further, in investigating the invisible ultra-violet region quartz is similarly employed, since it is highly transparent to these short wave-length vibrations. In many investigations it is of great advantage to use the grating-spectroscope, especially one provided with a concave Rowland grating, since then the normal spectrum (fig. II.) is obtained directly without the use of the usual lenses and prisms, and hence free from their distorting effects. Recent photographs of the solar spectrum obtained by Prof. Rowland in this way give a clearness of definition combined with high dispersion never before approached. Thus, in their enlarged form as published (1890), the double sodium-lines are widely separated, and sixteen distinct fine lines may be counted between them. It was formerly the custom to divide the solar spectrum into three parts, formed by the invisible heat-rays, the luminous rays, and the so-called chemical or actinic rays. This threefold division of the spectrum is, however, erroneous, since all the rays of the spectrum are "heat-rays" if they are received upon an absorbing surface, as lampblack; and, while it is true that the chemical change upon which ordinary photography depends is most stimulated by the violet and ultra-violet rays, this is not true universally of all chemical changes produced by direct radiation. The rays from the lowest end of the spectrum to the highest differ intrinsically in wave-length only, and the difference of effect observed is due to the character of the surface upon which they fall. The spectra of the stars, of the comets, nebulæ, etc., can be studied in the same way as the solar spectrum, and the result has been to throw much light upon the constitution of these bodies; the spectrum of the aurora has been similarly examined. In addition to its use in the study of cosmical physics, spectrum analysis has proved a most delicate and invaluable method to the chemist and physicist in the examination of the different elements and their compounds. By this method of research a number of new elements have been detected (as rubidium, cæsium, indium, thallium); and recently the study of the absorption-spectra of the earths—obtained from samarskite, gadolinite, and other related minerals—has served to show the existence of a group of closely related elements whose existence had not before been suspected. Further, the study of the change in the spectra of certain elements under different conditions of temperature has led Lockyer to some most important and suggestive hypotheses as to the relation between them and their possible compound nature.

By using new kinds of glass which allow of proportional dispersion in different parts of the spectrum (see *apochromatic*), Abbe has made lenses which collect three colors to one focus, leaving only a small residual aberration uncorrected, which is called the *tertiary spectrum*.

specula, *n.* Plural of *speculum*.

speculable (spek′ū-la-bl), *a.* Knowable.

specular (spek′ū-lär), *a.* [= F. *spéculaire* = Pr. *specular* = Sp. Pg. *especular* = It. *speculare*, < L. *specularis*, belonging to a mirror, < *speculum*, a mirror: see *speculum*.] 1. Of or pertaining to a mirror; capable of reflecting objects: as, a *specular* surface; a *specular* mineral; *specular* metal (an alloy prepared for making mirrors).—2. Assisting or facilitating vision; serving for inspection or observation; affording a view: as, a *specular* orb (the eye or a lens); *specular* stone (an old name for mica used in windows, in Latin *specularis lapis*); a

specular tower (one serving as a lookout). [Archaic.]

It is distinguished from the allied genus *Campanula* by its wheel-shaped or shallow and broadly bell-shaped corolla and linear or narrowly oblong ovary. There are about 10 species, natives of the northern hemisphere, chiefly of southern and central Europe, with one in South America. They are annual herbs, either erect or decumbent, and smooth or bristly. They bear alternate entire or toothed leaves, and blue, violet, or white two-bracted flowers nearly or quite sessile in the axils. *S. Speculum* is the Venus's looking-glass, formerly a favorite in English gardens; *S. hybrida* is there known as the *corn-violet;* and *S. perfoliata*, native in the United States, is remarkable for its dimorphous flowers, the earlier being minute and cleistogamic.

Thou hast no *speculation* in those eyes
Which thou dost glare with.
Shak., Macbeth, iii. 4. 95.

I am arrived to that perfection in *speculation* that I understand the language of the eyes.
Steele, Spectator, No. 354.

2. The pursuit of truth by means of thinking, especially mathematical reasoning and logical analysis; meditation; deep and thorough consideration of a theoretical question. This use of the word, though closely similar to the application of *speculatio* in the Latin of Boëthius to translate θεωρία, is chiefly due to 1 Cor. xiii. 12, "now we see through a glass, darkly," where 'glass' is in the Vulgate *speculum*. But some writers, as Milton and Cowper, associate the meaning with *specula*, 'a watch-tower.'

For practise must agree with *speculation*,
Belief & knowledge must guide operation.
Times' Whistle (E. E. T. S.), p. 147.

Thenceforth to *speculations* high or deep
I turn'd my thoughts. *Milton*, P. L., ix. 602.

Join sense unto reason, and experiment unto *speculation*.
Sir T. Browne, Christ. Mor., ii. 5.

From him [Pythagoras] Socrates derived the principles of virtue and morality, . . . and most of his natural *speculations*. *Sir W. Temple*, Ancient and Modern Learning.

The brilliant fabric of *speculation* erected by Darwin can scarcely sustain its own weight.
Dawson, Nature and the Bible, p. 240.

3. In *philos.*, sometimes, a purely a priori method of philosophizing: but commonly in philosophy the word has the meaning 2, above. —**4.** The investing of money at a risk of loss on the chance of unusual gain; specifically, buying and selling, not in the ordinary course of commerce for the continuous marketing of commodities, but to hold in the expectation of selling at a profit upon a change in values or market rates. Thus, if a merchant lays in for his regular trade a much larger stock than he otherwise would because he anticipates a rise in prices, this is not termed *speculation;* but if he buys what he does not usually deal in, not for the purpose of extending his business, but for the chance of a sale of the particular articles at a profit by reason of anticipated rise, it is so termed. In the language of the exchanges, *speculation* includes all dealing in futures and options, whether purchases or sales.

The establishment of any new manufacture, of any new branch of commerce, or of any new practice in agriculture, is always a *speculation* from which the projector promises himself extraordinary profits.
Adam Smith, Wealth of Nations, I. x. 1.

A vast *speculation* had fail'd,
And ever he mutter'd and madden'd.
Tennyson, Maud, i. 3.

5. A game at cards, the leading principle of which is the purchase of an unknown card on the calculation of its probable value, or of a known card on the chance of no better appearing during the game, a part of the pack not being dealt. *Latham.*—**Syn. 2.** *Hypothesis*, etc. See *theory*.

speculatist (spek′ū-lā-tist), *n.* [⟨ *speculate* + *-ist*.] A speculative philosopher; a person who, absorbed with theoretical questions, pays little attention to practical conditions.

Such *speculatists*, by expecting too much from friendship, dissolve the connection. *Goldsmith*, Friendship.

Fresh confidence the *speculatist* takes
For every hare-brain'd proselyte he makes.
Cowper, Progress of Error.

speculative (spek′ū-lā-tiv), *a.* [= F. *spéculatif* = Sp. Pg. *especulativo* = It. *speculativo*, ⟨ LL. *speculativus*, pertaining to or of the nature of observation, ⟨ L. *speculari*, view: see *speculate*.] **1†.** Pertaining to or affording vision or outlook: a meaning influenced by Latin *specula*, 'a watch-tower.'

Now roves the eye;
And, posted on this *speculative* height,
Exults in its command. *Cowper*, Task, i. 289.

2†. Looking; observing; inspecting; prying.

My *speculative* and officed instrument.
Shak., Othello, i. 3. 271.

To be *speculative* into another man, to the end to know how to work him or wind him or govern him, proceedeth from a heart that is double and cloven.
Bacon, Advancement of Learning, i

3. Given to speculation; contemplative; theoretical.

He [Washington] was not a *speculative*, but a practical man; not at all devoted to Ideas.
Theodore Parker, Historic Americans, Washington, p. 114.

Speculative men are deemed unsound and frivolous.
Emerson, Misc., p. 12.

4. Purely scientific; having knowledge as its end; theoretical: opposed to *practical;* also (limiting a noun denoting a person and signifying his opinions or character), in theory, and not, or not merely, in practice; also, cognitive; intellectual. In this sense (which has no connection with *speculation*), *speculative* translates Aristotle's θεωρητικός. Thus, *speculative science* is science pursued for its own sake, without immediate reference to the needs of life, and does not exclude experimental science.

I do not think there are so many *speculative* atheists as men are wont to imagine.
Boyle, Christian Virtuoso, part i.

It is evidently the intention of our Maker that man should be an active and not merely a *speculative* being.
Reid, Active Powers, Int.

When astronomy took the form of a *speculative* science, words were invented to denote distinctly the conceptions thus introduced.
Whewell, Philos. of Inductive Sciences, I. liii.

A distinction merely *speculative* has no concern with the most momentous of all practical controversies.
J. R. Seeley, Nat. Religion, p. 51.

5. Inferential; known by reasoning, and not by direct experience: opposed to *intuitive;* also, improperly, purely a priori. This meaning was introduced into Latin by Anselm, with reference to 1 Cor. xiii. 12, where the Vulgate has *speculum*. *Speculative cognition* is cognition not intuitive.

6. Pertaining or given to speculation in trade; engaged in speculation, or precarious ventures for the chance of large profits; of the nature of financial speculation: as, a *speculative* trader; *speculative* investments or business.

The *speculative* merchant exercises no one regular, established, or well-known branch of business.
Adam Smith, Wealth of Nations, I. x. 1.

Speculative geometry, philosophy, reason, theology, etc. See the nouns.

speculatorial† (spek″ū-lā-tō′ri-al), *a.* [⟨ L. *speculatorius*, pertaining to a scout or observer (see *speculatory*), + *-al*.] Speculatory.

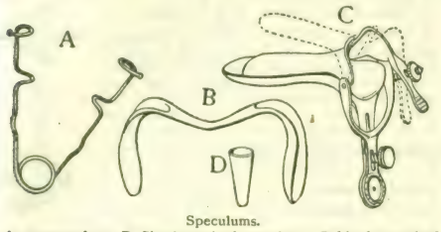
speculatory (spek′ū-lā-tō-ri), *a.* [⟨ L. *speculatorius*, pertaining to a scout or observer, ⟨ *speculator*, an observer: see *speculator*.] **1†.** Practising or intended for oversight or outlook; overseeing; overlooking; viewing.

My privileges are an ubiquitary, circumambulatory, *speculatory*, interrogatory, redargutory immunity over all the privy lodgings. *Carew*, Cœlum Britannicum.

Both these [Roman encampments] were nothing more than *speculatory* outposts to the Akeman-street.
T. Warton, Hist. Kiddington, p. 66.

2. Given to, or of the nature or character of, speculation; speculative. [Rare.]

speculatrix (spek′ū-lā-triks), *n.*; pl. *speculatrices* (spek″ū-lā-trī′sēz). [L., fem. of *speculator:* see *speculator*.] A female speculator. [Rare.]



A communion with invisible spirits entered into the general creed [in the sixteenth century] throughout Europe, and crystal or beryl was the magical medium. . . . Persons even of ordinary rank in life pretended to be what they termed speculators, and sometimes women were *speculatrices*. *I. D'Israeli*, Amen. of Lit., II. 297.

★**speculum** (spek′ū-lum), *n.*; pl. *specula* (-lạ), sometimes *speculums* (-lumz). [⟨ L. *speculum*, a mirror, a copy or imitation (cf. *specula*, a watch-tower, lookout), ⟨ *specere*, look at, behold: see *species*.] **1.** Something to look into or from; specifically, a mirror or looking-glass. —**2.** An attachment to or part of an optical instrument, as a reflecting telescope, having a brightly polished surface for the reflection of objects. Specula are generally made of an alloy called *speculum-metal*, consisting of two parts of copper to one of tin, sometimes with a little arsenic to increase its whiteness. Another speculum alloy is made of equal weights of steel and platinum. Specula are also made of glass covered with a film of silver on the side turned toward the object.

3. In *ornith.*: (*a*) An ocellus or eye-spot, as of a peacock's tail. See *ocellus*, 4. (*b*) The mirror of a wing, a specially colored area on some of the flight-feathers. It is usually iridescent-green, purple, violet, etc., and formed by a space of such color on the outer webs of several secondaries, toward their end, and commonly set in a frame of different colors formed by the tips of the same secondaries or of the greater wing-coverts, or of both. Sometimes it is dead-white, as in the gadwall. A speculum occurs in various birds, and as a rule in ducks, especially the *Anatinæ*, being in these so constant and characteristic a marking that some breeds of game-fowls are named *duckwing* in consequence of a certain resemblance in the wing-markings. See *silver-duckwing*. Also called *mirror*. See cuts under *Chaulelasmus* and *mallard*.

The wing [in *Anatinæ*] has usually a brilliant *Speculum*, which, like the other wing-markings, is the same in both sexes. *Coues*, Key to N. A. Birds, p. 690.

Spellynge, sillabicacio. *Prompt. Parv.*, p. 468.

Our common *spelling* is often an untrustworthy guide to etymology. *J. Hadley*, Essays, p. 356.

To prepare the way for such a change [a reform in spelling] the first step is to break down, by the combined influence of enlightened scholars and of practical educators, the immense and stubborn prejudice which regards the established modes of *spelling* almost as constituting the language, as having a sacred character, as in themselves preferable to others. All agitation and all definite proposals of reform are to be welcomed so far as they work in this direction. *Proc. Amer. Philol. Assoc.*, VII. 35.

It may be observed that it is mainly among the class of half-taught dabblers in philology that etymological *spelling* has found its supporters. All true philologists and philological bodies have uniformly denounced it as a monstrous absurdity, both from a practical and a scientific point of view. *H. Sweet*, Handbook of Phonetics, p. 201.

2. A collocation of letters representing a word; a written word as spelled in a particular way.

Our present spelling is in many particulars a far from trustworthy guide in etymology, and often, indeed, entirely falsifies history. Such *spellings* as island, author, delight, sovereign, require only to be mentioned, and there are hundreds of others involving equally gross blunders, many of which have actually corrupted the spoken language. *H. Sweet*, Handbook of Phonetics, p. 200.

Phonetic spelling. See *phonetic.*—**Spelling reform,** the improvement by regulation and simplification of the conventional orthography of a language, specifically of the English language; the proposed simplification of English orthography. The spelling of all languages having a recorded history tends to lag behind the changes of pronunciation, and in time a reform becomes necessary. In English, since the gradual fixation of the spelling after the invention of printing, the separation of spelling and pronunciation has become very wide, and numerous proposals for spelling reform have been made. The present organized effort for spelling reform has arisen out of the spread of phonography, which is based on phonetic spelling, and from the more recent spread of the study of comparative philology, which is also based on phonetics. Proposals for a gradual reform in spelling have been put forth jointly by the American Philological Association and the Philological Society of England, and are advocated by the Spelling Reform Association. Amended spellings have been accepted to some extent by various periodicals, and are admitted, less freely, into recent books. Movements for spelling reform exist also in France, Germany, Denmark, and other countries. A spelling reform has been accomplished in Dutch, Spanish, and other tongues, and to some extent, by government action, in Germany.

spelling-bee (spel'ing-bē), *n.* Same as *spelling-match.*

spelling-book (spel'ing-bůk), *n.* A book from which children are taught to spell.

spelling-match (spel'ing-mach), *n.* A contest for superiority in spelling between two or more persons or parties. A formal spelling-match is usually between sides or sets of persons chosen by two leaders. Any person who misspells one of the words given out retires, and the victory belongs to the side that has the larger number left at the close. Also called *spelling-bee.* [U. S.]

spellken† (spel'ken), *n.* [Also *speelken;* < D. *spel,* play (see *spell*[3]), + E. *ken*[5], a resort.] A playhouse; a theater. [Low slang.]

Spencerian (spen-sē'ri-an), *a.* [< *Spencer* (see ★def.) + *-ian.*] Pertaining or relating to the English philosopher Herbert Spencer (born 1820: died 1903), or characteristic of his philosophical system. See *Spencerianism.*

Spencerianism (spen-sē'ri-an-izm), *n.* The philosophy of Herbert Spencer, called by him the *synthetic philosophy.* Like almost all the ancient and a considerable part of the modern philosophical systems, it is a philosophy of evolution; but it differs from most of these in reducing evolution to the rank of a mere secondary principle, and in making the immutable law of mechanics the sole fundamental one. Spencer has formally stated his philosophy in sixteen propositions, which concern the relations of evolution and dissolution. These are of a special and detailed character, so that he does not countenance the claim made for him of the principle of evolution itself. His sixteenth proposition states that under the sensible appearances which the universe presents to us, and "transcending human knowledge, is an unknown and unknowable power."

spencer-mast (spen'sėr-mâst), *n.* See *mast*[1].

spency (spen'si), *n.*; pl. *spencies* (-siz). The stormy petrel, *Procellaria pelagica*. *C. Swainson.* [Shetland Isles.]

Spenserian (spen-sē'ri-an), *a.* and *n.* [< *Spenser* (see def. and *spenser*) + *-i-an.*] **I.** *a.* Of or pertaining to the English poet Edmund Spenser (died 1599); specifically, noting the style of versification adopted by Spenser in his "Faerie Queene." It consists of a strophe of eight decasyllabic lines and an Alexandrine, with three rimes, the first and third line forming one, the second, fourth, fifth, and seventh another, and the sixth, eighth, and ninth the third. It is the stateliest of English measures, and is used by Thomson in his "Castle of Indolence," by Byron in his "Childe Harold," etc.

II. *n.* The poetical measure of Spenser's "Faerie Queene"; a Spenserian verse or stanza. *O. W. Holmes*, Poetry.

spent (spent), *p. a.* [Pp. of *spend*[1], *v.*] **1.** Nearly or quite exhausted or worn out; having lost force or vitality; inefficient; impotent: generally in a comparative sense. A *spent deer* or other animal is one that has been chased or wounded nearly to death. A *spent ball* is a flying ball (from a gun) that has so nearly lost its impulse as to be unable to penetrate an object struck by it, though it may occasionally inflict a dangerous contused wound. A *spent bill of lading* or other commercial document is one that has fulfilled its purpose and should be canceled.

The forme of his style there, compared with Tullies writyng, is but euen the talke of a *spent* old man.
Ascham, The Scholemaster, p. 152.

Mine eyes, like *spent* lamps glowing out, grow heavy.
Fletcher, Sea Voyage, iii. 1.

2. Exhausted by spending or spawning; of fish, having spawned.

speos (spē'os), *n.* [< Gr. *σπέος*, a cave.] In *Egypt. archæol.*, a temple or part of a temple, or a tomb of some architectural importance, as distinguished from a mere tunnel or syringe, excavated in the solid rock; a grotto-temple or tomb, as at Beni-Hassan (see cut under *hypogeum*) and Abou Simbel (Ipsamboul). The larger speos of Abou Simbel is about 169 feet deep, and has all the parts of a complete open-air Egyptian temple.

Speotyto (spē-ot'i-tō), *n.* [NL. (Gloger, 1842), < Gr. *σπέος*, a cave, + *τυτώ*, the night-owl.] An American genus of *Strigidæ*, containing several species of small long-legged earless owls which live in treeless regions and burrow in the ground, as *S. cunicularia* of the pampas of South America and *S. hypogæa* of the prairies of western North America; the burrowing owls. A variety of the latter also inhabits Florida, and the genus is likewise represented in the West Indies. *S. hypogæa* is the species which is found in association with prairie-dogs and spermophiles, giving rise to many exaggerated accounts of the relation between the bird and the mammal. These owls were formerly placed in the genus *Athene*, and were also called *Pholeoptynx*. See cuts under *owl.*

sper†, *v. t.* A variant of *spar*[1].

sperable[1]† (spē'ra-bl), *a.* [< L. *sperabilis*, that may be hoped for, < *sperare*, hope, < *spes*, hope.] Capable of being hoped for; affording grounds of hope.

Wherin, suerly perceaving his own cause not *sperable*, he doth honorably and wisely.
Sir W. Cecil (June 3, 1565), in Ellis's Hist. Letters, 2d ser., [clxxii.

sperable[2]†, *n.* An obsolete form of *sparable.*

sperage†, *n.* Same as *sparage.*

sperate† (spē'rāt), *a.* [< L. *speratus*, pp. of *sperare*, hope.] Hoped for; not hopeless: opposed to *desperate.* In old law, in determining whether debts to a testator, the right to collect which devolved upon the executor, were assets to be accounted for by him, though not collected, regard had to be had to their character, whether they were sperate or desperate.

sperclet, *v.* A Middle English form of *sparkle.*

spere†. An old spelling of *spear*[1], *speer*[1], *sphere.*

Spergula (spėr'gū-lä), *n.* [NL. (Dillenius, 1719), named from its scattering its seeds; < L. *spargere*, scatter: see *sparge.*] A genus of dicotyledonous plants, of the family *Silenaceæ* and tribe *Sperguleæ.* It is characterized by the presence of small scarious stipules, by flowers with five styles alternate with the five sepals, and by a one-celled capsule with its five valves opposite the sepals. There are 2 or 3 species, widely scattered through temperate regions of either hemisphere, especially abundant in fields and cultivated places of the old world. They are annual herbs with dichotomous or clustered branches, the swollen and succulent axils bearing apparent whorls of awl-shaped leaves. The small white or pink flowers form raceme-like cymes with conspicuous pedicels. Also known by the general name of *spurry*, sometimes *sandweed.*

Spergularia (spėr-gū-lā'ri-ä), *n.* [NL., < *Spergula* + *-aria.*] A name given by J. and C. Presl in 1819 to *Tissa*, a genus of dicotyledonous plants, of the family *Silenaceæ.* It is distinguished from the allied genus *Spergula* by its three styles and three-valved capsule, and differs from *Arenaria*, to which it was formerly referred, in the possession of stipules. There are about 20 species, scattered through temperate regions, especially along salt-marshes and shores. They are commonly diffuse herbs, small and often succulent, with thread-like or linear leaves, often, as

in *Spergula*, with secondary clusters of leaves forming apparent whorls at the axils. The small flowers open in bright sunshine, and are white or rose-colored or commonly purplish. The species are known as *sand-spurry*. At least 3 species are found on the Atlantic coast of the United States. See *Tissa*.

sperhawk†, *n.* Same as *sparhawk* for *sparrow-hawk*.

sperket (spėr'ket), *n.* [Also *spirket;* origin obscure.] A large hooked wooden peg, not much curved, to hang saddles, harness, etc., on. *Halliwell.* [Prov. Eng.]

> High on the *spirket* there it hung.
> *Bloomfield*, The Horkey. (*Davies.*)

sperling (spėr'ling), *n.* Same as *sparling*[1].

sperm[1] (spėrm), *n.* [< ME. *sperme*, < OF. *sperme, sparme*, F. *sperme* = Sp. Pg. *esperma* = It. *sperma*, < L. *sperma*, < Gr. σπέρμα (σπερματ-), seed, < σπείρειν, sow. Cf. *spore*[2].] The male seed of any kind, as the semen or seminal fluid of the higher vertebrates, the male spawn or milt of the lower vertebrates, or the seminal elements of any animal, containing the male germs, or spermatozoa.

sperm[2] (spėrm), *n.* [Abbr. of *spermaceti.*] 1. Same as *spermaceti.*—2. A sperm-whale.—3. Sperm-oil.

sperma (spėr'mą), *n.* Same as *semen* (which see).

spermaceti (spėr-mą-set'i or -sē'tī), *n.* and *a.* [Formerly or dial. also, in corrupt forms, *parmaceti, parmacety, parmacetty, parmacity, parmacitty*, etc.; < F. *spermaceti* = Sp. *espermaceti* = Pg. *espermacete* = It. *spermaceti*, < NL. *spermaceti*, lit. 'whale's seed,' the substance having been regarded as the spawn of the whale; < L. *sperma*, seed, + *ceti*, gen. of *cetus*, < Gr. κῆτος, whale: see *Cete*[3].] **I.** *n.* A peculiar fatty substance contained in the characteristic adipose tissue of the cavity of the head of the sperm-whale or cachalot, *Physeter* or *Catodon macrocephalus*, and related cetaceans. During the life of the animal the spermaceti is in a fluid state, and when the head is opened has the appearance of an oily white liquid. On exposure to the air the spermaceti concretes and precipitates from the oil, from which it may then be separated. After being purified by an elaborate process the spermaceti concretes into a white, crystallized, brittle, semi-transparent unctuous substance, nearly inodorous and insipid. It dissolves in boiling alcohol, and as the solution cools it is deposited in perfectly pure lamellated crystals. In this state it is called *cetin*. Spermaceti is a mixture of various fatty acids and derivatives of the acids. It is bland and demulcent, but in medicine it is chiefly employed externally as an ingredient in ointments, cerates, and cosmetics. It has also been largely used in the manufacture of candles.

> By this [fallacy of Æquivocation] are they deluded who conceive *spermaceti* [*sperma Cœti*, Pseud. Ep., 1646], which is found about the head, to be the spawn of the whale.
> *Sir T. Browne*, Vulg. Err., ii. 1.

II. *a.* 1. Pertaining to, derived from, or composed of spermaceti or sperm.—2. Producing or yielding spermaceti, as the sperm-whales.—**Spermaceti ointment.** See *ointment*.

spermaceti-oil (spėr-mą-set'i-oil), *n.* Sperm-oil.

spermaceti-whale (spėr-mą-set'i-hwāl), *n.* A sperm-whale.

Spermacoce (spėr-mą-kō'sē), *n.* [NL. (Dillenius, 1732), so called in allusion to the carpels pointed with one or more calyx-teeth; < Gr. σπέρμα, seed, germ, + ἀκωκή, a point, < ἀκή, a point, anything sharp.] A genus of rubiaceous plants, type of the tribe *Spermacoceæ*, characterized by flowers with from two to four calyx-lobes which sometimes have smaller teeth between, a small two-cleft or capitate stigma, and a dry fruit of two carpels which separate when ripe and are each or only one of them open, one often retaining the membranous axis. There are about three species, natives of America. They are perennial herbs, with smooth, rough, or hairy stems and four-angled branchlets. They bear opposite leaves, which are either sessile or petioled, membranous or coriaceous, nerved or feather-veined. The stipules are united with the petioles into a bristle-bearing membrane or sheath. The small sessile white flowers are solitary in the axils or variously clustered, often in dense axillary and terminal heads. In allusion to the heads, the species are called *button-weed*. All the species occur in the United States, especially southward, one extending to the Florida Keys and the West Indies. *S. glabra*, the most common, extends into Ohio.

Spermacoceæ (spėr-mą-kō'sē-ē), *n. pl.* [NL. (Chamisso and Schlechtendal, 1828), < *Spermacoce* + *-eæ* (shortened for *Spermacoceæ*).] A tribe of rubiaceous plants, of which *Spermacoce* is the type, embracing 18 other genera, chiefly natives of tropical or subtropical America.

spermaduct (spėr'mą-dukt), *n.* [< NL. *spermaductus*, irreg. < Gr. σπέρμα, seed, + L. *ductus*, a duct: see *duct*.] A spermatic duct, or sperm-duct; a male gonaduct or seminal passage; a hollow tubular or vesicular organ in the male, serving to convey or detain sperm or semen. It is connected in some way with the spermary, from which it carries off the sperm, and in many animals is specifically called the *vas deferens*. But it is a more comprehensive term, including the whole of the male generative passages, of whatever kind. Also *spermaductus, spermiduct*.

spermagone (spėr'mą-gōn), *n.* Same as *spermogone*.

spermagonium (spėr-mą-gō'ni-um), *n.* Same as *spermogonium*.

spermalist (spėr'mą-list), *n.* [< *sperm*[1] + *-al* + *-ist*.] A spermist.

spermangium (spėr-man'ji-um), *n.*; pl. *spermangia* (-ą). [NL., < Gr. σπέρμα, seed, sperm, + ἀγγεῖον, vessel.] In *Algæ*, a receptacle containing the spores; a sporangium.

spermaphyte (spėr'mą-fīt), *n.* See *spermophyte*.

spermarium (spėr-mā'ri-um), *n.*; pl. *spermaria* (-ą). [NL., < L. *sperma*, seed, + *-arium*.] A spermary: used in distinction from *ovarium*.

spermary (spėr'mą-ri), *n.*; pl. *spermaries* (-riz). [< NL. *spermarium*.] The male germ-gland or essential sexual organ, of whatever character; the sperm-gland, or spermatic organ, or seminal gonad, in which spermatozoa are generated, in its specialized condition in the higher animals known as the *testis* or *testicle*. The term is used in distinction from *ovary*, both spermaries and ovaries being gonads. Also *spermarium*.

spermatemphraxis (spėr″mą-tem-frak'sis), *n.* [NL., < Gr. σπέρμα(τ-), seed, + ἐμφράσσειν, obstruct: see *emphractic*.] Obstruction to the discharge of semen.

spermatheca (spėr-mą-thē'ką), *n.*; pl. *spermathecæ* (-sē). [NL., irreg. < Gr. σπέρμα, seed, + θήκη, a case. Cf. *spermotheca*.] A spermatic case, capsule, or sheath; a receptacle for semen; specifically, the seminal receptacle in the female, as of various insects and other invertebrates, which receives and conveys or detains the sperm of the male. More correctly *spermatotheca*. See cuts under *Dendrocœla, ovariole*, and *Rhabdocœla*.

spermathecal (spėr-mą-thē'kąl), *a.* [< *spermatheca* + *-al*.] Of or pertaining to a spermatheca: as, a *spermathecal* duct or vesicle.

> On reaching the point where the *spermathecal* duct debouches, they [ova] are impregnated by the spermatozoa which escape now from the spermatheca and meet the ova. *Encyc. Brit.*, XVI. 658.

spermatia, *n.* Plural of *spermatium*.

spermatic (spėr-mat'ik), *a.* [< OF. (and F.) *spermatique* = Sp. *espermático* = Pg. *espermatico* = It. *spermatico*, < L. *spermaticus*, < Gr. σπερματικός, < σπέρμα, seed: see *sperm*[1].] 1. Of or pertaining to sperm, or male seed, in general; containing spermatozoa, or consisting of sperm or semen; seminal: as, *spermatic* fluid.—2. Secreting spermatozoa; generating or producing semen; seminal, as a spermary.—3. Connected with or related to the spermary, or essential male organ; subservient to the male function; testicular: as, *spermatic* vessels; the *spermatic* cord.—4. In *bot.*, resembling or of the nature of spermatia: as, *spermatic* filaments; *spermatic* gelatin.—5. Figuratively, seminal; germinal; fructifying. [Rare.]

> I find certain books vital and *spermatic*, not leaving the reader what he was; he shuts the book a richer man.
> *Emerson*, Books.

External spermatic fascia. Same as *intercolumnar fascia* (which see, under *fascia*).—**External spermatic nerve**, the genital branch of the genitocrural nerve. It supplies the cremaster muscle.—**Internal spermatic fascia.** Same as *infundibuliform fascia* (which see, under *fascia*).—**Spermatic artery**, any artery supplying a testis or other spermary, corresponding to an ovarian artery of the female. In man the spermatic arteries are two long slender arteries arising from the abdominal aorta a little below the renal arteries, and passing along each spermatic cord, to be distributed to the testes.—**Spermatic calculus**, a concretion sometimes found in the seminal vesicles.—**Spermatic canal.** (*a*) The inguinal canal. (*b*) Any spermatic duct, as the vas deferens.—**Spermatic cartridge.** Same as *spermatophore*.—**Spermatic cord.** See *cord*[1].—**Spermatic cyst**, in *pathol.*, a cyst arising in the testicle near the epididymis, and filled with fluid in which are often found spermatozoa, crystals, etc. See *spermatocele*.—**Spermatic duct.** Same as *spermaduct*.—**Spermatic filament**, a spermatozoön.—**Spermatic gelatin**, in *bot.*, a gelatinous substance in spermogonia which when wet aids in the expulsion of the spermatia.—**Spermatic logos.** See *logos*.—**Spermatic plexus of nerves.** See *plexus*.—**Spermatic plexus of veins**, a thick plexus of convoluted vessels formed in the spermatic cord by the venæ comites of the spermatic arteries. These veins coalesce after leaving the inguinal canal, and empty into the vena cava inferior of the right side and the renal vein of the left side. This venous plexus corresponds to the ovarian venous plexus of the female, and is specifically known as the *pampiniform plexus*. When varicose, it constitutes a *varicocele* or *cirsocele*, an extremely common affection, most frequent on the left side.—**Spermatic rete.** Same as *rete vasculosum testis* (which see, under *rete*).—**Spermatic sac**, a sac containing a number of spermatozoa packed or bundled together, to be discharged on rupture of the sac.

spermatical (spėr-mat'i-kąl), *a.* [< *spermatic* + *-al*.] Same as *spermatic*. *Bacon.*

spermatiogenous (spėr-mā-shi-oj'e-nus), *a.* [< NL. *spermatium* + Gr. *-γενής*, producing: see *-genous*.] In *bot.*, producing or bearing spermatia: as, a *spermatiogenous* surface.

> On the contrary, they are disk-shaped or cushion-shaped bodies with the *spermatiogenous* surface folded into deep sinuous depressions. *De Bary*, Fungi (trans.), p. 241.

spermatiophore (spėr-mā'shi-ō-fōr), *n.* [< NL. *spermatium* + Gr. *-φόρος*, < φέρειν = E. *bear*[1].] In *bot.*, a structure bearing a spermatium.

spermatism (spėr'mą-tizm), *n.* [< *spermat(ize)* + *-ism*.] 1. Emission of semen; a seminal discharge.—2. Same as *spermism*.

spermatist (spėr'mą-tist), *n.* [< Gr. σπέρμα(τ-), seed, + *-ist*.] Same as *spermist*.

spermatium (spėr-mā'shi-um), *n.*; pl. *spermatia* (-ą). [NL., < Gr. σπέρμα, seed.] In *bot.*, an exceedingly minute ellipsoid, cylindrical, or rod-shaped body in fungi, produced like spores in perithecium-like organs called spermogonia. The spermatia are conjectured to be the male fertilizing organs, although the male sexual function of spermatia in fungi has not been demonstrated. Also used as synonymous with *pollinoid* for the non-motile gamete of the *Rhodophyceæ*.

spermatize (spėr'mą-tīz), *v. i.*; pret. and pp. *spermatized*, ppr. *spermatizing*. [< Gr. σπερματίζειν, sow, yield seed, < σπέρμα, seed: see *sperm*[1].] To yield male sperm or seed; have a seminal emission; discharge semen.

spermatoa†, *n.* Plural of *spermatoön*. *Owen.*

spermatoal (spėr-mą-tō'ąl), *a.* [< *spermato(ön)* + *-al*.] Pertaining to a spermatoön. *Owen.*

spermatoblast (spėr'mą-tō-blȧst), *n.* [< Gr. σπέρμα(τ-), seed, + βλαστός, bud, sprout, shoot.] The bud or germ of a spermatozoön; a germinal blastema whence spermatozoa are produced. Spermatoblasts form a layer of nucleated and nucleolated cells in the seminal tubules, which proliferates or projects into the lumen of the tubule with often a lobed or digitate end; and from every lobe a spermatozoön develops and is discharged, leaving a branching stump of the spermatoblast. Also *spermoblast, nematoblast*.

spermatoblastic (spėr'mą-tō-blas'tik), *a.* [< *spermatoblast* + *-ic*.] Of or pertaining to spermatoblasts or the formation of spermatozoa; germinal or budding, as a structure which develops spermatozoa. Also *spermoblastic*.

spermatocele (spėr'mą-tō-sēl), *n.* [< Gr. σπέρμα(τ-), seed, + κήλη, a tumor.] A retention-cyst of the epididymis or testicle containing spermatozoa.

spermatocyst (spėr'mą-tō-sist), *n.* [< NL. *spermatocystis*, < Gr. σπέρμα(τ-), seed, + κύστις, bladder: see *cyst*.] 1. In *anat.*, a seminal vesicle.—2. In *pathol.*, a spermatic cyst or sac. See *spermatic*.

spermatocystic (spėr″mą-tō-sis'tik), *a.* [< *spermatocyst* + *-ic*.] Containing spermatozoa, as a cyst; of the nature of a spermatocyst.

spermatocystidium (spėr″mą-tō-sis-tid'i-um), *n.*; pl. *spermatocystidia* (-ą). [NL., < Gr. σπέρμα(τ-), seed, + κύστις, bladder, + dim. *-ίδιον*.] In *bot.*, same as *antheridium*. *Hedwig.*

spermatocystis (spėr″mą-tō-sis'tis), *n.* [NL.: see *spermatocyst*.] Same as *spermatocyst*.

spermatocystitis (spėr″mą-tō-sis-tī'tis), *n.* [NL., < *spermatocystis* + *-itis*.] Inflammation of the seminal vesicles.

spermatocytal (spėr″mą-tō-sī'tąl), *a.* [< *spermatocyte* + *-al*.] Of or pertaining to spermatocytes; of the nature of a spermatocyte.

spermatocyte (spėr'mą-tō-sīt), *n.* [< NL. *spermatium* + Gr. κύτος, a hollow: see *cyte*.] 1. In *bot.*, the mother-cell of a spermatozooid.

> Four roundish primordial cells (*spermatocytes*), each of which produces a spermatozoid.
> *Goebel*, Special Morphology of Plants (trans.), p. 230.

2. The cell whose nuclear chromatin and cell-protoplasm become respectively the head and tail of the spermatozoön: now restricted to the two cell-generations which precede the formation of the spermatozoa. Synonymous with *spermatoblast*.

> These *spermatocytes* may either all develop into spermatozoa (Mammals), or a single *spermatocyte* may become modified as a basilar cell (Plagiostome Fishes), or a number may form an envelope or cyst around the others (Amphibians and Fishes). *Encyc. Brit.*, XX. 412.

spermatogemma (spėr″mą-tō-jem'ą), *n.*; pl. *spermatogemmæ* (-ē). [NL., < Gr. σπέρμα(τ-), seed, + *gemma*, a bud.] A mass of spermatocytes; a multinuclear spermatic cyst; a kind of

spermatoblast. See also *spermosphere*. *Encyc. Brit.*, XX. 412.

spermatogenesis (spėr″ma-tō-jen′e-sis), *n.* [NL., < Gr. σπέρμα(τ-), seed, + γένεσις, origin.] In *biol.*, the formation or development of spermatozoa. *Huxley and Martin*, Elementary Biology, p. 301.

spermatogenetic (spėr″ma-tō-jē-net′ik), *a.* [< *spermatogenesis*, after *genetic*.] Of or pertaining to spermatogenesis; exhibiting or characterized by spermatogenesis: as, a *spermatogenetic* process or result; a *spermatogenetic* theory. *Encyc. Brit.*, XX. 412.

spermatogenous (spėr-ma-toj′e-nus), *a.* [< Gr. σπέρμα(τ-), seed, + -γενής, producing: see *-genous*.] Producing spermatozoa.

spermatogeny (spėr-ma-toj′e-ni), *n.* [< Gr. σπέρμα(τ-), seed, + -γένεια, < -γενής, producing: see *-geny*.] The generation or production of spermatozoa; spermatogenesis.

spermatogonium (spėr″ma-tō-gō′ni-um), *n.*; pl. *spermatogonia* (-ä). [NL., < Gr. σπέρμα(τ-), seed, + γονή, generation.] **1†.** In *bot.*, same as *pycnidium*, 1.—**2.** A primitive or formative seminal cell, forming a kind of sperm-morula, or spermosphere composed of spermatoblasts or spermatocytes, which in turn give rise to spermatozooids. *La Valette St. George.*

spermatoid (spėr′ma-toid), *a.* [< Gr. σπέρμα(τ-), seed, + εἶδος, form.] Resembling sperm, or male seed; sperm-like; of the nature of sperm; spermatic or seminal.

spermatological (spėr″ma-tō-loj′i-kal), *a.* [< *spermatology* + *-ic-al*.] Of or pertaining to spermatology. Also *spermological*.

spermatologist (spėr-ma-tol′ō-jist), *n.* [< *spermatology* + *-ist*.] One who is versed in spermatology. Also *spermologist*.

spermatology (spėr-ma-tol′ō-ji), *n.* [< Gr. σπέρμα(τ-), seed, + -λογία, < λέγειν, speak: see *-ology*.] The doctrine or body of facts and opinions regarding sperm, semen, or the male elements of procreation, as those of spermatogenesis or spermatogeny. Also *spermology*.

spermatomere (spėr′ma-tō-mēr), *n.* [< Gr. σπέρμα(τ-), seed, + μέρος, part.] One of the parts into which the male or female pronucleus of an ovum may divide after fertilization.

Two of these "residual globules" are, according to them, expelled by the *spermatomeres* during their nuclear metamorphosis preceding division.

Micros. Science, XXVI. 597.

spermatoönt (spėr-ma-tō′on), *n.*; pl. *spermatoa* (-ä). [< Gr. σπέρμα(τ-), seed, + ᾠόν, an egg.] The nucleus of a sperm-cell or spermatozoön; a cell which stands in the relation of such a nucleus, as that out of or from which a spermatozoön may be developed; a spermatoblast.

Spermatophilus (spėr-ma-tof′i-lus), *n.* [NL. (Wagler, 1830), emended from *Spermophilus*.] Same as *Spermophilus*.

spermatophoral (spėr-ma-tof′ō-ral), *a.* [< *spermatophore* + *-al*.] Of the character of or pertaining to a spermatophore. *Huxley and Martin*, Elementary Biology, p. 291.

spermatophore (spėr′ma-tō-fōr), *n.* [< Gr. σπέρμα(τ-), seed, + φέρειν = E. *bear*[1].] A special case, capsule, or sheath containing spermatozoa; specifically, one of the peculiar spermatic cysts of cephalopods (also called *spermatic* or *seminal cartridge*, *seminal rope*, or *filament of Needham*), usually forming a long cylindrical structure in which several envelops may be distinguished. The contents of such a spermatophore are not exclusively seminal, for in the hinder part of each there is a special substance, the exploding mass, which serves to discharge the packet of spermatozoa. These are invested in a special tubular tunic, and packed in the front part of the spermatophore, like a charge of shot in a cartridge in front of the powder. Behind this packet of sperm the exploding mass forms a spiral coil, which extends through the greater part of the spermatophore and is continuous behind with the coat of the latter. When the spermatophore is wetted it swells up and bursts, through the force of the spring coiled inside, and the spermatozoa are discharged with considerable force. A spermatophore thus offers a striking analogy to the nematophore or thread-cell of a cœlenterate, though the object attained is not urtication or nettling, but a seminal emission and consequent impregnation of the female. A spermatophore of some sort, less complex than that of cephalopods, is very commonly found in several classes of invertebrates.

spermatophorous (spėr-ma-tof′ō-rus), *a.* [As *spermatophore* + *-ous*.] Bearing or conveying seed, sperm, or spermatozoa; spermatogenous; seminiferous; specifically, bearing sperm as a spermatophore; of or pertaining to a spermatophore; spermatophoral.

spermatorrhea, spermatorrhœa (spėr″ma-tō-rē′ä), *n.* [NL. *spermatorrhœa*; < Gr. σπέρμα(τ-), seed, + ῥεῖν, flow, run.] Involuntary seminal loss.

spermatospore (spėr′ma-tō-spōr), *n.* [< Gr. σπέρμα(τ-), seed, + σπόρος, a sowing.] A kind of cell which gives rise to spermatozoa. Also *spermospore*.

spermatotheca (spėr″ma-tō-thē′kä), *n.* Same as *spermatheca*.

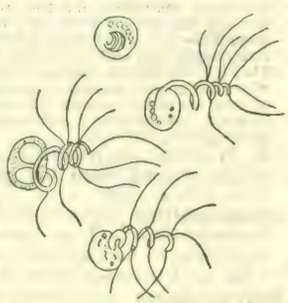
spermatovum (spėr-ma-tō′vum), *n.*; pl. *spermatova* (-vä) [NL., < Gr. σπέρμα(τ-), seed, + L. *ovum*, egg.] A fecundated egg; an ovum after impregnation by spermatozoa, whence its substance consists of material from both parents. Also *spermovum*.

Spermatozoa (spėr″ma-tō-zō′ä), *n. pl.* [NL., pl. of *spermatozoön*, q. v.] **1†.** A supposed class or other group of animalcules; sperm-animals: so called before their nature was known, when they were regarded as independent parasitic organisms.—**2.** [*l. c.*] Plural of *spermatozoön*.

spermatozoal (spėr″ma-tō-zō′al), *a.* [< *spermatozoön* + *-al*.] Same as *spermatozoan*.

spermatozoan (spėr″ma-tō-zō′an), *a.* and *n.* [< *spermatozoön* + *-an*.] **I.** *a.* Of the nature of a spermatozoön; of or pertaining to spermatozoa.

II. *n.* A spermatozoön or spermatozooid.

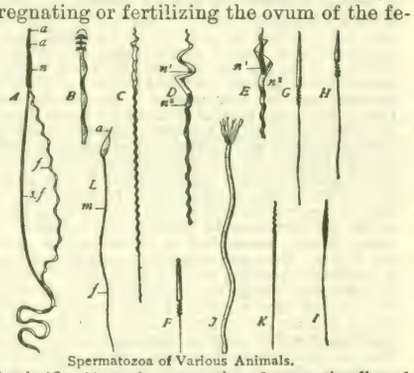


spermatozoic (spėr″ma-tō-zō′ik), *a.* [< *spermatozoön* + *-ic*.] Same as *spermatozoan*.

spermatozoid (spėr′ma-tō-zō′id), *a.* and *n.* [< *spermatozoön* + *-id*[2].] See *spermatozooid*.

spermatozoidal (spėr″ma-tō-zō′i-dal), *a.* [< *spermatozoön* + *-oid* + *-al*.] Same as *spermatozooid*. *W. B. Carpenter*, Micros., § 443.

spermatozooid (spėr″ma-tō-zō′oid), *a.* and *n.* [< *spermatozoön* + *-oid*.] **I.** *a.* Resembling a spermatozoön; of spermatozoan nature or appearance.



II. *n.* **1.** A spermatozoön. *Von Siebold.* Also, less commonly, *spermatozoid*. See *zooid*.—**2.** In *bot.*, a male flagellated motile gamete produced in an antheridium: same as *antherozoid*. In this sense more commonly *spermatozoid*. See also cut under *antheridium*.

Spermatozooids of *Adiantum Capillus-Veneris*.

spermatozoön (spėr″ma-tō-zō′on), *n.*; pl. *spermatozoa* (-ä). [NL., < Gr. σπέρμα(τ-), seed, + ζῷον, an animal.] **1.** One of the numberless microscopic bodies contained in semen, to which the seminal fluid owes its vitality, and which are the immediate and active means of impregnating or fertilizing the ovum of the female; a spermatic cell or filament; a spermatozoan or spermatozooid. Spermatozoa are the vital and essential product of a spermary, male gonad, or testis, as ova are of the ovary or female gonad; their production, or the ability to produce them, is the characteristic distinction of the male from the female organism, whatever their size or shape or other physical character, and however various may be the organ in which they are produced. Spermatozoa, like ova, have the morphological value of the cell; and a spermatozoön is usually a cell in which a cell-wall, cell-contents, and cell-nucleus, with or without a nucleolus, may be distinguished. The form may be spherical, like the ovum, and indistinguishable therefrom by any physical character; more frequently, and especially in the higher animals, these little bodies are shaped like a tadpole, with a small spherical or discoidal head, a succeeding rod-like middle piece, and a long slender tail or caudal filament, capable of spontaneous vibratile movements, by means of which the spermatozoa swim actively in the seminal fluid, like a shoal of microscopic fishes, every one seeking, in the passages of the female into which the fluid has been injected, to discover the ovum in which to bury itself, in order to undergo dissolution in the substance of the ovum. They are smaller than the corresponding ovum, and several or many of them may be embedded in one ovum. The actual union of spermatozoa with an ovum, and fusion of their nuclei, is required for impregnation, and is the consummation of sexual intercourse, to which all other acts and processes are simply ancillary or subservient. Spermatozoa may be killed by cold, or chemical or mechanical injury, like any other cells. These bodies, very similar to various animalcules, were discovered and named *spermatozoa* by Leeuwenhoek in 1677; they were at first and long afterward regarded as independent organisms, variously classed as parasitic helminths or infusorians—such a view being held, for instance, by Von Baer so late as 1827 or 1835. Von Siebold, who found them in various vertebrates, called them *spermatozooids*. Their true nature appears to have been first recognized by Kölliker. Spermatozoa or their equivalents are diagnostic of the male sex under whatever conditions they exist, whether in male individuals separate from the female, or in those many hermaphrodite animals which unite the two sexes in one individual; and the organ which produces them is invariably a testis or its equivalent spermary, of whatever character. The male elements of the lowest animals, however, as *Protozoa*, do not ordinarily receive the name *spermatozoa*, this being specially applied to the more elaborate male cells of the character above described. The origination of spermatozoa has of late years been the subject of much research and discussion; the details of the process, as observed in different animals, or under different conditions of investigation, together with conflicting doctrinal conclusions, have occasioned a large special vocabulary. See many words preceding and following this one.

2†. [*cap.*] A genus of animalcules. *Von Baer*, 1827.

Spermatozoa of Various Animals.

A, beetle (*Copris*), partly macerated; *s.f.*, supporting-fiber of flagellum; *f*, fin-like envelop; *n*, nucleus; *a*, *a*, apical body divided into two parts; *B*, insect (*Calathus*); *C*, bird (*Phyllopneuste*); *D*, bird (*Muscicapa*), nucleus divided into two parts (n^1, n^2); *E*, bull-finch; *F*, gull (*Larus*); *G*, *H*, giant spermatozoön and ordinary form of *Tadorna*; *I*, ordinary form of the same stained; *J*, "vermiform spermatozoön" and, *K*, ordinary spermatozoön of the snail *Paludina*; *L*, snake (*Coluber*), showing apical body (*a*), nucleus, greatly elongated middle-piece (*m*), and flagellum (*f*). (From Wilson, "The Cell.")

sperm-ball (spėrm′bâl), *n.* A spherical cluster of spermatozoa, such as occurs in some sponges. *Encyc. Brit.*, XXII. 424.

sperm-blastoderm (spėrm′blas″tō-dėrm), *n.* A blastodermic layer of formative spermatozoa composing the surface of a sperm-blastula.

sperm-blastula (spėrm′blas″tū-lä), *n.* A spermatic blastula, or hollow sphere whose surface is a layer of formative spermatozoa.

sperm-cell (spėrm′sel), *n.* **1.** A spermatozoön: so called from its morphological valence as a cell.—**2.** A cell giving rise to spermatozoa; a spermatoblast or spermatocyte.

spermet, *n.* An obsolete spelling of *sperm*[1].

Spermestes (spėr-mes′tēz), *n.* [NL. (Swainson, 1837), said to be (irreg.) < Gr. σπέρμα, seed, + ἐσθίειν, eat.] The typical genus of *Spermestinæ*, containing six or eight species confined to Africa and Madagascar. Such are *S. cucullata*, *S. poensis*, and *S. bicolor*, of the continent, and the Madagascar *S. nana*. These little birds are closely related to *Amadina*, of which *Spermestes* is often rated as a subgenus.

Spermestinæ (spėr-mes-tī′nē), *n. pl.* [NL., < *Spermestes* + *-inæ*.] An extensive subfamily of *Ploceidæ*, named from the genus *Spermestes*. The very numerous species, about 150, are chiefly African and Asiatic, but some of them extend to Australia and various Polynesian islands. Among them are the amadavats and estrilds. Leading genera are *Lagonosticta*, *Spermospiza*, *Pyrenestes*, *Estrelda*, and *Amadina*. See cut under *senegal*.

spermestine (spėr-mes′tin), *a.* Of, or having characters of, the *Spermestinæ*.

spermic (spėr′mik), *a.* [< *sperm*[1] + *-ic*.] Same as *spermatic*.

spermidium† (spėr-mid′i-um), *n.*; pl. *spermidia* (-ä). [NL., < L. *sperma*, seed, germ, + *-idium*.] In *bot.*, same as *achenium*, 1.

spermiduct (spėr′mi-dukt), *n.* [< L. *sperma*, sperm, + *ductus*, a duct: see *duct*. Cf. *spermaduct*.] A passage for the conveyance of sperm in the female of *Echinorhynchus*. See the quotation. [Rare.]

From the lower end of the ovarium [of the female of *Echinorhynchus*] two short oviducts, or rather *spermiducts*, arise, and almost immediately unite into a sort of uterus, which is continued into the vagina.

Huxley, Anat. Invert., p. 555.

spermin (spėr′min), *n.* [< *sperm*[1] + *-in*[2].] A non-poisonous alkaloid (C_2H_5N) obtained from sputum, human semen, organs of leucemic patients, and alcoholic anatomical preparations.

spermism (spėr′mizm), *n.* [< *sperm*[1] + *-ism*.] The theory or doctrine that the male sperm contains the whole germ of the future animal, which develops entirely from a spermatozoön, the ovum serving merely as a mold or matrix; animalculism. Also *spermatism*.

spermist (spėr′mist), *n.* [< *sperm*[1] + *-ist*.] One who holds the theory of spermism or spermatism; an animalculist: the opposite of *ovulist*. See *theory of incasement*, under *incasement*. Also *spermatist*.

sperm-kernel (spėrm′kėr″nel), *n.* Same as *spermococcus*.

sperm-morula (spėrm′mor″ọ̈-lä), *n.* A spermatic morula; a mulberry-mass of formative spermatozoa.

sperm-nucleus (spėrm′nū″klē-us), *n.* 1. The nucleus of a spermatozoön; a spermococcus or sperm-kernel.—2. In *bot.*, the nucleus of a male gamete, which coalesces with the nucleus of an oösphere to form a germ-nucleus. *Goebel.*

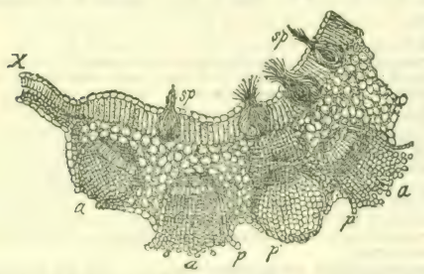
spermoblast (spėr′mō-blast), *n.* Same as *spermatoblast.*

spermoblastic (spėr-mō-blas′tik), *a.* Same as *spermatoblastic.*

spermocarp (spėr′mō-kärp), *n.* [< Gr. σπέρμα, seed, + καρπός, fruit.] In *bot.*, the so-called "fruit" in the *Characeæ* and certain confervoid algæ. It is the fertilized and matured female organ with its variously formed covering or pericarp and accessory cells. The "fruit" of the *Characeæ* has also been called the *antheridium, sporangium, enveloped oögonium,* and *sporophydium,* by different authors. *Sporophydium* seems the preferable term. See these various words. Compare *sporocarp.* See cuts under *antheridium* and *conceptacle.*

spermococcus (spėr-mō-kok′us), *n.*; pl. *spermococci* (-sī). [NL., < Gr. σπέρμα, seed, + κόκκος, grain, berry.] The nucleus of a spermatozoön: it consists of the head of the sperm-animalcule, excepting its thin outer layer. Also *sperm-kernel.*

spermoderm (spėr′mō-dėrm), *n.* [< Gr. σπέρμα, seed, + δέρμα, skin.] In *bot.*, the integument of a seed in the aggregate; properly, same as *testa.*



spermogastrula (spėr-mō-gas′trọ̈-lä), *n.*; pl. *spermogastrulæ* (-lē). [NL., < L. *sperma* (see *sperm*[1]) + NL. *gastrula*, q. v.] A sperm-blastula which has undergone a kind of gastrulation.

spermogone (spėr′mō-gōn), *n.* [< NL. *spermogonium.*] In *bot.*, same as *spermogonium;* also employed by some writers to denote the spermatium or spore-like body which is produced in a spermogonium. See *spermogonium, spermatium.* Also spelled *spermagone.*

spermogonia, *n.* Plural of *spermogonium.*

spermogoniferous (spėr″mō-gō-nif′e-rus), *a.* [< NL. *spermogonium*, q. v., + L. *ferre* = E. *bear*[1].] In *bot.*, bearing or producing spermogonia.

spermogonium (spėr-mō-gō′ni-um), *n.*; pl. *spermogonia* (-ä). [NL., < Gr. σπερμογόνος, producing seed, < σπέρμα, seed, + -γονος, producing: see *-gony.*] In *bot.*, a cup-shaped cavity or

Section of Barberry-leaf (of its natural thickness at *x*), infested with *Puccinia graminis* in its æcidial stage.

sp, spermogonia; *a*, fruit, inclosed within the peridium *p*, or open and discharging spores. (Somewhat magnified.)

receptacle in which spermatia are produced. See *spermatium, peridium, Puccinia* (with cut). Also *spermagonium.*

spermogonous (spėr-mog′ọ̈-nus), *a.* [< *spermogone* + *-ous.*] In *bot.*, resembling or having the character of spermogonia or spermogones.

sperm-oil (spėrm′oil), *n.* Spermaceti-oil; the oil of the spermaceti-whale. See *train-oil.*

spermolith (spėr′mō-lith), *n.* [< Gr. σπέρμα, seed, + λίθος, stone.] A concretion which occasionally forms in the seminal ducts.

spermological (spėr-mō-loj′i-kạl), *a.* Same as *spermatological.*

spermologist (spėr-mol′ọ̈-jist), *n.* [< *spermolog-y* + *-ist.*] 1. Same as *spermatologist.*—2. In *bot.*, one who treats of or collects seeds; a student of or an authority in spermology.

spermology (spėr-mol′ọ̈-ji), *n.* 1. Same as *spermatology.*—2. In *bot.*, that branch of science which investigates the seeds of plants.

spermonucleus (spėr-mō-nū′klē-us), *n.*; pl. *spermonuclei* (-ī). [NL., < L. *sperma* (see *sperm*[1]) + *nucleus*, q. v.] A male pronucleus. See *masculonucleus, feminonucleus. Hyatt.*

Spermophila (spėr-mof′i-lä), *n.* [NL. (Swainson, 1827), < Gr. σπέρμα, seed, + φιλεῖν, love.] 1. In *ornith.*, the little seed-eaters or pygmy finches, an extensive genus of small American fringilline birds, with very short stout bills like a bullfinch's, giving name to the subfamily *Spermophilinæ.* The limits of the genus vary with different authors, but it usually includes about 50 species, of tropical and subtropical America. The only one of these which occurs in the United States is *S. moreleti*, which is found in Texas, and known as *Morelet's pygmy finch.* It is only about 4 inches long, with extremely turgid bill convex in all its outlines, short rounded wings, and still shorter tail. The male is entirely black and white, the latter color tinged with buff on the under parts; the female is olivaceous-brown above and brownish-yellow or buff below, with whitish wing-bars. A like dissimilarity of coloration characterizes the sexes throughout the genus. By those who hold that *Spermophila* is the same name as *Spermophilus*, this genus is called *Sporophila;* and some or all of the species are often placed in a more extensive genus *Gyrinorhynchus*, of which *Spermophila* or *Sporophila* then constitutes one section. See cut under *grassquit.* Also called *Spermospiza.*

2. In *mammal.*, same as *Spermophilus*, 1. *J. Richardson*, 1825.—3†. In *entom.*, a genus of arachnidans. *Hentz*, 1842.

spermophile (spėr′mō-fil), *n.* [< NL. *Spermophilus.*] 1. A rodent quadruped of the genus *Spermophilus*, as a ground-squirrel or suslik, of which there are numerous species in Europe, Asia, and North America. See cuts under *suslik* and *Spermophilus.*—2. A fringilline bird of the genus *Spermophila;* a little seed-eater, of which there are numerous Central and South American species. See cut under *grassquit.*

Spermophilinæ (spėr″mō-fi-lī′nē), *n. pl.* [NL., < *Spermophilus* (in sense 2 < *Spermophila*) + *-inæ.*] 1. In *mammal.*, the ground-squirrels or spermophiles, prairie-dogs, and marmots, one of two subfamilies into which the *Sciuridæ* are sometimes divided, represented by the genera *Spermophilus, Tamias,* and *Arctomys.* It is not separated from *Sciurinæ* or the true arboreal squirrels by any trenchant characters, and the two divisions intergrade through the genera *Xerus* and *Tamias.* But the spermophilines are of terrestrial habits, with usually stouter form, larger size, and less bushy tail than the *Sciurinæ.* They inhabit Europe, Asia, and especially North America, where the greater number of species are found, and most of them are called *gophers.* The group is also called *Arctomyinæ.* See cuts under *Arctomys, chipmunk, prairie-dog, Spermophilus,* and *suslik.*

2. In *ornith.*, an American subfamily of *Fringillidæ*, named from the genus *Spermophila. P. L. Sclater*, 1862.

spermophiline (spėr-mof′i-lin), *a.* and *n.* [< *Spermophilinæ.*] I. *a.* Pertaining to the *Spermophilinæ*, or having their characters.

II. *n.* A member of the *Spermophilinæ.*

Spermophilus (spėr-mof′i-lus), *n.* [NL. (F. Cuvier, 1822), < Gr. σπέρμα, seed, + φιλεῖν, love.] 1. A genus of ground-squirrels, giving name to the *Spermophilinæ.* The type is *S. citillus* of Europe, the suslik, but the genus is especially well represented in North America, where more than thirty distinct species occur, many of which run into several varieties. They were divided by Coues into (1) *Otospermophilus*, in which the ears are high and pointed, the tail is full and broad, with the hairs from two thirds to three quarters of the length of the head and body, and the whole aspect is strongly squirrel-like. To this section belongs *S. grammurus*, with its varieties *beecheyi* and *douglassi;* these are the common ground-squirrels of California, Oregon, and Washington, and east to the Rocky Mountains. *S. annulatus* of Mexico probably also belongs here. (2) *Colobotis*, in which the ears are short and marginiform, the tail is short, from one third to one half the length of the body, and the form is stout. The Old World species belong here, and several of those of North America, as Parry's spermophile, *S. empetra* (or *parryi*), which inhabits British America and Alaska, and runs into several varieties, as *kodiacensis* and *erythroglutæus.* In the United States the best-known species of this section is Richardson's spermophile, *S. richardsoni*, very generally distributed, in one or another of its varieties, from the plains of the Saskatchewan to those of the Laramie. It is a tawny animal, resembling a prairie-dog in appearance and habits. Here also belong *S. mollis, S. spilosoma,* and *S. obsoletus*, inhabiting western parts of the United States. (3) *Ictidomys*, which includes several slender-bodied species, almost like weasels in this respect (whence the name), with the ears generally small or rudimentary, as in *Colobotis*, the skull long and narrow, the tail variable, and the first upper premolar generally small. The most squirrel-like of these is Franklin's spermophile, *S. franklini*, inhabiting Illinois and Missouri and northward to 64°. It not distantly resembles a gray squirrel, the tail being bushy, two thirds as long as the head and body. The commonest species is *S. tridecemlineatus*, the thirteen-

Thirteen-lined Spermophile, or Federation Squirrel (*Spermophilus tridecemlineatus*).

lined spermophile, or federation squirrel, so called by Dr. S. L. Mitchill (in 1821) from the original thirteen States of the United States, it having a number (six or eight) of longitudinal stripes, with five or seven rows of spots between them, likened by that patriot to the "stars and stripes." It inhabits the prairies of the United States at large, and extends northward into British America. Other species of this section are *S. mexicanus* of Texas and Mexico, and *S. tereticaudus* of Arizona and California. Three of the above animals, *S. grammurus, S. franklini,* and *S. tridecemlineatus,* are numerous enough in cultivated districts to be troublesome, and all of them are called *gophers,* a name shared by the different animals of the family *Geomyidæ.* They are all terrestrial (*S. franklini* somewhat arboreal), and live in burrows underground, much like prairie-dogs, though none of them dig so extensively. In many parts of the Dakotas and Montana the ground is honeycombed with the burrows of *S. richardsoni.* They feed on herbage and seeds, and are also to some extent carnivorous. They are prolific, like most rodents, and bring forth their young in burrows. Those of northern regions hibernate like marmots. Their flesh is eatable. The name of the genus is also written *Spermophila* and *Spermatophilus,* but both of these forms are rare. See also cut under *suslik.*

2. In *entom.*, a genus of coleopterous insects. *Gebler.*

spermophore (spėr′mō-fōr), *n.* [< NL. *spermophorum.*] Same as *spermophorum.*

spermophorum (spėr-mof′ọ̈-rum), *n.*; pl. *spermophora* (-rä). [NL., < Gr. σπέρμα, seed, + φέρειν = E. *bear*[1].] 1. A seminal vesicle.—2. In *bot.*, a synonym of *placenta* and also of *funiculus.*

Spermophyta (spėr-mof′i-tä), *n. pl.* [NL., pl. of *spermophytum:* see *spermophyte.*] The highest of the four principal groups or phyla into which the vegetable kingdom is separated by the later systematists. It embraces the higher or flowering plants, those producing true seeds. It is the same as *Phanerogamia.* The correlative terms in descending systematic order are *Pteridophyta, Bryophyta,* and *Thallophyta.* See *Phanerogamia,* and compare *Cryptogamia.* Properly *Spermatophyta.*

spermophyte (spėr′mō-fīt), *n.* [< NL. *spermophytum,* < Gr. σπέρμα, seed, + φυτόν, plant.] In *bot.*, a member of the *Spermophyta;* a plant producing true seeds; a phanerogam, or flowering plant. Properly *spermatophyte.*

spermophytic (spėr-mō-fit′ik), *a.* [< *spermophyte* + *-ic.*] In *bot.*, capable of producing true seeds; phanerogamic.

spermoplasm (spėr′mō-plazm), *n.* [< Gr. σπέρμα, seed, + πλάσμα, anything formed or molded: see *plasm.*] The protoplasm of a spermatozoön; the plasmic contents of a spermule, distinguished from the *spermococcus* or *sperm-kernel.* Also *spermoplasma.*

spermopodium (spėr-mō-pō′di-um), *n.*; pl. *spermopodia* (-ä). [NL., < Gr. σπέρμα, seed, + πούς (ποδ-) = E. *foot.*] In *bot.*, an unused name for the gynophore in *Umbelliferæ.*

spermosphere (spėr′mō-sfēr), *n.* [< Gr. σπέρμα, seed, + σφαῖρα, sphere.] A mass of spermatoblasts; a spermatogemma.

Spermospiza (spėr-mō-spī′zä), *n.* [NL. (G. R. Gray, 1840), < Gr. σπέρμα, seed, + σπίζα, a finch.] 1. A leading genus of *Spermestinæ*, the type of which is the African *S. hæmatina.* Originally called *Spermophaga*, a name too near *Spermophagus.*—2. A genus of American finches, synonymous with *Spermophila. Bonaparte.*

spermospore (spėr′mō-spōr), *n.* Same as *spermatospore.*

spermotheca (spėr-mō-thē′kä), *n.*; pl. *spermothecæ* (-sē). [NL., < Gr. σπέρμα, seed, + θήκη, a case. Cf. *spermatheca.*] In *bot.*, a pericarp. [Rare.]

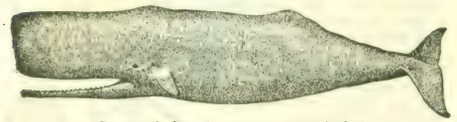
spermous (spėr′mus), *a.* [< *sperm*[1] + *-ous.*] Same as *spermatic.*

spermovarian (spėr-mō-vā′ri-an), *a.* [< *spermovari(um)* + *-an.*] Of or pertaining to a spermovarium.

spermovarium (spėr-mō-vā′ri-um), *n.*; pl. *spermovaria* (-ä). [NL., < Gr. σπέρμα, seed, + NL. *ovarium*, q. v.] A hermaphroditic genital gland; a bisexual gonad; an ovispermary or ovotestis, which gives rise, simultaneously or successively, to male and female products. See cut under *ovotestis.*

spermovary (spėr-mō′va-ri), *n.*; pl. *spermovaries* (-riz). [< NL. *spermovarium.*] Same as *spermovarium.*

spermovum (spėr-mō′vum), *n.*; pl. *spermova* (-vä). [< Gr. σπέρμα, seed, + L. *ovum*, egg.] Same as *spermatovum.*



sperm-rope (spėrm′rōp), *n.* A string of spermatozoa packed in a long case; a package of sperm, as one of the spermatic cartridges of a cephalopod. For description, see *spermatophore. Encyc. Brit.*, XVI. 682.

spermule (spėr′mūl), *n.* [< NL. *spermulum*, dim. of LL. *sperma*, seed: see *sperm*[1].] A seed-animalcule, sperm-cell, spermatozoön, or zoöspermium; the fertilizing male element, of the morphological valence of a cell. *Spermule* is Haeckel's

term, corresponding to *ovule* for the female egg-cell. The protoplasm of the spermule is called *spermoplasm*, and the nucleus *spermococcus*.

spermulum (spėr′mū-lum), *n.*; pl. *spermula* (-lä). [NL.: see *spermule*.] A spermule, sperm-cell, or spermatozoön.

sperm-whale (spėrm′hwāl), *n.* [< *sperm*[2] + *whale*[1].] The spermaceti-whale or cachalot, *Physeter* (or *Catodon*) *macrocephalus*, belonging

Sperm-whale (*Physeter macrocephalus*).

to the family *Physeteridæ* (which see for technical characters; see also cut of skull under *Physeter*). It is one of the largest of animals, exceeded in length only by the great rorqual or finner, *Balænoptera musculus*; it has teeth in the lower jaw, but none and no baleen in the upper; and the enormous square head contains the valuable product spermaceti. This whale is also the source of the best whale-oil, and its chase is a very important industry in the warmer waters of all seas. See *cachalot*.—**Porpoise sperm-whale**, a pygmy sperm-whale, or snub-nosed cachalot, of the family *Physeteridæ* and genus *Kogia*, as *K. brevirostris* (*K. floweri* of Gill), of the Pacific and chiefly tropical seas, but sometimes occurring off the coast of the United States.—**Sperm-whale porpoise**, a bottle-nosed whale of the genus *Hyperoödon*. It belongs to the same family (*Physeteridæ*) as the sperm-whale, but to a different subfamily. (See *Ziphiinæ*.) The species are several, not well determined, and with confused synonymy. They are larger than any porpoises properly so called, though far inferior in size to the true sperm-whale.

speront, *n.* [< It. *sperone* = OF. *esperon*, F. *éperon*, a spur, the beak of a ship: see *spur*.] The beak of a ship.

Which barks are made after the maner of Fusts or Galliots, with a *Speron* and a couered poope.
Hakluyt's Voyages, II. 215.

sperr†, *v. t.* Same as *spar*[1].

sperrable†, *n.* An obsolete form of *sparable*.

sperrylite (sper′i-līt), *n.* [Named after F. L. *Sperry*, the discoverer.] A native arsenide of platinum, occurring in minute isometric crystals with pyrite and chalcopyrite near Sudbury in Ontario; also in North Carolina. It has a tin-white color, brilliant metallic luster, and a specific gravity of 10.6. It is the only compound of platinum known to occur in nature.

sperset (spėrs), *v. t.* and *i.* [An aphetic form of *disperse*, or var. of *sparse*.] To disperse. *Spenser*, Visions of Bellay, l. 195.

sperthe†, *n.* A Middle English form of *sparth*.

spertle†, *v.* and *n.* An obsolete form of *spurtle*.

serverv†, **spervyour**†, *n.* Same as *sparver*.

spessartite, spessartine (spes′ärr-tīt, -tin), *n.* [< *Spessart*, a mountainous region in Germany, north of the river Main.] A manganesian variety of garnet.

spet, *v.* and *n.* An obsolete or dialectal variant of *spit*[2].

spetch (spech), *n.* [Assibilated form of *speck*[1].] A piece of skin or hide used in making glue: as, size made from buffalo-*spetches*.

spetous†, *a.* See *spitous*.

spew (spū), *v.* [Formerly also *spue*; < ME. *spewen, spuen, spiwen*, < AS. *spīwan* (pret. *spāw*, pp. *spiwen*) = OS. *spīwan* = OFries. *spīa* = MD. *spijen, spouwen, spuuwen*, D. *spuwen* = OHG. *spīwan, spīan*, MHG. *spien*, G. *speien* = Icel. *spȳja* = Sw. Dan. *spy* = Goth. *speiwan*, spew, = L. *spuere* = Gr. *πτύειν*, Doric *ψύττειν* (for **σπύειν*), spit, = OBulg. *plĭvati, pljuti* = Bohem. *plíti* = Pol. *pluc* = Russ. *plevatĭ* = Lith. *spiauti* = Lett. *splaut* (Slav. √ *pljŭ* < *spljŭ* < *spŭ*), spit. Hence ult. *spit*[2].] **I.** *intrans.* **1.** To discharge the contents of the stomach; vomit; puke.

Then he gan to *spewe*, and up he threwe
The balsame all againe.
Robin Hood and the Peddlers (Child's Ballads, V. 248).

2. In *gun.*, to run at the mouth: said of a gun which bends at the chase, or whose muzzle droops, from too quick firing.

II. *trans.* **1.** To vomit; puke up or out; eject from or as if from the stomach.

So then because thou art lukewarm . . . I will *spue* thee out of my mouth. Rev. iii. 16.

2. To eject as if by retching or heaving; send or cast forth from within; drive by internal force or effort: often used figuratively.

That the land *spue* not you out also, when ye defile it, as it *spued* out the nations that were before you.
Lev. xviii. 28.

To live, for me, Jane, is to stand on a crater-crust which may crack and *spew* fire any day.
Charlotte Brontë, Jane Eyre, xx.

To spew oakum, said of the seams of a ship when the oakum starts out from between the planks.

spewer (spū′ėr), *n.* [< *spew* + *-er*[1].] One who or that which spews.

spewiness† (spū′i-nes), *n.* The state of being spewy, moist, or damp.

The coldness and *spewiness* of the soil.
Bp. Gauden, Hieraspistes (1653), p. 551. (*Latham.*)

spewing† (spū′ing), *a.* Same as *spewy*.

The soil [in New England] for the general is a warm kind of Earth, there being little cold *spewing* Land.
S. Clarke, Four Plantations in America (1670), p. 29.

[See also the quotation under *emuscation*.]

spewy† (spū′i), *a.* [< *spew* + *-y*[1].] Wet; boggy; moist; damp.

The lower valleys in wet winters are so *spewy* that they know not how to feed them. *Mortimer*, Husbandry.

Speyside pine. See *pine*[1].

sp. gr. An abbreviation of *specific gravity*.

sphacel (sfas′el), *n.* [< NL. *sphacelus*, q. v.] Same as *sphacelus*.

sphacela (sfas′e-lä), *n.*; pl. *sphacelæ* (-lē). [< Gr. *σφάκελος*, gangrene.] In *bot.*, in certain algæ, a hollow chamber of considerable size which is developed from the apical cell of each branch. When young it is filled with dark mucilaginous contents, which at a later stage become watery. The term is sometimes used as nearly or quite the equivalent of *propagulum*. Also *sphacele*.

Sphacelaria (sfas-e-lā′ri-ä), *n.* [NL., so called in allusion to the tips of the branches, which are black and shriveled when dried; < Gr. *σφάκελος*, gangrene.] A genus of algæ, typical of the family *Sphacelariaceæ*. They have olive-brown, branching, filamentous fronds, with corticating cells wanting or confined to the base of the frond. The axis and branches are terminated by a large apical cell, from which, by transverse, longitudinal, and oblique divisions, a solid frond is formed whose external surface is composed of rectangular cells arranged in regular transverse bands. The unilocular and plurilocular sporangia are spherical or ellipsoidal, borne on short pedicels; reproduction is non-sexual, by means of propagula. The species are variable, and difficult of determination. There are three species along the New England coast.

Sphacelariaceæ (sfas-e-lā-ri-ā′sē-ē), *n. pl.* [NL., < *Sphacelaria* + *-aceæ*.] A family of algæ, typified by the genus *Sphacelaria*. They are olive-brown seaweeds with branching polysiphonous fronds, the branches of which terminate in a peculiar large apical cell. Also *Sphacelarieæ*.

sphacelate (sfas′e-lāt), *a.* [< *sphacelus* + *-ate*[1].] **1.** In *pathol.*, dead; necrosed.—**2.** In *bot.*, decayed, withered, or dead.

sphacelate (sfas′e-lāt), *v.*; pret. and pp. *sphacelated*, ppr. *sphacelating*. [< *sphacelus* + *-ate*[2].] **I.** *intrans.* To become necrosed.

II. *trans.* To affect with sphacelus or necrosis.

The floor of the existing wound was of course formed by *sphacelated* hepatic tissue. *Lancet*, 1890, II. 425.

sphacelated (sfas′e-lā-ted), *a.* [< *sphacelate* + *-ed*[2].] Same as *sphacelate*.

sphacelation (sfas-e-lā′shon), *n.* [< *sphacelate* + *-ion*.] Necrosis; the process of becoming or making gangrenous; mortification.

sphacele (sfas′ēl), *n.* [< NL. *sphacela*.] In *bot.*, same as *sphacela*.

Sphacelia (sfā-sē′li-ä), *n.* [NL., < Gr. *σφάκελος*, gangrene.] A former genus of fungi, now known to be the conidial stage or form of *Claviceps*, the ergot. It constitutes the first stage of the ergot, and consists of a growth of mycelium destroying and replacing the ovary of the host, taking approximately the form of the latter. It produces conidial spores upon the tips of basidia which radiate from the surface of the hyphal mass. See *ergot*[1], 2. Also *Sphacelium*.

sphacelism (sfas′e-lizm), *n.* [< *sphacel*(*us*) + *-ism*.] Same as *sphacelismus*.

sphacelismus (sfas-e-lis′mus), *n.* [NL., < Gr. *σφακελισμός*, gangrene, < *σφακελίζειν*, be gangrened or blighted, < *σφάκελος*, gangrene: see *sphacelus*.] Necrosis.

Sphacelium (sfā-sē′li-um), *n.* [NL.: see *Sphacelia*.] Same as *Sphacelia*.

Sphaceloma (sfas-e-lō′mä), *n.* [NL., < Gr. *σφάκελος*, gangrene: see *sphacelus*.] A genus of melanconiaceous fungi, containing the very destructive species (*S. ampelinum*) known as *anthracnose*. It first appears on the shoots, leaves, and berries of grape-vines as minute brown spots which are a little depressed in the middle and have a slightly raised darker-colored rim. These spots soon increase in size and elongate longitudinally. On the fruit the spots retain a more or less regularly rounded outline, and have a well-defined band of bright vermilion between the dark border and the central portion. Finally, under the action of the disease, the berries dry up, leaving nothing, apparently, but the skin and seeds. Spraying the vines with a strong solution of sulphate of copper before the appearance of the leaves, and with Bordeaux mixture afterward, destroys or checks the disease. See *anthracnose*.

sphacelus (sfas′e-lus), *n.* [NL., < Gr. *σφάκελος*, gangrene, mortification, caries, also a spasm, convulsion.] **1.** Necrosis.—**2.** A necrosed mass of tissue.

Sphæralcea (sfē-ral′sē-ä), *n.* [NL. (St. Hilaire, 1825), so called from the fruit, a round head of carpels; < Gr. *σφαῖρα*, a ball, sphere, + *ἀλκέα*, a plant, *Malva Alcea*, related to the plant here defined.] A genus of dicotyledonous choripetalous plants, of the family *Malvaceæ* and tribe *Malveæ*. It is characterized by flowers each with three bractlets, and fruit of numerous two-valved carpels naked within, each containing two or three reniform seeds. There are about 30 species, mainly natives of warmer parts of America, with 4 at the Cape of Good Hope. They are herbs or shrubs, in habit resembling the genus *Malva*. They usually bear angled or lobed leaves, and short-pedicelled violet or reddish flowers single or clustered in the axils or forming a raceme or spike. They are known as *globe mallow*, and several species are in cultivation for ornament under glass. They possess marked demulcent properties, especially *S. cisplatina*, a decoction of which is used as a remedy in Brazil, and as a substitute for marshmallows.

Sphæranthus (sfē-ran′thus), *n.* [NL. (Linnæus, 1753), so called from the clustered heads of flowers; < Gr. *σφαῖρα*, a ball, + *ἄνθος*, flower.] A genus of composite plants, of the family *Asteraceæ*, tribe *Inuleæ*, and subtribe *Plucheineæ*. It is characterized by flowers without pappus, the central ones bisexual, fertile or sterile, tubular and four- to five-cleft, the outer female and fertile, filiform and minutely two- to three-toothed, and by the aggregation of the small flower-heads into a dense solitary terminal spherical or ovoid glomerule. There are about 17 species, natives of the tropics of Asia, Africa, and Australia. They are erect villous or glutinous herbs, with divaricate branches terminated by the pink flower-clusters. The leaves are alternate, toothed, and decurrent on the stem. *S. Indicus* is known as the *East Indian globe-thistle*, and is a common Indian weed of dry cultivated land, clothed everywhere with soft glandular hairs which give off a powerful honey-like odor.

sphæraphides (sfē-raf′i-dēz), *n. pl.* [< Gr. *σφαῖρα*, a ball, + *ῥαφίς*, a needle.] In *bot.*, the more or less spherical masses of crystals or raphides occurring in the cells of many plants. Also called *sphere-crystals*.

sphæret, *n.* An obsolete form of *sphere*.

sphærenchyma (sfē-reng′ki-mä), *n.* [NL., irreg. < Gr. *σφαῖρα*, a ball, + *ἔγχυμα*, an infusion: see *parenchyma*.] Spherical or spheroidal cellular tissue, such as is found in the pulp of fruits: a modification of parenchyma.

Sphæria (sfē′ri-ä), *n.* [NL. (Haller, 1768), < Gr. *σφαῖρα*, a ball: see *sphere*.] A genus of pyrenomycetous fungi, giving name to the family *Sphæriaceæ*. The older authors included all forms having the perithecia black, carbonaceous or membranaceous, pierced at the apex, and usually superficial or erumpent. Recent authors have either discarded the name or used it for old and imperfectly known species.

Sphæriaceæ (sfē-ri-ā′sē-ē), *n. pl.* [NL. (Fries, 1821), < *Sphæria* + *-aceæ*.] A family of pyrenomycetous fungi, typified by the genus *Sphæria*.

Sphæriacei (sfē-ri-ā′sē-ī), *n. pl.* [NL., < *Sphæria* + *-acei*.] Same as *Sphæriaceæ*.

sphæriaceous (sfē-ri-ā′shius), *a.* [< *Sphæria* + *-aceous*.] In *bot.*, resembling or belonging to the genus *Sphæria* or the *Sphæriaceæ*.

sphæridia, *n.* Plural of *sphæridium*, 1.

sphæridial (sfē-rid′i-al), *a.* [< *sphæridium* + *-al*.] Of or pertaining to the sphæridia of a sea-urchin.

Sphæridiidæ (sfē-ri-dī′i-dē), *n. pl.* [NL., < *Sphæridium* + *-idæ*.] The *Sphæridiinæ* as a family of palpicorn coleopterous insects. Also *Sphæridiadæ, Sphæridida, Sphæridides, Sphæridiites, Sphæridiota, Spheridiites*.

Sphæridiinæ (sfē-rid-i-ī′nē), *n. pl.* [NL. (Le Conte, 1883, as *Sphæridiini*), < *Sphæridium* + *-inæ*.] A subfamily of the water-beetle family *Hydrophilidæ*, remarkable from the fact that its forms are all terrestrial. They are small, oval, convex, or hemispherical beetles which live in the excrement of herbivorous mammals. They are usually black in color, with the elytra frequently spotted or margined with yellow. They are divided into six genera, of which five are represented in the United States. See *Sphæridium*, 2.

sphæridium (sfē-rid′i-um), *n.* [NL., < Gr. *σφαιρίδιον*, dim. of *σφαῖρα*, a ball, sphere: see *sphere*.] **1.** Pl. *sphæridia* (-ä). In echinoderms, one of the numerous minute spheroidal bodies, rarely more than one hundredth of an inch long, which are found in nearly all sea-urchins upon the ambulacral plates, especially those nearest the mouth. Each contains a dense glassy calcareous skeleton, and is articulated by a short pedicel, like a spine, to one of the tubercles. The sphæridia are supposed to be olfactory or auditory sense-organs.

In some genera, these *sphæridia*, to which Lovén ascribes a sensory function (probably auditory), are sunk in fossæ of the plate to which they are attached.
Huxley, Anat. Invert., p. 490.

2. [*cap.*] [NL. (Fabricius, 1795).] The typical genus of the *Sphæridiinæ*, comprising mainly African species distinguished by the elongate

scutellum and the visible pygidium. *S. scarabæoides* is an example.

Sphæriidæ (sfē-rī'i-dē), *n. pl.* [NL., < *Sphærium* + *-idæ.*] A family of fresh-water bivalve mollusks, typified by the genus *Sphærium*, formerly called *Cycladidæ*, and now generally united with the typical *Cyrenidæ* under the latter name.

sphæristerium (sfē-ris-tē'ri-um), *n.*; pl. *sphæristeria* (-ä). [< L. *sphæristerium*, < Gr. *σφαιριστήριον*, a place for playing ball, < *σφαιρίζειν*, play at ball, < *σφαῖρα*, a ball: see *sphere.*] In *class. antiq.*, any place or structure for the exercise of ball-playing; a tennis-court.

sphærite (sfē'rīt), *n.* [< Gr. *σφαῖρα*, a ball, sphere, + *-ite*[2].] A hydrous phosphate of aluminium, allied to wavellite in structure and composition.

Sphærium (sfē'ri-um), *n.* [NL. (Scopoli, 1777), < Gr. *σφαιρίον*, dim. of *σφαῖρα*, a ball.] The typical genus of the *Sphæriidæ*, or a genus of the family *Cyrenidæ*, for a long time generally known as *Cyclas*. It contains many small clam-like fresh-water shells.

Sphærobacteria (sfē″rō-bak-tē'ri-ä), *n. pl.* [NL., < Gr. *σφαῖρα*, a sphere, + NL. *bacterium*, q. v.] In Cohn's system of classification, a tribe of schizomycetes or bacteria, with spherical cells, as in the genus *Micrococcus*. See *Micrococcus.*

Sphærococcaceæ (sfē″rō-ko-kā'sē-ē), *n. pl.* [NL., < *Sphærococcus* + *-aceæ.*] A family of florideous algæ, named from the genus *Sphærococcus*. The fronds are cylindrical or membranaceous, often of very delicate substance. The antheridia form superficial patches, or are occasionally contained in sunken cavities. Also *Sphærococcoideæ.*

Sphærococcus (sfē-rō-kok'us), *n.* [NL. (Stackhouse), < Gr. *σφαῖρα*, a ball, + *κόκκος*, a berry.] A genus of florideous algæ, giving name to the family *Sphærococcaceæ*. There are no American species.

Sphærodactylus (sfē-rō-dak'ti-lus), *n.* [NL. (Wagler, 1830), < Gr. *σφαῖρα*, a ball, + *δάκτυλος*, finger.] A genus of American gecko lizards, having toes ending in small circular sucking-disks, by means of which they adhere to perpendicular surfaces. There are large carinate scales on the back, and small smooth hexagonal ones on the belly. *S. notatus* is one of the smallest of lizards, about 2 inches long, found in Florida and Cuba; it is notable as the only gecko of the United States. Also *Sphæriodactylus.*

Sphærogaster (sfē-rō-gas'tėr), *n.* [NL. (Zetterstedt, 1842), < Gr. *σφαῖρα*, a ball, + *γαστήρ*, belly.] A genus of dipterous insects, of the family *Acroceridæ*, containing one species, *S. arcticus*, a minute shining-black fly, which occurs from the northernmost point of Lapland to northern Sweden.

Sphærogastra (sfē-rō-gas'trä), *n. pl.* [NL., < Gr. *σφαῖρα*, a ball, + *γαστήρ*, belly.] A division of arachnidans, containing those whose abdomen is more or less spheroidal or globose, as the spiders: contrasted with *Arthrogastra*. See cut under *spider.*

sphæroid, *n.* See *spheroid.*

Sphæroma (sfē-rō'mä), *n.* [NL. (Latreille, 1802), < Gr. *σφαίρωμα*, anything made round or globular, < *σφαιροῦν*, make round or globular, < *σφαῖρα*, a ball, sphere: see *sphere.*] The typical genus of *Sphæromidæ*, so called from their habit of rolling themselves up in a ball when disturbed, like some of the *Oniscidæ*. They are known as *globe-slaters*. Also *Spheroma. Leach.*

sphæromere, *n.* See *spheromere.*

sphæromian, *a.* and *n.* See *spheromian.*

Sphæromidæ (sfē-rom'i-dē), *n. pl.* [NL., < *Sphæroma* + *-idæ.*] A family of isopod crustaceans, typified by the genus *Sphæroma;* the globe-slaters. Also *Sphæromatidæ.*

sphærosiderite, *n.* See *spherosiderite.*

sphærospore, *n.* Same as *spherospore.*

sphærostilbite (sfē-rō-stil'bīt), *n.* [< Gr. *σφαῖρα*, a ball, + E. *stilbite.*] A variety of stilbite.

Sphærotheca (sfē-rō-thē'kä), *n.* [NL. (Léveillé, 1851), < Gr. *σφαῖρα*, a ball, + *θήκη*, a case.] A genus of pyrenomycetous fungi, belonging to the family *Erysiphaceæ*, characterized by a perithecium which contains only a single ascus. The appendages are simple threads not unlike the mycelium with which they are frequently interwoven. The ascus is usually suborbicular in shape, and generally contains eight spores. *S. humuli*, called the hop-mildew, is destructive to the hop-vine; *S. pannosa* is injurious to rose-bushes; and *S. mors-uvæ* is the common gooseberry-mildew. See *hop-mildew.*

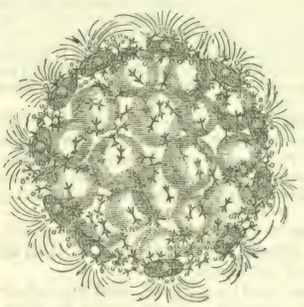
sphærotherian (sfē-rō-thē'ri-an), *a.* and *n.* [< *Sphærotherium* + *-an.*] **I.** *a.* Of or pertaining to the genus *Sphærotherium.*

II. *n.* A milleped of the genus *Sphærotherium* or family *Sphærotheriidæ.*

Sphærotheriidæ (sfē″rō-thē-rī'i-dē), *n. pl.* [NL., < *Sphærotherium* + *-idæ.*] A family of chilognath myriapods, typified by the genus *Sphærotherium*, having aggregated eyes and lateral antennæ. Also called *Zephroniidæ.*

Sphærotherium (sfē-rō-thē'ri-um), *n.* [NL., (Brandt, 1841), < Gr. *σφαῖρα*, a ball, + *θηρίον*, a wild beast.] A genus of chilognath myriapods, of the family *Glomeridæ*, or giving name to the *Sphærotheriidæ*. *S. elongatum* is an example. Also called *Zephronia.*

sphærozoa, *n.* Plural of *sphærozoön.*



sphærozoid (sfē-rō-zō'id), *a.* and *n.* **I.** *a.* Of or pertaining to the *Sphærozoidæ.*

II. *n.* A sphærozoön, or member of the *Sphærozoidæ.*

Sphærozoidæ (sfē-rō-zō'i-dē), *n. pl.* [NL., < *Sphærozoum* + *-idæ.*] A family of spumellarians, or compound radiolarians, typified by the genus *Sphærozoum*, with a skeleton composed of numerous detached spicules scattered round the social central capsules, or embedded in their common gelatinous body.

sphærozoön (sfē-rō-zō'on), *n.*; pl. *sphærozoa* (-ä). [NL.: see *Sphærozoum.*] An individual or species of the genus *Sphærozoum* or family *Sphærozoidæ.*

Sphærozoum (sfē-rō-zō'um), *n.* [NL., < Gr. *σφαῖρα*, a ball, + *ζῷον*, an animal.] A genus of compound radiolarians, typical of the family *Sphærozoidæ*, the protoplasm of which contains colored cellæform bodies, and gives rise to a network of spicules forming a loose detached skeleton. *S. ovodimare* is an example. A second species is *S. punctatum.* See also cut under *spicule.*

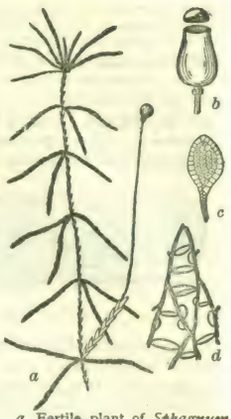
Sphærozoum ovodimare, magnified.

sphærule, sphærulite, etc. See *spherule*, etc.

Sphagnaceæ (sfag-nā'sē-ē), *n. pl.* [NL. (Bridel, 1826), < *Sphagnum* + *-aceæ.*] A monotypic family of mosses; the peat-mosses. They are soft and flaccid caulescent plants, generally of large size, growing in more or less compact tufts or patches on the surface of bogs, or floating in stagnant water, more rarely on the borders of mountain rivulets. They are whitish, yellowish, or sometimes red or olive-colored, and are perennial by the annual prolongation of the stems or by simple innovations at the apex. The branches are generally spreading, in lateral fascicles of from two to seven, rarely more, those at the summit of the stem capitate. The leaves are nerveless, translucent, formed of a single layer of two kinds of cells. The inflorescence is monœcious or dicœcious; the male organs (antheridia) are borne upon clavate catkin-like branches, solitary at the side of each leaf, globose or ovoid, pedicellate; the female organs (archegonia) are generally three or four terminating a short branch, only one perfecting fruit and forming a capsule. The capsule is globose, operculate with a convex or nearly flat lid, the orifice naked; the spores are of two kinds. See cut under *Sphagnum.*

Sphagnei (sfag'nē-ī), *n. pl.* [NL., < L. *sphagnos*, < Gr. *σφάγνος*, a kind of moss.] Same as *Sphagnaceæ.*

sphagnicolous (sfag-nik'ō-lus), *a.* [< NL. *Sphagnum* + L. *colere*, inhabit.] In *bot.* and *zoöl.*, growing or living upon or among mosses of the genus *Sphagnum.*



sphagnologist (sfag-nol'ō-jist), *n.* [< *sphagnolog-y* + *-ist.*] In *bot.*, a student of the *Sphagnaceæ;* one who is an authority on, or interested in the study of, the *Sphagnaceæ. Jour. Roy. Micros. Soc.*, 2d ser., VI. 108.

sphagnology (sfag-nol'ō-ji), *n.* [< NL. *Sphagnum* + Gr. *-λογία*, < *λέγειν*, speak: see *-ology.*] The special study of the *Sphagnaceæ.*

sphagnous (sfag'nus), *a.* [< NL. *Sphagn(um)* + *-ous.*] In *bot.*, pertaining to bog-mosses or peat-mosses; abounding in bog- or peat-mosses. See *Sphagnum.*

Sphagnum (sfag'num), *n.* [NL. (Dillenius, 1741), < Gr. *σφάγνος*, also *σφάκος*, and *φάσκος*, *φάσκον*, a kind of moss.] **1.** A genus of mosses, the peat- or bog-mosses, the only representative of the family *Sphagnaceæ.* For characters, see *Sphagnaceæ.* The plants of this genus are widely diffused over the temperate parts of the globe, and enter largely into the composition of peat. There are about 25 North American species and many varieties or forms, about the validity of which the best authorities differ widely. The most divergent forms may be distinguished by well-marked characters, but these seem to merge into one another by a complete series of connecting links. See *peat*[1], *peat-moss, Bryaceæ.*

2. [*l. c.*] A mass or quantity of moss of this genus: often used attributively: as, *sphagnum* moss; a *sphagnum* bog.

a, Fertile plant of *Sphagnum cuspidatum*, var. *plumosum*; *b*, the capsule of *Sphagnum subsecundum*; *c*, the antheridium of *Sphagnum subsecundum*; *d*, cells of the leaf of *Sphagnum cymbifolium.*

Sphagolobus (sfā-gol'ō-bus), *n.* [NL. (Cabanis, 1860), < Gr. *σφαγή*, the throat, + *λοβός*, lobe.] A genus of hornbills, of the family *Bucerotidæ*, characterized by the peculiar form of the casque and by the curly crest. The only species is *S. atratus* of western Africa, of a blackish color with the tail dark-green and broadly tipped with white.

Sphagolobus atratus.

sphalerite (sfal'ē-rīt), *n.* [< Gr. *σφαλερός*, slippery, uncertain (< *σφάλλειν*, cause to fall, throw down, trip: see *fall, fail*[1]), + *-ite*[2]: so named because often confounded with more useful ores.] The native zinc sulphid more familiarly known as *zinc-blende.* See *blende.*

sphalerocarpium (sfal″ē-rō-kär'pi-um), *n.*; pl. *sphalerocarpia* (-ä). [NL., < Gr. *σφαλερός*, slippery, uncertain (see *sphalerite*), + *καρπός*, fruit.] In *bot.*, an accessory fruit, as that of *Hippophaë*, in which the achene is invested by a persistent berry-like calyx. Also *sphalerocarpum.*

Sphargididæ (sfär-jid'i-dē), *n. pl.* [NL. (Bonaparte, 1839), < *Sphargis* (*Sphargid-*) + *-idæ.*] A family of chelonians, typified by the genus *Sphargis*, having a carapace formed of small irregular pieces of bone embedded in thick skin, and clawless feet forming mere paddles; the soft-shelled turtles. Only one species is known, the luth, or leather-back turtle, which reaches a gigantic size. Preferably *Dermochelydidæ.* Also *Sphargidæ, Sphargidina, Sphargidoidæ.* See cut under *leatherback.*

Sphargis (sfär'jis), *n.* [NL. (Merrem, 1820).] The typical genus of *Sphargididæ.* The species is *S. coriacea*, the soft-shelled or leather-backed turtle, or trunk-turtle. An earlier and unexceptionable name, and therefore the onym of this genus, is *Dermochelys.* See cut under *leatherback.*

Sphecia (sfē'shi-ä), *n.* [NL. (Hübner, 1816), < Gr. *σφήξ* (*σφηκ-*), a wasp.] A genus of lepidopterous insects, of the family *Sesiidæ*, having the abdomen moderate and no anal tuft; the hornet-moths. Two European species are the hornet-moth (*S. apiformis*) and the lunar hornet-moth (*S. bembeciformis*). See *Sesia.*

Sphecidæ (sfes'i-dē), *n. pl.* [NL., also erroneously *Sphegidæ*, < *Sphex* (*Sphec-*) + *-idæ.*] A family of fossorial hymenopterous insects, typified by the genus *Sphex:* same as *Sphegidæ.*

Sphecius (sfē'shi-us), *n.* [NL. (Dahlbom, 1843), < Gr. *σφήξ* (*σφηκ-*), a wasp.] A notable genus of digger-wasps, of the family *Bembecidæ*, having the middle tibiæ armed with two spurs at the apex, and the marginal cell of the fore wings lanceolate. The species are of large size and bright colors. *S. speciosus* is one of the largest of the

Sphecius speciosus, natural size.

North American solitary wasps, and digs large cylindrical burrows which it stores with stung cicadas, particularly with the dog-day harvest-fly (*Cicada tibicen*).

Sphecotheres (sfē-kō-thē′rēz), *n.* [NL. (Vieillot, 1816, also *Sphecotera* and *Sphecothera*), ⟨ Gr. *σφήξ* (*σφηκ-*), a wasp, + *θηρᾶν*, hunt, chase.] One of two leading genera of passerine birds, of the family *Oriolidæ*, having the lores and circumocular region naked. There are 4 species, ranging in Australia, New Guinea, Timor, and the Kei Islands. The Australian is *S. maxillaris;* the Papuan is *S. salvadorii; S. flaviventris* inhabits the Kei Islands and parts of Australia; while *S. viridis* is found in Timor and Semao. Also called *Picnorhamphus*.

Sphegidæ (sfej′i-dē), *n. pl.* [NL. (Westwood, 1840), irreg. ⟨ *Sphex* (*Sphec-*) + *-idæ*.] A family of fossorial hymenopters, or digger-wasps. The prothorax is narrowed anteriorly, and forms a sort of neck; the basal segment of the abdomen is narrowed into a long, smooth, round petiole; and the head and thorax are usually clothed with a long, thin pubescence. These wasps usually burrow into sand-banks, and provision their cells with caterpillars and spiders. Eighteen genera and about three hundred species are known. Also *Sphecidæ*. See *sand-wasp*, and cuts under *digger-wasp*, *Ammophila*, *mud-dauber*, and *Pelopæus*.

Blue Digger-wasp (*Chalybion cæruleum*), one of the *Sphegidæ*, natural size.

Sphenæacus, *n.* See *Sphenœacus*.

sphendone (sfen′dō-nē), *n.* [⟨ Gr. *σφενδόνη*, a sling, a head-band, a hoop, etc.] In *Gr. archæol.*: (*a*) A form of head-band or fillet worn by women to confine the hair around and on the top of the head. It is characteristically broad in front and narrow behind, being thus opposite in its arrangement to the opisthosphendone. (*b*) An elliptical or semi-elliptical area, or any place of kindred form, as the auditorium of a theater; that end of a stadium which was curved or rounded.

The Messenian stadium, which is surrounded by colonnades, has 16 rows of seats in the *sphendone*.
C. O. Müller, Manual of Archæol. (trans.), § 290.

sphene (sfēn), *n.* [⟨ F. *sphène*, in allusion to the wedge shape of the crystals, ⟨ Gr. *σφήν*, a wedge.] The mineral titanite. The transparent green, greenish-yellow, or yellow varieties frequently exhibit a play of colors as brilliant as that of the yellow or green diamond, showing a strong refractive and dispersive power on light. It is quite soft, the hardness being only 5.5. See *titanite*.

sphenethmoid (sfē-neth′moid), *a.* and *n.* [⟨ *sphen*(*oid*) + *ethmoid*.] **I.** *a.* 1. Of or pertaining to the sphenoid and the ethmoid bone; sphenethmoidal; ethmosphenoid: as, the *sphenethmoid* suture or articulation.—2. Representing or combining characters of both sphenoid and ethmoid: as, the *sphenethmoid* bone.

II. *n.* The sphenethmoid bone, as of the frog's skull: one of the cranial bones, situated in front of the parasphenoid. See *girdle-bone*, and cuts under *Anura*[2] and *Rana*.

Also *spheno-ethmoid*.

sphenethmoidal (sfē-neth-moi′dal), *a.* [⟨ *sphenethmoid* + *-al*.] Same as *sphenethmoid*.—**Sphenethmoidal nerve,** a branch of the nasal nerve described by Luschka as passing through the posterior internal orbital canal to the mucous membrane of the posterior ethmoidal cells and the sphenoidal sinus. Called by Krause the *posterior ethmoidal nerve*.

sphenic (sfē′nik), *a.* [⟨ Gr. *σφήν*, a wedge, + *-ic*.] Wedge-like.—**Sphenic number,** a number having three unequal factors.

sphenion (sfē′ni-on), *n.* [NL., ⟨ Gr. *σφήν*, a wedge.] The apex of the sphenoidal angle of the parietal bone, on the surface of the skull: so called by Von Torök. See *craniometry*.

spheniscan (sfē-nis′kan), *n.* [⟨ *Spheniscus* + *-an*.] A penguin or spheniscomorph; especially, a jackass-penguin of the restricted genus *Spheniscus*. See cut under *Spheniscus*.

Spheniscidæ (sfē-nis′i-dē), *n. pl.* [NL., ⟨ *Spheniscus* + *-idæ*.] The penguins as a family of squamipennate or brevipennate palmiped natatorial birds, of the order *Pygopodes;* the only family of *Spheniscomorphæ*, *Squamipennes*, *Impennes*, or *Ptilopteri*, so strongly marked that it is regarded as representing a superfamily, order, or even superorder, though formerly included in the *Alcidæ*, or auk family. The wings are reduced to flippers, like a seal's or turtle's. They hang by the side, and cannot be closed like those of other birds; in swimming under water they are flapped alternately with a peculiar motion suggesting that of the blades of a screw propeller. They are covered with small scaly feathers in which no remiges can be distinguished, and their bones are peculiarly flat, and not hollow. The feet are four-toed and webbed, with very short broad tarsi, the bones of which are more separate than the metatarsals of any other birds. In walking or standing the whole tarsus clears the ground, the birds not being plantigrade; and in swimming under water the feet act mainly as rudders. The beak varies in form in different genera. The plumage is uniformly implanted in the skin, without any apteria; and there is a highly developed system of subcutaneous muscles, contributing to the sinuous movements of the birds under water, suggestive of those of the duck-mole. The feathers of the upper parts and wings are scaly, with thick, flattened shafts and slight webbing. The *Spheniscidæ* are confined to the southern hemisphere, and abound in cold temperate and antarctic waters, especially about the southern end of Africa and South America, where they live in communities, often of great extent. There are about 14 species, one of which reaches Brazil and another Peru. The generic forms are *Aptenodytes*, the king-penguins, of great size, with slender bill; *Pygoscelis*, a similar but long-tailed type; *Dasyrhamphus*, with extensively feathered bill; *Eudyptula*, of very small size; *Eudyptes* (or *Catarractes*), the rock-hoppers, which are crested, and hop instead of waddling; and *Spheniscus*, the jackass-penguins. There is a fossil penguin, *Palæeudyptes antarcticus*, from the Tertiary of the west coast of Nelson Island, which was a giant, 4 or 5 feet tall. *Aptenodytidæ* is a synonym. See the generic names, *Spheniscomorphæ*, and cuts under *Eudyptes*, *metatarsus*, *penguin*[1], *Pygoscelis*, *Spheniscus*, and *Squamipennes*.

Spheniscinæ (sfē-ni-sī′nē), *n. pl.* [NL., ⟨ *Spheniscus* + *-inæ*.] The penguins: (*a*†) as a subfamily of *Alcidæ;* (*b*) as the only subfamily of *Spheniscidæ*.

spheniscine (sfē-nis′in), *a.* [⟨ *Spheniscus* + *-ine*[1].] Of or pertaining to the *Spheniscidæ;* spheniscomorphic.

spheniscoid (sfē-nis′koid), *a.* [⟨ *Spheniscus* + *-oid*.] Same as *spheniscomorphic*.

spheniscomorph (sfē-nis′kō-môrf), *n.* A penguin as a member of the *Spheniscomorphæ*.

Spheniscomorphæ (sfē-nis-kō-môr′fē), *n. pl.* [NL. (Huxley, 1867), ⟨ *Spheniscus* + Gr. *μορφή*, form.] The penguins as a group of schizognathous carinate birds, represented by the single family *Spheniscidæ*. See *Spheniscidæ*.

spheniscomorphic (sfē-nis-kō-môr′fik), *a.* [⟨ *Spheniscomorphæ* + *-ic*.] Of or pertaining to the *Spheniscomorphæ*. Also *spheniscoid*.

Spheniscus (sfē-nis′kus), *n.* [NL. (Brisson, 1760), ⟨ Gr. *σφηνίσκος*, dim. of *σφήν*, a wedge.] 1. In *ornith.*, a genus of penguins, of the family *Spheniscidæ*, having a stout, compressed beak hooked at the end, and no crest; the jackass-penguins. There are several species, of medium size. *S. demersus* is found off the Cape of Good Hope. It

Cape Jackass-penguin (*Spheniscus demersus*).

is bluish-gray or slate-colored above, white below, with a dark mask and single collar cut off by a white band from the other colored parts, the collar extending as a stripe along the sides of the body. The Magellanic penguin, *S. magellanicus*, of South America, is similar, but has a double collar. *S. humboldti* is another, inhabiting the coast of Peru. *S. minor* is a very small species, only about 12 inches long, now placed in another genus, *Eudyptula*.

2. In *entom.*, a genus of heteromerous coleopterous insects, of the family *Tenebrionidæ*. *Kirby*, 1817.—3. [*l. c.*] In *math.*, a sphenic number.

sphenobasilar (sfē-nō-bas′i-lär), *a.* [⟨ *spheno*(*id*) + *basilar*.] Of or pertaining to the basisphenoid and the basioccipital or basilar process of the occipital bone; basilar, as the suture between these bones. See cuts under *craniofacial*, *skull*, and *sphenoid*.

sphenoccipital (sfē-nok-sip′i-tal), *a.* [⟨ *spheno*(*id*) + *occipital*.] Of or pertaining to the sphenoid and the occipital bone; occipitosphenoid; sphenobasilar.

Sphenocercus (sfē-nō-sėr′kus), *n.* [NL. (G. R. Gray, 1840), ⟨ Gr. *σφήν*, a wedge, + *κέρκος*, a tail.] A genus of fruit-pigeons or *Treroninæ*, having the tail cuneate. Several species inhabit parts of Asia, Japan, and the East Indies, as *S. sphenurus*

Wedge-tailed Pigeon (*Sphenocercus sphenurus*).

of the Himalayan region, *S. sieboldi* of Japan, *S. korthalsi* of Sumatra, *S. apicauda* of Nepal, *S. oxyurus* of Java and Borneo, *S. formosæ* of Formosa. The genus is also called *Sphenurus*, *Sphenœnas*, and *Sphenotreron*.

Sphenodon (sfē′nō-don), *n.* [NL., ⟨ Gr. *σφήν*, a wedge, + *ὀδούς* (*ὀδοντ-*) = E. *tooth*.] 1. In *mammal.*, a genus of extinct megatherioid edentates, or fossil sloths, remains of which occur in the bone-caves of South America. *Lund*, 1839.—2. In *herpet.*: (*a*†) A genus of extant rhynchocephalous lizards of New Zealand. *S. punctatus* is known as the *tuatera*. The name is synonymous with *Hatteria*. (*b*) [*l. c.*] A lizard of this genus. They resemble ordinary lizards externally, but have internal characters representative of an order (*Rhynchocephalia*). They are now restricted to certain localities in New Zealand, and live chiefly in holes in the sand or about stones on certain rocky islets, though they were formerly abundant in other places. They have been thinned out, it is said, chiefly by hogs. There is but one species, *S. punctatum*.

sphenodont (sfē′nō-dont), *a.* and *n.* [⟨ *Sphenodon*(*t-*).] **I.** *a.* Having the character of a sphenodon; of or pertaining to the *Sphenodontidæ* or *Hatteriidæ*.

II. *n.* A sphenodont lizard.

Sphenodontidæ (sfē-nō-don′ti-dē), *n. pl.* [NL., ⟨ *Sphenodon*(*t-*) + *-idæ*.] A family of rhynchocephalous reptiles, named from the genus *Sphenodon:* same as *Hatteriidæ*.

sphenodontoid (sfē-nō-don′toid), *a.* and *n.* [⟨ *Sphenodon*(*t-*) + *-oid*.] Same as *sphenodont*.

Sphenœacus (sfē-nē-ā′kus), *n.* [NL. (Strickland, 1841), ⟨ Gr. *σφήν*, a wedge, + *οἰαξ* (*οἰακ-*), a rudder.] A genus of aberrant reed-warblers, of uncertain systematic position. It is remarkable in having only ten tail-feathers, which are stiffened with spiny shafts, and whose webs are lax and decomposed. There are no rictal bristles (as in the related emu-wren: see cut under *Stipiturus*). There are 6 species, of South Africa, New Zealand, and the Chatham Islands, as *S. africanus*, *S. punctatus* of New Zealand, and *S. rufescens* of the Chathams. Also *Sphenæacus* and *Sphenura*.

Sphenœnas (sfē-nē′nas), *n.* [NL., ⟨ Gr. *σφήν*, a wedge, + *οἰνάς*, a wild pigeon of the color of ripening grapes, ⟨ *οἰνάς*, *οἰνή*, the vine: see *wine*.] Same as *Sphenocercus*.

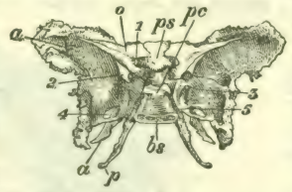
spheno-ethmoid (sfē-nō-eth′moid), *a.* and *n.* Same as *sphenethmoid*.

spheno-ethmoidal (sfē″nō-eth-moi′dal), *a.* Same as *sphenethmoidal*.

sphenofrontal (sfē-nō-fron′tal), *a.* [⟨ *spheno*(*id*) + *frontal*.] Of or pertaining to the sphenoid and the frontal bone; frontosphenoid.—**Sphenofrontal suture** or **articulation,** in man, a long horizontal suture between the orbital plates of the frontal bone and the orbitosphenoids, and between the external angular processes of the frontal and the alisphenoids.

sphenogram (sfē′nō-gram), *n.* [⟨ Gr. *σφήν*, a wedge, + *γράμμα*, a writing, ⟨ *γράφειν*, write.] A cuneiform or arrow-headed character.

sphenographer (sfē-nog′ra-fėr), *n.* [⟨ *sphenograph-y* + *-er*[1].] One versed in sphenography. [Little used.]



sphenographic (sfē-nō-graf′ik), *a.* [⟨ *sphenograph-y* + *-ic*.] Of or pertaining to sphenography.

sphenographist (sfē-nog'ra-fist), *n.* [< *sphenograph-y* + *-ist.*] Same as *sphenographer.*

sphenography (sfē-nog'ra-fi), *n.* [< Gr. *σφήν*, a wedge, + *-γραφία*, < *γράφειν*, write.] The study and description of cuneiform writings. [Rare.]

★**sphenoid** (sfē'noid), *a.* and *n.* [< Gr. *σφηνοειδής*, wedge-shaped, < *σφήν*, a wedge, + *εἶδος*, form.] **I.** *a.* Wedge-shaped; wedge-like; specifically, in *anat.*, noting certain cranial bones. See **II.**, 2.—**Minimum sphenoid diameter,** the least transverse diameter of the skull, measured between the temporal fossæ.

II. *n.* 1. In *crystal.*, a wedge-shaped crystalline form contained under four equal isosceles triangles. It is the hemihedral form of the square pyramid of the tetragonal system.—2. In *anat.*, a large and important compound bone of the skull: so called from its shape and connections in man. The cranial articulations are with the occipital, temporal, parietal, frontal, and ethmoid; the facial, with the vomer, malar, palate, and sometimes the superior maxillary. It has a solid median and inferior body, and bears on each side two pairs of wings, greater and lesser, separated by the sphenoidal fissure from each other. It is a collection of bones, not a single bone, its composition including, in man and the mammals generally, (*a*) a basisphenoid, the principal posterior part of the body of the bone, bearing (*b*) the alisphenoids, the pair of greater wings, these elements forming with the parietal bones the second or parietal segment of the cranium; (*c*) the presphenoid, the lesser anterior moiety of the body of the bone, bearing (*d*) the orbitosphenoids, the pair of lesser wings, or processes of Ingrassias, these forming with the frontal bones the third or frontal cranial segment; (*e*) a pair of pterygoid bones, the so-called internal pterygoid processes; (*f*) a pair of spongy bones, the sphenoturbinals. The development of the human sphenoid is from 14 centers of ossification, 8 in the postsphenoid division, and 6 in the presphenoid division. Below mammals, in *Sauropsida* (birds and reptiles), the sphenoid is simplified by subtraction of the pterygoids, which then form permanently distinct bones, and complicated by the addition of other elements, especially an underlying membrane-bone called the *parasphenoid.* In *Ichthyopsida* (amphibians and fishes) further and very great modifications occur. To the sphenoid of man are attached twelve pairs of muscles.

Human Sphenoid Bone, from above.

a, *a*, alisphenoid, or greater wing, the lower letter *a* pointing to its continuation as the external pterygoid process; *bs*, basisphenoid, or main body of the bone, *bs* pointing to the sphenoccipital articulation; *pc*, postclinoid processes, bounding the pituitary fossa or sella Turcica behind; *ps*, presphenoid, or fore part of the body of the bone; *o*, orbitosphenoid, or lesser wing; *p*, internal pterygoid process; *1*, optic foramen; *2*, sphenoidal fissure, or foramen lacerum anterius; *3*, foramen rotundum; *4*, foramen ovale; *5*, groove for internal carotid artery, or cavernous groove.

sphenoidal (sfē-noi'dal), *a.* [< *sphenoid* + *-al.*] Same as *sphenoid.*—**Sphenoidal angle.** See *craniometry.*—**Sphenoidal crest,** the median thin ridge projecting from the anterior surface of the sphenoid bone to articulate with the perpendicular plate of the ethmoid. Also called *ethmoidal crest.*—**Sphenoidal fissure.** See *fissure.*—**Sphenoidal fontanelle,** the membranous interspace in the infant skull at the junction of the squamous suture with the coronal suture. It often contains a Wormian bone.—**Sphenoidal hemihedrism.** See *hemihedrism.*—**Sphenoidal process.** See *process.*—**Sphenoidal rostrum.** (*a*) The beak, or a beak-like part, of the sphenoid bone. In man it is a vertical ridge upon which the vomer rides, forming the sphenovomerine suture or schindylesis. (*b*) In birds, a rostrate part of the skull which appears to be chiefly, if not entirely, developed from the parasphenoid.—**Sphenoidal septum.** See *septum sphenoidale,* under *septum.*—**Sphenoidal sinuses.** See *sinus.*—**Sphenoidal spongy bones,** the sphenoturbinals.

sphenoides (sfē-noi'dēz), *n.* [NL., < Gr. *σφηνοειδής*, wedge-shaped: see *sphenoid.*] 1. In *anat.*, the sphenoid bone: more fully called *os sphenoides.*—2. [*cap.*] A genus of cœlenterates.

sphenoideum (sfē-noi'dē-um), *n.*; pl. *sphenoidea* (-ạ). [NL.: see *sphenoid.*] The sphenoid bone, or os sphenoideum.

sphenoido-auricular (sfē-noi″dō-â-rik'ū-lăr), *a.* In *craniom.*, noting the ratio of the minimum sphenoidal diameter of the skull to the auricular diameter: as, the *sphenoido-auricular* index.

sphenoidofrontal (sfē-noi″dō-fron'tal), *a.* In *craniom.*, noting the ratio of the minimum sphenoidal diameter of the skull to the minimum frontal diameter.

sphenoidoparietal (sfē-noi″dō-pā-rī'e-tal), *a.* In *craniom.*, noting the ratio of the minimum sphenoidal diameter of the skull to the maximum parietal diameter.

sphenomalar (sfē-nō-mā'lăr), *a.* [< *spheno(id)* + *malar.*] Of or pertaining to the sphenoid and malar bones: as, the *sphenomalar* articulation, between the alisphenoid and malar bones.—**Sphenomalar suture.** See *suture.*

sphenomaxillary (sfē-nō-mak'si-lā-ri), *a.* [< *spheno(id)* + *maxillary.*] Relating to the sphenoid and superior maxillary bones.—**Sphenomaxillary fissure, fossa, suture,** etc. See the nouns.

Sphenomonadidæ (sfē″nō-mō-nad'i-dē), *n. pl.* [NL., < *Sphenomonas* (*-monad-*) + *-idæ.*] A family of dimastigate eustomatous protozoans, represented by the genus *Sphenomonas.* These animalcules are free-swimming; the cuticular surface is indurated; flagella are two in number, one long and one short, both vibratile and extended anteriorly; the oral aperture is succeeded by a distinct tubular pharynx; the endoplasm is colorless, granular; a nucleus and contractile vesicle are conspicuous.

Sphenomonas (sfē-nom'ō-nas), *n.* [NL., < Gr. *σφήν*, a wedge, + *μονάς*, solitary, a unit: see *monad.*] The representative genus of *Sphenomonadidæ.* These animalcules are of persistent polyhedral prismatic figure, with four or more longitudinal carinæ, and two vibratile flagella, a long and a short one. Two fresh-water species are *S. quadrangularis* and *S. octocostatus.*

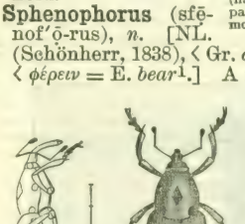
sphenonchus (sfē-nong'kus), *n.*; pl. *sphenonchi* (-kī). [NL., < Gr. *σφήν*, a wedge, + *ὄγκος*, bulk, mass.] In *ichth.*: (*a*) One of the hooked dermal spines of the cephalic armature of certain fossil fishes, as of the genera *Hybodus* and *Acrodus.* (*b*†) [*cap.*] A lapsed genus of fishes, founded on sphenonchi by Agassiz in 1843.

spheno-orbital, spheno-orbitar (sfē-nō-ôr'bi-tal, -tăr), *a.* Same as *sphenorbital.*

sphenopalatine (sfē-nō-pal'a-tin), *a.* [< *spheno(id)* + *palatine*2.] Pertaining to the sphenoid and palatine bones. Also *sphenopalatal, sphenopalatinate.*—**Internal sphenopalatine nerve.** Same as *nasopalatine nerve* (which see, under *nasopalatine*).—**Sphenopalatine artery,** a branch arising from the third or sphenomaxillary portion of the internal maxillary artery. It passes through the sphenopalatine foramen into the cavity of the nose, and is distributed to the nasal mucous membrane and the membranes of the antrum, ethmoid, and sphenoid cells. Also called *nasal artery.*—**Sphenopalatine foramen, ganglion, notch.** See the nouns.—**Sphenopalatine nerves,** two small branches of the superior maxillary nerve to the sphenopalatine or Meckel's ganglion.—**Sphenopalatine vein,** a small vein entering the pterygoid plexus.

sphenoparietal (sfē″nō-pā-rī'e-tal), *a.* [< *spheno(id)* + *parietal.*] Pertaining to the sphenoid and parietal bones: as, the *sphenoparietal* suture.—**Sphenoparietal sinus,** a small vessel which communicates with the cavernous sinus and middle meningeal veins, and rests in a groove on the under side of the lesser wing of the sphenoid. *Breschet.*—**Sphenoparietal suture.** See *suture.*

sphenopetrosal (sfē″nō-pet-rō'sal), *a.* [< *spheno(id)* + *petrosal.*] Of or pertaining to the sphenoid and petrosal bones; petrosphenoidal.—**Sphenopetrosal suture.** See *suture.*



sphenopharyngeus (sfē″nō-far-in-jē'us), *n.* [< *spheno(id)* + *pharyngeus.*] An occasional elevator muscle of the pharynx which arises from the spine of the sphenoid.

Sphenophorus sculptilis.

a, adult beetle, dorsal view; *b*, adult beetle, side view in outline (hair-line shows natural size); *c*, pattern of elytral sculpture, still more enlarged.

Sphenophorus (sfē-nof'ō-rus), *n.* [NL. (Schönherr, 1838), < Gr. *σφήν*, a wedge, + *-φόρος*, < *φέρειν* = E. *bear*1.] A notable genus of rhynchophorous beetles, of many species and very wide distribution, having the anterior coxæ narrowly separated, and the body beneath glabrous. Nearly 200 species are known, of which 30 inhabit America north of Mexico. Many of them breed in the roots of plants, and so may become pests. The adult beetles also often feed upon plants. Thus *S. sculptilis* feeds upon corn, and *S. pulchellus* upon the cocklebur (*Xanthium*).

Sphenophorus pulchellus.

a, adult beetle, dorsal view; *b*, adult beetle, side view in outline. (Hair-line shows natural size.)

Sphenophyllum (sfē-nō-fil'um), *n.* [NL. (Brongniart, 1828), < Gr. *σφήν*, a wedge, + *φύλλον*, a leaf.] A genus of fossil plants, characteristic of the Carboniferous and Permian of the northern hemisphere. These plants were herbaceous, ramose, articulated, with solid triangular stele, the inflated joints bearing verticils of sessile, cuneate, dichotomously plurinerved leaves with crenulate, denticulate, or laciniate upper margins. The small strobilar fructification bore close verticils of bracts which were connate near the base, upturned and free above, the sporangia being borne in one or more rows on ventrally developed sporangiospores on the lower portions of the bracts. *Sphenophyllum*—for which the name *Sphenophyllites* (Brongniart, 1822) should be substituted—is the type of the order *Sphenophyllales.*

sphenopterid (sfē-nop'te-rid), *n* A fern of the genus *Sphenopteris.*

Sphenopteris (sfē-nop'te-ris), *n.* [NL. (Sternberg, 1825), < Gr. *σφήν*, a wedge, + *πτέρις* (*πτεριδ-*), a fern: see *Pteris.*] One of the great genera comprised in the early classification of fossil ferns. Although based wholly on the features of the sterile fronds, and therefore artificial, it is still in general use, since the fructifications of the greater number of fossil fern species, especially those of the Paleozoic epoch, are still imperfectly if at all known. *Sphenopteris* includes ferns with intricate, generally pinnately compound fronds, often very large, characterized by having its pinnules constricted and commonly more or less wedge-shaped at the base, usually cuneately lobed or laciniate, and mostly denticulate, the nervation being thin and more or less diffusely forked, without a very thick primary nerve. The genus is abundant and wide-spread, especially in the Carboniferous, though ranging from the Devonian through the Permian, while many Mesozoic species are improperly included therein by authors. The ten or more types of fructification already discovered on the fronds of *Sphenopteris* represent highly diverse genera (*Renaultia, Zeilleria, Corynepteris,* etc.), not all admissible to the same family.

sphenopterygoid (sfē-nop-ter'i-goid), *a.* [< *spheno(id)* + *pterygoid.*] Common to the sphenoid and pterygoid bones. Also *pterygosphenoid.*

sphenorbital (sfē-nôr'bi-tal), *a.* [< *sphen(oid)* + *orbital.*] Pertaining to the sphenoid bone and the orbits of the eyes; orbitosphenoid. The sphenorbital parts of the sphenoid are the lesser wings, or orbitosphenoids; the sphenorbital fissure is the sphenoidal fissure, or anterior lacerate foramen. See *orbitosphenoid.* Also *spheno-orbital* and *spheno-orbitar.*

Sphenorhynchus (sfē-nō-ring'kus), *n.* [NL., prop. *Sphenorrhynchus* (Hemprich and Ehrenberg, 1829), < Gr. *σφήν*, a wedge, + *ῥύγχος*, a snout.] 1. A genus of *Ciconiidæ*, the wedge-billed storks, having a sharp straight bill with a membrane saddled on the base of the upper mandible, and no ambiens muscle. The only species is the white-bellied stork or simbil, *S. abdimi,* also called *Abdimia sphenorhyncha,* of greenish and brownish-purple color and white below, the bill tipped with orange-red. It inhabits Africa, nests in trees, and is regarded with veneration by the natives. See cut under *simbil.*

2†. A genus of South American dendrocolaptine birds, now called *Glyphorhynchus. Maximilian,* 1831.—3†. A genus of reptiles. *Tschudi,* 1838.

sphenosquamosal (sfē″nō-skwā-mō'sal), *a.* [< *spheno(id)* + *squamosal.*] Of or pertaining to the sphenoid and the squamous part of the temporal bone; squamosphenoidal.

sphenotemporal (sfē-nō-tem'pō-ral), *a.* [< *spheno(id)* + *temporal*2.] In *anat.*, of or belonging to the temporal and sphenoid bones. Also *temporosphenoid.*—**Sphenotemporal suture.** See ★*suture.*

sphenotic (sfē-nō'tik), *a.* and *n.* [< *sphen(oid)* + *otic.*] **I.** *a.* Of or pertaining to the sphenoid bone and the otic capsule, or hard parts of the auditory organ: as, a *sphenotic* ossification in various fishes. See cut under *teleost.*

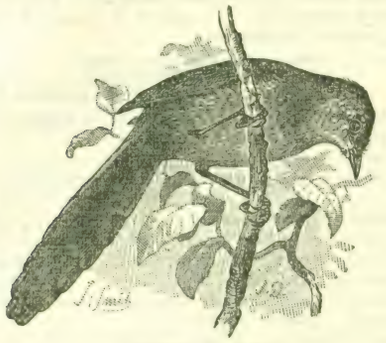
II. *n.* In *ornith.*, a postfrontal process of bone, or a separate ossification, developed in relation with sphenoidal and otic elements, entering into the posterior boundary of the orbital cavity.

sphenotresia (sfē-nō-trē'si-ạ), *n.* [NL., < Gr. *σφήν*, a wedge, + *τρῆσις*, perforation, < *τετραίνειν* (√ *τρα*), perforate.] The breaking up of the basal portion of the fetal skull in craniotomy.

sphenotribe (sfē'nō-trīb), *n.* [< Gr. *σφήν*, a wedge, + *τρίβειν*, rub, bruise.] The instrument used in performing sphenotresia.

sphenoturbinal (sfē-nō-tėr'bi-nal), *a.* and *n.* [< *spheno(id)* + *turbinal.*] **I.** *a.* Sphenoidal and turbinated or whorled or scroll-like; sphenoturbinate: specifically applied, conformably with *ethmoturbinal* and *maxilloturbinal,* to the sphenoidal spongy bones. See II.

II. *n.* One of the sphenoidal spongy bones; one of a pair of small bones situated in front of the body of the sphenoid, in man at birth solid, nodular, distinct from each other and from the sphenoid, afterward fused with the body of the sphenoid as delicate spongy or scroll-like bones which take part in forming the sphenoidal sinuses. Their homologues in other animals are questionable.



sphenoturbinate (sfē-nō-tėr'bi-nāt), *a.* [< *spheno(id)* + *turbinate.*] Same as *sphenoturbinal.*

sphenovomerine (sfē-nō-vom'e-rin), *a.* [< *spheno(id)* + *vomerine.*] Of or pertaining to the sphenoid bone and the vomer: as, the *sphenovomerine* suture or schindylesis.

Sphenozamites (sfē″nō-za-mī'tēz), *n.* [NL., < Gr. *σφήν*, a wedge, + NL. *Zamites*, q. v.] A name given by Brongniart in 1849 to certain fossil cycadaceous plants from the Oölite, designating as the type the plant from the Yorkshire beds now known as *Otozamites Beanii.* Schimper in 1870 sought to establish the genus, but

excluded from it Brongniart's type. The name is therefore untenable.

Sphenura (sfē-nū′rä), *n.* [NL., < Gr. *σφήν*, a wedge, + *οὐρά*, a tail.] 1. In *ornith.*, a generic name variously applied. (*a*) An Australian genus of aberrant reed-warblers, with only ten tail-feathers and three pairs of strong recurved rictal bristles. It is quite

Sphenura brachyptera.

near *Sphenœacus* (which see), and in part synonymous therewith. There are 3 species, *S. brachyptera*, *S. longirostris*, and *S. broadbenti*. *Lichtenstein*, 1823. (*b*†) A genus of South American synallaxine birds now called *Eusphenura* and *Thripophaga*. *Spix*, 1824; *Sundevall*, 1835. (*c*†) A genus of Indian and African birds related to neither of the foregoing, now called *Argya* (or *Argia*) and *Malcolmia*. *Bonaparte*, 1854.

2. In *entom.*, a genus of coleopterous insects. *Dejean*, 1834.

spheral (sfēr′al), *a.* [< L. *sphæralis*, of or pertaining to a sphere, globular, < *sphæra*, < Gr. *σφαῖρα*, a ball, sphere: see *sphere*.] 1. Rounded or formed like a sphere; sphere-shaped; hence, symmetrical; perfect in form. —2. Of or pertaining to the spheres or heavenly bodies; moving or revolving like the spheres; hence, harmonious.

Well I know that all things move
To the *spheral* rhythm of love.
Whittier, Andrew Rykman's Prayer.

The *spheral* souls that move
Through the ancient heaven of song-illumined air.
Swinburne.

Carlyle had no faith in . . . the astronomic principle by which the systems are kept in poise in the *spheral* harmony. *The Century*, XXVI. 538.

spherality (sfē-ral′i-ti), *n.* [< *spheral* + *-ity*.] The state of being spheral, or having the form of a sphere. [Rare.]

spheraster (sfē-ras′tėr), *n.* [NL., < Gr. *σφαῖρα*, a ball, sphere, + *ἀστήρ*, a star.] In sponges, a regular polyact or stellate spicule whose rays coalesce into a spherical figure, as in the genus *Geodia*; an aster with a thick spherical body. *W. J. Sollas.*

spheration (sfē-rā′shọn), *n.* [< *sphere* + *-ation*.] Formation into a sphere; specifically, the process by which cosmic matter is formed into a globular or planetary body. [Recent.]

The physical relations accompanying the *spheration* of a ring are not such as to determine uniformly either direct or retrograde motion. *Winchell*, World-Life, p. 123.

★**sphere** (sfēr), *n.* [Early mod. E. also *sphear*, *spheare*, also *sphære* (with vowel as in L.); earlier (and still dial.) *spere*, < ME. *spere*, < OF. *espere*, later *sphere*, F. *sphère* = Pr. *espera* = Sp. *esfera* = Pg. *esphera* = It. *sfera* = D. *sfeer* = G. *sphäre* = Dan. *sfære* = Sw. *spher*, < L. *sphæra*, ML. also *sphera*, *spera*, < Gr. *σφαῖρα*, a ball, globe, sphere, applied to a playing-ball, a sphere as a geometrical figure, the terrestrial globe, the earth, also an artificial globe (so in Strabo, the notion that the earth is a sphere appearing first prob. in Plato), also a star or planet (Plutarch), also a hollow sphere, one of the concentric spheres supposed to revolve around the earth, also a ball (of the eye), a pill, etc.; perhaps lit. 'that which is tossed about' (applied first to a playing-ball), for **σφάργα* for **σπάργα*, < *σπείρειν*, scatter, throw about (see *sperm*, *spore*[1]); or perhaps connected with *σπεῖρα*, a coil, ball, spire (see *spire*[2]).] 1. In *geom.*, a solid figure generated by the revolution of a semicircle about its diameter. This is substantially Euclid's definition. The modern definition is a quadric surface having contact with the absolute throughout a conic, and therefore everywhere equidistant from a center. The surface of a sphere is $4\pi R^2$, where R is the radius; its volume is $\frac{4}{3}\pi R^3$.

Hence — 2. A rounded body, approximately spherical; a ball; a globe.

The Lieutenant's evidence was as round, complete, and lucid as a Japanese *sphere* of rock-crystal.
O. W. Holmes, Old Vol. of Life, p. 55.

3. An orbicular body representing the earth or the apparent heavens, or illustrating their astronomical relations. Hence — 4. The visible supernal region; the upper air; the heavens; the sky. [Poetical.]

Then shall the righteous shine like glorious starres
Within the *sphear* of heaven.
Times' Whistle (E. E. T. S.), p. 6.

Sweet Echo, . . .
Sweet queen of parley, daughter of the *sphere*.
Milton, Comus, l. 241.

I,
An eagle, clang an eagle to the *sphere*.
Tennyson, Princess, iii.

5. One of the supposed concentric and eccentric revolving rigid and transparent shells called crystalline, in which, according to the old astronomers (following Eudoxus), the stars, sun, moon, and planets were severally set, and by which they were carried in such a manner as to produce their apparent motions. The term is now generally restricted to the sphere of the fixed stars, and is recognized as a convenient fiction. It is also loosely applied to the planets themselves.

After shewede he hym the nyne *speres*;
And after that the melodye herde he
That cometh of thilke *speres* thryes three,
That welle is of musik and melodye
In this world here and cause of harmonye.
Chaucer, Parliament of Fowls, l. 59.

Stand still, you ever-moving *spheres* of heaven!
Marlowe, Doctor Faustus, v. 4.

Hence — 6†. An orbicular field or course of movement; an orbit, as that of a heavenly body or of the eye; a circuit.

As Mars in three-score yeares doth run his *spheare*, . . .
The *spheare* of Cupid fourty yeares containes.
Spenser, Sonnets, lx.

Make thy two eyes, like stars, start from their *spheres*.
Shak., Hamlet, i. 5. 17.

7. Place or scene of action; the space within which movement is made or operations are carried on; a circumscribed region of action: as, the *sphere* of a mission; the *spheres* (fuller, *spheres of influence*) of the different European powers and trading companies in Africa.

The foure elementes wherof the body of man is compacte . . . be set in their places called *spheris*, higher or lower accordynge to the soueraintie of theyr natures.
Sir T. Elyot, The Governour, i. 1.

All this while the King had mov'd within his own *Sphere*, and had done nothing out of the Realm.
Baker, Chronicles, p. 403.

Our South African *sphere* seems better suited for European settlement than is the Tunisian protectorate of France. *Sir C. W. Dilke*, Probs. of Greater Britain, v.

8. Position or rank in society; position or class with reference to social distinctions.

Pleas'd, or not pleas'd, if we be Englands King,
And mightiest in the *Spheare* in which we moove,
Wee'le shine alone, this Phaeton cast downe.
Heywood, Royal King (Works, ed. Pearson, 1874, VI. 29).

I saw her [Marie Antoinette] just above the horizon, decorating and cheering the elevated *sphere* she just began to move in. *Burke*, Rev. in France.

9. Circuit or radius, as of knowledge, influence, or activity; definite or circumscribed range; determinate limit of any mental or physical course: as, the *sphere* of diplomacy.

This being wholly out of my *sphere*, I can give no account of them. *Dampier*, Voyages, II. i. 126.

Nature to each allots his proper *Sphere*.
Congreve, Of Pleasing.

Armillary sphere. See *armillary*. — **Axis of a sphere.** See *axis*[1]. — **Circle of the sphere.** See *circle*. — **Colloid, dialing, direct sphere.** See the qualifying words. — **Copernican sphere**, an armillary sphere with the addition of a second sphere representing the sun, central to a divided circle representing the ecliptic. — **Doctrine of the sphere**, the elements of the geometry of figures drawn upon the surface of a sphere. — **Epidermic spheres.** Same as *epithelial pearls* (which see, under *pearl*). — **Geometry of spheres**, a branch of geometry in which the lines of Plücker's geometry of lines are replaced by spheres, and the intersections of lines by the contact of spheres. — **Harmony or music of the spheres.** See *harmony*. — **Logical sphere**, the subject or ultimate antecedent of a statement, or the objects which a term denotes. — **Magic sphere.** See *magic*. — **Oblique sphere**, the sphere of the heavens, or another sphere representing that, as it appears at a station where the angle between the equator and the horizon is oblique. The *right sphere* is the same sphere for an equatorial station where the angle is a right angle, and the *parallel sphere* is the same where the angle vanishes — that is, for a polar station. — **Osculating sphere of a non-plane curve**, the sphere through four consecutive points of the curve. — **Parallel circles on a sphere.** See *parallel*. — **Parallel sphere.** See *oblique sphere*. — **Power of a sphere in regard to another**, the squared distance of the two centers less the sum of the squares of the radii. *Clifford*. — **Projection of the sphere.** See *map-projection*, under *projection*. — **Radical sphere**, a sphere orthogonally cutting four spheres having their centers at the summits of the tetrahedron of coördinates. — **Right sphere.** See *oblique sphere*. — **Sector of a sphere.** See *sector*. — **Segmentation sphere.** See *segmentation*. — **Segment of a sphere.** See *segment*. — **Sphere at infinity.** See *infinity*, 3. — **Twelve-point sphere.** (*a*) A sphere (discovered by Prouhet in 1863) belonging to a tetrahedron in which the four perpendiculars from the summits upon the opposite faces intersect in one point, this sphere passing through the four feet of these perpendiculars and consequently also through the centers of gravity of the four faces, and through the mid-points of the lines from the summits to the common intersection of the perpendiculars aforesaid. (*b*) More generally, a sphere (discovered in 1884 by the Italian mathematician Intrigila) belonging to any tetrahedron, and passing through the four feet of the perpendiculars from the summits upon the opposite faces, and consequently also through the mid-points of the lines from the summits to the center of the hyperboloid of which these perpendiculars are generators, and through the orthogonal projections of these points upon the opposite faces. = **Syn. 1-3.** *Orb*, *Ball*, etc. See *globe*.

sphere (sfēr), *v. t.*; pret. and pp. *sphered*, ppr. *sphering*. [< *sphere*, *n.*] 1. To make into a sphere; make spherical; round, or round out; fill out completely.

Blow, villain, till thy *sphered* bias cheek
Outswell the colic of puff'd Aquilon.
Shak., T. and C., iv. 5. 8.

2. To place in a sphere or among the spheres; ensphere.

And therefore is the glorious planet Sol
In noble eminence enthroned, and *sphered*
Amidst the other. *Shak.*, T. and C., i. 3. 90.

Light . . . from her native east
To journey through the aery gloom began,
Sphered in a radiant cloud; for yet the sun
Was not. *Milton*, P. L., vii. 247.

Because I would have reach'd you, had you been
Sphered up with Cassiopeia. *Tennyson*, Princess, iv.

3. To inclose as in a sphere or orbit; encircle; engirdle.

When any towne is *spher'd*
With siege of such a foe as kils men's minds.
Chapman, Iliad, xviii. 185.

4. To pass or send as in a sphere or orbit; circulate. [Rare.]

We'l still sit up,
Sphering about the wassail cup
To all those times
Which gave me honour for my rhimes.
Herrick, His Age.

sphere-crystals (sfēr′kris″talz), *n. pl.* In *bot.*, same as *sphæraphides*.

sphereless (sfēr′les), *a.* [< *sphere* + *-less*.] Having no sphere; wandering; unrestrained.

Let the horsemen's scimitars
Wheel and flash, like *sphereless* stars,
Thirsting to eclipse their burning
In a sea of death and mourning.
Shelley, Masque of Anarchy, st. 79.

sphere-yeast (sfēr′yēst), *n.* In *bot.*, an aggregation of certain sprouting forms of the genus *Mucor*: formerly so called from a resemblance in shape to the yeast-fungus, *Saccharomyces*.

spheric (sfer′ik), *a.* [= F. *sphérique* = Sp. *esférico* = Pg. *espherico* = It. *sferico*, < L. *sphæricus*, < Gr. *σφαιρικός*, of or pertaining to a ball, < *σφαῖρα*, a ball, sphere: see *sphere*.] Of or pertaining to a sphere or the spheres; sphere-like; spherical.

Up the *spheric* circles, circle above circle.
Mrs. Browning, Drama of Exile.

Let any sculptor hew us out the most ravishing combination of tender curves and *spheric* softness that ever stood for woman. *S. Lanier*, The English Novel, p. 273.

★**spherical** (sfer′i-kal), *a.* [< *spheric* + *-al*.] 1. Bounded by or having the form of the surface of a sphere: as, a *spherical* body; a *spherical* surface; a *spherical* shell.

We must know the reason of the *spherical* figures of the drops. *Glanville.*

2. Pertaining or relating to a sphere or spheres, or to sphericity: as, a *spherical* segment or section; *spherical* trigonometry. — 3†. Relating to the planets; planetary, in the astrological sense.

We make guilty of our disasters the sun, the moon, and the stars: as if we were villains by necessity; fools by heavenly compulsion; knaves, thieves, and treachers by *spherical* predominance. *Shak.*, Lear, i. 2. 134.

Adjunct spherical function. See *function*. — **Center of spherical curvature.** See *center*[1]. — **Concave spherical mirror.** See *mirror*, 2. — **Line of spherical curvature.** See *line*[2]. — **Spherical aberration.** See *aberration*, 4. — **Spherical angle.** See *angle*[3]. — **Spherical bracketing**, in *arch.*, an arrangement of brackets for the support of lath-and-plaster work forming a spherical surface. — **Spherical compasses**, a kind of calipers for measuring globular bodies, variously constructed. — **Spherical complex**, the aggregate of all the spheres in space fulfilling a single geometrical condition. — **Spherical congruence**, the aggregate of all the spheres in space fulfilling two geometrical conditions. — **Spherical conic section.** See *conic*. — **Spherical coördinates.** See *coördinate*. — **Spherical curvature, epicycloid, excess, function, geometry.** See the nouns. — **Spherical cyclic**, a curve which is the intersection of a sphere with a quadric surface. — **Spherical group**, the spherical complex determined by a linear equation between the coördinates and the power of the center of the variable circle. — **Spherical harmonic.** Same as *Laplace's function* (which see, under *function*). — **Spherical indicatrix.** See *indicatrix*. — **Spherical inversion.** See *geometrical inversion*, under

inversion.—**Spherical lune,** the portion of the surface of a sphere included between two great semicircles.—**Spherical nucleus.** Same as *nucleus globosus* (see *nucleus*).—**Spherical pencil,** a singly infinite continuous series of spheres determined like a spherical group, but by three equations.—**Spherical polygon.** See *polygon.*—**Spherical representation,** a mode of continuous correspondence between the points of a surface and the points of a sphere, each radius of the sphere through the center representing the parallel normal of the surface. Any part of the sphere considered as thus representing a part of the surface is called its *spherical image.*—**Spherical saw,** a saw made in the form of a segment of a sphere, used for sawing out curvilinear work. See cut *d* under *saw*[1].—**Spherical sclere.** See *sclere* and *spheraster.*—**Spherical-shot machine,** a machine for finishing cannon-balls by molding and pressing to a true spherical form. *E. H. Knight.*—**Spherical surface-harmonic.** See *harmonic.*—**Spherical triangle, trigonometry,** etc. See the nouns.

sphericality (sfer-i-kal′i-ti), *n.* [< *spherical* + *-ity.*] Spherical form; sphericity. *N. A. Rev.*, CXXVI. 375. [Rare.]

spherically (sfer′i-kal-i), *adv.* In the form of a sphere, or of part of a sphere; so as to be spherical.

sphericalness (sfer′i-kal-nes), *n.* The state or property of being spherical; sphericity. [Rare.]

sphericity (sfē-ris′i-ti), *n.* [= F. *sphéricité;* as *spheric* + *-ity.*] The character of being in the shape of a sphere.

sphericle (sfer′i-kl), *n.* [Dim. of *sphere.*] A small sphere; a spherule. [Rare.] *Imp. Dict.*

spherics (sfer′iks), *n.* [Pl. of *spheric* (see *-ics*).] Geometry of figures drawn on the surface of a sphere; specifically, spherical trigonometry.

spheriform (sfē′ri-fôrm), *a.* [< L. *sphæra,* sphere, + *forma,* form.] Formed or existing as a sphere; sphere-shaped; spherical. *Cudworth,* Intellectual System, II. 23. [Rare.]

spherocobaltite (sfē-rō-kō′bâl-tīt), *n.* [< Gr. *σφαῖρα,* a ball, sphere, + E. *cobalt* + *-ite*[2].] Carbonate of cobalt, a rare mineral occurring in small spherical masses with concentric radiated structure, and having a peach-blossom red color.

spheroconic (sfē-rō-kon′ik), *n.* [< Gr. *σφαῖρα,* a ball, sphere, + *κῶνος,* a cone: see *conic.*] A non-plane curve, the intersection of a sphere with a quadric cone having its vertex at the center of the sphere.—**Cyclic arcs of the spheroconic,** the intersections of the cyclic planes of the cone with the sphere.—**Reciprocal spheroconic,** the envelop of the great circles of which the points on the first spheroconic are the poles.

spherocrystal (sfē-rō-kris′tal), *n.* [< Gr. *σφαῖρα,* a ball, sphere, + *κρύσταλλος,* crystal.] 1. In *lithol.*, a mineral occurring in spherical form with fibrous-radiate structure.—2. *pl.* In *bot.*, same as *sphæraphides.*

spherodactyl (sfē-rō-dak′til), *a.* Of or pertaining to the genus *Sphærodactylus,* as a gecko.

spherogastric (sfē-rō-gas′trik), *a.* [< Gr. *σφαῖρα,* a ball, sphere, + *γαστήρ,* stomach.] Having a spherical or globular abdomen, as a spider; of or pertaining to the *Sphærogastra.* See cut under *honey-bearer.*

spherograph (sfē′rō-grâf), *n.* [< Gr. *σφαῖρα,* a ball, sphere, + *γράφειν,* write.] A nautical instrument consisting of a stereographic projection of the sphere upon a disk of pasteboard, in which the meridians and parallels of latitude are laid down to single degrees. By the aid of this projection, and a ruler and index, the angular position of a ship at any place, and the distance sailed, may be readily and accurately determined on the principle of great-circle sailing.

spheroid (sfē′roid), *n.* [Also *sphæroid;* = F. *sphéroïde,* < Gr. *σφαιροειδής,* like a ball or sphere, globular, < *σφαῖρα,* a ball, sphere, + *εἶδος,* form.] 1. A geometrical body approaching to a sphere, but not perfectly spherical.—2. In *geom.*, a solid generated by the revolution of an ellipse about one of its axes. When the generating ellipse revolves about its longer or major axis, the spheroid is *prolate* or *oblong;* when about its less or minor axis, the spheroid is *oblate.* The earth is an oblate spheroid—that is, flattened at the poles, so that its polar diameter is shorter than its equatorial diameter. (See *earth*[1], 1.) The same figure is assumed by the other planets; hence the properties of the oblate spheroid are of great importance in geodesy and astronomy.—**Universal spheroid,** a surface generated by the revolution of an ellipse about any diameter.

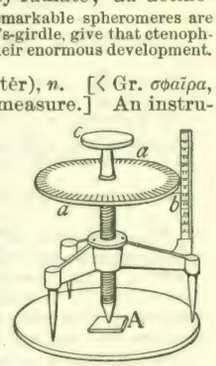
spheroidal (sfē-roi′dal), *a.* [< *spheroid* + *-al.*] 1. Of or pertaining to, or having the form of, a spheroid.—2. In *crystal.*, globose; bounded by several convex faces.—3. In *entom.*, round and prominent, appearing like a ball or sphere partly buried in the surface: as, *spheroidal* eyes; *spheroidal* coxæ.—**Spheroidal bracketing,** in *arch.*, bracketing which has a spheroidal surface.—**Spheroidal epithelium.** See *epithelium.*—**Spheroidal state or condition,** the condition of water or other liquid when, on being placed on a highly heated surface, as red-hot metal, it assumes the form of a more or less flattened spheroid, and evaporates without ebullition. The spheroid in this condition does not touch the surface of the metal, but floats on a layer of its own vapor, and evaporates rapidly from its exposed surface. It is heated mainly by radiation from the hot surface, since the layer of intervening vapor conducts heat very feebly. The formation of a layer of non-conducting vapor explains why it is possible to dip the wetted hand into molten iron with impunity. It is sometimes spoken of as the *caloric* or *caloriffic paradox.*

spheroidally (sfē-roi′dal-i), *adv.* In a spheroidal manner; so as to form a spheroid or spheroids.

> The great mass . . . is largely built up of *spheroidally* jointed rock. *Quart. Jour. Geol. Soc.*, XLIV. 450.

spheroidic (sfē-roi′dik), *a.* [= F. *sphéroïdique;* as *spheroid* + *-ic.*] Same as *spheroidal.* [Rare.]

spheroidical (sfē-roi′di-kal), *a.* [< *spheroidic* + *-al.*] Same as *spheroidal.* [The usual old form.]



> The same *spheroidical* form. *Jefferson,* Correspondence, II. 67.

spheroidicity (sfē-roi-dis′i-ti), *n.* [< *spheroidic* + *-ity.*] The state or character of being spheroidal.

Spheroma, *n.* See *Sphæroma.*

spheromere (sfē′rō-mēr), *n.* [Also *sphæromere;* < Gr. *σφαῖρα,* a ball, sphere, + *μέρος,* a part.] One of the radially arranged parts or symmetrical segments of any radiate; an actinomere. Perhaps the most remarkable spheromeres are those two which, in the Venus's-girdle, give that ctenophoran a ribbon-like figure by their enormous development. See cut under *Cestum.*

spherometer (sfē-rom′e-tėr), *n.* [< Gr. *σφαῖρα,* a ball, sphere, + *μέτρον,* measure.] An instrument for measuring the radii of spheres; a sphere-measurer. It is of especial service to opticians in determining the focal lengths, etc., of lenses. The common form (see figure) consists of a vertical screw *c,* with a large graduated head *a a,* turning in a socket supported by three legs whose hard steel points are exactly equidistant. The fixed scale *b* at the side, together with the graduated screw-head, makes it possible to measure with great accuracy the distance between the extremity of the screw and the plane passing through the ends of the three supports, when, for example, all the points are in contact with the surface of the sphere. If, in addition, the distance between the ends of the supports is known, a simple calculation gives the radius of the sphere. The same instrument may also be used to determine with precision the thickness of a plate, as (in the figure) A, placed upon a horizontal surface.

Spherometer.

spheromian (sfē-rō′mi-an), *a.* and *n.* [< *Spheroma* + *-ian.*] **I.** *a.* Of or pertaining to *Sphæroma* or the *Sphæromidæ.*

II. *n.* A globe-slater.

Also spelled *sphæromian.*

spheropolar (sfē-rō-pō′lär), *a.* [< Gr. *σφαῖρα,* sphere, + E. *polar.*] Reciprocal relatively to a sphere. The plane through the points of contact of a cone with a sphere is the *spheropolar* of the vertex.

spherosiderite (sfē-rō-sid′e-rīt), *n.* [Also *sphærosiderite;* < Gr. *σφαῖρα,* a ball, sphere, + *σιδηρίτης,* of iron: see *siderite.*] A variety of the iron carbonate siderite, occurring in globular concretionary forms.

spherospore (sfē′rō-spōr), *n.* [< Gr. *σφαῖρα,* a ball, + E. *spore.*] In *bot.*, same as *tetraspore.*

spherular (sfer′ō-lär), *a.* [< *spherule* + *-ar*[3].] 1. Having the form of a spherule; resembling a spherule.—2. Of or pertaining to a spherulite; spherulitic.

> *Spherular* bodies consisting of radially-aggregated fibres of a single mineral. *Nature,* XXXIX. 315.

spherulate (sfer′ō-lāt), *a.* [< *spherule* + *-ate*[1].] In *entom.*, having one or more rows of minute rounded tubercles; studded with spherules.

spherule (sfer′ōl), *n.* [Also *sphærule;* < L. *sphærula,* dim. of *sphæra,* a ball, sphere: see *sphere.*] A little sphere or spherical body. Quicksilver, when poured upon a plane surface, divides itself into a great number of minute spherules.

spherulite (sfer′ō-līt), *n.* [Also *sphærulite;* < *spherule* + *-ite*[2].] 1. A spherule, formed by crystallization in certain igneous rocks, having a more or less perfectly developed concentric and at the same time decidedly radiating fibrous structure. The highly silicious volcanic rocks not unfrequently have a spherulitic structure.—2. Same as *radiolite,* 2.—**Spherulite rock,** in *geol.*, a rock of which the predominating part has a spherulitic structure.

spherulitic (sfer-ō-lit′ik), *a.* [< *spherulite* + *-ic.*] Made up of or containing spherulites; having the character of a spherulite. Also *sphærulitic.*

spherulitize (sfer′ō-li-tīz), *v. t.*; pret. and pp. *spherulitized,* ppr. *spherulitizing.* [< *spherulite* + *-ize.*] To convert more or less completely into spherulites, or cause to assume a spherulitic structure, wholly or in part. *Quart. Jour. Geol. Soc.*, XLV. 250.

spherulitoid (sfer′ō-li-toid), *a.* [< *spherulite* + *-oid.*] Having more or less perfectly the form of a spherulite. *Quart. Jour. Geol. Soc.*, XLV. 248.

sphery (sfēr′i), *a.* [< *sphere* + *-y*[1].] 1. Belonging to the spheres.

> She can teach ye how to climb
> Higher than the *sphery* chime.
> *Milton,* Comus, l. 1021.

2. Resembling a sphere or star in roundness, brightness, or other attribute.

> What wicked and dissembling glass of mine
> Made me compare with Hermia's *sphery* eyne?
> *Shak.*, M. N. D., ii. 2. 99.

spheterize (sfet′e-rīz), *v. t.*; pret. and pp. *spheterized,* ppr. *spheterizing.* [< Gr. *σφετερίζειν,* make one's own, < *σφέτερος,* their own, poss. adj. of the 3d pers. pl., < *σφεῖς,* they.] To take to one's self; appropriate as one's own. *Burke.* [Rare.] (*Encyc. Dict.*)

Sphex (sfeks), *n.* [NL. (Linnæus, 1758), < Gr. *σφήξ,* a wasp: see *wasp.*] 1. A notable genus of large handsome digger-wasps, typical of the family *Sphegidæ* (or *Sphecidæ* or *Sphexidæ*). They abound in tropical regions, but some 12 species inhabit the United States. *S. ichneumonea* digs rapidly in hard ground, and provisions its cells with grasshoppers. About 100 species are known. See cut under *digger-wasp.*

2. [*l. c.*] A wasp of this genus.

sphex-fly (sfeks′flī), *n.* One of numerous different dipterous insects, as of the genus *Conops,* which resemble a sphex in some respects.

sphiggure (sfig′ūr), *n.* See *sphingure.*

sphincter (sfingk′tėr), *n.* [NL., < L. *sphincter,* < Gr. *σφιγκτήρ,* anything which binds tight, a lace, a band, < *σφίγγειν,* shut tight, close.] An orbicular, circular, or annular muscle surrounding and capable of closing a natural orifice or passage of the body.—**Oral sphincter.** Same as *orbicularis oris* (which see, under *orbicularis*).—**Sphincter ani,** the sphincter of the anus, under which name two distinct muscles are known. (*a*) The sphincter ani proper, sphincter externus, or external sphincter is a thin, flat plane of voluntary muscular fibers supplied by hemorrhoidal branches of nerves from the sacral plexus, surrounding the anus, subcutaneous and intimately adherent to the integument, of elliptical form 3 or 4 inches in long diameter, and an inch wide across. It arises from the tip of the coccyx, and is inserted into the tendinous raphe of the perineum. Like most sphincters, it consists of symmetrical lateral halves united by a raphe in front of and behind the opening it incloses. (*b*) The sphincter recti, sphincter internus, or internal sphincter surrounds the lower end of the rectum, forming a muscular ring about an inch in extent and a quarter of an inch thick, and consists of an aggregation and thickening of the circular fibers of the gut. This sphincter is involuntary, and in health maintains its tonic contractility, which yields by reflex action to the pressure of the contents of the bowel.—**Sphincter oculi,** or **sphincter palpebrarum,** the orbicular muscle of the eyelids, which surrounds and closes them. Usually called *orbicularis palpebrarum.* See cut under *muscle*[1].—**Sphincter cris,** the oral sphincter. See *orbicularis oris,* under *orbicularis.*—**Sphincter pupillaris,** the circular or concentric fibers of the iris, whose contraction makes the pupil smaller. Also called *sphincter pupillæ* and *sphincter iridis.*—**Sphincter pylori.** See *pylorus.*—**Sphincter recti,** the internal sphincter ani (see above).—**Sphincter vaginæ,** an elliptical muscle surrounding the orifice of the vagina, corresponding to the bulbocavernosus of the male. Also called *constrictor vaginæ.*—**Sphincter vesicæ,** the unstriped involuntary muscular fibers around the neck of the urinary bladder.—**Sphincter vesicæ externus,** the partly plain partly striated muscular fibers which surround the prostatic part of the urethra. Also called *sphincter prostaticus* and *sphincter of Henle.*

sphincteral (sfingk′tėr-al), *a.* [< *sphincter* + *-al.*] Same as *sphincterial.*

sphincterate (sfingk′tėr-āt), *a.* [Also *sphinctrate;* < *sphincter* + *-ate*[1].] 1. In *anat.* and *zoöl.*, provided with a sphincter; closed or closable by means of a sphincter.—2. Contracted or constricted as if by a sphincter: thus, an hourglass is *sphincterate* in the middle.

sphincterial (sfingk-tē′ri-al), *a.* [< *sphincter* + *-ial.*] Of or pertaining to a sphincter or its function: as, a *sphincterial* muscle; *sphincterial* fibers; *sphincterial* action.

sphincteric (sfingk-ter′ik), *a.* [< *sphincter* + *-ic.*] Same as *sphincterial.*

sphincterotomy (sfingk-tė-rot′ō-mi), *n.* [< Gr. *σφιγκτήρ,* a sphincter, + *-τομία,* < *τέμνειν, ταμεῖν,* cut.] The operation of cutting a sphincter to prevent its spasmodic action.

sphinctrate (sfingk′trāt), *a.* Same as *sphincterate.*

Sphindidæ (sfin′di-dē), *n. pl.* [NL., < *Sphindus* + *-idæ.*] An aberrant family of serricorn beetles, in which the antennæ are so obviously clavate as to resemble those of the clavicorn series. It contains a few small species found in fungi which grow upon the trunks of trees.

Sphindus (sfin'dus), *n.* [NL. (Chevrolat, 1833), a made word.] The typical genus of the *Sphindidæ*. Only 3 species are known, one of which is North American.

Sphingidæ (sfin'ji-dē), *n. pl.* [NL. (Leach, 1819), ‹ *Sphinx* (*Sphing-*) + *-idæ*.] An important family of heterocerous lepidopterous insects, with fusiform antennæ, typified by the genus *Sphinx*, including all those commonly known as *sphinxes*, *sphinx-moths*, *hawk-moths*, or *humming-bird moths*. The body is robust; the abdomen is stout, conical, often tufted; the tongue is usually long and strong; the antennæ have a hook at the tip; the wings are comparatively small and narrow, the fore wings acute at the tip. They are diurnal or crepuscular in habit, a few flying in the hottest sunshine, but the majority in the twilight. The larvæ are large, naked, usually green in color, and generally furnished with a prominent caudal horn, which is sometimes replaced after the last molt by a shining lenticular tubercle. When full-grown they either pupate above ground, between leaves, in a slight cocoon, or more generally go deep under ground, and transform in an earthen cell. The long-tongued species have a special free and characteristic tongue-case. The species of temperate regions are divided into four principal subfamilies: *Macroglossinæ*, *Chærocampinæ*, *Sphinginæ*, and *Smerinthinæ*. From America north of Mexico 83 species have been described, about 50 from Europe, and rather more than 600 for the entire world. Also *Sphingides*, *Sphingidi*, *Sphingina*, *Sphingoidea*, and *Sphingoides*. See cuts under *hog-caterpillar*, *Philampelus*, *hawk-moth*, *Lepidoptera*, and *sphinx*.

sphingiform (sfin'ji-fôrm), *a.* [‹ NL. *Sphinx* (*Sphing-*) + L. *forma*, form.] In *entom.*, resembling a moth of the family *Sphingidæ*.

sphingine (sfin'jin), *a.* Resembling a sphinx or hawk-moth; of or pertaining to the *Sphingidæ;* sphingoid or sphingiform.

sphingoid (sfing'goid), *a.* [‹ NL. *Sphinx* (*Sphing-*) + *-oid*.] Like a sphinx or hawk-moth; sphingine or sphingiform.

sphingure (sfing'gūr), *n.* [= F. *sphiggure:* see *Sphingurus*.] A member of the genus *Sphingurus*.

Sphingurinæ (sfing-gū-rī'nē), *n. pl.* [NL., ‹ *Sphingurus* + *-inæ*.] The American porcupines; a subfamily of *Hystricidæ*, of more or less completely arboreal habits, represented by four genera, *Sphingurus*, *Synetheres*, *Chætomys*, and *Erethizon:* so named by E. R. Alston in 1876. It corresponds to the *Synetherina* of Gervais (1852), the *Synetherinæ* of J. A. Allen (1877), and the *Cercolabinæ* (as a subfamily of *Spalacopodidæ*) of Lilljeborg (1866) and Gill (1872). See cuts under *porcupine* and *prehensile*.

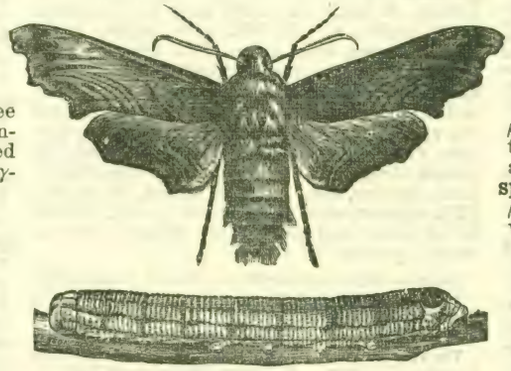
sphingurine (sfing'gū-rin), *a.* Of or belonging to the *Sphingurinæ;* synetherine; cercolabine.

Sphingurus (sfing-gū'rus), *n.* [NL. (F. Cuvier, 1822, in form *Sphiggurus*), ‹ Gr. *σφίγγειν*, throttle, strangle (see *sphinx*), + *οὐρά*, tail.] The typical genus of *Sphingurinæ*, having the tail prehensile, all four feet four-toed, and little development of spines. It is closely related to *Synetheres;* but the latter is more spiny, and has a broad, highly arched frontal region. The two genera are united by Brandt under the name *Cercolabes*. Each has several Neotropical species in Central and South America, east of the Andes, from southeastern Mexico and the West Indies to Paraguay.

sphinx (sfingks), *n.*; pl. *sphinxes*, *sphinges* (sfingk'sez, sfin'jēz). [= F. *sphinx* = Sp. *esfinge* = Pg. *esphinge* = It. *sfinge* = G. *sphinx*, ‹ L. *sphinx*, ‹ Gr. *σφίγξ* (*σφιγγ-*), Æolic *φίξ*, a sphinx (Theban or Egyptian: see defs. 1 and 2); supposed to mean lit. 'strangler,' the story being that the Sphinx strangled those who could not solve her riddles; ‹ *σφίγγειν*, throttle, strangle, orig. bind, compress, fix; prob. = L. *figere*, fix (see *fix*); by some connected with L. *fascis*, a bundle: see *fascis*.] **1.** [*cap.* or *l. c.*] In *Gr. myth.*, a female monster, said to have proposed a riddle to the Thebans who passed her as she sat on a rock by the roadside, and to have killed all who were not able to guess it. The riddle, according to tradition, inquired what being has successively four, two, and three feet, and is weakest when it has most feet. Œdipus answered, Man, who creeps in infancy, afterward goes erect, and finally walks with a staff (a third foot). The Sphinx, in compliance with her own conditions, thereupon threw herself from her rock and died. In art this monster is represented with the body of a lion or a dog, winged, and the head and often the breasts of a woman.

> For valour, is not Love a Hercules? . . .
> Subtle as *Sphinx*. *Shak.*, L. L. L., iv. 3. 342.

> In the third [court] . . . are two *Sphinges* very curiously carved in brasse. *Coryat*, Crudities, I. 35.



2. In *Egypt. antiq.*, a figure somewhat similar in composition to the Greek, having the body of a lion (never winged), and a male human head or an animal head. The human-headed figures have been called *androsphinxes;* those with the head of a ram, *criosphinxes;* and those with the head of a hawk, *hieracosphinxes*. Egyptian sphinxes are symbolical figures, having no connection with the Greek fable; and the Greeks probably applied the term *sphinx* to the Egyptian statues merely on account of the accidental external resemblance between them and their own conception. The Egyptian sphinxes were commonly placed in avenues leading to temples or tombs. The most celebrated example is the Great Sphinx near the great pyramids of Ghizeh, hewn out of solid granite, with the recumbent body of a lion, 146 feet long from the shoulders to the rump, and 56 feet high, and a man's head 28½ feet high from chin to crown. A small temple stood between the fore paws of this sphinx. There are also Oriental sphinxes, in general akin to the Egyptian, but more often winged than wingless. See cut under *androsphinx*.

3. In *her.*, a creature with a lion's body and a woman's head, but not necessarily like any ancient original. It is assumed to be winged; when not winged, it should be blazoned "sans wings."—**4.** An enigmatic or sphinx-like person; one who talks puzzlingly, or is inscrutable in disposition or character; one whom it is hard to understand.—**5.** In *entom.*: (*a*) A hawk-moth; a member of the genus *Sphinx* or the family *Sphingidæ*. See cuts under *hawk-moth*, *hog-caterpillar*, *Lepidoptera*, and *Philampelus*. (*b*) [*cap.*] [NL. (Linnæus, 1767).] The typical genus of the family *Sphingidæ*. At first it was coextensive with this family; later it formed a group of variable extent; now it is confined to forms having the head small, the eyes lashed, tibiæ spinose, and fore tarsi usually armed with long spines. It is a wide-spread genus; 19 species occur in America north of Mexico. The larvæ of this, as well as of other groups of the family *Sphingidæ*, have the habit of erecting the head and anterior segments, from which Linnæus derived a fanciful resemblance to the Egyptian Sphinx (whence the name).

6. The Guinea baboon, *Cynocephalus papio* or *Papio sphinx*. Also called *sphinx-baboon*.—**Abbot's sphinx**, *Sphecodina abboti*, a small North American sphinx whose larva feeds on the vine.—**Achemon sphinx**, *Pholus achemon*. See cuts of moth and larva under *Philampelus*.—**Blind-eyed sphinx**, *Paonias excæcatus*, a handsome American moth, of a general fawn color, with roseate hind wings ornamented with a blue-centered eye-spot, whose larva lives upon the apple.—**Carolina sphinx**, *Phlegethontius carolina*, a mottled gray and black moth whose larva is the tobacco-worm. See cut under *tobacco-worm*.—**Catalpa sphinx**, *Ceratomia catalpæ*, an American moth whose larva feeds on the catalpa.—**Clear-winged sphinx**, a moth whose wings are partly hyaline, as *Hemaris diffinis* and other members of the same genus; also, certain of the *Sesiidæ*.—**Death's-head sphinx**, *Acherontia atropos*. See cut under *death's-head*.—**Five-spotted sphinx**, *Phlegethontius celeus*, a common gray North American moth whose abdomen is marked with five orange spots on each side, and whose larva feeds upon the tomato, potato, and other solanaceous plants. See cut under *tomato-worm*.—**Morning-sphinx**, any species of the genus *Deilephila*, as *D. lineata*, the white-lined morning-sphinx, a common American moth of striking coloration, whose larva feeds on purslane.—**Satellite sphinx**. See *satellite-sphinx* (with cut).—**Walnut-sphinx**, *Cressonia juglandis*, an American moth whose larva feeds on the walnut.

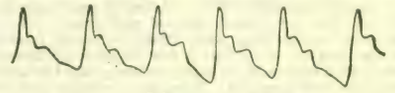
Sphinx.—Greek sculpture in the British Museum.

Abbot's Sphinx (*Sphecodina abboti*), moth and larva, natural size.

White-lined Morning-sphinx (*Deilephila lineata*), natural size, left wings omitted.

sphinx-moth (sfingks'môth), *n.* Same as *sphinx*, 5 (*a*).

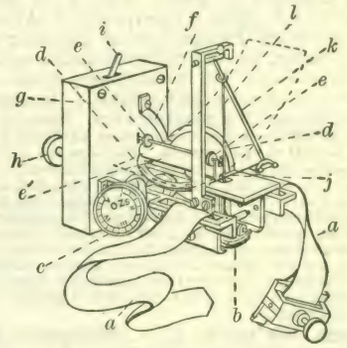
sphragide (sfraj'id), *n.* [‹ F. *sphragide*, ‹ L. *sphragis*, ‹ Gr. *σφραγίς*, a signet, a seal.] Same as *Lemnian earth* (which see, under *Lemnian*).



sphragistics (sfrā-jis'tiks), *n.* [‹ Gr. *σφραγιστικός*, of, for, or pertaining to sealing, ‹ *σφραγίζειν*, seal, ‹ *σφραγίς*, a seal.] The study of seals and the distinctions among them; the archæology of seals. This study is similar in its nature to numismatics, and has been of great use in the history of the middle ages, as well as in the investigation of costume, armor, etc.; it is also of value in connection with the documents to which seals are attached, as aiding in their classification and in the proof of their authenticity.

sphrigosis (sfri-gō'sis), *n.* [NL., for **sphrigesis;* ‹ Gr. *σφριγᾶν*, be full and vigorous, + *-osis*.] Over-rankness in fruit-trees and other plants. It is a disease in which the plant tends to grow to wood or stems and leaves in place of fruit or bulb, etc., or to grow so luxuriantly that the nutritious qualities of the product are injured, as in the turnip and potato. Sphrigosis is sometimes due to over-manuring, sometimes to constitutional defect. Compare *rankness*, 4.

sphygmic (sfig'mik), *a.* [‹ Gr. *σφυγμικός*, pertaining to the pulse, ‹ *σφυγμός*, the beating of the heart, the pulse: see *sphygmus*.] **1.** Of or pertaining to the pulse.—**2.** In *zoöl.*, pulsating or pulsatile; beating with rhythmic contraction and dilatation, like a pulse; specifically, belonging to the *Sphygmica*.



Sphygmica (sfig'mi-kä), *n. pl.* [NL., ‹ Gr. *σφυγμικός*, pertaining to the pulse: see *sphygmic*.] A group or series of amœbiform protozoans, in which regularly contractile or sphygmic vacuoles are observed. See *Amœboidea*.

sphygmogram (sfig'mō-gram), *n.* [‹ Gr. *σφυγμός*, pulse, + *γράμμα*, a writing.] A tracing of the changes of tension at a point in an artery, as obtained with a sphygmograph.

Sphygmogram.

sphygmograph (sfig'mō-gräf), *n.* [‹ Gr. *σφυγμός*, pulse, + *γράφειν*, write.] An instrument which, when applied over an artery, traces on

Sphygmograph.

a, band by which the instrument is fastened on; *b*, spring which rests upon the artery; *c*, adjusting-screw (with graduated head) which regulates the pressure of the spring *b* according as the pulse is strong or weak; *d*, *d*, supports for paper upon which the tracing is made; *e'*, feed-roller, between which and the pressure-wheels *e*, *e* the paper is carried; *f*, spring which bears on the shaft of the wheels *e*, *e* to engage the paper positively; *g*, small spring clockwork (incased) by which motion is imparted to the feed-roller *e'*; *h*, milled-headed winding-key; *i*, stop-motion; *j*, tracer attached to the oscillating arm *k*, which is moved by the rod *l* that connects this arm with the spring *b*.

a piece of paper moved by clockwork a curve which indicates the changes of tension of the blood within. The paper is blackened by holding it over a smoking lamp, and the tracer, moving in accordance with the pulsations of the artery, indicates the rapidity, strength, and uniformity of the beats. The tracings are preserved by a thin varnish of gum damar dissolved in benzolin.

sphygmographic (sfig-mō-graf′ik), *a.* [< *sphygmograph* + *-ic.*] Of or pertaining to, or registered or traced by, the sphygmograph.

sphygmography (sfig-mog′ra-fi), *n.* [As *sphygmograph* + *-y*[3].] 1. The act or art of taking pulse-tracings or sphygmograms.—2. A description of the pulse.

sphygmoid (sfig′moid), *a.* [< Gr. *σφυγμός*, pulse, + *εἶδος*, form.] Pulse-like.

sphygmology (sfig-mol′ō-ji), *n.* [< Gr. *σφυγμός*, pulse, + *-λογία*, < *λέγειν*, speak: see *-ology.*] The sum of scientific knowledge concerning the pulse.

sphygmomanometer (sfig″mō-mā-nom′e-tėr), *n.* [< Gr. *σφυγμός*, pulse, + *μανός*, rare, + *μέτρον*, measure (cf. *manometer*).] An instrument for measuring the tension of the blood in an artery.

sphygmometer (sfig-mom′e-tėr), *n.* [< Gr. *σφυγμός*, pulse, + *μέτρον*, measure.] Same as *sphygmomanometer.*

sphygmophone (sfig′mō-fōn), *n.* [< Gr. *σφυγμός*, pulse, + *φωνή*, sound, voice.] An instrument by the aid of which each pulse-beat makes a sound. It is a combination of a kind of sphygmograph with a microphone.

sphygmoscope (sfig′mō-skōp), *n.* [< Gr. *σφυγμός*, pulse, + *σκοπεῖν*, view.] An instrument for rendering the arterial pulsations visible. One form of it works by the projection of a ray of light from a mirror which is moved by the pulsation; in another form the impact of the pulsation is received in a reservoir of liquid, which is caused by it to mount in a graduated tube. The invention of the instrument is ascribed to Galileo.

sphygmus (sfig′mus), *n.* [NL., < Gr. *σφυγμός*, the beating of the heart, the pulse, < *σφύζειν*, beat violently, throb.] The pulse.

sphynx, *n.* An occasional misspelling of *sphinx.*

Sphyræna (sfī-rē′nä), *n.* [NL. (Artedi, Bloch, etc.), < L. *sphyræna*, < Gr. *σφύραινα*, a sea-fish so called, a hammer-fish, < *σφῦρα*, hammer, mallet.] 1. The representative genus of *Sphyrænidæ.* It contains about 20 species of voracious pike-like fishes, of most temperate and tropical seas. *S. spet* or *S. vulgaris* is the becuna, of both coasts of the Atlantic and of the Mediterranean, the sphyræna of the ancients, about 2 feet long, of an olive color, silvery below, when young with dusky blotches. *S. argentea* of the Pacific coast, abundant from San Francisco southward, about 3 feet long, is an important food-fish. *S. barracuda*, the barracuda of the West Indies, grows to be sometimes 7 or 8 or even, it is claimed, 10 feet long. See cut under *becuna.* 2. [*l. c.*] A fish of this genus.

Sphyrænidæ (sfī-ren′i-dē), *n. pl.* [NL. (Bonaparte, 1831), < *Sphyræna* + *-idæ.*] A family of percesocine acanthopterygian fishes, typified by the genus *Sphyræna.* About 20 species are known, all of which are closely related, and usually referred to the single genus *Sphyræna.* They are mostly inhabitants of the tropical seas; but a few advance northward and southward into cooler waters, as along the United States coast to New England. They are voracious and savage, and the larger ones are much dreaded. See cut under *becuna.* Also *Sphyrænoidei.*

sphyrænine (sfī-rē′nin), *a.* [< *Sphyræna* + *-ine*[1].] Same as *sphyrænoid.*

sphyrænoid (sfī-rē′noid), *a.* [< *Sphyræna* + *-oid.*] Of or pertaining to the *Sphyrænidæ.*

Sphyrapicus (sfī-rap′i-kus), *n.* [NL. *Sphyrapicus* (Spencer F. Baird, 1858), < Gr. *σφῦρα*, a hammer, + L. *picus*, a woodpecker.] A remarkable genus of *Picidæ*, having the tongue obtuse, brushy, and scarcely extensile, owing to the shortness of the hyoid bones, whose horns do not curl up over the hindhead; the sapsuckers, or sapsucking woodpeckers. There are several species, all American, feeding upon soft fruits and sapwood, as well as upon insects. The common yellow-bellied woodpecker of the United States is *S. varius*, of which a variety, *S. nuchalis*, is found in the west, and another, *S. ruber*, has the whole head, neck, and breast carmine-red. A very distinct species is *S. thyroideus* of the western United States, notable for the great difference between the sexes, which long caused them to be regarded as different species, and even placed in different genera. The condition of the hyoid apparatus in this genus is unique, though an approach to it is seen in the genus *Xenopicus.* See cut under *sapsucker.*

Sphyrna (sfėr′nä), *n.* [NL. (Rafinesque, 1815), an error for **Sphyra*, < Gr. *σφῦρα*, a hammer.] A genus of hammer-headed sharks, giving name to the family *Sphyrnidæ.* It contains those in which the head is most hammer-like, and grooves extend from the nostrils to the front. *S. tiburo*, the bonnet-shark, is now placed in another genus (*Reniceps*). *Zygæna* is an exact synonym of *Sphyrna*, but is preoccupied in entomology. Also called *Cestracion* (after Klein). See cut under *hammerhead.*

Sphyrnidæ (sfėr′ni-dē), *n. pl.* [NL., < *Sphyrna* + *-idæ.*] A family of anarthrous selachians; the hammer-headed sharks, having an extraordinary conformation of the head. There are 3 genera and 5 or 6 species, found in most seas. The body usually has the common shark-like form; but the head is expanded laterally into a kidney-like shape, or arched like a hammer-head. The eyes are upon the sides of the expanded head, and the nostrils are on the front edge. The fins are like those of ordinary sharks. See cuts under *hammerhead* and *shark.* Also called *Zygænidæ.*

sphyrnine (sfėr′nin), *a.* [< *Sphyrna* + *-ine*[1].] Of the character or appearance of a hammer-headed shark; belonging to the *Sphyrnidæ;* zygænine.

spialt (spī′al), *n.* [Early mod. E. also *spyal, spyall;* by apheresis from *espial:* see *espial,* and cf. *spion, spy.*] 1. Close or secret watch; espial.

I have those eyes and ears shall still keep guard
And *spial* on thee. *B. Jonson*, Catiline, iv. 2.

2. A spy; a watcher; a scout.

Secretaries and *spials* of princes and states bring in bills for intelligence. *Bacon*, Advancement of Learning, ii.

spiauterite (spi-â′tėr-īt), *n.* [< G. *spiauter*, spelter (see *spelter*), + *-ite*[2].] Same as *wurtzite.*

spica (spī′kä), *n.* [< L. *spica*, a point, spike, ear of grain: see *spike*[1].] 1. In *bot.*, a spike. —2. In *surg.*, a spiral bandage with reversed turns: so named because it was thought to resemble a spike of barley.—3. In *ornith.*, a spur; a calcar.—4. [*cap.*] In *astron.*, a very white star of magnitude 1.2, the sixteenth in order of brightness in the heavens, *a* Virginis, situated on the left hand of the Virgin.—**Spica celtica**, an old name of *Valeriana Celtica.*—**Spica nardi.** Same as *spikenard.*

spical (spī′kal), *a.* [< NL. **spicalis*, < L. *spica*, a spike: see *spike*[1].] Same as *spicate:* as, the *spical* palpi of a dipterous insect.

Spicatæ (spī-kā′tē), *n. pl.* [NL., fem. pl. of L. *spicatus*, spiked: see *spicate.*] A section of pennatuloid polyps, distinguished by a bilateral arrangement of the polyps on the rachis, which is elongate, cylindrical, and destitute of pinnules.

spicate (spī′kāt), *a.* [< L. *spicatus*, spiked, pp. of *spicare*, furnish with spikes, < *spica*, a spike: see *spike*[1].] 1. In *bot.*, having the form of a spike; arranged or disposed in spikes.—2. In *ornith.*, spurred; calcarate; spiciferous.

spicated (spī′kā-ted), *a.* [< *spicate* + *-ed*[2].] In *bot.*, same as *spicate.*

spicateous (spī-kā′tē-us), *a.* [Irreg. < *spicate* + *-e-ous.*] In *zoöl.*, spicate; specifically, of or pertaining to the *Spicatæ.*

spicatum (spī-kā′tum), *n.* [L., sc. *opus*, lit. 'spicate work': see *spicate.*] In *anc. masonry*, herring-bone work: so called from the resemblance of the position of the blocks of any two contiguous courses to that of the grains in an ear of wheat.

spiccato (spik-kä′tō), *a.* [It., pp. of *spiccare*, detach, divide.] In *music*, same as *picchetato.*

spice[1] (spīs), *n.* [< ME. *spice, spyce, spyse, spece*, species, kind, spice (Icel. *spiz*, spices, < E.), < OF. *espice, espece*, kind, spice, F. *épice*, spice, *espèce*, kind, species, *espèces*, pl., specie, = Pr. *especia, especi* = Sp. *especia*, spice, *especie*, species, = Pg. *especia*, spice, *especie*, species, specie, = It. *spezie*, species, kind, pl. spices, drugs, < L. *species*, look, appearance, kind, species, etc., LL. also spices, drugs, etc. (ML. *espiciæ*, after Rom.): see *species.* Doublet of *species* and *specie.*] 1†. Kind; sort; variety; species.

2†. Kind of thing; anything of the kind or class before indicated; such sort: used demonstratively or indefinitely.

Chydynge comys of hert hy,
And grett pride and velany,
And other *spice* that mekylle deres.
R. de Brunne, MS. Bowes, p. 31. (*Halliwell.*)

Al that toucheth dedly synne
In any *spyce* that we falle ynne.
MS. Harl. 1701, f. 1. (*Halliwell.*)

For trewthe telleth that loue is triacle of heuene;
May no synne be on him sene that vseth that *spise.*
Piers Plowman (B), i. 147.

3†. An exemplification of the kind of thing mentioned; specimen; sample; instance; piece.

Whanne he seeth the lepre in the skynne, and the heeris chaungid into whijt colour, and thilk *spice* of lepre lower than the skynne and that other flesh, a plaage of lepre it is. *Wyclif*, Lev. xiii. 3.

He hath *spices* of them all, not all. *Shak.*, Cor., iv. 7. 46.

4. A characteristic touch or taste; a modicum, smack, or flavoring, as of something piquant or exciting to the mind: as, a *spice* of roguery or of adventure. [In this sense now regarded as a figurative use of def. 5; compare *sauce* in a similar figurative use.]

I think I may pronounce of them, as I heard good Senecio, with a *spice* of the wit of the last age, say, viz., "That a merry fellow is the saddest fellow in the world."
Steele, Tatler, No. 45.

The world loves a *spice* of wickedness.
Longfellow, Hyperion, i. 7.

5. A substance aromatic or pungent to the taste, or to both taste and smell; a drug; a savory or piquant condiment or eatable; a relish. The word in this sense formerly had a much wider range than at present (def. 6); it is still used in northern England as including sweetmeats, gingerbread, cake, and any kind of dried fruit.

"Hastow auȝte in thi purs, any hote *spices?*"
"I haue peper and piones [peony-seeds]," quod she, "and a pounde of garlike,
A ferthyngworth of fenel-seed for fastyngdayes."
Piers Plowman (B), v. 311.

Now, specifically—6. One of a class of aromatic vegetable condiments used for the seasoning of food, commonly in a pulverized state, as pepper, allspice, nutmeg, ginger, cinnamon, and cloves; collectively, such substances as a class: as, the trade in *spices* or *spice.*

So was her love diffused; but, like to some odorous *spices*, Suffered no waste nor loss, though filling the air with aroma. *Longfellow*, Evangeline, ii. 5.

7. A piquant odor or odorous substance, especially of vegetable origin; a spicy smell. [Poetical.]

The woodbine *spices* are wafted abroad,
And the musk of the rose is blown.
Tennyson, Maud, xxii.

8. Figuratively, a piquant concomitant; an engaging accompaniment or incident; an attractive or enjoyable variation.

Is not birth, . . . youth, liberality, and such like, the *spice* and salt that season a man?
Shak., T. and C., i. 2. 277.

Variety's the very *spice* of life,
That gives it all its flavour.
Cowper, Task, ii. 606.

Young Beichan and Susie Pye (Child's Ballads, IV. 5).

A *spice-cake*, which followed by way of dessert, vanished like a vision. *Charlotte Brontë*, Shirley, i.

spiced (spīst), *p. a.* [< ME. *spiced*; < *spice*[1] + *-ed*[2].] 1. Impregnated with an aromatic odor; spicy to the smell; spice-laden.

In the *spiced* Indian air, by night,
Full often hath she gossip'd by my side.
Shak., M. N. D., ii. 1. 124.

Spiced carnations of rose and garnet crowned their bed in July and August.
R. T. Cooke, Somebody's Neighbors, p. 39.

2†. Particular as to detail; over-nice in matters of conscience or the like; scrupulous; squeamish.

Ye sholde been al pacient and meke,
And han a sweete, *spiced* conscience,
Sith ye so preche of Jobes pacience.
Chaucer, Prol. to Wife of Bath's Tale, l. 435.

Take it; 'tis yours;
Be not so *spiced*; 'tis good gold,
And goodness is no gall to the conscience.
Fletcher, Mad Lover, iii. 1.

spiceful (spīs'fûl), *a.* [< *spice*[1] + *-ful.*] Spice-laden; spicy; aromatic.

The scorching sky
Doth singe the sandy wilds of *spiceful* Barbary.
Drayton, Polyolbion, v. 312.

spice-mill (spīs'mil), *n.* A small hand-mill for grinding spice, etc.: sometimes mounted ornamentally for use on tables.

spice-nut (spīs'nut), *n.* A gingerbread-nut.

spice-plate† (spīs'plāt), *n.* A particular kind of plate or small dish formerly used for holding spice to be served with wine.

Item, ij. *spiceplates*, weiyng both iiij[xx] xij. unces.
Paston Letters, I. 474.

G. Ripley, in Frothingham, p. 266.

spice-shop (spīs'shop), *n.* [< ME. *spice schope*; < *spice* + *shop.*] A shop for the sale of aromatic substances; formerly, a grocery or an apothecary's shop.

A Spycere schoppe (a *Spice schope* . . .), apotheca vel ipotheca. *Cath. Ang.*, p. 355.

spice-tree (spīs'trē), *n.* An evergreen tree, *Umbellularia Californica*, of the Pacific United States, variously known as *mountain-laurel, California laurel, olive*, or *bay-tree*, and *cajeput*. Northward it grows from 70 to 90 feet high, and affords a hard strong wood susceptible of a beautiful polish; this is used for some ship building purposes, and is the finest cabinet-wood of its region. The leaves are exceedingly acrid, exhaling, when bruised, a pungent effluvium which excites sneezing.

spicewood (spīs'wûd), *n.* Same as *spice-bush*.

spiciferous (spī-sif'e-rus), *a.* [< L. *spicifer*, ear-bearing, < *spica*, a spike, ear, + *ferre* = E *bear*[1].] 1. In *bot.*, bearing or producing spikes; spicate; eared.—2. In *ornith.*, spurred; having spurs or calcars, as a fowl.

spiciform (spī'si-fôrm), *a.* [< L. *spica*, a point, spike, ear, + *forma*, form.] Having the form of a spica or spike.

spicily (spī'si-li), *adv.* In a spicy manner; pungently; with a spicy flavor.

spiciness (spī'si-nes), *n.* The quality of being racy, piquant, or spicy, in any sense.

Delighted with the *spiciness* of this beautiful young woman. *The Century*, XXVI. 370.

spick[1]†, *n.* [An obs. or dial. form of *spike*[1]; cf. *pick*[1] as related to *pike*[1].] A spike; a tenter. *Florio.*

spick[2] (spik), *n.* [Origin obscure.] A titmouse. —**Blue spick**, the blue titmouse, *Parus cæruleus.*

spick[3] (spik), *n.* See *spick-and-span-new.*

spick-and-span (spik'and-span'), *a.* [Shortened from *spick-and-span-new.*] Same as *spick-and-span-new.*

From our poetic store-house we produce
A couple [of similes] *spick and span*, for present use.
Garrick, quoted in W. Cooke's Memoirs of S. Foote, I. 107.

The Dutch Boer will not endure over him . . . a *spick-and-span* Dutch Africander from the Cape Colony.
Trollope, South Africa, II. vi.

Beside my hotel rose a big *spick-and-span* church.
H. James, Jr., Little Tour, p. 178.

spick-and-span-new (spik'and-span'nū'), *a.* [Also *spick-span-new*; lit. 'new as a spike and chip': an emphatic form of *span-new*: see *spike*[1], *spoon*[1], *new*, and cf. *span-new, spick-span-new.* Cf. also the equiv. D. *spik-splinter-nieuw*, 'spick-splinter-new,' Dan. *splinter-ny*, Sw. *splitter-ny*, 'splinter-new,' Sw. dial. *till splint och span ny*, 'splint-and-span-new,' G. *spalt-neu*, 'splinter-new,' etc., E. *brand-new*, etc. A compound of four independent elements, like this, is very rare in E.; the lit. meaning of the nouns *spick* and *span* is not now recognized, but the words *spick and span* are taken together adverbially, qualifying *new*, with which they form a compound. By omission of *new*, the phrase *spick-and-span* is sometimes used with an attributive force.] New and fresh; span-new; brand-new.

'Tis a fashion of the newest edition, *spick and span new*, without example. *Ford*, Lover's Melancholy, ii. 1.

Among other Things, Black-Friars will entertain you with a Play *spick and span new*, and the Cockpit with another. *Howell*, Letters, I. iv. 2.

spicket† (spik'et), *n.* An obsolete form of *spigot.*

spicknel, spignel (spik'nel, spig'nel), *n.* [Early mod. E. also *spicknell, spignell, speknel, spikenel*; said to be a corruption of *spike-nail*, and to be so called in allusion to the shape of its long capillary leaves.] The baldmoney, *Meum athamanticum*; also, any plant of the related genus *Athamanta*, which has similar graceful finely dissected foliage.

spick-span-new (spik'span-nū'), *a.* Same as *spick-and-span-new.*

Look at the cloäths on 'er back, thebbe ammost *spick-span-new*. *Tennyson*, Northern Cobbler.

spicose (spī'kōs), *a.* [< NL. *spicosus*: see *spicous.*] In *bot.*, same as *spicous.*

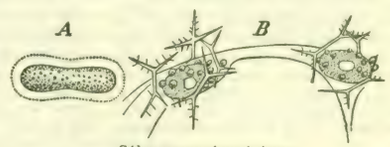
spicosity (spī-kos'i-ti), *n.* [< *spicose* + *-ity.*] In *bot.*, the state or condition of being spicous or eared.

spicous (spī'kus), *a.* [Also *spicose*; < NL. *spicosus*, < L. *spica*, a spike, ear: see *spike*[1].] In *bot.*, having spikes or ears; spiked or eared like corn.

spicula[1] (spik'ū-lä), *n.*; pl. *spiculæ* (-lē). [NL.: see *spicule.*] 1. In *bot.*, a diminutive or secondary spike; a spikelet.—2. A small splinter-like body; a spicule.—3. In *zoöl.*, a spicule or spiculum. [Rare.]

spicula[2], *n.* Plural of *spiculum.*

spicular (spik'ū-lär), *a.* [< *spicule* + *-ar*[3].] In *zoöl.*: (*a*) Having the form or character of a spicule; resembling a spicule; dart-like; spiculiform; spiculate. (*b*) Containing or composed of spicules; spiculous; spiculiferous or spiculigenous: as, a *spicular* integument; the *spicular* skeleton of a sponge or radiolarian.—**Spicular notation**, a notation for logic, invented by Augustus De Morgan (though the name was given by Sir William Hamilton), in which great use is made of marks of parenthesis. The significations of the principal signs are as follows:



X))Y All Xs are Ys.
X).(Y No Xs are Ys.
X(.)Y Everything is either X or Y.
X((Y Some Xs compose all the Ys.
X(.(Y Some Xs are not Ys.
X()Y Some Xs are Ys.
X)(Y Some things are neither X nor Y.
X).)Y None of the Xs are certain of the Ys.

★**spiculate** (spik'ū-lāt), *v. t.*; pret. and pp. *spiculated*, ppr. *spiculating.* [< L. *spiculatus*, pp. of *spiculare*, sharpen, < *spiculum*, dim. of *spicum*, a point: see *spike*[1].] To sharpen to a point.

Extend a rail of elm, securely arm'd
With *spiculated* paling.
W. Mason, English Garden, ii.

spiculate (spik'ū-lāt), *a.* [< L. *spiculatus*, pp.: see the verb.] 1. In *zoöl.*, sharp-pointed; spicate.—2. Covered with or divided into fine points. Specifically, in *bot.*: (*a*) Covered with pointed fleshy appendages, as a surface. (*b*) Noting a spike composed of several spikelets crowded together.

★**spicule** (spik'ūl), *n.* [< L. *spiculum*, NL. also *spicula*, f., a little sharp point, dim. of *spicum, spica*, a point, spike: see *spike*[1].] 1. A fine-pointed body resembling a needle: as, ice-*spicules.*—2. In *bot.*: (*a*) A spikelet. (*b*) One of the small projections or points on the basidia of hymenomycetous fungi which bear the spores. There are usually four to each basidium. See *sterigma.* —3. In *zoöl.*, a hard, sharp body like a little spike, straight or curved, rod-like, or branched, or diversiform; a spiculum; a sclere: variously applied, without special reference to size or shape. Specifically—(*a*) One of the skeletal elements, scleres, or spicula of the protozoans, as radiolarians, either

Sphærozoum punctatum.
A, natural size; *B*, two of the sacs with colored vesicles and spicules which lie in the investing protoplasm, magnified.

calcareous or silicious, coherent or detached. See cuts under *Radiolaria* and *Sphærozoum.* (*b*) One of the spines of echinoderms, sometimes of great size, and bristling over the surface of the test, as in sea-urchins, or small, and embedded in the integument, as in holothurians; sometimes of singular shape, like wheels, anchors, etc. See cuts under *ancora*[1], *Echinometra, Echinus*, and *Spatangus.* (*c*) In sponges, a spiculum; one of the hard calcareous or silicious bodies, of whatever shape, which enter into the composition of the skeleton; a mineral sclere; a sponge-spicule (which see). Some sponges mostly consist of spicules, as that figured under *Euplectella.* (*d*) In some worms and mollusks, a dart-like organ constituting a kind of penis; a spiculum (which see). (*e*) In *entom.*: (1) A minute spine or spinous process. (2) The piercing ovipositor of any insect; especially, the lancet-like portion of the sting of a parasitic hymenopter. See *Spiculifera.*

spicule-sheath (spik'ūl-shēth), *n.* A thin layer of organic substance forming the sheath or investment of a sponge-spicule.

Spiculifera (spik-ū-lif'e-rä), *n. pl.* [NL.: see *spiculiferous.*] In Westwood's classification of insects, a division of *Hymenoptera*, in which the abdomen is, in the female, armed with a long plurivalve ovipositor, and the larvæ are footless. It contains the ichneumons (including braconids), the evaniids, the proctotrypids, the chalcidids, and the cynipids or gall-flies. It thus corresponds to the *Pupivora* of Latreille, except in excluding the *Chrysididæ* as *Tubulifera.*

spiculiferous (spik-ū-lif'e-rus), *a.* [< L. *spiculum*, a spicule, + *ferre* = E. *bear*[1].] In *zoöl.*, having a spiculum or spicula; spicular or spiculous; specifically, in *entom.*, having a piercing ovipositor; of or pertaining to the *Spiculifera.* Also *spiculigerous.*

spiculiform (spik'ū-li-fôrm), *a.* [< L. *spiculum*, a spicule, + *forma*, form.] In *bot.* and *zoöl.*, having the form of a spicule; being of the nature of a spicule.

spiculigenous (spik-ū-lij'e-nus), *a.* [< L. *spiculum*, a spicule, + *-genus*, producing: see *-genous.*] Producing spicules; giving origin to spicules; spiculiferous: as, the *spiculigenous* tissue of a sponge.

spiculigerous (spik-ū-lij'e-rus), *a.* [< L. *spiculum*, a spicule, + *gerere*, carry.] Same as *spiculiferous.*

spiculose (spik'ū-lōs), *a.* [< NL. *spiculosus*: see *spiculous.*] Same as *spiculous.*

spiculous (spik'ū-lus), *a.* [Also *spiculose*; < NL. *spiculosus*, < L. *spiculum*, a spicule: see *spicule.*] Having spicules; spinulose; spiculose or spiculiferous.

★**spiculum** (spik'ū-lum), *n.*; pl. *spicula* (-lä). [NL., < L. *spiculum*, a little sharp point: see *spicule.*] In *zoöl.*, a spicula or spicule. Specifically—(*a*) In some worms, a chitinous rod developed in the cloaca as a copulatory organ; a kind of penis. (*b*) In some mollusks, as snails, the love-dart, a kind of penis, more fully called *spiculum amoris.* (*c*) In insects, the piercing non-poisonous ovipositor of the *Spiculifera.*

spicy (spī'si), *a.* [< *spice*[1] + *-y*[1].] 1. Producing spice; abounding with spices.

As . . . off at sea north-east winds blow
Sabæan odours from the *spicy* shore
Of Araby the bless'd. *Milton*, P. L., iv. 162.

2. Having the qualities of spice; flavored with spice; fragrant; aromatic: as, *spicy* plants.

The *spicy* nut-brown ale. *Milton*, L'Allegro, l. 100.

Under southern skies exalt their sails,
Led by new stars, and borne by *spicy* gales!
Pope, Windsor Forest, l. 392.

3. Highly flavored; pungent; keen; pointed; racy: as, a *spicy* letter or debate. [Colloq.]

Your hint about letter-writing for the papers is not a bad one. . . . A political surmise, a *spicy* bit of scandal, a sensation trial, wound up with a few moral reflections upon how much better we do the same sort of thing at home. *Lever*, A Rent in a Cloud, p. 58.

4. Stylish; showy; smart in appearance: as, a *spicy* garment; to look *spicy*. [Slang.]

"Bless'd if there isn't Snipe dismounting at the gate!" he exclaimed joyfully; "there's a drummer holding his nag. What a *spicy* chestnut it is!"
Whyte Melville, White Rose, I. xiii.

★=Syn. 3. *Racy*, *Spicy*. See *racy*.

spider (spī'dėr), *n.* [An altered form of **spither*, < ME. *spither*, dat. *spithre*, < AS. **spīther*, orig. **spinther*, with formative *-ther* of the agent, < *spinnan*, spin: see *spin*. Cf. *spinner*[1], a spider; D. *spin* = OHG. *spinnā*, MHG. G. *spinne*, a spider, lit. 'spinner.' For other E. names, see *attercop*, *cop*[2], *lob*[1], *lop*[3].] **1.** An arthropod of the order *Araneæ*, *Araneina*, or *Araneida* (the old Linnean genus *Aranea*), of the class *Arachnida*, of which there are many families, hundreds of genera, and thousands of species, found all over the world. Though popularly considered insects, spiders are not true *Insecta*, since they have eight instead of only six legs, normally seven-jointed, and no wings are developed. They are dimerosomatous — that is, have the body divided into two principal regions, the cephalothorax, or head and chest together, and the abdomen, which is generally tumid or globose, whence the name *Sphærogastra*. No antennæ are developed as such, but there are raptorial organs called *falces*, which are subchelate — that is, have a distal joint folding down on the next like the blade of a pocket-knife. (See cut under *falx*.) In all species which are poisonous, the falces are traversed by the duct of a venom-gland. Some spiders are by far the most venomous animals in existence in proportion to their size: that the bite of a spider can be fatal to man (and there are authentic instances of this) implies a venom vastly more powerful than that of the most poisonous snakes. (See *katipo* and *Latrodectus*.) Spiders breathe by means of pulmonary sacs, or lung-sacs, nearly always in connection with tracheæ or spiracles, whence they are called *pulmotracheal*; these sacs are two or four in number, whence a division of spiders into dipneumonous and tetrapneumonous araneids. (See *Dipneumones*, 2, *Tetrapneumones*.) Most spiders belong to the former division. They have usually eight eyes, sometimes six, rarely four, in one genus (*Nops*) only two. The abdomen is always distinct, ordinarily globose, never segmented, and provided with two or more pairs of spinnerets. (See cut under *arachnidium*.) The characteristic habit of spiders is to spin webs to catch their prey, or to make a nest for themselves, or for both these purposes. Cobweb is a fine silky substance secreted by the arachnidium, or arachnidial glands, and conducted by ducts to the several, usually six, arachnidial mammillæ, which open on papillæ at or near the end of the abdomen, and through which the viscid material is spun out in fine gossamer threads. Gossamer or spider-silk serves not only to construct the webs, but also to let the spider drop speedily from one place to another, to throw a "flying bridge" across an interval, or even to enable some species to "fly" — that is, be buoyed up in the air and wafted a great distance. It has occasionally been woven artificially into a textile fabric, and is a well-known domestic application for stanching blood. (See cut under *silk-spider*.) Some spiders are sedentary, others vagabond; the former are called *orbitelarian*, *retitelarian*, *tubitelarian*, etc., according to the character of their webs. Spiders move by running in various directions, or by leaping; whence the vagabond species have been described as *rectigrade*, *laterigrade*, *citigrade*, *saltigrade*, etc. They lay numerous eggs, usually inclosed in a case or cocoon. The male is commonly much smaller than the female, and in impregnating the female runs great risk of being devoured. The difference in size is as if the human female should be some 60 or 70 feet tall. (See cut under *silk-spider*.) Spiders are carnivorous and highly predatory. Some of the largest kinds are able to kill small birds, whence the name *bird-spiders* of some of the great hairy mygalids. (See cut under *bird-spider*.) A few are aquatic, as the water-spiders of the genus *Argyroneta* (which see, with cut). Wolf-spiders or tarantulas belong to the family *Lycosidæ*; but the name *tarantula* is more frequently applied to the *Mygalidæ* (or *Theraphosidæ*). The common garden-spider or diadem-spider of Europe is *Epeira diadema*; that of the United States is *E. cophinaria* (or *riparia*). See *Araneida*, and cuts under *chelicera*, *cross-spider*, *pulmonary*, and *tarantula*.

Female of *Latrodectus mactans*, enlarged one quarter.
a, under side of abdomen.

My brain, more busy than the labouring *spider*,
Weaves tedious snares to trap mine enemies.
Shak., 2 Hen. VI., iii. 1. 339.

2. Some other arachnidan, resembling or mistaken for a spider; a spider-mite. See *red-spider*. — **3.** A spider-crab; a sea-spider. — **4.** A cooking-utensil having legs or feet to keep it from contact with the coals: named from a fancied resemblance to the insect — the ordinary frying-pan is, however, sometimes erroneously termed a *spider*. (*a*) A kind of deep frying-pan, commonly with three feet.

Some people like the sound of bubbling in a boiling pot, or the fizzing of a frying-*spider*.
C. D. Warner, Backlog Studies, p. 10.

Hash was warmed up in the *spider*.
J. T. Trowbridge, Coupon Bonds, p. 113.

(*b*) A trivet; a low tripod used to support a dish, or the like, in front of a fire. **5.** In *mach.*: (*a*) A skeleton of radiating spokes, as a rag-wheel. (*b*) The internal frame or skeleton of a gear-wheel, for instance, on which a cogged rim may be bolted, shrunk, or cast. (*c*) The solid interior part of a piston, to which the packing is attached, and to whose axis the piston-rod is secured. *E. H. Knight.* — **6.** *Naut.*, an iron outrigger to keep a block clear of the ship's side. — **Geometrical spider.** See *geometric*. — **Grass-spider,** one of many different spiders, as species of *Agalena*, which spin webs on the grass, such as may be seen spangled with dew in the morning in meadows. — **Round-web spider,** one of many orbitelarian spiders, as species of *Epeira* (see, also, cut under *cross-spider*). — **Spider couching.** See *couching*[1], 5. — **Trap-door spider.** See *Cteniza*, *Mygalidæ*, *trap-door*, and cut under *Araneida*. (See also *bird-spider*, *crab-spider*, *diving-spider*, *garden-spider*, *house-spider*, *jumping-spider*, *sea-spider*, *silk-spider*, *water-spider*, *wolf spider*.)

spider-ant (spī'dėr-ant), *n.* A solitary ant of the family *Mutillidæ*: so called from the spider-like aspect of the females.

spider-band (spī'dėr-band), *n.* *Naut.*, an iron hoop round a mast to which the lower ends of the futtock-shrouds are secured; also, a hoop round a mast provided with belaying-pins. See cut under *futtock-shrouds*.

spider-bug (spī'dėr-bug), *n.* A long-legged heteropterous insect of the family *Emesidæ*, *Emesa longipes*, somewhat resembling a spider. See cut under *stick-bug*. [U. S.]

spider-catcher (spī'dėr-kach″ėr), *n.* A bird that catches spiders. Specifically — (*a*) The wall-creeper, *Tichodroma muraria*. See cut under *Tichodroma*. (*b*) *pl.* The genus *Arachnothera* in a broad sense, numerous species of which inhabit the Indo-Malayan region. They are small creeper-like birds with long bills, and belong to the family *Nectariniidæ*. Also called *spider-eaters* and *spider-hunters*.

Spider-catcher (*Arachnothera magna*).

spider-cells (spī'dėr-selz), *n. pl.* Neuroglia cells.

spider-cot (spī'dėr-kot), *n.* Same as *spider-web*.

spider-crab (spī'dėr-krab), *n.* A spider-like crab, or sea-spider, with long slender legs and comparatively small triangular body. The name is given to many such crabs, of different families, but especially to the maioids, or crabs of the family *Maiidæ*, such as *Maia squinado*, the common spinous spider crab of Great Britain, and species of *Libinia*, *Inachus*, etc. The giant Japanese spider-crab, *Macrochira kaempferi*, is the largest crustacean. See cuts under *Leptopodia*, *Lithodes*, *Maia*, and *Oxyrhyncha*.

A Spider-crab (*Inachus dorsettensis*), male.

spider-diver (spī'dėr-dī″vėr), *n.* The little grebe, or dabchick. [Local, British.]

spider-eater (spī'dėr-ē″tėr), *n.* Same as *spider-catcher* (*b*).

I obtained an interesting bird, a green species of *Spider-eater*. *H. O. Forbes*, Eastern Archipelago, p. 233.

spidered (spī'dėrd), *a.* [< *spider* + *-ed*[2].] Infested with spiders; cobwebbed. [Rare.]

Content can visit the poor *spidered* room.
Wolcot (Peter Pindar), p. 39. (*Davies.*)

spider-flower (spī'dėr-flou″ėr), *n.* **1.** A plant of the family *Melastomaceæ*, which belongs to the genus *Tibouchina*. The species are elegant hothouse shrubs from Brazil, bearing large purple flowers. — **2.** A plant of the genus *Cleome*, especially *C. spinosa*, a native of tropical America, escaped from gardens in the southern United States. The stipules are spinous, the flowers large, rose-purple to white, with long stamens and style, suggesting the name. See cut under *Cleome*.

spider-fly (spī'dėr-flī), *n.* A parasitic pupiparous dipterous insect, as a bee-louse, bat-louse, bird-louse, bat-fly, sheep-tick, etc. They are of three families, *Braulidæ*, *Nycteribiidæ*, and *Hippoboscidæ*. Some of them, especially the wingless forms, as *Nycteribia*, closely resemble spiders in superficial appearance. See cut under *sheep-tick*.

spider-helmet (spī'dėr-hel″met), *n.* A name given to the skeleton head-pieces sometimes worn. See *secret*, *n.*, 9.

spider-hunter (spī'dėr-hun″tėr), *n.* Same as *spider-catcher* (*b*).

spider-legs (spī'dėr-legz), *n. pl.* In *gilding*, irregular fractures sometimes occurring when gold-leaf is fitted over a molding having deep depressions.

spider-line (spī'dėr-līn), *n.* One of the threads of a spider's web substituted for wires in micrometer-scales intended for delicate astronomical observations.

The transit of the star is observed over *spider lines* stretched in the field, while a second observer reads the altitude of this star from the divided circle.
The Century, XXXVI. 608.

spider-mite (spī'dėr-mīt), *n.* A parasitic mite or acarid of the family *Gamasidæ*.

spider-monkey (spī'dėr-mung″ki), *n.* A tropical American platyrrhine monkey, of the family *Cebidæ*, subfamily *Cebinæ*, and genera *Ateles* and *Brachyteles*; a kind of sajou or sapajou, likened to a spider by reason of the very long and slim limbs, and long prehensile tail. They are large slender-bodied monkeys of great agility and of arboreal habits, with the thumb absent or imperfect. *Brachyteles* (or *Eriodes*) *arachnoides* is a Brazilian spider-monkey called the *miriki*. *Ateles paniscus* is the large black spider-monkey, or coiata; *A. melanochir* is the black-handed spider-monkey; and many more species or varieties of this genus have been named. One of the spider-monkeys, *A. vellerosus*, is among the most northerly of American monkeys, extending into Mexico to Orizaba and Oajaca. The flesh of some species is used for food, and the pelts have a commercial value. See also cut under *Eriodes*.

A Spider-monkey (*Ateles paniscus*).

spider-net (spī'dėr-net), *n.* Netting by spider-stitch.

spider-orchis (spī'dėr-ôr″kis), *n.* A European orchid, *Arachnites aranifera* (*Ophrys aranifera*). It has an erect stem from 9 to 18 inches high, with a few leaves near the base, and a loose spike of few small flowers with broad dull-brown lip and parts so shaped and arranged as somewhat to resemble a spider.

spider-shell (spī'dėr-shel), *n.* The shell of a gastropod of the family *Strombidæ* and genus *Pteroceras*; a scorpion-shell, having the outer lip expanded into a number of spines. The species inhabit the Indian and tropical Pacific oceans. See cut under *scorpion-shell*.

spider-stitch (spī'dėr-stich), *n.* A stitch in darned netting and in guipure, by which open spaces are partly filled with threads carried diagonally and parallel to each other, the effect of several squares together being that of a spider-web.

spider-wasp (spī′dėr-wosp), *n.* Any true wasp of the family *Pompilidæ*, which stores its nest

Spider-wasp (*Ceropales rufiventris*). (Cross shows natural size.)

with spiders for its young, as *Ceropales rufiventris* of North America, which lays its eggs in the mud nests of *Agenia*. See cut under *Agenia*.

spider-web (spī′dėr-web), *n.* The web or net spun by a spider; cobweb; gossamer. Also *spider-cot*.

spider-wheel (spī′dėr-hwēl), *n.* In *embroidery*, any circular pattern or unit of design open and having radiating and concentric lines. Compare *catharine-wheel*, 4.

spider-work (spī′dėr-wėrk), *n.* Lace worked by spider stitch.

spiderwort (spī′dėr-wėrt), *n.* 1. A plant of the genus *Tradescantia*, especially *T. Virginiana*, the common garden species. It is a native of the central and southern United States, and was early introduced into European gardens. The petals are very delicate and ephemeral; in the wild plant they are blue, in cultivation variable in color, often reddish-violet.

Spiderwort (*Tradescantia Virginiana*). 1, the inflorescence; 2, the lower part of the stem with the root.

2. By extension, any plant of the family *Commelinaceæ*; specifically, *Commelina cœlestis*, a blue-flowered plant from Mexico. The name is also given to *Lloydia serotina*, mountain-spiderwort; to *Anthericum Liliago*, St. Bernard's lily; and to *Paradisea Liliastrum*, St. Bruno's lily — all old-world plants, the last two ornamental.

spidery (spī′dėr-i), *a.* [< *spider* + *-y*[1].] Spider-like. *Cotgrave.*

spiet†, *v.* and *n.* An old spelling of *spy*.

spiegel (spē′gl), *n.* [Short for *spiegeleisen*.] Same as *spiegeleisen*.— **Spiegel-iron.** Same as *spiegeleisen*.

spiegeleisen (spē′gl-ī″zen), *n.* [G., < *spiegel* (< L. *speculum*), a mirror, + *eisen* = E. *iron*.] A pig-iron containing from eight to fifteen or more per cent. of manganese. Its fracture often presents large well-developed crystalline planes. This alloy, as well as ferromanganese, an iron containing still more manganese than spiegeleisen, is extensively used in the manufacture of Bessemer steel, and is a necessary adjunct to that process. Also called *spiegel-iron*.

spiegelerz (spē′gl-erts), *n.* [G., < *spiegel*, a mirror, + *erz*, ore.] Specular ironstone: a variety of hematite.

spier[1] (spī′ėr), *n.* [< *spy* + *-er*[1].] One who spies; a spy; a scout. *Halliwell.*

spier[2], *v.* See *speer*[1].

spiffy (spif′i), *a.* [Origin obscure.] Spruce; well-dressed. [Slang, Eng.]

spificate (spif′li-kāt), *v. t.*; pret. and pp. *spificated*, ppr. *spificating*. [Also *spifficate*, *smifligate*; appar. a made word, simulating a L. origin.] 1. To beat severely; confound; dismay. *Halliwell.* [Prov. Eng.]—2. To stifle; suffocate; kill. [Slang.]

So out with your whinger at once,
And scrag Jane while I *spificate* Johnny.
Barham, Ingoldsby Legends, II. 166.

spification (spif-li-kā′shon), *n.* [< *spificate* + *-ion*.] The act of spificating, or the state of being spificated; annihilation. [Slang.]

Whose blood he vowed to drink—the Oriental form of threatening *spification*. *R. F. Burton*, El-Medinah, I. 204.

Spigelia (spi-jē′li-ą), *n.* [NL. (Linnæus, 1737), named after Adrian van der *Spigel* (1558–1625), a Belgian physician and professor of anatomy at Padua.] A genus of dicotyledonous sympetalous plants, type of the family *Spigeliaceæ* and tribe *Spigelieæ*. It is characterized by flowers commonly disposed in one-sided spikes, the corolla with valvate lobes, a jointed style, and a two-celled ovary becoming in fruit a compressed twin capsule which is circumscissile above the cup-shaped persistent base. There are about 35 species, natives of America and mostly tropical, 3 extending into the United States; of these 1 is confined to Florida, 1 to Texas, and 1, *S. Marilandica*, the Maryland pinkroot or worm-grass, reaches Pennsylvania and Wisconsin. They are annual or perennial herbs, rarely somewhat shrubby, either smooth, downy, or woolly, bearing opposite feather-veined or rarely nerved leaves, which are connected by a line or transverse membrane or by stipules. The flowers are usually red, yellow, or purplish, and the many-flowered secund and curving spikes are often very handsome. In *S. Anthelmia*, the Demerara pinkroot, the flowers are white and pink, followed by purple fruit, and the two pairs of upper leaves are crowded in an apparent whorl. See *pinkroot*.

Spigelian (spi-jē′li-ąn), *a.* [< *Spigel* (see *Spigelia*) + *-ian*.] In *anat.*, noting the lobulus Spigelii, one of the lobes of the liver.

spight[1]†, *n.* See *speight*.

spight[2]†, *n.* and *v.* An obsolete erroneous spelling of *spite*.

spignel, *n.* See *spicknel*.

spignet (spig′net), *n.* [A corruption of *spikenard*.] The American spikenard, *Aralia racemosa*. See *spikenard*.

spigot (spig′ọt), *n.* [Early mod. E. also *spiggot*, *spiggott*, *spiggotte*, *spygotte*, *spygote*, < ME. *spigot*, *spygot*, *spygott*, *speget*; obs. or dial. also *spicket*, < ME. *spykket*, *spykette*; appar. < Ir. hinder passage. See cut under *chevaux-de-frise*. (*b*) A sharp projecting point on the sole of a shoe, to prevent slipping, as on ice or soft wet ground. (*c*) The central boss or a shield or buckler when prolonged to a sharp point. Such a spike is sometimes a mere pointed umbo and sometimes a square or three-cornered steel blade screwed or bolted into the boss. (*d*) In *zoöl.*: (1) The antler of a young deer, when straight and without snag or tine; a spike-horn. (2) A young mackerel 6 or 7 inches long. (3) A spine, as of some animals. (*e*) A piece of hardened steel, with a soft point that can be clenched, used to plug up the vent of a cannon in order to render it useless to an enemy.

2. A large nail or pin, generally of iron. The larger forms of spikes, particularly railroad-spikes, are chisel-pointed, and have a head or fang projecting to one side to bite the rail. Spikes are also made split, barbed, grooved, and of other shapes. See cut in preceding column.

3. An ear, as of wheat or other grain.

Bote yf the sed that sowen is in the sloh sterue,
Shall neuere spir springen vp, ne *spik* on strawe curne.
Piers Plowman (C), xiii. 180.

4. In *bot.*, a flower-cluster or form of inflorescence in which the flowers are sessile (or apparently so) along an elongated, unbranched common axis, as in the well-known mullen and plantain. There are two modifications of the spike that have received distinct names, although not distinguishable by exact and constant characters. They are *spadix* and *catkin*. In the *Equisetaceæ* a spike is an aggregation of sporophyls at the apex of a shoot. Compare *raceme*, and see cuts under *inflorescence*, *barley*, *papyrus*, and *Equisetaceæ*.

a, Spike of *Plantago major*; *b*, section of it, showing the sessile flowers.

Hence—5. A sprig of some plant in which the flowers form a spike or somewhat spike-like cluster: as, a *spike* of lavender.

The head of Nardus spreadeth into certaine *spikes* or eares, whereby it hath a twofold use, both of *spike* and also of leafe; in which regard it is so famous.
Holland, tr. of Pliny, xii. 12.

A plant, the source of a famous perfumed unguent of the ancients, now believed to be *Nardostachys Jatamansi*, closely allied to valerian, found in the Himalayan region. This plant is known to have been used by the Hindus as a medicine and perfume from a very remote period, and is at present employed chiefly in hair-washes and ointments. The odor is heavy and peculiar, described as resembling that of a mixture of valerian and patchouli. The market drug consists of short pieces of the rootstock densely covered with fibers, the remains of leafstalks. Also *nard*.

Spikenard (*Nardostachys Jatamansi*).

2. An aromatic ointment of ancient times, in which spikenard was the characteristic ingredient; nard. It was extremely costly.

There came a woman having an alabaster box of ointment of *spikenard*, very precious, and she brake the box, and poured it on his head. Mark xiv. 3.

3. A name given to various fragrant essential oils.—**American spikenard**, a much-branching herbaceous plant, *Aralia racemosa*, with a short thick rootstock more spicy than that of *A. nudicaulis*, the wild sarsaparilla, and, like that, used in domestic medicine in place of true sarsaparilla. The *A. nudicaulis* is sometimes named *small spikenard*, while *A. spinosa*, the angelica-tree, has been called *spikenard-tree*.—**Celtic spikenard**, *Valeriana Celtica* of the Alps, Apennines, etc.—**Cretan spikenard**, *Valeriana Phu*, an Asiatic plant, sometimes cultivated in Europe, but medicinally weaker than the officinal valerian.—**False spikenard**, an American plant, *Vagnera racemosa*, somewhat resembling the true (American) spikenard. Also *false Solomon's-seal*.—**Indian spikenard**, the true spikenard. See def. 1.—**Plowman's spikenard**, a European plant, *Inula Conyza*, so called from its fragrant root and from being confounded with a plant by some writers called *nardus rustica* or *clown's-nard*. *Prior*.—**Small spikenard**. See *American spikenard*.—**West Indian spikenard**, a fragrant weed, *Hyptis suaveolens*, sometimes cultivated for medicinal use.

spikenard-tree (spīk'närd-trē), *n.* See *American spikenard*, under *spikenard*.

The Bhagirathi, although for centuries a mere *spill-stream* from the parent Ganges, is still called the Ganges by the villagers along its course.
Nineteenth Century, XXIII. 43.

spill-time† (spil'tīm), *n.* [ME. *spille-tyme;* < *spill*[1], *v.*, + obj. *time.*] A waster of time; a time-killer; an idler.

A spendour that spende mot other a *spille-tyme*,
Other beggest thy bylyue a-boute at menne hacches.
Piers Plowman (C), vi. 28.

spill-trough (spil'trôf), *n.* In *brass-founding*, a trough against which the inclined flask rests while the metal is poured from the crucible, and which catches metal that may be spilled.

spillway (spil'wā), *n.* A passage for surplus water from a dam.

In wet weather the water in the two reservoirs flows away through the *spillways* or waste weirs beside the dams, and runs down the river into Croton Lake.
The Century, XXXIX. 207.

Spilochalcis (spī-lō-kal'sis), *n.* [NL. (Thomson, 1875), < Gr. *σπίλος*, a spot, speck, + NL. *Chalcis:* see *Chalcis*[1].] A genus of parasitic hymenopterous insects, of the family *Chalcididæ*, containing some of the largest species. The hind thighs are greatly enlarged, the abdomen has a long petiole, the thorax is maculate, and the middle tibiæ have spurs. The genus is very widely distributed, and the species destroy many kinds of insects. Some of the smaller

Spilochalcis mariæ, female. (Cross shows natural size.)

ones are secondary parasites. *S. mariæ* is a common parasite of the large native American silkworms, such as the polyphemus and cecropia.

Spilogale (spī-log'a-lē), *n.* [NL., < Gr. *σπίλος*, a spot, + *γαλῆ*, contr. of *γαλέη*, a weasel.] A genus of American skunks, differing from *Mephitis* in certain cranial characters. The skull is depressed, with highly arched zygomata, well-developed postorbital and slight mastoid processes, and peculiarly bullous periotic region. *S. putorius*, formerly *Mephitis bicolor*, is the little striped or spotted skunk of the United States. It is black or blackish, with numerous white stripes and spots in endless diversity of detail. The length is scarcely 12 inches without the tail, which is shorter than the rest of the animal. The genus was named by J. E. Gray in 1865. See cut in next column.

Little Striped Skunk (*Spilogale putorius*).

Spilornis (spī-lôr'nis), *n.* [NL. (G. R. Gray, 1840), < Gr. *σπίλος*, a spot, + *ὄρνις*, a bird.] A genus of large spotted and crested hawks, of the family *Falconidæ*, having the tarsi bare below, the nostrils oval and perpendicular, and the crest-feathers rounded. There are several species of India, and thence through the Indo-Malayan region to Celebes and the Sulu and Philippine Islands. The best-

Crested Serpent-eagle, or Cheela (*Spilornis cheela*).

known is the cheela, *S. cheela*, of India. The bacha, *S. bacha*, inhabits Java, Sumatra, and Malacca; *S. pallidus* is found in Borneo, *S. rufipectus* in Celebes, *S. sulæensis* in the Sulu Islands, and *S. holospilus* in the Philippines.

spilosite (spil'ō-sīt), *n.* [Irreg. < Gr. *σπίλος*, a spot, + *-ite*[2].] A name given by Zincken to a rock occurring in the Harz, near the borders of the granitic mass of the Ramberg, apparently the result of contact metamorphism of the slate in the vicinity of granite or diabase. The most prominent visible feature of this change in the slate is the occurrence of spots; hence the rock has been called by the Germans *Fleckenschiefer*, while rocks of a similar origin, but striped instead of spotted, are known as *Bandschiefer*. Similar phenomena of contact metamorphism have been observed in other regions and described by various authors, and such altered slates are called by English geologists *spotted schists, chiastolite schists, andalusite schists*, etc.

Spilotes (spī-lō'tēz), *n.* [NL. (Wagler, 1830), as if < Gr. **σπιλωτής*, < *σπιλοῦν*, stain, < *σπίλος*, a spot.] A genus of colubrine serpents, having smooth equal teeth, one median dorsal row of scales, internasals not confluent with nasals, two prefrontals, two nasals, one preocular, the rostral not produced, and the anal scute entire. *S. couperi* is a large harmless snake of the South Atlantic and Gulf States, sometimes 6 or 8 feet long, of a black color shading into yellow below, and known as the *indigo-* or *gopher-snake.* This genus was called *Georgia* by Baird and Girard in 1853.

spilt (spilt). A preterit and past participle of *spill*[1].

spilter† (spil'tėr), *n.* Same as *speller*[3].

spilth (spilth), *n.* [< *spill*[1] + *-th*[3]. Cf. *tilth.*] That which is spilled; that which is poured out lavishly.

Our vaults have wept
With drunken *spilth* of wine.
Shak., T. of A., ii. 2. 169.

Burned like a *spilth* of light
Out of the crashing of a myriad stars.
Browning, Sordello.

spilus (spī'lus), *n.* [NL., < Gr. *σπίλος*, a spot, blemish.] 1. Pl. *spili* (-lī). In *anat.* and *pathol.*, a spot or discoloration; a nævus or birth-mark.—2. [*cap.*] In *entom.*, a genus of elaterid beetles, confined to South America. *Candèze*, 1859.

spin (spin), *v.*; pret. *spun* (formerly also *span*), pp. *spun*, ppr. *spinning.* [< ME. *spinnen, spynnen* (pret. *span*, pl. *sponne*, pp. *sponnen*), < AS. *spinnan* (pret. *spann*, pp. *spunnen*) = D. *spinnen* = MLG. LG. *spinnen* = OHG. *spinnan*, MHG. G. *spinnen* = Icel. Sw. *spinna* = Dan. *spinde* = Goth. *spinnan*, spin; prob. related to *span* (AS. *spannan*, etc.), < Teut. √ *span*, draw out: see *span*[1]. Hence ult. *spinner, spindle, spinster, spider.*] **I.** *trans.* 1. To draw out and twist into threads, either by the hand or by machinery: as, to *spin* wool, cotton, or flax.

All the yarn she [Penelope] *spun* in Ulysses' absence did but fill Ithaca full of moths. *Shak.*, Cor., i. 3. 93.

For plain truths lose much of their weight when they are rarify'd into subtilties, and their strength is impaired when they are *spun* into too fine a thread.
Stillingfleet, Sermons, I. iv.

The number of strands of gut *spun* into a cord varies with the thickness of catgut required.
Workshop Receipts, 2d ser., p. 320.

2. To make, fabricate, or form by drawing out and twisting the materials of: as, to *spin* a thread or a web; to *spin* glass.

O fatal sustren! which, er any cloth
Me shapen was, my desteyne me *sponne*.
Chaucer, Troilus, iii. 734.

She, them saluting, there by them sate still,
Beholding how the thrids of life they *span*.
Spenser, F. Q., IV. ii. 49.

What Spinster Witch could *spin* such Thread
He nothing knew. *Congreve*, An Impossible Thing.

There is a Wheel that's turn'd by Humane power, which *Spins* Ten Thousand Yards of Glass in less than half an hour. Advertisement quoted in *Ashton's* Social Life [in Reign of Queen Anne, I. 290.

3. To form by the extrusion in long slender filaments or threads of viscous matter which hardens in air: said of the spider, the silkworm, and other insects: as, to *spin* silk or gossamer; to *spin* a web or cocoon.—4. Figuratively, to fabricate or produce in a manner analogous to the drawing out and twisting of wool or flax into threads, or to the processes of the spider or the silkworm: sometimes with *out.*

When they [letters] are *spun* out of nothing, they are nothing, or but apparitions and ghosts, with such hollow sounds as he that hears them knows not what they said.
Donne, Letters, xlvii.

Those accidents of time and place which obliged Greece to *spin* most of her speculations, like a spider, out of her own bowels. *De Quincey*, Style, iv.

5. To whirl rapidly; cause to turn rapidly on its own axis by twirling: as, to *spin* a top; to *spin* a coin on a table.

If the ball were *spun* like a top by the two fingers and thumb, it would turn in the way indicated by the arrow in the diagram. *St. Nicholas*, XVII. 826.

6. To fish with a swivel or spoon-bait: as, to *spin* the upper pool.—7. In *sheet-metal work*, to form in a lathe, as a disk of sheet-metal, into a globe, cup, vase, or like form. The disk is fitted to the live spindle, and is pressed and bent by tools of various forms. The process is peculiarly suitable to plated ware, as the thin coating of silver is not broken or disturbed by it. Called in French *repoussé sur tour.*

8. To reject at an examination; "send spinning." [Slang.]

"When must you go, Jerry?" "Are you to join directly, or will they give you leave?" "Don't you funk being *spun?*" "Is it a good regiment? How jolly to dine at mess every day!" *Whyte Melville*, White Rose, I. x.

Spun glass, silk. See the nouns.—**Spun gold,** gold thread prepared for weaving in any manner; especially, that prepared by winding a very thin and narrow flat ribbon of gold around a thread of some other material.—**Spun silver,** silver thread for weaving. Compare *spun gold.*—**Spun yarn** (*naut.*), a line or cord formed of rope-yarns twisted together, used for serving ropes, bending sails, etc.—**To spin a yarn,** to tell a long story: originally a seamen's phrase. [Colloq.]—**To spin hay** (*milit.*), to twist hay into ropes for convenient carriage.—**To spin out,** to draw out tediously; prolong by discussion, delays, wordiness, or the like; protract: as, to *spin out* the proceedings beyond all patience.

By one delay after another, they *spin out* their whole lives. *Sir R. L'Estrange.*

Do you mean that the story is tediously *spun out?*
Sheridan, The Critic, i. 1.

He endeavoured, however, to gain further time by *spinning out* the negotiation. *Prescott*, Ferd. and Isa., ii. 18.

To spin street-yarn, to gad abroad; spend much time in the streets. [Slang. New Eng.]

II. *intrans.* 1. To form threads by drawing out and twisting the fiber of wool, cotton, flax, and the like, especially with the distaff and spindle, with the spinning-wheel, or with spinning-machinery.

Deceite, wepyng, *spynnyng*, God hath yeve
To wommen kyndely.
Chaucer, Prol. to Wife of Bath's Tale, l. 401.

When Adam dalve, and Eve *span*,
Who was then a gentleman?
Bp. Pilkington, Works (Parker Soc.), p. 125.

2. To form threads out of a viscous fluid, as a spider or silkworm.—3. To revolve rapidly; whirl, as a top or a spindle.

Let the great world *spin* for ever down the ringing grooves of change. *Tennyson*, Locksley Hall.

4. To issue in a thread or small stream; spirt.

Make incision in their hides,
That their hot blood may *spin* in English eyes.
Shak., Hen. V., iv. 2. 10.

The sharp streams of milk *spun* and foamed into the pail below. *R. T. Cooke*, Somebody's Neighbors, p. 84.

5. To go or move rapidly; go fast: as, to *spin* along the road. [Colloq.]

While it [money] lasts, make it *spin*.
W. Collins, Hide and Seek, ii. 4.

The locomotive *spins* along no less merrily because ten carloads of rascals may be profiting by its speed.
S. Lanier, The English Novel, p. 8.

6. To use a spinner or spinning-spoon; troll: as, to *spin* for trout.—**7.** To be made to revolve, as a minnow on the trolling-spoon. The minnow is fastened on a gang of small hooks that are thrust into its back and sides to so bend it that it may turn round and round when dragged through the water.

★—**Spinning dervish.** See *dervish*.

spin (spin), *n.* [< *spin*, *v.*] **1.** A rapid revolving or whirling motion, as that of a top on its axis; a rapid twirl: as, to give a coin a *spin*.

She found Nicholas busily engaged in making a penny spin on the dresser, for the amusement of three little children. . . . He, as well as they, was smiling at a good long *spin*. *Mrs. Gaskell*, North and South, xxxix.

2. A continued rapid motion or action of any kind; a dash or run; a single effort, especially at high speed, as in a race; a spurt. [Colloq.]—**3.** In *math.*, a rotation-velocity considered as represented by a line, the axis of rotation, and a length marked upon that line proportional to the number of turns per unit of

★time. *W. K. Clifford*.

spina (spī'nä), *n.*; pl. *spinæ* (-nē). [< L. *spina*, a thorn, prickle, the backbone: see *spine*.] **1.** In *zoöl.* and *anat.*: (*a*) A spine, in any sense. (*b*) The spine, or spinal column; the backbone: more fully called *spina dorsalis* or *spina dorsi*, also *columna spinalis*.—**2.** [*cap.*] [NL.] In *ornith.*, a genus of fringilline birds, the type of which is *S. lesbia* of southern Europe. *Kaup*, 1829. Also called *Buscarla*. See *Spinus*.—**3.** In *Rom. antiq.*, a barrier dividing the hippodrome longitudinally, about which the racers turned.—**4.** One of the quills of a spinet or similar instrument.—**Erector spinæ, multifidus spinæ, rotatores spinæ.** See *erector, multifidus, rotator*.—**Spina angularis.** See *spine of the sphenoid*, under *spine*.—**Spina bifida**, a congenital gap in the posterior wall of the spinal canal, through which protrudes a sac, formed in hydrorachis externa of meninges, and in hydrorachis interna of these with a nervous lining. This forms a tumor in the middle line of the back.—**Spina dorsalis, spina dorsi**, the vertebral column.—**Spina frontalis.** See *nasal spine* (*a*), under *nasal*.—**Spina helicis**, the spinous process of the helix of the ear.—**Spina mentalis**, one of the mental or genial tubercles. See *mental*[2], *genial*[2].

spinaceous (spi-nā'shius), *a.* [< *Spinacia* + *-ous* (accom. to *-aceous*).] Of, pertaining to, or of the nature of spinach, or the class of plants

★to which it belongs.

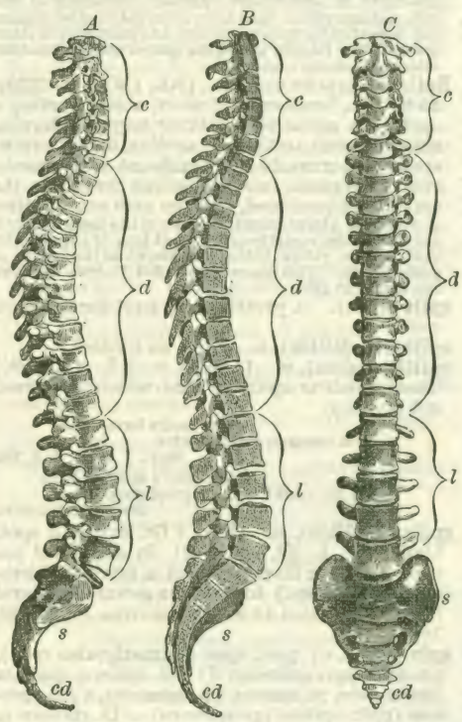
spinach, spinage (spin'āj), *n.* [(*a*) According to the present pron., prop. spelled *spinage* (early mod. E. also *spynage*), this being an altered form of *spinach* (early mod. E. *spinache*); = MD. *spinagie, spinazi*, D. *spinazie* = LG. *spinasie*, < OF. *spinache, espinache, espinage, espinace, espinoce, espinoche, espinoiche*, etc., = Sp. *espinaca* = Cat. *espinac* = It. *spinace*, also *spinacchia*, < ML. *spinacia, spinacium*, also *spinacius, spinachia, spinachium, spinathia*, etc., after Rom. (NL. *spinacia*), spinach; cf. (*b*) Pr. *espinar*, OF. *espinars, espinard, espinar*, F. *épinard*; (*c*) G. Dan. *spinat* = Sw. *spenat, spinat*; (*d*) Pg. *espinafre*, spinach, so called with ref. to the prickly fruit, popularly supposed to be < L. *spina*, a thorn (see *spine*), but actually derived through the Sp. from Ar. *isfināj, isfānāj*, < Pers. *aspanākh*, spinach.] **1.** A chenopodiaceous garden vegetable of the genus *Spinacia*, producing thick succulent leaves, which, when boiled and seasoned, form a pleasant and wholesome, though not highly flavored, dish. There are but two species recognized by recent authors, *S. oleracea*, with several cultivated forms, and *S. tetrandra*, a wild species not in cultivation. The leaves of one variety of *S. oleracea* are sagittate, undivided, and prickly; those of another are larger, rounded at the base, and smooth. These are respectively the prickly-leaved and round-leaved spinach. There are several cultivated forms of each of these varieties, one of which, with wrinkled leaves like a Savoy cabbage, is the Savoy or lettuce-leaved spinach. Both the species are Asiatic; the cultivated plant was first introduced into Europe by the Arabs by way of Spain.

2. One of several other plants affording a dish like spinach. See phrases below.—**Australian spinach**, a species of goosefoot, *Chenopodium auricomum*, a recent substitute for spinach; also, *Tetragonia implexicoma*, the Victorian bower-spinach, a trailing and climbing plant festooning bushes, its leaves covered with transparent vesicles as in the ice-plant.—**Indian spinach.** Same as *Malabar nightshade*. See *nightshade*.—**Mountain spinach.** See *mountain-spinach*.—**New Zealand spinach**, a decumbent or prostrate plant, *Tetragonia expansa*, found in New Zealand, Australia, and Tasmania, and also in Japan and southern South America. It has numerous rhomboid thick and succulent deep-green leaves.—**Strawberry spinach.** Same as *strawberry-blite*.—**Wild spinach**, a name of several plants locally used as pot-herbs, namely *Chenopodium Bonus-Henricus* and *C. album*, *Beta maritima* (the wild beet), and *Campanula latifolia*. [Prov. Eng.]

Spinachia (spī-nā'ki-ä), *n.* [NL. (Cuvier, 1817), < L. *spina*, a thorn, prickle, spine: see *spine*, and cf. *spinach*.] In *ichth.*, a genus of marine gasterosteids. *S. spinachia* is the common seastickleback of northern Europe.

Spinacia (spī-nā'si-ä), *n.* [NL. (Tournefort, 1700), < ML. *spinacia*, spinach: see *spinach*.] A genus of apetalous plants, of the family *Chenopodiaceæ* and tribe *Atriplicæ*. It is characterized by bractless and commonly dioecious flowers, the pistillate with a two- to four-toothed roundish perianth, its tube hardened and closed in fruit, covering the utricle and its single erect turgid seed. There are 2 species, natives of the Orient. They are erect annuals, with alternate stalked leaves which are entire or sinuately toothed. The flowers are borne in glomerules, the fertile usually axillary, the staminate forming interrupted spikes. See *spinach*.

Spinacidæ (spī-nas'i-dē), *n. pl.* [NL., < *Spinax* (*-ac-*) + *-idæ*.] A family of anarthrous sharks, typified by the genus *Spinax*; the dogfishes. There are 6 or more genera and about 20 species of rather small sharks, chiefly of the Atlantic. Also called *Acanthiidæ, Centrinidæ, Spinaces*, and *Squatidæ*.

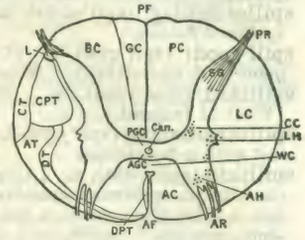


spinacine (spin'a-sin), *a.* [< *Spinax* (*-ac-*) + *-ine*[1].] Of or pertaining to the *Spinacidæ*.

spinacoid (spin'a-koid), *a.* and *n.* [< *Spinax* (*-ac-*) + *-oid*.] **I.** *a.* Resembling or related to the dogfish; of or pertaining to the *Spinacidæ*.

II. *n.* A member of the *Spinacidæ*; a dogfish.

spinage, *n.* See *spinach*.



spinal (spī'nal), *a.* [= F. *spinal* = Sp. *espinal* = ★Pg. *espinhal* = It. *spinale*, < LL. *spinalis*, of or pertaining to a thorn or the spine, < L. *spina*, a thorn, prickle, spine, the spine or backbone: see *spine*.] In *anat.*: (*a*) Of or pertaining to the backbone, spine, or spinal column; rachidian; vertebral: as, *spinal* arteries, bones, muscles, nerves; *spinal* curvature; a *spinal* complaint. (*b*) Pertaining to a spine or spinous process of bone; spinous: as, the *spinal* point (the base of the nasal spine, or subnasal point): specifically used in craniometry. [Rare.]—**Accessory spinal nerve**, or **spinal accessory.** Same as *accessorius* (*b*).—**Acute, atrophic,** and **spastic spinal paralysis.** See *paralysis*.—**Spinal arteries**, numerous branches, especially of the vertebral artery, which supply the spinal cord.—**Spinal bulb**, the medulla oblongata.—**Spinal canal.** See *canal*[1].—**Spinal column**, the spine or backbone; the vertebral column or series of vertebræ, extending from the head to the end of the tail, forming the morphological axis of the body of every vertebrate. In man the bones composing the spinal column are normally thirty-three—seven cervical, twelve dorsal or thoracic, five lumbar, five sacral, and four coccygeal. These form a flexuous and

Human Spinal Column.

A, side view; *B*, same, in median sagittal section; *C*, front view; *c*, seven cervicals; *d*, twelve dorsals; *l*, five lumbars; *s*, five sacrals, fused in a sacrum; *cd*, four caudals or coccygeals, forming a coccyx.

flexible column capable of bending, as a whole, in every direction. It is most movable in the lumbar and cervical regions, less so in the dorsal and coccygeal, fixed in the sacral. Twenty-four of its bones are individually movable. The total length averages 26 or 27 inches. See *vertebra*, and cut under *backbone*.—**Spinal cord**, the main neural axis of every vertebrate, exclusive of the brain; the myelon, or the neuron without the encephalon; the spinal marrow, or nervous cord which extends in the spinal canal from the brain for a varying distance in different animals, and gives off the series of spinal nerves in pairs. The cord is directly continuous with the brain in all cranial vertebrates, and, with the brain, constitutes the neuron, or cerebrospinal axis, developed from an involution of epiblast in connection with a notochord (see cut under *protovertebra*). The cord is primitively tubular, and may retain, in the adult, traces of its cœlia (see *rhombocœlia*), comparable to the cœliæ of the brain; but it generally solidifies, and also becomes fluted, or presents several parallel columns, from between certain of which the spinal nerves emerge. In man the cord is solid and subcylindrical, and extends in the spinal canal from the foramen magnum, where it is continuous with the oblongata, to the first or second lumbar vertebra. It gives off the spinal nerves, and may be regarded as made up of a series of segments, from each of which springs a pair of nerves; it is divided into cervical, thoracic, lumbar, sacral, and coccygeal regions, corresponding to the nerves and not to the adjacent vertebræ. There is an enlargement where the nerves from the arms come in (the cervical enlargement), and one where those from the legs come in (the lumbar enlargement). A cross-section of the cord exhibits a central H-shaped column of gray substance incased in white. (See figure.) The tracts of different functions are exhibited on one side of the cut; they are not distinguished in the adult healthy cord, but differ from one another in certain periods of early development, and may be marked out by secondary degenerations. The cord is a center for certain reflex actions, and a collection of pathways to and from the brain. The reflex centers have been located as follows: scapular, 5 C. to 1 Th.; epigastric, 4 Th. to 7 Th.; abdominal, 8 Th. to 1 L.; cremasteric, 1 L. to 3 L.; patellar, 2 L. to 4 L.; cystic and sexual, 2 L. to 4 L.; rectal, 4 L. to 2 S.; gluteal, 4 L. to 5 L.; Achilles tendon, 5 L. to 1 S.; plantar, 1 S. to 3 S. See also cuts under *brain, cell, Petromyzontidæ*, and *Pharyngobranchii*.—**Spinal epilepsy**, muscle-clonus, spontaneous or due to assuming some ordinary position of the legs, the result of increased myotatic irritability, as in spastic paralysis.—**Spinal foramina**, the intervertebral foramina.—**Spinal ganglia.** See *ganglion*.—**Spinal marrow.** Same as *spinal cord*.—**Spinal muscles**, the muscles proper of the spinal column, which lie longitudinally along the vertebræ, especially the epaxial muscles of the back, constituting what are known in human anatomy as the *third, fourth*, and *fifth layers* of muscles of the back (the so-called first and second "layers" of human anatomy being not axial, but appendicular). One of these is called *spinalis*.—**Spinal nerves**, the numerous pairs of nerves which arise from the spinal cord and emerge from the intervertebral foramina. In the higher vertebrates spinal nerves originate by two roots from opposite sides of that section of the spinal cord to which they respectively pertain—a *posterior, sensory*, or *ganglionated* root, and an *anterior, motor*, or *non-ganglionated* root, which usually unite in one sensorimotor trunk before emergence from the intervertebral foramina, and then as a rule divide into two main trunks, one epaxial and the other hypaxial. The number of spinal nerves varies within wide limits, and bears no fixed relation to the length of the spinal cord, which latter may end high in the dorsal region, yet give off a leash of nerves (see *cauda equina*, under *cauda*) which emerge from successive intervertebral foramina as far as the coccygeal region. The spinal nerves form numerous and intricate connections with the nerves of the ganglionic system. Their epaxial trunks are always few and small in comparison with the size, number, and extent of the ramifications of the hypaxial trunks, which latter usually supply all the appendicular and most of the axial parts of the body.—**Spinal reflexes.** See *reflex*.—**Spinal veins**, the numerous veins and venous plexuses in and on the spinal column, carrying off blood from the bones and included structures. In man these veins are grouped and named in four sets. See *vena*.

Cross-section of Human Spinal Cord.

AC, anterior column; AF, anterior fissure; AGC, anterior gray commissure; AH, anterior horn of gray matter; AR, anterior roots; AT, ascending anterolateral tract, or tract of Gowers; BC, postero-external column, or column of Burdach; Can., central canal; CC, Clarke's column; CPT, crossed pyramidal tract; CT, cerebellar tract; DPT, direct or uncrossed pyramidal tract; DT, anterolateral descending tract; GC, posteromedian column, or column of Goll; L, Lissauer's tract; LC, lateral column; LH, lateral horn or intermediolateral tract of gray matter with contained ganglion-cells; PC, posterior column; PF, posterior fissure; PGC, posterior gray commissure; PR, posterior root; SG, substantia gelatinosa; WC, anterior white commissure.

spinalis (spī-nā'lis), *n.*; pl. *spinales* (-lēz). [NL. (sc. *musculus*), < LL. *spinalis*, pertaining to a thorn: see *spinal*.] In *anat.*, a series of muscular slips, derived from the longissimus dorsi, which pass between and connect the spinous processes of vertebræ: usually divided into the *spinalis dorsi* and *spinalis colli*, according to its relation with the back and the neck respectively.

spinate (spī'nāt), *a.* [< NL. *spinatus*, < L. *spina*, spine: see *spine*. Cf. *spinach* (*d*).] Covered with spines or spine-like processes.

Spinax (spī'naks), *n.* [NL. (Cuvier, 1817), < Gr. σπίνα or σπίνη, a fish so called.] A genus of dogfishes, giving name to the family *Spinacidæ*, and

represented by *S. niger* or *spinax*, a small black shark of Europe. Properly *Etmopterus*.

Spindalis (spin'da-lis), *n.* [NL. (Jardine and Selby, 1836); origin unknown.] A genus of thick-billed tanagers, of the family *Tanagridæ*, peculiar to the Antillean region. They have a comparatively long bill, ascending gonys, and swollen upper mandible; in the male the coloration is brilliant orange varied with black and white. There are 6 species, *S. nigricephala, portoricensis, multicolor, pretrii, benedicti,* and *zena*, respectively inhabiting Jamaica, Porto Rico, San Domingo, Cuba, Cozumel Island (off the Yucatan coast), and the Bahamas. The first-named builds a cup-shaped nest in trees or shrubs, and lays spotted eggs, and the others are probably similar in this respect. See cut under *cashew-bird*.

★**spindle** (spin'dl), *n.* [Also dial. *spinnel;* < ME. *spindle, spyndle, spindel, spyndel, spyndelle, spyndyl, spyndylle,* < AS. *spindle, spindel,* earlier *spinel, spinil, spinl* (dat. *spinele, spinle*) (= MD. *spille* (by assimilation for **spinle*), D. *spil* = OHG. *spinnela, spinnila, spinnala,* MHG. *spinnele, spinnel,* G. *spindel* (also *spille,* < D.) = Sw. Dan. *spindel*), a spindle, < *spinnan*, spin: see *spin*. Cf. *spill*[2].] **1.** (*a*) In *hand-spinning*, a small bar, usually of wood, hung to the end of the thread as it is first drawn from the mass of fiber on the distaff. By rotating the spindle, the spinner twists the thread, and as the thread is spun it is wound upon the spindle.

Sing to those that hold the vital shears,
And turn the adamantine *spindle* round,
On which the fate of gods and men is wound.
Milton, Arcades, l. 66.

(*b*) The pin which is used in spinning-wheels for twisting the thread, and on which the thread, when twisted, is wound. See cut under *spinning-wheel*. (*c*) One of the skewers or axes of a spinning-machine upon which a bobbin is placed to wind the yarn as it is spun. See cut under *spinning-jenny*.—**2.** Any slender pointed rod or pin which turns round, or on which anything turns. (*a*) A small axle or axis, in contradistinction to a *shaft* or large axle, as the arbor or mandrel in a lathe: as the *spindle* of a vane; the *spindle* of the fusee of a watch. See *dead-spindle, live-spindle*. (*b*) A vertical shaft supporting the upper stone or runner of a pair in a flour-mill. See cut under *mill-spindle*. (*c*) In vehicles, the tapering end or arm on the end of an axletree. (*d*) A small shaft which passes through a door-lock, and upon which the knobs or handles are fitted. When it is turned it withdraws the latch. (*e*) In *ship-building:* (1) The upper main piece of a made mast. (2) An iron axle fitted into a block of wood, which is fixed securely between two of the ship's beams, and upon which the capstan turns. (*f*) In *founding*, the pin on which the pattern of a mold is formed. (*g*) In *building*, same as *newel*[1]. (*h*) In *cabinet-making*, a short turned part, especially the turned or circular part of a baluster, stair-rail, etc.

3. Something having the form of a spindle (sense 1); a fusiform object. (*a*) The grip of a sword. (*b*) A pine-needle or -leaf. [U. S.]

We went into camp in a magnificent grove of pines. The roots of the trees are buried in the *spindles* and burrs which have fallen undisturbed for centuries.
G. W. Nichols, Story of the Great March, xxii.

(*c*) The roll of not yet unfolded leaves on a growing plant of Indian corn.

Its [the spindle-worm's] ravages generally begin while the cornstalk is young, and before the *spindle* rises much above the tuft of leaves in which it is embosomed.
Harris, Insects Injurious to Vegetation.

(*d*) In *conch.*, a spindle-shell. (*e*) In *anat.*, a fusiform part or organ. (1) A spindle-cell. (2) The inner segment of a rod or cone of the bacillary layer of the retina. See cut under *retina*. *Huxley*, Crayfish, p. 121. (*f*) In *embryol.*, one of the fusiform figures produced by chromatin fibers in the process of karyokinesis.

Before the germinal vesicle begins to be converted into the *spindle*. *Amer. Nat.*, XXII. 933.

4. In *geom.*, a solid generated by the revolution of the arc of a curve about its chord. The spindle is denominated *circular, elliptic, hyperbolic, parabolic*, etc., according to the figure of its generating curve.

5. A measure of yarn: in cotton a *spindle* of 18 hanks is 15,120 yards; in linen a *spindle* of 48 cuts is 14,400 yards.—**6.** A long slender stalk.

The *spindles* must be tied up, and, as they grow in height, rods set by them, lest by their bending they should break.
Mortimer.

7. Something very thin and slender.

I am fall'n away to nothing, to a *spindle*.
Fletcher, Women Pleased, iv. 3.

Ring-spindle, a spindle which carries a traveling ring.—**Spindle side of the house**, the female side. See *spear-side*.

spindle (spin'dl), *v. i.*; pret. and pp. *spindled*, ppr. *spindling*. [< *spindle*, *n.*] To shoot or grow in a long, slender stalk or body.

When the flowers begin to *spindle*, all but one or two of the biggest at each root should be nipped off. *Mortimer*.

spindle-cataract (spin'dl-kat″a-rakt), *n.* A form of cataract characterized by a spindle-shaped opacity extending from the posterior surface of the anterior part of the capsule to the anterior surface of the posterior part of the capsule, with a central dilatation. Commonly called *fusiform cataract*.

spindle-cell (spin'dl-sel), *n.* A spindle-shaped cell; a fusiform cell.—**Spindle-cell layer**, the deepest layer of the cerebral cortex, containing many fusiform with a few angular cells.—**Spindle-cell sarcoma**. See *spindle-celled sarcoma*, under *sarcoma*.

spindle-celled (spin'dl-seld), *a.* Made up of or containing spindle-shaped cells.—**Spindle-celled sarcoma**. See *sarcoma*.

spindle-legged (spin'dl-legd), *a.* Having long, thin legs; spindle-shanked.

A pale, sickly, *spindle-legged* generation of valetudinarians. *Addison*, Tatler, No. 148.

spindle-legs (spin'dl-legz), *n. pl.* Long, slim legs; hence, a tall, thin person with such legs or shanks: used humorously or in contempt.

spindle-shanked (spin'dl-shangkt), *a.* Same as *spindle-legged*.

spindle-shanks (spin'dl-shangks), *n. pl.* Same as *spindle-legs*.

A Weezel-faced cross old Gentleman with *Spindle-Shanks*. *Steele*, Tender Husband, i. 1.

spindle-shaped (spin'dl-shāpt), *a.* Circular in cross-section and tapering from the middle to each end; fusiform; formed like a spindle.

Spindle-shaped Root of Radish (*Raphanus sativus*).

spindle-shell (spin'dl-shel), *n.* In *conch.*, a spindle-shaped shell; a spindle. (*a*) A shell of the genus *Fusus* in some of its applications, as *F. antiquus*, the common spindle or red-whelk, also called *buckie* or *roaring buckie*. See cuts under *Fusus* and *Siphonostoma*, 2. (*b*) A spindle-stromb. (*c*) A gastropod of the family *Muricidæ* and genus *Chrysodomus*, having a spindle-like or fusiform shape and the canal slightly produced. The species inhabit chiefly the northern cold seas. See cut under *reverse*.

spindle-step (spin'dl-step), *n.* In mill- and spinning-spindles, the lower bearing of an upright spindle. *E. H. Knight*.

spindle-stromb (spin'dl-stromb), *n.* A gastropod of the family *Strombidæ* and genus *Rostellaria*, having a spindle-like or fusiform shell with a long spire, and also a long anterior canal. The species inhabit the tropical Pacific and Indian oceans. See cut under *Rostellaria*.

spindletail (spin'dl-tāl), *n.* The pin-tailed duck, *Dafila acuta*. See *pintail*, 1. [Local, U. S.]

spindle-tree (spin'dl-trē), *n.* A European shrub or small tree, *Euonymus Europæus*, growing in hedge-rows, on borders of woods, etc. It is so called from the use of its hard fine-grained wood in making spindles, and other uses have given it the names *prick-timber, skewer-wood*, and *pegwood*. It is one of the dogwoods. The name is carried over to the American *E. atropurpureus*, the wahoo or burning-bush, and to the Japanese *E. Japonicus;* it is also extended to the genus, and even to the family (*Celastraceæ*).

★**spindle-valve** (spin'dl-valv), *n.* A lifting valve having an axial guide-stem.

spindle-whorl, *n.* Same as *whorl*, 4.

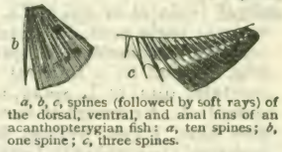
spindle-worm (spin'dl-wėrm), *n.* The larva of the noctuid moth *Achatodes* (or *Gortyna*) *zeæ:* so called because it burrows into the spindle of Indian corn. See *spindle*, *n.*, 3 (*c*). [Local, U. S.]

spindling (spind'ling), *a.* and *n.* [< *spindle* + *-ing*[2].] **I.** *a.* Long and slender; disproportionately slim or spindle-like.

II. *n.* A spindling or disproportionately long and slim person or thing; a slender shoot. [Rare.]

Half-conscious of the garden-squirt,
The *spindlings* look unhappy.
Tennyson, Amphion.

spindly (spind'li), *a.* [< *spindle* + *-y*[1].] Spindle-like; disproportionately long and slender or slim. [Colloq.]



The effect of all this may be easily imagined—a *spindly* growth of rootless ideas. *Pop. Sci. Mo.*, XXXVI. 556.

spindrift (spin'drift), *n.* [A var. (simulating *spin*, go rapidly) of *spoon-drift*, q. v.] *Naut.*, the spray of salt water blown along the surface of the sea in heavy winds.

★**spine** (spīn), *n.* [< OF. *espine*, F. *épine* = Pr. Sp. *espina* = Pg. *espinha* = It. *spina*, < L. *spina*, a thorn, prickle, also the backbone; prob. for **spicna*, and akin to *spica*, a point, spike: see *spike*[1]. In the sense of 'backbone' *spine* is directly < L. *spina*. Hence *spinach, spinage, spinal, spiny, spinet, spinney*, etc.] **1.** In *bot.*, a stiff sharp-pointed process, containing more or less woody tissue, and originating in the degeneracy or modification of some organ. Usually it is a branch or the termination of a stem or branch, indurated, leafless, and attenuated to a point, as in the hawthorn, sloe, pear, and honey-locust; its nature is clearly manifest by the axillary position, and also by the fact that it sometimes produces imperfect leaves and buds. A spine may also consist of a modified leaf (all gradations being found between merely spiny-toothed leaves and leaves which are completely contracted into simple or multiple spines, as in the barberry), or of a persistent petiole, as in some species of *Astragalus* and in *Fouquieria*, or of a modified stipule, as in *Robinia*. A spine is to be distinguished from a prickle, which is merely a superficial outgrowth from the bark. See *prickle*, 1.

2. The backbone; the rachis, spina, or spinal column of a vertebrate. The name is due to the series of spinous processes of the several vertebræ which it presents, forming a ridge along the middle of the back. See *spinal column* (under *spinal*), and *vertebra, vertebral*.

3. A name of some part in various animals. (*a*) In *anat.*, a sharp process, point, or crest of bone; a spinous process, generally stouter than a styloid process: as, the *spine* of the ilium, of the ischium, of the scapula, of the pubis. See cuts under *innominatum* and *shoulder-blade*. (*b*) In *morph.*, a bony element, or pair of bony elements, which completes a segment of either the neural canal or the hemal canal of a vertebrate on the midline of the dorsal or ventral aspect of the body, the ossification intervening dorsad between a pair of neurapophyses or ventrad between a pair of hemapophyses, the former being a *neural spine*, the latter a *hemal spine*. Thus, the spinous process of a dorsal vertebra is the neural spine of that vertebra, and the segment of the sternum with which the rib of that vertebra articulates is the hemal spine of the same vertebra. *Owen*. See cuts under *dorsal, carapace*, and *endoskeleton*. (*c*) In *mammal.*, a modified hair; a sharp, stiff, hard, horny dermal outgrowth, as one of the quills of a porcupine, or of the prickles of the hedgehog or spiny ant-eater. In many animals the transition from soft fur through harsh or bristly pelage to spines is very gradual. See cuts under *Echidnidæ, Erinaceus*, and *porcupine*. (*d*) In *ornith.*, a spur or calcar, as of the wing or foot; a mucro, as of a feather. See cuts under *Palamedea, Rasores*, and *mucronate*. (*e*) In *herpet.*, a sharp, prickly scale of considerable size; a horn. See cuts under *Ceratostes* and *Phrynosoma*. (*f*) In *conch.*, any considerable sharp projection of the shell. Such spines are endlessly modified in size, shape, and site. Good examples are figured under *murex, scorpion-shell*, and *Spondylus*. (*g*) In *Crustacea*, any considerable spinous process of the carapace, of the legs, etc. Such spines are the rule with most crustaceans. The large tail-spine of some is specified as the *telson*. (*h*) In *entom.*, any comparatively short sharp projection of the chitinous body-wall of an insect. Such occur commonly upon the larvæ of *Lepidoptera*, upon the bodies of many adult *Coleoptera, Hemiptera*, and *Hymenoptera*, and upon the legs (principally upon the tibiæ) of these and nearly all *Orthoptera* and many *Neuroptera*. The body-spines of adult insects are always of great use in classification. (*i*) In *ichth.*: (1) A fin-spine; one of the unjointed and unbranched sharp bony rays of the fins, such as those the presence of which gives name to the acanthopterygian fishes; a spinous fin-ray, as distinguished from a soft ray. See *ray*[1], 7, and the formula under *radial, a*. (2) A spinous process, as of an opercular bone. (3) The spinous process of some ganoid, placoid, etc., scales. See cuts under *Echinorhinus, sand-fish, scale, sea-raven*, and *shackle-joint*. (*j*) In echinoderms, one of the movable processes which beset the exterior, as of an echinus, and are articulated with the tubercles of the body-wall. *Primary spines* are the large ones forming continuous series along the ambulacra, as distinguished from less-developed *secondary* and *tertiary spines*. Other spines are specified as *semital*. See cuts under *Cidaris, Echinometra, Echinus, semita*, and *Spatangus*. (*k*) In general, some or any hard sharp process, like a spine; a thorn; a prickle: as, the *spine* at the end of the tail of the lion or the fer-de-lance.

a, b, c, spines (followed by soft rays) of the dorsal, ventral, and anal fins of an acanthopterygian fish: *a*, ten spines; *b*, one spine; *c*, three spines.

4. In *mach.*, any longitudinal ridge; a fin. *E. H. Knight*.—**5.** In *lace-making*, a raised projection from the cordonnet: one of the varieties of pinwork; especially, one of many small points that project outward from the edge of the lace, forming a sort of fringe.—**6.** The duramen or heartwood of trees: a ship-builders' term. See *duramen*.—**Angular curvature of the spine.** See *curvature*.—**Anterior superior spine of the ilium.** See *spines of the ilium*.—**Concussion of the spine**, in theoretic strictness, a molecular lesion of the spinal cord too fine for microscopic detection, but impairing the functions of the cord, and produced by violent jarring, as in a railway accident: often applied, without discrimination, to cases which, after an accident, exhibit various nervous or spinal symptoms without any manifest gross lesion which explains them. These include cases of traumatic neurasthenia, of hemorrhage in the cord or its membranes, of displacement and fracture of vertebræ, and of muscular and ligamentous strains.—**Ethmoidal spine**, a projection of the sphenoid bone for articulation with the cribriform plate of the ethmoid.—**Hemal spine.** See def. 3 (*b*), and *hemal*.—**Interhemal spine.** See *interhemal*.—**Interneural spine.** See *interneural*.—**Lateral curvature of the spine.** See *curvature*.—**Mental external spine**, the mental protuberance of the human mandible.—**Mental spines**, the genial tubercles. See *genial*[2].—**Nasal, pharyngeal, pleural spine.** See the

adjectives.—**Palatine spine.** See (*posterior*) *nasal spine*, under *nasal*.—**Posterior superior spine of the ilium.** See *spines of the ilium*.—**Pubic spine.** See below, and *pubic*.—**Railway spine,** concussion of the spine (especially in its more vague sense) resulting from railway accident.—**Scapular spine.** Same as *spine of the scapula*.—**Sciatic spine,** the spine of the ischium.—**Semital spine.** See *semital*.—**Spine of the ischium,** a pointed triangular eminence situated a little below the middle of the posterior border of the ischium, and separating the lesser from the greater sacrosciatic notch. In man the pudic vessels and nerve wind around this spine.—**Spine of the pubis,** the pubic spine, a prominent tubercle which projects from the upper border of the pubis about an inch from the symphysis.—**Spine of the scapula,** the scapular spine, in man a prominent plate of bone separating the supraspinous and infraspinous fossæ, and terminating in the acromion.—**Spine of the sphenoid,** a projection from the lower part of the greater wing of the sphenoid, extending backward into the angle between the petrous and squamous divisions of the temporal bone. Also called *spinous process of the sphenoid*.—**Spines of the ilium,** the iliac spines. In man these are four in number: the anterior extremity of the iliac crest terminates in the *anterior superior spine*, below which and separated from it by a concavity is the *anterior inferior spine;* in a similar manner the posterior extremity of the iliac crest terminates in the *posterior superior spine*, while below it is the *posterior inferior spine*, the two being separated by a notch.—**Spines of the tibia,** a pair of processes between the two articular surfaces of the head of the tibia, in the interior of the knee-joint, to which are attached the ends of the semilunar cartilages and the crucial ligaments of the joint.—**Trochlear spine,** a small spine-like projection upon the orbital part of the frontal bone for attachment of the pulley of the superior oblique muscle of the eye.

spine-armed (spīn′ärmd), *a.* Armed with spines or spiny processes, as a murex; spinigerous.

spineback (spīn′bak), *n.* A fish of the family *Notacanthidæ*.

spine-bearer (spīn′bār″ėr), *n.* A spine-bearing caterpillar.

spine-bearing (spīn′bār″ing), *a.* Having spines; spined or spiny; spinigerous.

spinebelly (spīn′bel′i), *n.* A kind of balloon-fish, *Tetraodon lineatus*, more fully called *striped spinebelly*. See cut under *balloon-fish*.

spinebill (spīn′bil), *n.* An Australian melihagine bird, *Acanthorhynchus tenuirostris*, formerly called *slender-billed creeper*, or another of this genus, *A. superciliosus*. In both these honey-eaters the bill is slender, curved, and extremely acute. They are closely related to the members of the genus *Myzomela*, but present a totally different pattern of coloration. The first-named is widely distributed on the continent and in Tasmania; the second inhabits western and southwestern Australia.

spined (spīnd), *a.* [< *spine* + *-ed*2.] 1. Having a spine or spinal column; backboned; vertebrate.—2. Having spines; spinous or spiny: as, a *spined* caterpillar; the *spined* cicadas.—**Spined soldier-bug.** See *soldier-bug*.

spinefoot (spīn′fůt), *n.* A lizard of the genus *Acanthodactylus*, as *A. vulgaris* of northern ★Africa.

spinel (spin′el or spi-nel′), *n.* [Also *spinelle*, *espinel;* early mod. E. *spinelle;* < OF. *spinelle*, *espinelle*, F. *spinelle* = It. *spinella*, *spinel;* prob. orig. applied to a mineral with spine-shaped crystals; dim. of L. *spina*, a thorn, spine: see *spine*.] 1. A mineral of various shades of red, also blue, green, yellow, brown, and black, commonly occurring in isometric octahedrons. It has the hardness of topaz. Chemically, it consists of the oxids of magnesium and aluminium, with iron protoxid in some varieties, also chromium in the variety picotite. Clear and finely colored red varieties are highly prized as ornamental stones in jewelry. The red varieties are known as *spinel ruby* or *balas ruby*, while those of a dark-green, brown, or black color, containing iron protoxid in considerable amount, are called *ceylonite* or *pleonaste*. The valuable varieties, including the spinel ruby (see *ruby*), occur as rolled pebbles in river-channels in Ceylon, Burma, and Siam; they are often associated with the true ruby (corundum). The spinel group of minerals includes several species which may be considered as made up of equal parts of a protoxid and a sesquioxid ($RO+R_2O_3$). Here belong gahnite, magnetite, franklinite, etc. An octahedral habit characterizes them all.

> There [in the Island of Zeilam] is also founde an other kynde of Rubies, which wee caule *Spinelle* and the Indians Caropus. *R. Eden*, tr. of Antonio Pigafetta (First Books [on America, ed. Arber, p. 264).

2. A bleached yarn from which the linen tape called inkle is made. *E. H. Knight.*—**Zinc-spinel.** Same as *gahnite*.

spineless (spīn′les), *a.* [< *spine* + *-less*.] 1. Having no spine or spinal column; invertebrate. Hence—2. Having no backbone, vigor, or courage; limp; weak; nerveless.—3. Having the backbone flexible or supple.

> A whole family of Sprites, consisting of a remarkably stout father and three *spineless* sons.
> *Dickens*, Uncommercial Traveller, iv. (*Davies.*)

4. In *ichth.*, having no fin-spines; soft-finned; anacanthine; malacopterous: as, the *spineless* fishes, or *Anacanthini*.—**Spineless perch,** a pirate-perch.

spinellane (spi-nel′ān), *n.* [< *spinelle* + *-ane*.] A blue variety of nosean occurring in small crystalline masses and in minute crystals, found near Andernach on the Rhine.

spinelle (spi-nel′), *n.* See *spinel*.

spine-rayed (spīn′rād), *a.* In *ichth.*, acanthopterygian.

spinescent (spī-nes′ent), *a.* [< L. *spinescen(t-)s*, ppr. of *spinescere*, grow thorny, < *spina*, a thorn, prickle, spine: see *spine*.] 1. In *bot.*, tending to be hard and thorn-like; terminating in a spine or sharp point; armed with spines or thorns; spinose.—2. In *zoöl.*, somewhat spinous or spiny, as the fur of an animal; very coarse, harsh, or stiff, as hair; spinulous.

spinet[1]† (spin′et), *n.* [< L. *spinetum*, a thicket of thorns, < *spina*, a thorn, spine: see *spine*. Cf. OF. *spinat*, F. dial. *épinat*, a thicket of thorns; and see *spinney*.] A small wood or place where briers and thorns grow; a spinney.

> A satyr, lodged in a little *spinet*, by which her majesty and the Prince were to come, . . . advanced his head above the top of the wood. *B. Jonson*, The Satyr.

spinet[2] (spin′et or spi-net′), *n.* [Formerly also *spinnet*, *espinette;* = D. *spinet* = G. Sw. *spinett* = Dan. *spinet*, < OF. *espinette*, F. *épinette* = Sp. Pg. *espineta*, < It. *spinetta*, a spinet, or pair of virginals (said to be so called because struck with a pointed quill), < *spinetta*, a point, spigot, etc., dim. of *spina*, a thorn, < L. *spina*, a thorn: see *spine*.] A musical instrument essentially similar to the harpsichord, but of smaller size and much lighter tone. Also called *virginal* and ★*couched harp*.—**Dumb spinet.** Same as *manichord*.

spinetail (spīn′tāl), *n.* In *ornith.*: (*a*) A passerine bird of the family *Dendrocolaptidæ*, having stiff and more or less acuminate tail-feathers, much like a woodpecker's; a spine-tailed or sclerurine bird. See cuts under *saberbill* and *Sclerurus*. (*b*) A cypseline bird of the subfamily *Chæturinæ;* a spine-tailed or chæturine swift, having mucronate shafts of the tail-feathers. See *Acanthyllis*, and cut under *mucronate*. (*c*) The ruddy duck, *Erismatura rubida*. [Pennsylvania and New Jersey.]

spine-tailed (spīn′tāld), *a.* 1. In *ornith.*: (*a*) Having stiff and generally acuminate tail-feathers; dendrocolaptine; sclerurine. (*b*) Having mucronate shafts of the tail-feathers; chæturine.—2. In *herpet.*, having the tail ending in a spine, as a serpent. See *fer-de-lance*, and cuts under *Craspidocephalus* and *Cyclura*.—3. In *entom.*, having the abdomen ending in a spine or spines. The *Scoliidæ* are known as *spine-tailed wasps*, and the *Sapygidæ* have been called *parasitic spine-tailed wasps*. See cut under *Elis*.

spine-tipped (spīn′tipt), *a.* In *bot.*, tipped with or bearing at the extremity a spine, as the leaves of agave.

spin-house† (spin′hous), *n.* A place in which spinning is carried on. Also *spinning-house*. See the quotation.

> As we returned we stepp'd in to see the *Spin-house*, a kind of Bridewell, where incorrigible and lewd women are kept in discipline and labour.
> *Evelyn*, Diary, Aug. 19, 1641.

spinicerebrate (spī-ni-ser′ē-brāt), *a.* [< L. *spina*, the spine, + *cerebrum*, the brain, + *-ate*1.] Having a brain and spinal cord; cerebrospinal; myelencephalous.

spinideltoid (spī-ni-del′toid), *a.* and *n.* [< L. *spina*, the spine, + E. *deltoid*.] I. *a.* Representing that part of the human deltoid muscle which arises from the spine of the scapula, as a muscle; pertaining to the spinideltoideus.

II. *n.* The spinideltoideus.

spinideltoideus (spī″ni-del-toi′dē-us), *n.*; pl. *spinideltoidei* (-ī). [NL.: see *spinideltoid*.] A muscle of the shoulder and arm of some animals, corresponding to the spinal or mesoscapular part of the human deltoideus: it extends from the mesoscapula and metacromion to the deltoid ridge of the humerus.

spiniferite (spī-nif′ē-rīt), *n.* [< L. *spinifer*, bearing spines (see *spiniferous*), + *-ite*2.] A certain minute organism beset with spines, occurring in the Chalk flints. Their real nature is unascertained, but they have been supposed to be the gemmules of sponges.

spiniferous (spī-nif′ē-rus), *a.* [< L. *spinifer*, bearing spines, < *spina*, a thorn, spine, + *ferre* = E. *bear*1.] Bearing or provided with spines; spinous or spiny; spinigerous.

spiniform (spī′ni-fôrm), *a.* [< L. *spina*, a thorn, spine, + *forma*, form.] Having the form of a spine or thorn; spine-like. *Huxley*.

spinigerous (spī-nij′ē-rus), *a.* [< LL. *spiniger*, bearing thorns or spines, < L. *spina*, a thorn, spine, + *gerere*, bear, carry.] Bearing spines, as a hedgehog; spinose; aculeate; spiniferous.—**Spinigerous elytra,** in *entom.*, elytra each one of which has an upright sutural process, the two uniting, when the elytra are closed, to form a large spiniform process on the back, as in certain phytophagous beetles.

Spinigrada (spī-nig′rā-dä), *n. pl.* [NL., neut. pl. of *spinigradus:* see *spinigrade*.] An order of echinoderms, composed of the ophiurans and euryaleans, or the brittle-stars and gorgon's-heads. *Forbes.* [Rare.]

spinigrade (spī′ni-grād), *a.* [< NL. *spinigradus*, < L. *spina*, a thorn, spine, + *gradi*, walk, go: see *grade*1.] Moving by means of spines or spinous processes, as an echinoderm; of or pertaining to the *Spinigrada*.

spininess (spī′ni-nes), *n.* Spiny character or state. (*a*) Thorniness. (*b*†) Slenderness; slimness; lankness.

> The old men resemble grasshoppers for their cold and bloodless *spininess*. *Chapman*, Iliad, iii., Commentarius.

spinirector (spī-ni-rek′tor), *a.* and *n.* [< L. *spina*, the spine, + *rector* for NL. *erector*, q. v.] I. *a.* Erecting, extending, or straightening the spine, or spinal column: noting the set or series of muscles of the back of which the erector spinæ is the basis.

II. *n.* The erector spinæ. (See *erector*.) It corresponds to the so-called fourth layer of the muscles of the back in human anatomy. *Coues and Shute*, 1887.

spinispicule (spī-ni-spik′ūl), *n.* [< L. *spina*, a spine, + E. *spicule*.] A spiny sponge-spicule; a spiraster.

spinispirula (spī-ni-spir′ǒ-lä), *n.*; pl. *spinispirulæ* (-lē). [NL., < L. *spina*, a spine, + *spirula*, a small twisted cake, dim. of *spira*, a coil, spire: see *spire*2.] A spiny sigmaspire; a sigmoid microsclere or flesh-spicule provided with spines. Also called *spiraster*. *Sollas.*

spinispirular (spī-ni-spir′ǒ-lär), *a.* [< *spinispirula* + *-ar*3.] Spiny and slightly spiral, as a sponge-spicule; having the character of a spinispirula. *Sollas.*

spinispirulate (spī-ni-spir′ǒ-lāt), *a.* [< *spinispirula* + *-ate*1.] Same as *spinispirular*.

spinitis (spi-nī′tis), *n.* [NL., < L. *spina*, the spine, + *-itis*.] Inflammation of the spinal cord and its membranes, in the horse and other domestic quadrupeds.

spinitrapezius (spī″ni-trā-pē′zi-us), *n.*; pl. *spinitrapezii* (-ī). [NL., < L. *spina*, the spine, + NL. *trapezius*.] The spinal as distinguished from the cranial part of the trapezius muscle, forming in some animals a nearly distinct muscle.

spink[1] (spingk), *n.* [< ME. *spink*, *spynk*, *spynke* = Sw. dial. *spink*, also *spikke*, *spekke*, a sparrow (*gull-spink*, a goldfinch), = Norw. *spikke* (for **spinke*), a sparrow or other small bird; cf. Gr. σπίγγος, also σπίζα, a finch (< σπίζειν, chirp); an imitative name, like the equiv. *pink*[5], *finch*[1].] The chaffinch, *Fringilla cœlebs*. [Prov. Eng.]

> The *spink* chants sweetest in a hedge of thorns.
> *W. Harte.*

spink[2] (spingk), *n.* [Origin obscure; prob. in part a var. of *pink*[2].] The primrose, *Primula veris;* also, the lady's-smock, *Cardamine pratensis* (also *bog-spinks*), and some other plants. [Scotland.]

spinnaker (spin′ā-kėr), *n.* [Said to be < *spin*, in sense of 'go rapidly.'] A jib-headed racing-sail carried by yachts, set, when running before the wind, on the side opposite to the mainsail.

spinnel (spin′el), *n.* A dialectal variant of *spindle*.★

spinner[1] (spin′ėr), *n.* [< ME. *spinnere*, *spynner*, *spinnare* (= D. G. *spinner* = Sw. *spinnare* = Dan. *spinder*); < *spin* + *-er*1. Cf. *spider*.] 1. One who or that which spins, in any sense; one skilled in spinning. (*a*) A workman who gives shape to vessels of thin metal by means of a turning-lathe. See *spin*, *v. t.*, 8. (*b*) In *woolen-manuf.*, any thread-spinning machine; a drawing and twisting machine for making woolen threads. (*c*) A trawling fish-hook fitted with wings to make it revolve in the water; a propeller spoon-bait. (*d*) In *hat-manuf.*, a machine for finishing the exterior of a hat. It consists of a flat oval table with a face corresponding to the curve of the hat-brim.

2. A spider; especially, a spinning-spider.

> As if thou hadst borrowed legs of a *spinner* and a voice of a cricket. *B. Jonson*, Bartholomew Fair, i. 1.

3. See the quotation. [Eng.]

> I do not know whether the daddy longlegs is ever called "gin spinner"; but Jenny *Spinner* is certainly the name of a very different insect, viz. the metamorphosis of the iron-blue dun, which, according to Ronald's nomenclature, is an ephemera of the genus Cloë.
> *N. and Q.*, 7th ser., VI. 153.

4. A spinneret.—**5.** The night-jar or nightchurr, *Caprimulgus europæus:* from its cries, which may be likened to the noise of a spinning-wheel. See cut under *night-jar*. Also *wheel-bird*. Compare *reeler* in like use for another bird. [Wexford, Ireland.]—**Ring-and-traveler spinner.** Same as *ring-frame*.

spinner[2]†, *n.* [ME. *spynner;* origin obscure.] A kind of boat.

> As on Monday next after May day there come tydyngs to London, that on Thorsday before the Duke of Suffolk come unto the costes of Kent full nere slower with his ij. shepes and a litel *spynner;* the qweche *spynner* he sente with certeyn letters to certeyn of his trustid men.
> *Paston Letters*, I. 124.

spinneret (spin'ėr-et), *n.* [< *spinner*[1] + *-et.*] A part or organ concerned in the spinning of silk, gossamer, or cobweb, as of a silkworm or spider. Specifically—(*a*) One of the mammillæ of the arachnidium of a spider; one of the four, six, or eight little conical or nipple-like processes under a spider's abdomen and near its end, through which the viscid secretion of the arachnidial glands is spun out into threads of silk. Some of the spinnerets are three-jointed. See *arachnidium*. (*b*) One of the tubules of the labium of certain caterpillars, as silkworms, through which silk is spun out of the secretion of glands connected with the mouth-parts. See *sericterium*. (*c*) One of the tubules of the anal segment of certain coleopterous larvæ, as in the first larval stage (triungulin) of some blister-beetles (*Meloidæ*), through which a little silk is spun. See cut under *Sitaris*. (*d*) A like organ of any other insect.

spinnerular (spi-ner'ö-lär), *a.* [< *spinnerule* + *-ar*[3].] Entering into the formation of a spinneret, as a tubule; of or pertaining to spinnerules.

spinnerule (spin'ėr-öl), *n.* [< *spinner*[1] + *-ule.*] One of the several individual tubules which collectively form the spinneret of a spider.

spinnery (spin'ėr-i), *n.*; pl. *spinneries* (-iz). [= D. *spinnerij*, a spinning-house, = G. *spinnerei* = Sw. *spinneri* = Dan. *spinderi*, spinning, spinning-house; as *spin* + *-ery.*] A spinning-mill. *Imp. Dict.*

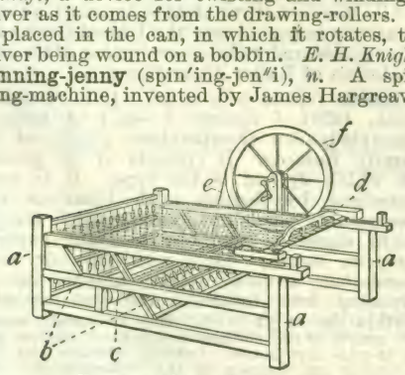
spinnet†, *n.* See *spinet*[2].

spinney, spinny[2] (spin'i), *n.* [< ME. **spineye, spenne*, < OF. *espinaye, espinoye, espinoie*, F. *épinaie*, a thicket, grove, a thorny plot, < L. *spinetum*, a thicket of thorns, < *spina*, a thorn: see *spine*. Cf. *spinet*[2].] A small wood with undergrowth; a clump of trees or shrubs; a small grove or shrubbery.

> As he sprent ouer a *spenné*, to spye the schrewe.
> *Sir Gawayne and the Green Knight* (E. E. T. S.), l. 1895.

> A land . . . covered with fine hedgerow timber, with here and there a nice little gorse or *spinney*.
> *T. Hughes*, Tom Brown at Rugby, i. 1.

★**spinning** (spin'ing), *n.* [< ME. *spynnynge;* verbal n. of *spin*, *v.*] **1.** The act of one who spins.—**2.** The process of giving shape to vessels of thin metal by means of a turning-lathe.



spinning-frame (spin'ing-frām), *n.* A machine by which cotton thread is twisted hard and firm, so as to make it suitable for the warp of cotton cloth: the invention of Richard Arkwright.

spinning-head (spin'ing-hed), *n.* An early form of spinning-machine in which the drawing and twisting mechanisms were combined in one head.

spinning-house† (spin'ing-hous), *n.* Same as *spin-house*.

spinning-jack (spin'ing-jak), *n.* In *cotton-manuf.*, a device for twisting and winding a sliver as it comes from the drawing-rollers. It is placed in the can, in which it rotates, the sliver being wound on a bobbin. *E. H. Knight.*

spinning-jenny (spin'ing-jen″i), *n.* A spinning-machine, invented by James Hargreaves

Hargreaves's Original Spinning-jenny.

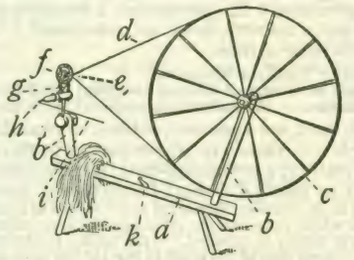
a, frame; *b*, frames supporting spindles; *c*, drum driven by the band *e* from the band-wheel *f*, and carrying separate bands (not shown) which separately drive each spindle; *d*, fluted wooden clasp which travels on wheels on the top of the frame, and in which the rovings are arranged in due order.

in 1767, which was the first to operate upon more than one thread. It has a series of vertical spindles, each of which is supplied with roving from a separate spool, and has a clasping and traversing mechanism by means of which the operator is enabled to clasp and draw out all the rovings simultaneously during the operation of twisting, and to feed the twisted threads to the spindles when winding on—the whole operation being almost exactly like hand-spinning, except that a large number of rovings are operated upon instead of a single one.

spinning-machine (spin'ing-ma-shēn″), *n.* **1.** Any machine for spinning; a mule; a spinner. Specifically—**2.** An apparatus which spins continuously, as distinguished from the intermittent action of the mule. *E. H. Knight.*

spinning-mill (spin'ing-mil), *n.* A mill or factory where thread is spun.

spinning-mite (spin'ing-mīt), *n.* Any mite or acarid of the family *Tetranychidæ;* a red-spider.

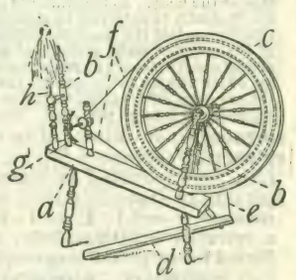


spinning-organ (spin'ing-ôr″gan), *n.* The organ or apparatus by means of which a spider or caterpillar spins silk; an arachnidium, as of a spider. See cut under *arachnidium*.

spinning-roller (spin'ing-rō″lėr), *n.* One of the iron wheels, covered with various materials—as rubber, vulcanite, paper, or felt—running in pairs in the drawing mechanism of a spinning-machine: a misnomer.

spinning-spider (spin'ing-spī″dėr), *n.* A spider which spins cobwebs; specifically, a true spider or araneid, as distinguished from any other arachnidan, whether it actually spins or not.

spinning-wart (spin'ing-wârt), *n.* A spinneret; one of the papillæ or mammillæ out of which a spider spins silk. See cut under *arachnidium*. *Gegenbaur*, Comp. Anat. (trans.), p. 291.



spinning-wheel (spin'ing-hwēl), *n.* A machine for spinning wool, cotton, or flax into threads by hand. It consists of a wheel, band, and spindle, and

Spinning-wheel for Wool.

a, bench; *b*, *b'*, standards; *c*, driving band-wheel with flat rim, turned by the peg *k* held in the right hand of the spinner; *d*, cord-band, crossed at *c* and driving the speed-pulley *f*; *g*, cord-band imparting motion to the spindle *h*; *i*, thread in process of spinning.

is driven by foot or by hand. Before the introduction of machinery for spinning there were two kinds of spinning-wheels in common use—the *large wheel* for spinning wool and cotton, and the *small* or *Saxon wheel* for spinning flax. The girdle-wheel was a spinning-wheel formerly in use, small enough to be fastened to a girdle- or apron-string, and used while standing or walking about.

Spinning-wheel for Flax.

a, bench or stool; *b*, standards; *c*, driving band-wheel grooved in its perimeter; *d*, treadle; *e*, rod which connects treadle with crank; *f*, cord-band which drives the flier-spindle; *g*, flier; *h*, distaff upon which the flax to be spun is placed, and which in use is held in the left hand of the operator.

spinny[1], *n.* See *spinney*.

spinny[2]†, *a.* [Appar. an irreg. var. of *spiny*, 3, or of *spindly*.] Thin; slender; slim; lank.

> They plow it early in the year, and then there will come some *spinny* grass that will keep it from scalding.
> *Mortimer.*

spinode (spī'nōd), *n.* [< L. *spina*, a thorn, spine, + *nodus*, a knot.] In *geom.*, a stationary point or cusp on a curve. A spinode may be conceived as resulting from the vanishing of the angle at a node between the two branches, the length of arc between them being reduced to zero, just as an inflection may be regarded as resulting from the vanishing of the interval between the two points of tangency of a bitangent, the total curvature between them at the same time vanishing. But this view in the latter case includes all the points of the inflectional tangent as points of the curve, and in the former case includes all lines through the spinode as tangents. For this reason the spinode, like the inflection, is reckoned as a distinct kind of singularity. A curve cannot, while remaining real, change continuously from having a crunode to having an acnode without passing through a form in which it has a spinode.

spinode-curve (spī'nōd-kėrv), *n.* A singularity of a surface consisting in a locus of points where tangent-planes to the curve intersect it in curves having spinodes at those points. The spinode-curve on a real surface is the boundary between a synclastic and an anticlastic region. It bears no resemblance to that singularity of a surface termed the *cuspidal curve*.

spinode-torse (spī'nōd-tôrs), *n.* That torse of which a spinode-curve is the edge of regression. It is the envelop of tangent-planes to a surface intersecting it in curves having spinodes.

spinose (spī'nōs), *a.* [< L. *spinosus*, full of thorns: see *spinous*.] Full of spines; spinous; spinigerous or spiniferous; armed with spines or thorns; of a spiny character: as, a *spinose* leaf; a *spinose* stem.—**Spinose maxillæ,** in *entom.*, maxillæ armed with spines at the apex, as in the dragon-fly.

spinosely (spī'nōs-li), *adv.* In *bot.*, in a spinose manner.

spinosity (spī-nos'i-ti), *n.*; pl. *spinosities* (-tiz). [< L. *spinosita(t-)s*, thorniness, < *spinosus*, thorny, spiny: see *spinous*.] **1.** The state of being spinous or spinose; rough, spinous, or thorny character or quality; thorniness: literally or figuratively.

> The part of Human Philosophy which is Rational . . . seemeth but a net of subtilty and *spinosity*.
> *Bacon*, Advancement of Learning, ii.

2. A thorny part or thing; something thorny or crabbed.

spinous (spī'nus), *a.* [= F. *épineux* = Sp. *espinoso* = Pg. *espinhoso* = It. *spinoso*, < L. *spinosus*, full of thorns, thorny, spiny, < *spina*, a thorn, spine: see *spine*.] **1.** In *zoöl.* and *anat.*: (*a*) Having spines; spiny; spinigerous or spiniferous. (*b*) Shaped like a spine; spiniform; having the character of a spine; sharp or pointed: as, a *spinous* process of bone. See *spinose*. —**2.** In *bot.*, same as *spinose*.—**Spinous foramen,** the foramen spinosum of the sphenoid. See under *foramen*.—**Spinous process of a vertebra,** one of the elements of most vertebræ, usually autogenous, or having its own center of ossification, forming a process, point, or plate of bone where the lateral halves of the neural arch, or neurapophyses, come together behind (in man) or above the neural arch; a neural spine. See cuts under *axis, cervical, dorsal, hypapophysis, lumbar,* and *vertebra*.—**Spinous process of the sphenoid.** See *spine of the sphenoid*, under *spine*.—**Spinous rat,** a spiny rat, in any sense. —**Spinous shark.** See *shark*[1], and *Echinorhinus* (with cut).—**Spinous spider-crab,** *Maia squinado*, the common spider-crab.

spinous-radiate (spī″nus-rā'di-āt), *a.* In *entom.*, rayed or encircled with spines.

Spinozism (spi-nō'zizm), *n.* [< *Spinoza* (see def.) + *-ism.*] The metaphysical doctrine of Baruch (afterward Benedict) de Spinoza (1632–1677), a Spanish Jew, born at Amsterdam. Spinoza's chief work, the "Ethics," is an exposition of the idea of the absolute, with a monistic theory of the correspondence between mind and matter, and applications to the philosophy of living. It is an excessively abstruse doctrine, much misunderstood, and too complicated for brief exposition. The style of the book, an imitation of Euclid's "Elements," is calculated to repel the mathematician and logician, and to carry the attention of the ordinary reader away from the real meaning, while conveying a completely false notion of the mode of thinking. Yet, while the form is pseudomathematical, the thought itself is truly mathematical. The main principle is, indeed, an anticipation in a generalized form of the modern geometrical conception of the absolute, especially as this appears in the hyperbolic geometry, where the point and plane manifolds have a correspondence similar to that between Spinoza's worlds of extension and thought. Spinoza is described as a pantheist; he identifies God and Nature, but does not mean by Nature what is ordinarily meant. Some sayings of Spinoza are frequently quoted in literature. One of these is *omnis determinatio est negatio*, "all specification involves exclusion"; another is that matters must be considered *sub specie æternitatis*, "under their essential aspects."

Spinozist (spi-nō'zist), *n.* [< *Spinoza* + *-ist.*] A follower of Spinoza.

Spinozistic (spi-nō-zis'tik), *a.* [< *Spinozist* + *-ic.*] Of, pertaining to, or characteristic of Spinoza or his followers: as, the *Spinozistic* school; *Spinozistic* pantheism.

spinster (spin'stėr), *n.* [< ME. *spinster, spynstare, spinnestere, spynnester* (= D. *spinster*), with suffix *-estre* (E. *-ster*), < AS. *spinnan*, spin: see *spin*.] **1.** A woman who spins; by extension, any person who spins; a spinner.

> My wif was a webbe and wollen cloth made.
> Hu spak to the *spynnesters* to spynnen hit oute.
> *Piers Plowman* (C), vii. 222.

> The silkworm is
> Only man's *spinster*.
> *Randolph*, Muses' Looking-Glass, iv. 1.

> Let the three housewifely *spinsters* of destiny rather curtail the thread of thy life.
> *Dekker*, Gull's Hornbook, p. 83.

2. An unmarried woman (so called because she was supposed to occupy herself with spinning): the legal designation in England of all unmarried women from a viscount's daughter downward; popularly, an elderly unmarried woman; an "old maid": sometimes used adjectively.

> I, Anthony Lumpkin, Esquire, of Blank place, refuse you, Constantia Neville, *spinster*, of no place at all.
> *Goldsmith*, She Stoops to Conquer, v. 1.

O, that I should live to hear myself called *Spinster!*
Sheridan, The Rivals, v. 1.

Here the *spinster* aunt uttered a loud shriek, and became senseless. *Dickens*, Pickwick, x.

3†. A woman of an evil life or character: so called from being forced to spin in the house of correction. See *spin-house*.

We are no *spinsters;* nor, if you look upon us,
So wretched as you take us.
Fletcher (*and another* ?), Prophetess, iii. 1.

spinsterdom (spin'stėr-dum), *n.* [< *spinster* + *-dom.*] Spinsters or "old maids" collectively. *G. Meredith*, Manfred, ii. 2. [Rare.]

spinsterhood (spin'stėr-hůd), *n.* [< *spinster* + *-hood.*] The state of being a spinster; unmarried life or state.

spinstership (spin'stėr-ship), *n.* [< *spinster* + *-ship.*] Spinsterhood. *Southey*.

spinstress (spin'stres), *n.* [< *spinster* + *-ess.*] A woman who spins, or whose occupation is spinning; a spinster.

Let meaner souls by virtue be cajoled,
As the good Grecian *spinstress* [Penelope] was of old.
Tom Brown, Works, IV. 10. (*Davies.*)

spinstry† (spin'stri), *n.* [< *spinster* + *-y*[3] (cf. *-ery*).] The work or occupation of spinning; spinning.

What new decency can be added to this your *spinstry?*
Milton, Church-Government, ii. 2.

spintext (spin'tekst), *n.* [< *spin*, *v.*, + obj. *text.*] One who spins out long dreary discourses; a prosy preacher.

The race of formal *spintexts* and solemn saygraces is nearly extinct. *V. Knox*, Winter Evenings, ix.

spinthere (spin'thēr), *n.* [= F. *spinthère*, < Gr. *σπινθήρ*, a spark.] A greenish-gray variety of sphene or titanite.

spintry† (spin'tri), *n.* [< L. *spintria*, *sphintria*, a male prostitute.] A male prostitute. [Rare.]

Ravished hence, like captives, and, in sight
Of their most grieved parents, dealt away
Unto his *spintries*, sellaries, and slaves.
B. Jonson, Sejanus, iv. 5.

spinula (spin'ū-lą), *n.*; pl. *spinulæ* (-lē). [NL., < L. *spinula*, dim. of *spina*, a spine: see *spine*.] In *entom.*, a minute spine or hook. Specifically — (*a*) One of the little hooks bordering the anterior edge of the lower wing in most *Hymenoptera:* same as *hamulus*, 1 (*d*). (*b*) One of the bristles forming the strigilis.

spinulate (spin'ū-lāt), *a.* [< *spinula* + *-ate*[1].] In *zoöl.*, covered with little spines.—**Spinulate hairs**, hairs emitting minute rigid branches or spinules: such hairs cover many lepidopterous insects.

spinulated (spin'ū-lā-ted), *a.* [< *spinulate* + *-ed*[2].] Same as *spinulate*.

spinule (spin'ūl), *n.* [< L. *spinula*, dim. of *spina*, a thorn, spine: see *spine*.] A small spine; a spicule.

spinulescent (spin-ū-les'ent), *a.* [< *spinule* + *-escent.*] In *bot.*, producing diminutive spines; somewhat spiny or thorny.

spinuliferous (spin-ū-lif'e-rus), *a.* [< L. *spinula*, a spinule, + *ferre* = E. *bear*[1].] In *bot.*, same as *spinulose*.

spinulose (spin'ū-lōs), *a.* [< NL. *spinulosus:* see *spinulous*.] In *bot.* and *zoöl.*, furnished with spinules or diminutive spines.

I have never seen any prominent spine upon the posterior elevation, though it is sometimes minutely *spinulose*.
Huxley, Crayfish, p. 234.

spinulous (spin'ū-lus), *a.* [< NL. *spinulosus*, < L. *spinula*, a spinule: see *spinule*.] Same as *spinulose*.

spinus (spī'nus), *n.* [NL., < Gr. *σπίνος*, a bird of the finch kind; cf. *spink*.] **1†.** An old name of some small bird which feeds on seeds, as a thistle-bird, linnet, siskin, or bunting. Hence — **2.** [*cap.*] A genus of thistle-birds named by Koch in 1816, containing the linnet, the siskin or aberdevine, the goldfinch, the redpoll, and others, both of Europe and of America. In present usage, the siskin is *Spinus spinus*, the pine-finch is *S. pinus*, the goldfinch of Europe is *S. carduelis*, that of America is *S. tristis*, etc. The name wavers in application, and is more or less inexactly synonymous with several others, as *Acanthis*, *Carduelis*, *Chrysomitris*, *Astragalinus*, *Ægiothus*, *Linaria*, *Linota*, etc. See cuts under *siskin* and *goldfinch*.

spiny (spī'ni), *a.* [< *spine* + *-y*[1].] **1.** Having thorns or spines; full of spines; thorny; prickly. — **2.** Figuratively, thorny; perplexed; difficult; troublesome.

The *spiny* desarts of scholastick philosophy.
Warburton, On Prophecy, p. 61. (*Latham.*)

3†. Thin; slim; slender.

As in well grown woods, on trees, cold *spiny* grasshoppers
Sit chirping. *Chapman*, Iliad, iii. 161.

Faith, thou art such a *spiny* bald-rib, all the mistresses in the town will never get thee up.
Middleton, Mayor of Queenborough, iii. 3.

Spiny calamary, a cephalopod of the genus *Acanthoteuthis*. *P. P. Carpenter.* — **Spiny crab**, a crab whose carapace is spiny, or has spinous processes; a spider-crab or maioid. See cut under *Oxyrhyncha*. — **Spiny fish**, a spiny-finned or acanthopterygian fish. — **Spiny lobster**. See *lobster*. — **Spiny rat**, one of sundry small rat-like rodents whose pelage is more or less spiny. (*a*) One of the South American species of *Echimys* and *Loncheres* or *Nelomys*. See cut under *Echimys*. (*b*) One of several pouched rats of the genus *Heteromys*.

★**spiny-eel** (spī'ni-ēl), *n.* See *Mastacembelidæ*.

spiny-finned (spī'ni-find), *a.* In *ichth.*, having spinous fin-rays; spine-finned; acanthopterygious.

spiny-skinned (spī'ni-skind), *a.* Echinodermatous.

spion† (spī'on), *n.* [Early mod. E. also *spyon;* = D. G. Sw. Dan. *spion*, < OF. (and F.) *espion*, a spy: see *spy*. Cf. *espionage*.] A spy.

Captaine of the *Spyons*.
Heywood, Four Prentises of London (Works, 1874, II. 242).

spirt†, *v.* An obsolete form of *speer*[1].

spira (spī'rą), *n.*; pl. *spiræ* (-rē). [L., the base of a column, a spire: see *spire*[2].] In *arch.*, the moldings at the base of a column; a torus. Such a molding or moldings are not present in the Greek Doric order of architecture, but the feature is constant in all varieties of the Ionic and Corinthian. See cuts under *base*[1], 3.

spirable† (spīr'ą-bl), *a.* [< L. *spirabilis*, that may be breathed, respirable, < *spirare*, breathe, blow: see *spire*[3].] Capable of being breathed; respirable.

The *spirable* odor and pestilent steame ascending from it put him out of his bias of congruity.
Nashe, Lenten Stuffe (Harl. Misc., VI. 173). (*Davies.*)

★**spiracle** (spir' or spīr'ą-kl), *n.* [< ME. *spyrakle*, < OF. *spiracle*, vernacularly *spirail*, *espirail* = It. *spiracolo*, < L. *spiraculum*, a breathing-hole, air-hole, < *spirare*, breathe: see *spire*[3].] **1.** An aperture or orifice.

And after XL dayes this *spiracle*
Is uppe to close, and whenne the [you] list, it [the wine] drinke. *Palladius*, Husbondrie (E. E. T. S.), p. 202.

2. In *zoöl.*, an aperture, orifice, or vent through which air, vapor, or water passes in the act of respiration; a breathing-hole; a spiraculum: applied to many different formations. Specifically — (*a*) In *Mammalia*, the nostril or blow-hole of a cetacean, as the whale, porpoise, etc., through which air, mixed with spray or water, is expelled. (*b*) In *ichth.*: (1) An aperture on the upper side of the head, in front of the suspensorium of the lower jaw, observed in many fishes, as selachians and ganoids. This is the external opening of the hyomandibular cleft, or persistent first postoral visceral cleft, of the embryo. (2) The single nostril of the monorhine vertebrates, or myzonts — the lampreys and hags. (*c*) In *entom.*, a breathing-hole; the external orifice of one of the tracheæ or windpipes of an arachnidan or myriapod, opening in the side of the body. In true insects (*Hexapoda*) the spiracles are typically twenty-two in number, a pair (one on each side) for each of the three thoracic segments, and for each of the anterior eight abdominal segments; but they are almost always lacking on some one or more of these. They are either simple openings into the respiratory system, or are provided with valves, sieves, or fringes of hair for the exclusion of foreign particles. See cut under *Systæchus*.

spiracula[1], *n.* Plural of *spiraculum*.

spiracula[2] (spī-rak'ū-lą), *n.*; pl. *spiraculæ* (-lē). [NL.: see *spiracle*.] In *entom.*, same as *spiracle*.

spiracular (spī-rak'ū-lär), *a.* and *n.* [< *spiraculum* + *-ar*[3].] **I.** *a.* **1.** Of or pertaining to a spiracle, breathing-hole, or blow-hole. — **2.** Fitted for or permitting respiration, as a spiracle; respiratory. — **Spiracular arch**, in *ichth.*, one of the visceral arches of some fishes, between the mandibular and hyomandibular arches, in special relation with the spiracular cleft and spiracle. — **Spiracular cleft**, in *ichth.*, the hyomandibular cleft: so called from its relations to the spiracle in certain fishes, as all selachians and various ganoids. See *spiracle*, 2 (*b*) (1). — **Spiracular gill**, a false gill, or pseudobranch. — **Spiracular respiration**, a breathing through spiracles, as in the tracheal respiration of many insects.

II. *n.* A small bone or cartilage in special relation with the spiracle of some fishes.

A series of small ossicles, of which two may be distinguished as *spiraculars*. *Encyc. Brit.*, XII. 648.

spiraculate (spī-rak'ū-lāt), *a.* [< *spiraculum* + *-ate*[1].] Provided with a spiracle.

spiraculiferous (spī-rak-ū-lif'e-rus), *a.* [< L. *spiraculum*, a breathing-hole, + *ferre* = E. *bear*[1].] In *entom.*, bearing a spiracle or breathing-pore: said of segments in which these organs are visible. See cut under *Systæchus*. *Westwood*.

spiraculiform (spī-rak'ū-li-fôrm), *a.* [< L. *spiraculum*, a breathing-hole, + *forma*, form.] In *entom.*, having the structure, form, or appearance of a spiracle; stigmatiform.

spiraculum (spī-rak'ū-lum), *n.*; pl. *spiracula* (-lą). [L.: see *spiracle*.] **1.** A spiracle, in any sense. — **2.** A breathing-hole in the aventaile, beaver, or mesail of a helmet.

spiræ, *n.* Plural of *spira*.

★**Spiræa** (spī-rē'ą), *n.* [NL. (Tournefort, 1700), < L. *spiræa*, < Gr. *σπειραία*, meadow-sweet, so called from the shape of its follicles, < *σπείρα*, a coil, spire: see *spire*[2].] **1.** A genus of rosaceous plants, type of the *Spiræeæ*. It is characterized by fruit commonly of five follicles, containing usually numerous linear seeds with a membranous or rarely coriaceous outer seed-coat and little or no albumen. The flowers have four or five calyx-lobes, as many rounded petals, twenty to sixty filiform stamens, and a smooth or woolly fleshy disk. The Himalayan *S. gracilis* is an exception in its solitary seeds and obconical calyx. There are about 60 species, widely scattered through temperate and cold regions of the northern hemisphere, and occurring rarely on mountains within the tropics. They are herbs or shrubs, bearing alternate simple pinnate or ternately compound leaves, usually furnished with free or wing-like and united stipules. The small white, pink, or rose-colored flowers form a copious axillary or terminal inflorescence, which is either a raceme, cyme, panicle, or corymb. Most of the species are highly ornamental in flower. They are now most commonly known, especially in cultivation, by the generic name *Spiræa*. Several species are natives of Europe, 1 of which occurs in England; *S. salicifolia* is known as *meadow-sweet*, also as *queen-of-the-meadows*, which see. Four species are natives of the northeastern United States, of which *S. salicifolia* is the most widely distributed, a shrub with slender ascending spire-like branches, popularly known in the west as *steeplebush*, in America usually with white flowers, in Europe, Siberia, Mongolia, and Japan pink or rose-colored. It is often cultivated, especially in Russia, where a great many varieties have originated; in Wales it forms a large part of the hedges. For *S. tomentosa*, a similar pink-flowered eastern species, see *hardhack;* its representative on the Pacific coast, *S. Douglasii*, with handsome whitened leaves, is one of the most showy of American shrubs. *S. corymbosa* and *S. Virginiana* are species confined to the Eastern States, occurring from New Jersey southward to Georgia and Tennessee. For *S. hypericifolia*, common in cultivation from Europe and Siberia, and also called *Italian may* and *St. Peter's wreath*, see *bridal-wreath*, 1. Several species from Japan are now abundant in ornamental grounds, as *S. Japonica* with its varieties, and *S. prunifolia*, the plum-leafed spiræa, a white-flowered shrub with handsome silky leaves. *S. Thunbergii* from Japan is much used in parks, forming a small diffuse shrub 2 or 3 feet high with light recurving branches whitened before the leaves with a profusion of small flowers usually in threes in the axils. *S. Japonica* also occurs as an escape from cultivation in eastern Pennsylvania. Some Asiatic species with pinnate leaves and large terminal panicles of white flowers are arborescent, as *S. Camchatica*, with the panicles very large, the flowers fragrant and feathery. Varieties of the widely distributed *S. chamædryfolia* are also frequent in cultivation. Many species possess moderate astringent or tonic properties; the roots of the British species are so used, and the flowers of *S. hypericifolia*. *S. tomentosa*, the principal American medicinal species, a plant of bitter and astringent taste, is used in New England and also formerly by the Indians as a tonic.

Flowering Branch of Hardhack (*Spiræa tomentosa*).
a, flower; *b*, fruit; *c*, leaf.

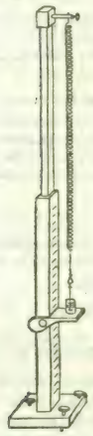
2. [*l. c.*] (*a*) A plant of this genus. (*b*) The white-flowered shrub *Astilbe Japonica*, now extensively imported into the United States and propagated under glass, forming one of the chief materials of Easter decorations.

Spiræeæ (spī-rē'ē-ē), *n. pl.* [NL. (Reichenbach, 1828), < *Spiræa* + *-eæ.*] A tribe of dicotyledonous choripetalous plants, of the family *Rosaceæ*. It consists of 10 genera, of which *Spiræa* is the type. It is characterized by flowers with bractless and commonly persistent calyx-lobes, ten or more stamens, from one to eight superior carpels, usually each with two or more pendulous ovules, either indehiscent or ripening into follicles, and not included within the calyx-tube. They are usually shrubs, all natives of the northern hemisphere; *Spiræa* only is of wide distribution. *Icotorus*, *Aruncus*, and *Porteranthus* are common in the United States. The scope of the tribe has varied greatly with different authors.

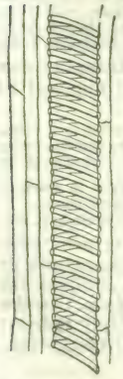
spiræic (spī-rē'ik), *a.* [< NL. *Spiræa* + *-ic.*] **1.** Pertaining to or derived from *Spiræa*. — **2†.** Same as *salicylic*.

★**spiral** (spī'rąl), *a.* and *n.* [< F. *spiral* = Sp. Pg. *espiral* = It. *spirale* = D. *spiraal* = G. Sw. Dan. *spiral*, < ML. *spiralis*, spiral (*linea spiralis*,

a spiral line, a spiral), < L. *spira*, a coil, spire: see *spire*[2].] **I.** *a.* **1.** Of or pertaining to a spire or coil; like a spire; pointed or shaped like a spire.—**2.** Winding around a fixed point or center, and continually receding from it, like a watchspring; specifically, in *conch.*, making a number of turns about the columella or axis of the shell; whorled. The whorls may be in one plane, producing the flat or discoid shell, or oftener wound into a spire, resulting in the ordinary turreted form. Compare cuts under *Planorbis* and *Limnæa*, and see *spire*[2], 2.



Flat Spiral of an Ammonite (*Ammonites bifrons*).



3. Winding and at the same time rising or advancing like a screw-thread: more accurately *helical* or *helicoidal*.

> Where upward, in the mellow blush of day,
> The noisy bittern wheeled his *spiral* way.
> *Longfellow*, Sunrise on the Hills.

Spiral axis. See *axis*[1].—**Spiral balance**, a form of balance in which the weight of the body under examination is measured by the stretching (torsion) of an elastic wire in the form of a long spiral. A common use of the simple form of spiral balance (see cut) is in determining the specific gravity of small fragments of minerals, which for this purpose are weighed first in the upper pan and then in that below, which is immersed in water.—**Spiral canal of the cochlea, of the modiolus.** See *canal*[1], and cut under *ear*[1].—**Spiral duct**, in *bot.*, same as *spiral vessel*.—**Spiral fracture**, a fracture of bone due to torsion, so that the broken ends have a more or less screw-like appearance.—**Spiral gearing.** See *gearing*.—**Spiral layer**, the middle one of the three layers or coats of the tracheal wall in insects. See *tænidium* and *trachea*.—**Spiral ligament of the cochlea**, the spiral ridge at the outer insertion of the basilar membrane: it is prismatic, or triangular in section.—**Spiral line**, the line connecting the radii or radiating lines of a geometrical spider's web, and forming a continuous spiral from the circumference nearly to the center. It is formed after the radii have been put in place.—**Spiral nebula, phyllotaxis, plexus.** See the nouns.—**Spiral point.** See *spire*[2], 3.—**Spiral pteropods**, the *Limacinidæ*.—**Spiral pump**, a form of the Archimedean screw water-elevator. See *Archimedean screw*, under *Archimedean*.—**Spiral screw.** See *screw*[1].—**Spiral space**, the area bounded at its two ends by successive parts of the same radius vector, and within and without by successive parts of the same spiral.—**Spiral spring.** See *spring*.—**Spiral valve**, in *ichth.*, a continuous fold or ridge of mucous membrane which winds spirally about the interior of the intestine of some fishes, as ganoids.—**Spiral vessel**, in *bot.*, a vessel which is usually long, with fusiform extremities, and has the walls thickened in a spiral manner with one or more simple or branched bands or fibers. In most cases the direction of the spiral is from right to left, but it frequently happens that the earlier formed spirals run in one direction, while those formed later run in an opposite direction. See *tissue*, *vessel*.—**Spiral wheels**, in *mach.* See *wheel*.

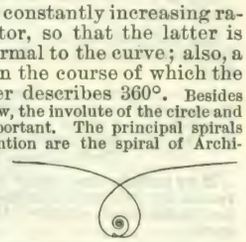
Spiral Vessels or Ducts of *Erballium Elaterium*.



II. *n.* **1.** In *geom.*, a plane curve which runs continuously round and round a fixed point, called the center, with constantly increasing radius vector, so that the latter is never normal to the curve; also, a part of such a curve in the course of which the radius from the center describes 360°. Besides the spirals mentioned below, the involute of the circle and the cycloides are very important. The principal spirals which have received attention are the spiral of Archimedes (usually understood to have been discovered by Conon the Samian), the radius of which increases uniformly with the angle; the hyperbolic spiral, whose radius vector is inversely proportional to the angle; the lituus, the square of whose radius vector is inversely proportional to the angle; and the logarithmic spiral, whose angle is proportional to the logarithm of the radius vector.

2. A helix or curve which winds round a cylinder like a screw.—**3.** A spiral spring.—**4.** In wool, one of the curls or convolutions in wool-fiber, the number of which in a unit of length is made the basis of an estimate of its quality for manufacturing.—**5.** In *zoöl.* and *anat.*, a spiral formation, as of a univalve, of the cochlea, etc.—**Airy's spirals**, the peculiar colored interference figures seen when two sections of quartz, one of a right-handed the other of a left-handed crystal, both cut transverse to the vertical axis, are placed one over the other, and viewed in converging polarized light.—**Curschmann's spirals**, in *pathol.*, bodies formed of spirally wound mucous threads with often a fine shining central thread. They seem to be casts of small bronchi, and are expectorated in asthma and certain forms of bronchitis.—**Double, equiangular, logarithmic, loxodromic spiral.** See the adjectives.—**Logistic spiral.** Same as *logarithmic spiral* (which see, under *logarithmic*).—**Norwich spiral**, that second involute of the circle whose apse is midway between the cusp of the first involute and the center of the circle: so called because first shown by Sylvester at the meeting of the British Association at Norwich in 1868.

★—**Parabolic spiral.** See *parabolic*[2], and cut above.

spiral (spī′ral), *v. t.*; pret. and pp. *spiraled*, *spiralled*, ppr. *spiraling*, *spiralling*. [< *spiral*, *n.*] To make spiral; cause to move spirally.

> The teeth of the cutter should be made to run slightly *spiralled*. *Joshua Rose*, Practical Machinist, p. 346.

spirality (spī-ral′i-ti), *n.* [< *spiral* + *-ity*.] Spiral character or quality. *Science*, III. 583.

spirally (spī′ral-i), *adv.* In the form or manner of a spiral.

spiral-tail (spī′ral-tāl), *n.* The royal or king bird of paradise, *Cincinnurus regius*: so called from the spiral coil at the end of the middle tail-feathers. See cut under *Cincinnurus*.

spiramentt, *n.* [< L. *spiramentum*, a breathing-hole, air-hole, < *spirare*, breathe: see *spire*[3].] A spiracle. *Rev. T. Adams*, Works, I. 78.

spirant (spī′rant), *n.* [< L. *spiran(t-)s*, ppr. of *spirare*, breathe, blow, exhale: see *spire*[3].] A consonant uttered with perceptible blowing, or expulsion of breath; an alphabetic sound in the utterance of which the organs are brought near together but not wholly closed; a rustling, or fricative, or continuable consonant. The term is by some restricted to sounds of the grade of *v* and *f*, the *th* of *thin* and that of *thine*, and the German *ch*; others make it include also the sibilants; others, the semivowels *w* and *y*.

Spiranthes (spī-ran′thēz), *n.* [NL. (Richard, 1818), so called in allusion to the spiral arrangement of the flowers; < Gr. σπεῖρα, a coil, spire, + ἄνθος, flower.] Richard's name (1818) for *Gyrostachis*, a genus of orchids, tribe *Neottieæ*. It is characterized by commonly spirally ranked and somewhat ringent flowers with the upper sepal and the two petals erect or connivent and galeate, and the lateral sepals set obliquely on the ovary or long-decurrent, and by a column not prolonged into a free appendage, but usually decurrent on the ovary. There are about 80 species, widely dispersed through temperate and tropical regions of both hemispheres. They are terrestrial herbs from a short rootstock or a cluster of fleshy fibers or thickened tubers. Many species produce small white or greenish fragrant flowers, in several spirals forming a dense spike; in some the spike is reduced to a single spiral or becomes straight and unilateral. The flowers are commonly small, but reach a large size in some tropical American species. The leaves are usually narrow. Nine species are natives of the northeastern United States, all late-flowering and some of them then leafless. They are known as *lady's-tresses*, *Gyrostachis cernua* also locally as *wild tuberose*, and *G. gracilis* as *corkscrew-plant*.

spiranthic (spī-ran′thik), *a.* [< *spiranth-y* + *-ic*.] Of the nature of or affected with spiranthy.

spiranthy (spī-ran′thi), *n.* [< Gr. σπεῖρα, a coil, spire (see *spire*[2]), + ἄνθος, a flower.] In *bot.*, the abnormal dislocation of the organs of a flower in a spiral direction. Thus, Masters describes a curious flower of *Cypripedium insigne*, in which a displacement occurred by a spiral torsion proceeding from right to left, which involved the complete or partial suppression of the organs of the flower. Also spelled *speiranthy*.

spiraster (spī-ras′tėr), *n.* [NL., < Gr. σπεῖρα, a coil, spire, + ἀστήρ, a star.] In sponges, an irregular polyact spicule in the form of a stout spiral with thick spines; a spinispirula. When these spines or rays are terminal, the spicule is called an *amphiaster*. *Sollas*.

Spirastrosa (spir-as-trō′sȧ), *n. pl.* [NL.: see *spirastrose*.] In Sollas's classification of sponges, a group of choristidan tetractinellidan sponges, generally provided with spirasters.

spirastrose (spī-ras′trōs), *a.* [< *spiraster* + *-ose* (see *-ous*).] Having microscleres or flesh-spicules in the form of spirasters; of or pertaining to the *Spirastrosa*: distinguished from *sterrastrose*.

spirated (spī′rā-ted), *a.* [< *spire*[2] + *-ate*[1] + *-ed*[2].] Formed into or like a spiral; twisted like a corkscrew. See cut under *sasin*. [Rare.]

> The males of this species [*Antilope bezoartica*] have long, straight, *spirated* horns nearly parallel to each other, and directed backward. *Darwin*, Descent of Man, II. 235.

spiration (spī-rā′shon), *n.* [< LL. *spiratio(n-)*, a breathing, < L. *spirare*, pp. *spiratus*, breathe, blow, exhale: see *spire*[3].] **1.** A breathing.

> God did by a kind of *spiration* produce them.
> *Barrow*, Sermons, II. xxxiv.

2. In *theol.*, the act by which the procession of the Holy Ghost is held to take place; also, the relation or notion so constituted.

spire[1] (spīr), *n.* [Also *spear* (formerly also *speer*), now commonly associated with *spear*[1]; < ME. *spire*, *spyre*, *spir*, < AS. *spīr*, a stalk, = MLG. *spir*, LG. *spier*, a point, needle, sprout, = G. *spier*, a needle, pointer, *spiere*, a spar, = Icel. *spira*, a spar, stilt, a kind of beaker, = Sw. *spira*, a spar, scepter, pistil, = Dan. *spire*, a spar, germ, shoot, *spir*, a spar, spire (in arch.); perhaps connected with *spike*[1] and *spine*, or with *spear*[1].] **1.** A sprout or shoot of a plant.

> An ook comth of a litel *spire*. *Chaucer*, Troilus, ii. 1335.

2. A stalk of grass or some similar plant; a spear.

> Shal neuere *spir* springen vp.
> *Piers Plowman* (C), xiii. 180.

> Pointed *Spires* of Flax, when green,
> Will Ink supply, and Letters mark unseen.
> *Congreve*, tr. of Ovid's Art of Love.

3. The continuation of the trunk in a more or less excurrent tree above the point where branching begins.

> No tops to be received, except the *spire* and such other top or limb as may be grown on the main piece [British oak for navy contracts]. *Laslett*, Timber, p. 72.

4. A name of various tall grasses, as the marram, *Ammophila arenaria*; the reed canary-grass, *Phalaris arundinacea*; and the common reed, *Trichoon Phragmites*. *Britten and Holland*. [Prov. Eng.]—**5.** In *mining*, the tube carrying the train to the charge in the blast-hole: so called from the spires of grass or rushes used for the purpose. Also called *reed* or *rush*.—**6.** A body that shoots up to a point; a tapering body; a conical or pyramidal body; specifically, in *arch.*, the tapering part of a steeple rising above the tower; a steeple; the great pinnacle, often of wood covered with lead, frequently crowning the crossing of the nave in large churches. The earliest spires, in the architectural sense, were merely pyramidal or conical roofs, specimens of which exist in some of the oldest Romanesque buildings. These roofs, becoming gradually elongated and more and more acute, resulted at length in the graceful tapering spire. Among the many existing medieval examples, that of Salisbury Cathedral is one of the finest; that of Senlis Cathedral, France, though not of great size, is one of the earliest of fully developed spires, and is admired for the purity and elegance of its design. The spires of medieval architecture are generally square, octagonal, or circular in plan; they are sometimes solid, more frequently hollow, and are variously ornamented with bands encircling them, with panels more or less enriched, and with piercings and spire-lights, which are of infinite variety. Their angles are sometimes crocketed, and they are often terminated by a finial. In later examples the general pyramidal outline is obtained by diminishing the diameter of the structure in successive stages, and this has been imitated in modern spires, in which the forms and details of classic architecture have been applied to an architectural creation essentially medieval. The term *spire* is sometimes restricted to signify such tapering structures, crowning towers or turrets, as have parapets at their base, while when the spire rises from the exterior of the wall of the tower, without the intervention of a parapet, it is called a *broach*. See also cuts under *broach*, 10, *rood-steeple*, and *transept*.

7. The top or uppermost point of a thing; the summit.

> To silence that
> Which, to the *spire* and top of praises vouch'd,
> Would seem but modest. *Shak.*, Cor., i. 9. 24.

spire[1] (spīr), *v.*; pret. and pp. *spired*, ppr. *spiring*. [< ME. *spiren*, *spyren* (= Dan. *spire* = Sw. *spira*, germinate); < *spire*[1], *n.*] **I.** *intrans.* **1.** To sprout, as grain in malting.—**2.** To shoot; shoot up sharply.

> Yon cypress *spiring* high,
> With pine and cedar spreading wide
> Their darksome boughs on either side.
> *Wordsworth*, White Doe of Rylstone, iv.

II. *trans.* **1†.** To shoot or send forth.

In gentle Ladies breste and bounteous race
Of woman kind it fayrest Flowre doth *spyre*.
Spenser, F. Q., III. v. 52.

2. To furnish with a spire or spires.

Like rampired walls the houses lean,
All *spired* and domed and turreted,
Sheer to the valley's darkling green.
W. E. Henley, From a Window in Princes Street.

spire[2] (spīr), *n.* [< F. *spire* = Sp. Pg. *espira* = It. *spira*, < L. *spira*, < Gr. σπεῖρα, a coil, twist, wreath, spire, also a tore or anchor-ring. Cf. Gr. σπυρίς, a woven basket, L. *sporta*, a woven basket, Lith. *spartas*, a band. Hence *spiral*, etc.] **1.** A winding line like the thread of a screw; anything wreathed or contorted; a coil; a curl; a twist; a wreath; a spiral.

His head . . .
With burnish'd neck of verdant gold erect
Amidst his circling *spires*, that on the grass
Floated redundant. *Milton*, P. L., ix. 502.

2. In *conch.*, all the whorls of a spiral univalve above the aperture or the body-whorl, taken together as forming a turret. In most cases the spire is exserted from the last turn of the shell, giving the ordinary turreted conical or helicoid form of numberless gastropods; and in some long slender forms, of many turns and with small aperture, the spire makes most of the length of the shell, as figured at *Cerithium*, *Cylindrella*, and *Terebra*, for example. In other cases, however, the spire scarcely protrudes from the body-whorl, and it may be even entirely included or contained in the latter, so that a depression or other formation occupies the usual position of the apex of the shell. (Compare cuts under *cowry*, *Cypræa*, *Cymbium*, and *Ovulum*.) See also cut under *univalve*.

a, Spire of a Univalve (*Imbricaria conica*).

3. In *math.*, a point at which different leaves of a Riemann's surface are connected. Also called a *spiral point*.

spire[3]† (spīr), *v. i.* [= OF. *spirer*, *espirer*, *esperer* = Sp. Pg. *espirar* = It. *spirare*, < L. *spirare*, breathe. Hence ult. *spirit*, etc., and *aspire*, *conspire*, *expire*, *inspire*, *perspire*, *respire*, *transpire*.] To breathe.

But see, a happy Borean blast did *spire*
From faire Pelorus parts, which brought us right.
Vicars, tr. of Virgil (1632). (*Nares*.)

spire[4]†, *v.* A Middle English form of *speer*[1].

spire[5] (spīr), *n.* [Cf. *spire*[1].] The male of the red deer, *Cervus elaphus*, in its third year.

A *spire* [has] brow [antler] and uprights.
W. W. Greener, The Gun, p. 510.

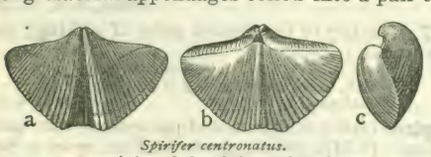
spire-bearer (spīr′bār″ėr), *n.* In *conch.*, a spirifer.

spired[1] (spīrd), *a.* [< *spire*[1] + *-ed*[2].] Having a spire.

And Baal's *spired* Stone to Dust was ground.
Cowley, Davideis, ii.

spired[2] (spīrd), *a.* [< *spire*[2] + *-ed*[2].] In *conch.*, having a spire, as a univalve shell; spiriferous; turreted.

spire-light (spīr′līt), *n.* A window or opening of any kind for light in a spire.



spire-steeple (spīr′stē″pl), *n.* A spire considered as part of a steeple; a spire. [Rare.]

spiric (spī′rik), *a.* and *n.* [< Gr. σπειρικός, spiric, < σπεῖρα, a tore, < σπείρειν, sweep round.] **I.** *a.* Pertaining to or in the form of a tore or anchor-ring.—**Spiric body**, a tore.—**Spiric line**. See *line*[2].

II. *n.* A curve, the plane section of a tore. Such curves, which are bicircular quartics, were treated by the ancient geometers Eudoxus and Perseus.

spiricle (spir′i-kl), *n.* [< NL. **spiricula*, dim. of L. *spira*, a spire: see *spire*[2].] In *bot.*, one of the delicate coiled threads in the hairs on the surface of certain seeds and fruits, which uncoil when wet. They probably serve in fixing small and light seeds to the soil, in order that they may germinate.

Spirifer (spir′i-fėr), *n.* [NL. (Sowerby, 1816), < L. *spira*, a coil, spire, + *ferre* = E. *bear*[1].] **1.** The typical genus of *Spiriferidæ*, having the long brachial appendages coiled into a pair of

Spirifer centronatus.
a, ventral view; *b*, dorsal view; *c*, lateral view.

spirals, with their apices at the hinge-angles and supported upon similarly convoluted shelly lamellæ, the shell usually impunctate, and with a long straight hinge-line. Numerous species range from the Lower Silurian to the Permian. *S. hystericus* is an example. Also called *Spirifera*, *Spiriferus*.

2. [*l. c.*] A member of this genus.

Spiriferidæ (spir-i-fer′i-dē), *n. pl.* [NL., < *Spirifer* + *-idæ*.] A family of articulate brachiopods with highly developed spiral appendages, typified by the genus *Spirifer*, containing numerous genera, ranging from the Lower Silurian to the Liassic.

spiriferine (spī-rif′ė-rin), *a.* [< *Spirifer* + *-ine*[1].] Bearing brachial appendages in the form of a spiral; of or pertaining to the *Spiriferidæ*.

spiriferoid (spī-rif′ė-roid), *n.* and *a.* [< *Spirifer* + *-oid*.] **I.** *n.* A brachiopod of the family *Spiriferidæ*.

II. *a.* Resembling a spirifer; having characters of the *Spiriferidæ*.

spiriferous (spī-rif′ė-rus), *a.* [< NL. **spirifer*, < L. *spira*, a coil, spire, + *ferre* = E. *bear*[1].] **1.** Having a spire, as a univalved shell; spired; turreted.—**2.** Having spiral appendages, as a brachiopod; spiriferine.—**3.** Containing or yielding fossil spirifers, as a geological stratum. *Encyc. Brit.*, XXIV. 507.

spirignath (spir′ig-nath), *n.* [< NL. *spirignatha* (Latreille, 1796), < **spirignathus*: see *spirignathous*.] The slender spirally coiled antlia or haustellum of lepidopterous insects. Also *spirignatha*, *spiritrompe*.

spirignathous (spī-rig′nā-thus), *a.* [< NL. **spirignathus*, < Gr. σπεῖρα, a coil, + γναθός, a jaw.] Having a filiform sucking-tube coiled in a spiral, as a moth or butterfly; haustellate or antliate, as a lepidopterous insect.

spirillar (spir′i-lär), *a.* [< *Spirill-um* + *-ar*[3].] In *bot.*, belonging to or resembling the genus ★*Spirillum*.

Spirillum (spī-ril′um), *n.* [NL. (Ehrenberg, 1830), dim. of L. *spira*, a coil, spire: see *spire*[2].] A genus of *Schizomycetes* or bacteria, having cylindrical or somewhat compressed spirally twisted cells. They are rigid and furnished at one or both ends with four or more cilia, and multiply by transverse division, the parts soon separating from one another. This genus, which according to some authorities also embraces the genus known as *Vibrio*, contains many species, found in swamp-water, brackish water, infusions, etc. See ★*Schizomycetes*.—**Spirillum fever**. See *fever*[1].

spirit (spir′it), *n.* [< ME. *spirit*, *spirite*, *spyryte*, *spyrite* (also *sprit*, *sprite*, > E. *sprite*[1]), < OF. *espirit*, *esperit*, *esprit*, F. *esprit* = Sp. *espíritu* = Pg. *espirito* = It. *spirito*, spirit (= G. Sw. Dan. *spiritus*, spirits of wine, etc.), < L. *spiritus*, a breathing or blowing (as of the wind), a breeze, the air, a breath, exhalation, the breath of life, life, mind, soul, spirit, also courage, haughtiness, etc., LL. a spirit, ghost, < *spirare*, breathe: see *spire*[3]. Cf. *sprite*[1], a doublet of *spirit*.] **1.** According to old and primitive modes of thought, an invisible corporeal thing of an airy nature, scarcely material, the principle of life, mediating between soul and body. The primitive and natural notion of life was that it consisted of the breath, and in most languages words etymologically signifying 'breath' are used to mean the principle of life. *Spirit* is one of these, and translates the Greek πνεῦμα. The ordinary notion of the Greek philosophers was that the soul is warm air. This was strengthened by the discovery, about the time of Aristotle (who, however, does not share the opinion), of the distinction between the veins and the arteries. It is found elaborately developed in the writings of the Stoics, and especially of Galen. The spirit in the body exists in various degrees of fineness. The coarser kinds confer only vegetative life, and betray themselves in eructations, etc.; there are, besides, a vital spirit (πνεῦμα ζωοτικόν) and an animal or psychical spirit (πνεῦμα ψυχικόν). At birth man was said to possess only vegetative spirit, but as soon as he draws breath this was thought to be carried through the left ventricle and the arteries to every part of the body, becoming triturated, and conveying animal life to the whole. The spirits were also said to be in different states of tension or tone, causing greater or less energy of body and mind. The vital spirits, being carried to the ventricles of the brain, were there further refined, and converted into spirits of sense, or animal spirits. In vision these spirits dart out from the eye to the object, though this be the most distant star, and immediately return laden in some form with information. This doctrine, modified by the addition of an incorporeal soul, and confused with the Hebrew conception of a spirit, was generally believed down to and into the scientific era. Old writers, therefore, who use phrases which are still employed metaphorically must be understood as meaning them literally. See def. 3.

There is no malice in this burning coal;
The breath of heaven hath blown his *spirit* out.
Shak., K. John, iv. 1. 110.

From the kind heat which in the heart doth raigne
The *spirits* of life doe their beginning take;
These *spirits* of life, ascending to the braine,
When they come there the *spirits* of sense do make.

These *spirits* of sense in fantasie's high court
Judge of the formes of objects ill or well;
And so they send a good or ill report
Downe to the heart, where all affections dwell.

Besides, another motive power doth rise
Out of the heart, from whose pure blood do spring
The vitall *spirits*, which, borne in arteries,
Continuall motion to all parts doe bring.
Sir J. Davies, Nosce Teipsum.

Adam, now enforced to close his eyes,
Sunk down, and all his *spirits* became entranced.
Milton, P. L., xi. 419.

Thus much cannot be denied, that our soul acteth not immediately only upon bones, flesh, brains, and other such like gross parts of the body, but, first and chiefly, upon the animal *spirits*, as the immediate instruments of sense and fancy, as that by whose vigour and activity the other heavy and unwieldy bulk of the body is so nimbly moved. And therefore we know no reason why we may not assent here to that of Porphyrius: that the blood is the food and nourishment of the *spirit*, and that this *spirit* is the vehicle of the soul, or the more immediate seat of life.
Cudworth, Intellectual System, v. § 3.

2. The principle of life conceived as a fragment of the divine essence breathed into man by God. This conception is developed in the Old and New Testaments, in the writings of the Neoplatonists, and by theologians. In Biblical and theological language the spirit is the highest part of human nature, as most akin to the divine, connected mediately with the body through the soul, and spoken of alone, or in contradistinction to the body, or as distinguished from both body and soul (see *soul*).

All flesh died that moved upon the earth, . . . all in whose nostrils was the breath of the *spirit* of life.
Gen. vii. 21, 22.

The *spirit* of Elijah doth rest on Elisha. 2 Ki. ii. 15.

My *spirit* is consumed, my days are extinct, the grave is ready for me. Job xvii. 1.

Who among men knoweth the things of a man, save the *spirit* of the man, which is in him? 1 Cor. ii. 11 [R. V.].

Our body shall be turned into ashes, and our *spirit* shall vanish as the soft air. Wisdom of Solomon, ii. 3.

3. Metaphorically, animation; vivacity; exuberance of life; cheerfulness; courage; mettle; temper; humor; mood: usually in the plural. But in old writers this meaning is not figurative, since they conceived this quality to be due to the tension of animal spirits.

So feble were his *spirites*, and so low.
Chaucer, C. T., l. 1361.

Hastings went to the council that morning in remarkably high *spirits*. *J. Gairdner*, Rich. III., ii.

spiritualism (spir'i-ṭū-al-izm), *n.* [= F. *spiritualisme* = Sp. Pg. *espiritualismo* = It. *spiritualismo*; as *spiritual* + *-ism*.] 1. The state of being spiritual; spiritual character. *Milman.*—2. In *philos.*, the doctrine of the existence of spirit as distinct from matter, or as the only reality: opposed to *materialism*.—3. The belief that disembodied spirits can and do communicate with the living, especially through the agency of a person particularly susceptible to spiritualistic influences, called a medium; also, the various doctrines and theories, collectively, founded upon this belief. In its modern form, spiritualism originated in the State of New York in the year 1848, and since that time has extended over the United States and Europe. The mediums through whom the supposed communications take place are of various kinds, no fewer than twenty-four different classes being mentioned in the books explanatory of spiritualism. Among the chief methods of communication are rappings, table-tippings, writing, and speaking; in the latter forms of communication the medium is supposed to be fully possessed by the spirit for the time being. Spiritualism has no formal system of theology, and it is contended by many of its advocates that it is not necessarily inconsistent with the maintenance of a faith otherwise Christian, and that spirit-communications are providential interventions for the purpose of inculcating the doctrine of immortality, and counteracting the material tendencies of the age. The meetings for spiritualistic communications are commonly called *séances*. Also *spiritism*.

spiritualist (spir'i-ṭū-al-ist), *n.* [= F. *spiritualiste* = Sp. Pg. *espiritualista* = It. *spiritualista*; as *spiritual* + *-ist*.] 1. One who professes a regard for spiritual things only; also, one whose employment is spiritual.

The deep-lying doctrine of Spiritual Beings, which embodies the very essence of *Spiritualistic* as opposed to Materialistic philosophy.
E. B. Tylor, Prim. Culture, I. 384.

2. Of or pertaining to modern spiritualism, or communication with departed spirits; produced by or believed to be due to the agency of departed spirits: as, *spiritualistic* manifestations; a *spiritualistic* séance.

spirituality (spir″i-ṭū-al′i-ti), *n.*; pl. *spiritualities* (-tiz). [< ME. *spiritualite*, *spiritualte*, < OF. *spiritualite*, *spiritualte*, *espiritualte*, *esperituaute*, etc., F. *spiritualité* = Sp. *espiritualidad* = Pg. *espiritualidade* = It. *spiritualità*, < LL. *spiritualita(t-)s*, < *spiritualis*, spiritual: see *spiritual*.] 1. Spiritual nature or character; immateriality; incorporeality.

A pleasure made for the soul, suitable to its *spirituality*, and equal to all its capacities. *South.*

2. Spiritual tendency or aspirations; freedom from worldliness and from attachment to the things of time and sense; spiritual tone; desire for spiritual good.

We are commanded to fast, that we may pray with more *spirituality*, and with repentance.
Jer. Taylor, Sermons, Return of Prayers, i.

No infidel can argue away the *spirituality* of the Christian religion; attacks upon miracles leave that unaffected.
De Quincey, Essenes, i.

His discourses were so valued, and his *spirituality* so revered, that his ministrations were coveted in all that region. *New Princeton Rev.*, II. 140.

3†. The clergy as a whole; the ecclesiastics; the church.

Five entire subsidies were granted to the king by the *spirituality*. *Fuller.*

4. That which belongs to the church or to an ecclesiastic in his official capacity: generally in the plural, and distinguished from *temporalities*: as, *spiritualities* of a bishop (those profits and dues which a bishop receives in his ecclesiastical character).—**Guardian of the spiritualities.** See *guardian*.—**Spirituality of benefices,** the tithes of land, etc.

spiritualization (spir″i-ṭū-al-i-zā′shon), *n.* [< *spiritualize* + *-ation*.] 1. The act of spiritualizing, or the state of being spiritualized.—2. In *old chem.*, the operation of extracting spirit from natural bodies.

Also spelled *spiritualisation*.

spiritualize (spir′i-ṭū-al-īz), *v. t.*; pret. and pp. *spiritualized*, ppr. *spiritualizing*. [< F. *spiritualiser* = Sp. Pg. *espiritualizar* = It. *spiritualizzare*; as *spiritual* + *-ize*.] 1. To make spiritual, or more spiritual; elevate above what is worldly or bodily.

Unless we endeavour to *spiritualise* ourselves, . . . the older we grow the more we are embruted and debased.
Southey, The Doctor, clxxxiv.

2. To infuse spirituality or life into; inform with spirit or life; animate.

This seen in the clear air, and the whole *spiritualized* by endless recollections, fills the eye and the heart more forcibly than I can express. *Carlyle.* (*Imp. Dict.*)

3. To draw a spiritual meaning from, or impart a spiritual meaning to: as, to *spiritualize* a text of Scripture.—4. In *chem.*: (*a*) To extract spirit from. (*b*) To convert into spirit, or impart the properties of spirit to.

Also spelled *spiritualise*.

spiritualizer (spir′i-ṭū-al-ī-zėr), *n.* [< *spiritualize* + *-er*[1].] One who spiritualizes, in any sense. Also spelled *spiritualiser*.

The most licentious of the allegorists, or the wildest of the *spiritualizers*. *Warburton*, Divine Legation, ix. 2.

spiritually (spir′i-ṭū-al-i), *adv.* [< ME. *spyritually*; < *spiritual* + *-ly*[2].] 1. In a spiritual manner; without corporeal grossness, sensuality, or worldliness; with purity of spirit or heart.—2. As a spirit; ethereally.

The sky . . .
Bespangled with those isles of light,
So wildly, *spiritually* bright.
Byron, Siege of Corinth, xi.

3. In a spiritual sense.

spiritual-minded (spir′i-ṭū-al-mīn″ded), *a.* Having the mind set on spiritual things; having holy affections; spiritual.

spiritual-mindedness (spir′i-ṭū-al-mīn″dednes), *n.* The state of being spiritual-minded; spirituality of mind.

spiritualness (spir′i-ṭū-al-nes), *n.* The state or character of being spiritual; spirituality.

spiritualty† (spir′i-ṭū-al-ti), *n.* [< ME. *spiritualte*, < OF. *speritualte*, etc.: see *spirituality*.] The ecclesiastical body; the whole clergy of any national church.

It [the church] is abused and mistaken for a multitude of shaven, shorn, and oiled, which we now call the *spiritualty* and clergy.
Tyndale, Ans. to Sir T. More, etc. (Parker Soc., 1850), p. 12.

spirituelle (spir″i-tū-el′), *a.* [F., fem. of *spirituel*: see *spiritual*.] Characterized by or exhibiting a refined intellectuality, grace, or delicacy: noting primarily but not exclusively a woman or the ways of women.

I have the air of youth without freshness, but noble, sweet, lively, *spirituelle*, and interesting.
The Century, XL. 654.

spirituosity (spir″i-tō̤-os′i-ti), *n.* [< *spirituous* + *-ity*.] 1. Spirituous character or quality: as, the *spirituosity* of beer.—2. Immateriality; ethereality. *Cudworth*, Intellectual System, p. 421.

spirituoso (spir″i-tū-ō′sō), *adv.* Same as *spiritoso*.

spirituous (spir′i-tū-us), *a.* [= Dan. *spirituös*; < OF. (and F.) *spiritueux* = Pg. *espirituoso*, spir-

ituous; cf. G. *spirituosen*, Sw. Dan. *spirituosa*, pl., alcoholic liquors; < ML. **spirituosus*, full of spirit, < L. *spiritus*, spirit: see *spirit*; cf. *spiritous*.] 1†. Having the quality of spirit; ethereal; immaterial; intangible.—2†. Lively; active; gay; cheerful; enlivening.

Hedon. Well, I am resolved what I'll do.
Ana. What, my good *spirituous* spark?
B. Jonson, Cynthia's Revels, iii. 2.

That it may appear aiery and *spirituous*, & fit for the welcome of chearful guests; the principal difficulty will be in contriving the lights and stair-cases.
Sir H. Wotton, Reliquiæ, p. 42.

3. Containing much alcohol; distilled, whether pure or compounded, as distinguished from *fermented;* ardent: applied to a liquor for drinking.—**Syn. 3.** *Spirituous, Spiritual, Spirited.* *Spirituous* is now strictly confined to the meaning of alcoholic: as, *spirituous*, ardent, or intoxicating liquors. *Spiritual* is as strictly confined to that higher field of meaning which is opposed to corporeal or carnal, secular or temporal. *Spirited* expresses active animal spirits, or that spirit which is a vigorous movement of the feelings and the will: as, a *spirited* horse, boy, reply.

spirituousness (spir′i-tū-us-nes), *n.* The character of being spirituous. *Boyle.*

spiritus (spir′i-tus), *n.*; pl. *spiritus*. [L.: see *spirit*.] 1. A breathing; an aspirate.—2. In *phar.*, spirit; any spirituous preparation: the officinal name of various spirits, specified by a qualifying term: as, *spiritus vini Gallici*, spirit of French wine (that is, brandy); *spiritus ætheris compositus*, compound spirit of ether.—**Spiritus asper**, a rough breathing; in *Gr. gram.*, the mark (῾) placed over or before an initial vowel, or over the second letter of an initial diphthong, to indicate that it should be preceded by a sound like *h* in English: also placed over ρ when it is initial or is preceded by another ρ (ῥῥ).—**Spiritus lenis**, a soft or smooth breathing; in *Gr. gram.*, the mark (᾽) denoting the absence of the rough breathing.

spiritweed (spir′it-wēd), *n.* Same as *spiritleaf*.

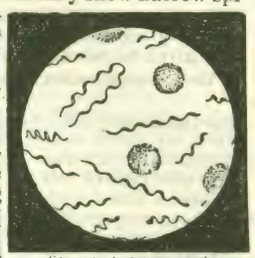
spirit-world (spir′it-wėrld), *n.* The world of disembodied spirits; Hades; the shades.

spirity (spir′i-ti), *a.* [< *spirit* + *-y*¹.] Full of spirit; spirited. [Scotch.]

spirivalve (spī′ri-valv), *a.* [< L. *spira*, a coil, spire, + *valva*, door (valve).] Having a spiral shell, as a univalve mollusk; spirally whorled, as a shell.

spirket (spėr′ket), *n.* [Origin obscure.] In *ship-building*, a space forward and aft between the floor-timbers. *Hamersly.*

spirketing, spirketting (spėr′ket-ing), *n.* [< *spirket*.] In *ship-building*, the strakes of plank worked between the lower sills of ports and waterways. *Thearle*, Naval Arch., § 209.



spirling (spėr′ling), *n.* Same as *sparling*¹.

Spirobranchia (spī-rō-brang′ki-ą), *n. pl.* [NL., < Gr. σπεῖρα, a coil, spire, + βράγχια, gills.] Same as *Brachiopoda*. Also *Spirobranchiata*.

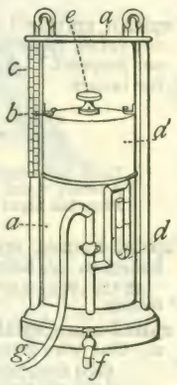
spirobranchiate (spī-rō-brang′ki-āt), *a.* and *n.* [< NL. *spirobranchiatus*, < Gr. σπεῖρα, a coil, spire, + βράγχια, gills.] **I.** *a.* Of or pertaining to the *Spirobranchiata;* brachiopod.

II. *n.* A brachiopod.

Spirochæta (spī-rō-kē′tą), *n.* [NL. (Ehrenberg, 1833), < Gr. σπεῖρα, a coil, spire, + χαίτη, a bristle.] A genus of *Flagellata*, related to the trypanosomes, existing in the form of long slender motile threads which usually show narrow spiral windings. *S. plicatilis* occurs among algæ in swamp-water; *S. Obermeieri*, found in the blood of those sick with recurrent fever, is the cause of the disease; *S. pallida* (now usually called *Treponema pallidum*) is the pathogenic organism of syphilis; *S. pertenuis* (*Treponema pertenue*) is believed to be the cause of yaws; *S. dentium* is found in the mucus of the teeth, and *S. anserina* in blood of diseased geese.

Spirochæta Obermeieri.

spirogonimium (spī″rō-gō-nim′i-um), *n.*; pl. *spirogonimia* (-ą). [NL., < Gr. σπεῖρα, a coil, spire, + NL. *gonimium*, q. v.] In *bot.*, a gonimium similar to a hormogonimium, but not moniliform, with the syngonimia subglobose, smaller and more scattered, as in *Omphalaria*.



Spirogyra (spī-rō-jī′rą), *n.* [NL. (Link, 1833), so called with ref. to the spiral bands of chlorophyl in the cells; < Gr. σπεῖρα, a coil, spire, + γῦρος, a circle, ring.] A genus of fresh-water algæ, of the class *Conjugatæ* and family *Zygnemaceæ*. They are among the commonest of fresh-water algæ, forming dense bright-green masses, in both running and stagnant water, and have often a slimy feel, owing to the well-developed mucilaginous sheath in which each filament is enveloped. The cells have one to several parietal chlorophyl-bands spirally winding to the right. Conjugation is scalariform or lateral. There are about 75 species and very many varieties. They are popularly called *frog-spit* or *frog-spittle*. See *frog-spit*, and cuts under *chlorophyl* and *conjugation*, 4.

spirolet, spirol† (spī′rōl, -rol), *n.* [< OF. *spirole*, a small culverin.] A small culverin.

Long pieces of artillery called basilisks, and smaller sized ones, known by the name of *spirols*.
Urquhart, tr. of Rabelais, i. 47.

spiroloculine (spī-rō-lok′ū-lin), *a.* Composed of spirally coiled loculi or chamberlets: specifically noting certain foraminifers. *Amer. Jour. Sci.*, No. 160, p. 328.

spirometer (spī-rom′e-tėr), *n.* [Irreg. < L. *spirare*, breathe (see *spire*³), + *metrum*, measure.] A contrivance for measuring the extreme differential capacity of the human lungs. The instrument most commonly employed consists of an inverted chamber submerged in a water-bath. The breath is conducted by a flexible pipe and internal tube so as to collect in the chamber, which rises in the water, and is fitted with an index which marks the cubic inches of air expired after a forced inspiration. In the accompanying cut, *a a* is a small gas-holder containing an inverted vessel *a′*; *b*, index, which shows on the scale *c* the number of cubic inches expired; *d*, manometer, which, when *a′* is held down, shows the pressure which the lungs can exert; *e*, plug-vent for outlet of expired air; *f*, cock for outlet of water; *g*, tube through which the expiration is made.

Spirometer.

spirometric (spī-rō-met′rik), *a.* [As *spirometer* + *-ic*.] Of or pertaining to the spirometer; ascertained by means of the spirometer; as tested by the spirometer.—**Spirometric capacity**, extreme differential capacity of the lungs, measured by the total amount of air which can be expired after the fullest possible inspiration.

spirometry (spī-rom′e-tri), *n.* [As *spirometer* + *-y*³.] The use of the spirometer in measuring the capacity of the lungs.

Spiromonas (spī-rom′ō-nas), *n.* [NL. (Perty, 1852), < Gr. σπεῖρα, a coil, spire, + μονάς, a unit.] A genus of pantostomatous flagellate protozoans, spirally twisted on their long axis (whence the name). These animalcules are free-swimming or temporarily attached, soft and plastic, with two anterior subequal flagella, one of which is adherent at will. *S. volubilis* is an example. According to Kent, the *Cyclidium distortum* and *Heteromita angustata* of Dujardin are both species of *Spiromonas*.

spirophore (spī′rō-fōr), *n.* [Irreg. < L. *spirare*, breathe, + Gr. *-φορος*, < φέρειν = E. *bear*¹.] An apparatus for producing artificial respiration in cases of suspended animation, as in persons rescued from drowning. It consists of an air-tight case, in which the body is inclosed up to the neck, and an air-pump, for producing at proper intervals a partial vacuum in the case, thus causing the external air to fill the lungs of the patient.

Spirophyton (spī-rof′i-ton), *n.* [NL. (Hall, 1863), < Gr. σπεῖρα, a coil, spire, + φυτόν, a plant.] A genus of fossil algæ, the type of which is characteristic of a subdivision of the Devonian occurring in the State of New York, and called from this fossil (*Spirophyton caudagalli*) the *cauda-galli grit*. The *Spirophyton* group appeared in the Silurian, and continued, as the Mesozoic *Taonurus*, into the Tertiary, but is now extinct. The frond of *Spirophyton* was broad, thin, and spirally convoluted from a slender axis, the convolution widening with the distance from the point of attachment.

spirozooid (spī-rō-zō′oid), *n.* [< Gr. σπεῖρα, a coil, spire, + E. *zooid*.] The defensive zooid of certain hydroid hydrozoans, as of *Podocoryne*, a tubularian polyp: so called as coiling or curling spirally when not in action. These zooids are long slender filaments always provided with cnidæ or lasso-cells for nettling, and are sometimes called *spiralozooids*. Compare *dactylozooid* and *machopolyp*.

Spirula lævis.

spirt¹, **spirt**². See *spurt*¹, *spurt*².

spirtle, *v.* and *n.* See *spurtle*.

Spirula (spir′ū-lą), *n.* [NL. (Lamarck, 1799), < LL. *spirula*, dim. of L. *spira*, a coil, spire: see *spire*².] 1. In *Cephalopoda:* (*a*) A genus of sepioid cuttlefishes, typical of the family *Spirulidæ*, having a delicate shell in the hinder part of the body rolled into a flat or discoidal spiral, with discrete whorls whose involute spire presents ventrally, and no guard. There are several species, as *S. lævis* and *S. fragilis*. The shells are common, and are sometimes carried by the Gulf Stream to the coast of England, but specimens of the entire animal are extremely rare. Also *Spirulæa*, *Spirulea*. (*b*) [*l. c.*; pl. *spirulæ* (-lē).] A member of this genus. *Imp. Dict.*—2. [*l. c.*; pl. *spirulæ* (-lē).] In sponges, an irregular spineless polyact spicule of spiral form.

spirulate (spir′ū-lāt), *a.* [< LL. *spirula*, dim. of L. *spira*, a coil, spire (see *Spirula*), + *-ate*¹.] Spiral in form, or in disposition of parts; spirally arranged: said of structures, markings, etc.

Spirulidæ (spī-rö′li-dē), *n. pl.* [NL., < *Spirula* + *-idæ*.] A family of cephalopods, typified by the genus *Spirula*. They are squids or sepioids with the mantle supported by a cartilaginous prominence or ridge and a corresponding pit or furrow, the fins small and terminal, and an internal tubular shell partitioned into numerous chambers by transverse septa, and wound in a loose coil.

spirulite (spir′ū-līt), *n.* [< NL. *Spirula* + *-ite*².] A fossil cephalopod resembling or related to *Spirula*.

spiry¹ (spīr′i), *a.* [Early mod. E. *spirie;* < *spire*¹ + *-y*¹.] 1. Having the form of a spire or pyramid; tapering like a spire.

In these lone walls (their days' eternal bound)
Those moss-grown domes with *spiry* turrets crown'd.
Pope, Eloisa to Abelard, l. 142.

2. Abounding in spires or steeples.

And villages embosom'd soft in trees,
And *spiry* towns by surging columns mark'd
Of household smoke. *Thomson*, Spring, l. 953.

spiry² (spīr′i), *a.* [< *spire*² + *-y*¹.] Of a spiral form; spiral; wreathed; curled.

Hid in the *spiry* volumes of the snake.
Dryden, State of Innocence, iv. 2.

spisciousness†, *a.* A variant of *spissous*.

spisst (spis), *a.* [= OF. *espais, espois*, F. *épais* = Sp. *espeso* = Pg. *espesso* = It. *spesso*, < L. *spissus*, thick, compact, dense.] Thick; close; dense.

This *spiss* and dense, yet polish'd, this copious, yet concise treatise of the variety of languages. *Brerewood.*

spissated (spis′ā-ted), *a.* [< L. *spissatus*, pp. of *spissare*, thicken, condense, < *spissus*, thick, compact: see *spiss*.] Inspissated; thickened, as by evaporation. *Warburton*, Divine Legation, ii. 4.

spissed† (spist), *a.* [< *spiss* + *-ed*².] Thickened; condensed; inspissated.

Of such a *spissed* Substance there 's no need.
Heywood, Hierarchy of Angels, p. 214.

spissitude (spis′i-tūd), *n.* [< L. *spissitudo*, thickness, density, < *spissus*, thick, compact: see *spiss*.] Density; the denseness or compactness which belongs to substances not perfectly liquid nor perfectly solid; inspissated condition.

From this Grossness and *Spissitude* of Air proceeds the slow Nature of the Inhabitants. *Howell*, Letters, I. i. 8.

spissous† (spis′us), *a.* [< L. *spissus*, thick: see *spiss*.] Thick. *Hist. of Francion* (1655). (*Nares.*)

spit¹ (spit), *n.* [(*a*) < ME. **spitte, spytte, spette*, earlier *spite, spyte, spete*, < AS. *spitu*, a spit, = MD. *spit, spet, speet, spete*, D. *spit* = MLG. *spit*, LG. *spitt* = OHG. MHG. *spiz*, G. *spiess* (= Dan. *spid* = Sw. *spett*, < LG. ?), a roasting-spit, in G. also the branches of a deer's horn (hence OF. *espoit, espoi*, a spit, *espois*, F. *épois*, a deer's horn, = Sp. Pg. *espeto*, a spit, = Olt. *spito, spedo*, a spit); orig. neut. of the adj., OHG. *spizzi*, MHG. *spitze, spiz*, G. *spitz*, pointed (G. *spitze*, a point). (*b*) Cf. LG. *speet* (prop. **spiet*), a spear, in humorous use a sword, = OHG. *spioz*, MHG. *spiez*, G. *spiess*, a spear, lance, pike, = Icel. *spjōt*, a spear, = Sw. *spjut* = Dan. *spyd*, a spear (hence OF. *espiet, espet, espie*, also *espoit, espoi* = It. *spiedo, spiede*, a spear). (*c*) Cf. Icel. *spȳta*, a spit, a wooden peg, < *spjōt*, a spear. The above forms have been partly confused with one another. (*d*) Cf. W. *pid*, a tapering point.] 1. A slender bar, sharply pointed at the end, to be thrust through meat which is to be roasted in front of the fire. The rotation of the spit brings all parts of the meat in turn to the heat. The ordinary spit is several feet long, and rests on supports at the sides of the fireplace. Shorter spits are used for small birds, kidneys, etc. See cut under *spit-rack*.

With your arms crossed on your thin-belly doublet like a rabbit on a *spit*. *Shak.*, L. L. L., iii. 1. 20.

He loves roast well
That eats the *spit*.
Fletcher, Mad Lover, ii. 1.

2†. A sword. [Cant.]

Going naked with a *spit* on his shoulder.
Purchas, Pilgrimage, p. 309.

3†. The obelisk or dagger (†) used as a reference-mark.

Either your starres or your *spits* (that I may use Origen's notes) shall be welcome to my margent.
Bp. Hall, To Hugh Cholmley. (*Latham.*)

4. A small point of land running into the sea, or a long narrow shoal extending from the shore into the sea.

But Hermod rode with Niord, whom he took
To show him *spits* and beaches of the sea.
M. Arnold, Balder Dead, iii.

On a narrow *spit* of sand between the rocks a dozen little girls are laughing, romping, and pattering about.
Kingsley, Two Years Ago, ii.

5. In *weaving*, the spindle or wire which holds the cop, spool, or pirn in the shuttle.

spit[1] (spit), *v.*; pret. and pp. *spitted*, ppr. *spitting*. [< ME. *spitten, spyten, spitien* = MD. *spiten, speten*, D. *speten* = MLG. LG. *speten* = OHG. *spizzen*, G. *spiessen* = Dan. *spidde* (cf. Sp. Pg. *espetar*), spit, turn on a spit; from the noun.] I. *trans.* 1. To thrust a spit through; pierce, transfix, or impale with or as with a spit: as, to *spit* a loin of veal.

Look to see . . .
Your naked infants *spitted* upon pikes.
Shak., Hen. V., iii. 3. 38.

How lov'd Patroclus with Achilles joins,
To quarter out the ox, and *spit* the loins.
W. King, Art of Cookery, l. 203.

2. To string on a stick and hang up to dry, as herring in a smoke-house.

II. *intrans.* To roast anything on a spit; attend to a spit; use a spit.

spit[2] (spit), *v.*; pret. and pp. *spit* or *spat*, ppr. *spitting*. [Under this form are merged several orig. diff. forms: (*a*) Early mod. E. and dial. also *spet*, < ME. *spitten, spytten* (pret. *spitte, spytte, sputte, sput*), < AS. *spittan*, **spyttan* (pret. **spytte*) = G. *spützen* = Sw. *spotta* = Dan. *spytte*, spit; (*b*) late MHG. *sputzen*, G. *speutzen* = Icel. *spýta*, spit; (*c*) ME. *speten* (pret. *spette, spete, spetide*), < AS. *spætan* (pret. *spætte*), spit. These forms are supposed to be connected with *spew*, but their relations are not clear. The similar forms, MD. *spicken*, also *spugen*, MLG. *spigen, spiggen*, G. *spucken*, spit, are secondary forms of the verb cognate with AS. *spīwan*, E. *spew:* see *spew*. Hence *spattle*[1], *spittle*[1], and prob. ult. *spot*.] I. *intrans.* 1. To eject saliva from the mouth; expectorate.

When he had thus spoken, he *spat* on the ground, and made clay of the spittle. John ix. 6.

Let him but fasting *spit* upon a toad,
And presently it bursts and dies.
Fletcher and Massinger, A Very Woman, iii. 1.

2. To fall in scattered drops, as rain. [Colloq.]

"And"—putting her hand out at the window—"I think it 's *spitting* already." *Miss Ferrier*, Marriage, vii.

II. *trans.* To eject from the mouth; spew; especially, to eject as or with saliva: as, to *spit* blood.

Thus *spitte* I out my venim under hewe
Of holynesse, to seme holy and trewe.
Chaucer, Prol. to Pardoner's Tale, l. 135.

Sir Roger told me that Old Moll had been often brought before him for making Children *spit* Pins, and giving Maids the Night Mare. *Addison*, Spectator, No. 117.

To spit sixpences, to spit with a white nummular expectoration from a dry mouth. [Low.]

He had thought it rather a dry discourse; and, beginning to *spit sixpences* (as his saying was), he gave hints to Mr. Wildgoose to stop at the first public-house they should come to. *Graves*, Spiritual Quixote, iv. 6. (*Davies.*)

To spit white, to spit from a dry or feverish mouth, especially after a debauch. [Low.]

If it be a hot day, and I brandish any thing but a bottle, I would I might never *spit white* again.
Shak., 2 Hen. IV., i. 2. 237.

spit[2] (spit), *n.* [Early mod. E. and dial. also *spet;* < ME. *spyt;* < *spit*[2], *v.*] 1. What is ejected from the mouth; saliva; spume.—2. The act of spitting: as, a cat gives an angry *spit*.

The speckl'd toad . . .
Defies his foe with a fell *spit*.
Lovelace, Lucasta, Toad and Spider, p. 42.

3. In *entom.*: (*a*) The spume of certain insects; a frothy, fleecy, or waxy substance secreted by various homopterous bugs from specialized pores scattered over the general surface of the body; (*b*) An insect which produces such spume: as, the cuckoo-*spit*, *Ptyelus spumarius*. See *spittle-insect*.—4. A light fall of rain or snow; especially, rain or snow falling in light gusts or scattered drops or flakes.

Spits of rain dashed in their faces.
C. D. Warner, Their Pilgrimage, p. 175.

5. Image; likeness. [Vulgar.]

There was a large lithograph or a horse, dear to the remembrance of the old man from an indication of a dog in the corner. "The very *spit* of the one I had for years; it 's a real portrait, sir, for Mr. Hanbart, the printer, met me one day and sketched him."
Mayhew, London Labour and London Poor, II. 488.

spit[3] (spit), *v. t.* [< D. *spitten*, dig; appar. connected with *speten*, spit: see *spit*[1].] To spade; plant by spading.

Saffron . . . in the moneth of July, . . . when the heads thereof have been plucked up, and after twenty days *spitted* or set againe under mould.
Holland, tr. of Camden, p. 453. (*Davies.*)

spit[3] (spit), *n.* [E. dial.; cf. *spit*[3], *v.*] A spade; hence, the depth of a spade in the earth; a spading or spadeful. [Prov. Eng.]

It [a curious harp] was raised by labourers at the depth of twelve *spits* or spadings under the earth in Coolness Moss, near Newcastle, between Limerick and Killarney.
O'Curry, Anc. Irish, II. xxxiii.

spital†, **spittle**[2]† (spit'al, spit'l), *n.* [< ME. *spyttle, spitel, spytelle*, by apheresis from *hospital:* see *hospital*.] A hospital; properly, a hospital for lazars.

He is
A *spittle* of diseases, and, indeed,
More loathsome and infectious.
Massinger, Picture, iv. 2.

Kind, pious hands did to the Virgin build
A lonely *Spital*, the belated swain
From the night terrors of that waste to shield.
Wordsworth, Guilt and Sorrow, xvii.

(*a*) That genus of painted finches of which the common indigo-bird of the United States is the type: synonymous with *Passerina* or *Hortulanus* of Vieillot, and *Cyanospiza* of Baird. See cut under *indigo-bird*. (*b*) Now employed for the silk-buntings, of which the common dickcissel or black-throated bunting, *S. americana*, is the type: synonymous with

Dickcissel (*Spiza americana*).

Euspiza. The male is 6¾ inches long, 10¾ in extent of wings; the plumage is smooth and compact; the upper parts are grayish-brown, streaked with black on the back; the lower are whitish, shaded with gray, tinged with bright yellow on the breast, and marked with a large black throat-patch; the edge of the wing is yellow; the lesser and middle coverts are bright-chestnut; the lower eyelid is white, the superciliary stripe yellow, and the bill dark horn-blue. The female is similar, but plainer, being less tinged with yellow, and having no black throat-patch, but a few black maxillary or pectoral streaks. This bunting is widely but irregularly distributed in the United States, especially in the eastern half, abounding in some districts, but seldom or never seen in others apparently as eligible. It nests on the ground or in a low bush, and lays four or five plain pale-greenish eggs (rarely speckled). The nuptial male has a quaint monotonous ditty, three notes of which are rendered in the name *dickcissel*—a word which originated in Illinois, and crept into print in or about 1876.

Spizaëtus (spī-zā'e-tus), *n.* [NL. (Vieillot, 1816), < Gr. *σπίζα*, a finch (see *Spiza*), + *ἀετός*, an eagle.] A genus of *Falconidæ*, including hawks or small eagles having the feet feathered to the bases of the toes, the tail square or little rounded, the wings short and rounded, and the head, in the typical species, with a long occipital crest. The genus is sometimes restricted to such birds as the crested eagle of Brazil, *S. manduyti* or *S. ornatus;* in a wider sense, it includes 12 or more species of Central and South America, Africa, India and the Indo-Malayan region, Celebes, Formosa, and Japan. Also *Spizaëtos*.

Spizella (spī-zel'ą), *n.* [NL. (Bonaparte, 1832), < *Spiza* + dim. *-ella*.] A genus of small American finches or sparrows, the chipping-sparrows, having the wings pointed, the tail long and emarginate, the back streaked, and the under parts not streaked in the adult. It includes several of the most familiar sparrows of the United States, as the chippy or chip-bird, *S. socialis* or *domestica;* the field-sparrow, *S. agrestis* or *pusilla;* the tree-sparrow, *S. monticola;* the clay-colored bunting and Brewer's bunting, *S. pallida* and *S. breweri;* and the black-chinned sparrow, *S. atrigularis*. See cut under *field-sparrow*.

Spizellinæ (spī-ze-lī'nē), *n. pl.* [NL., < *Spizella* + *-inæ*.] A subfamily of *Fringillidæ*, containing a large number of small spotted and streaked sparrows. None of those which occur in the United States have any red, blue, or orange colors. *S. F. Baird*, 1858.

spizelline (spī-zel'in), *a.* [< *Spizella* + *-ine*[1].] Resembling or related to the chipping-sparrow; of or pertaining to the *Spizellinæ*.

spizine (spī'zin), *a.* [< *Spiza* + *-ine*[1].] Resembling or related to the finches or buntings of the genus *Spiza*.

Splachnaceæ (splak-nā'sē-ē), *n. pl.* [NL., < *Splachnum* + *-aceæ*.] A family of mosses, named from the genus *Splachnum*, containing the tribes *Voitieæ*, *Tayloricæ*, and *Splachneæ*.

splanchnology (splangk-nol'ō-ji), *n.* [< Gr. *σπλάγχνον*, pl. *σπλάγχνα*, viscera, + *-λογία*, < *λέγειν*, speak: see *-ology*.] The sum of scientific knowledge concerning viscera.

splanchnopleura (splangk-nō-plö'rą), *n.*; pl. *splanchnopleuræ* (-rē). [NL.: see *splanchnopleure*.] Same as *splanchnopleure*.

splanchnopleural (splangk-nō-plö'ral), *a.* [< *splanchnopleure* + *-al*.] Forming the walls of viscera; constituting or pertaining to the splanchnopleure.

splanchnopleure (splangk'nō-plör), *n.* [< NL. *splanchnopleura*, < Gr. *σπλάγχνον*, pl. *σπλάγχνα*, viscera, + *πλευρά*, the side.] The inner or visceral layer of mesoderm, formed by the splitting of the mesoblast, separated from the somatopleure by the perivisceral space, cœlomatic cavity, or cœloma. It is formed in those animals whose germ becomes four-layered in the above manner, and then constitutes the musculature and connective tissue of the intestinal tract and its annexes—the lining epithelium being derived from the hypoblast. Thus, the connective tissue and muscular substance of the lungs, liver, kidneys, etc., and the thickness of the walls of the stomach, bowels, etc., are all splanchnopleural. The term is contrasted with *somatopleure*.

splanchnopleuric (splangk-nō-plö'rik), *a.* [< *splanchnopleure* + *-ic*.] Same as *splanchnopleural*. *Foster*, Elements of Embryology, i. 2.

splanchnoskeletal (splangk-nō-skel'e-tal), *a.* [< *splanchnoskeleton* + *-al*.] Skeletal or hard, as a part of a viscus; forming a part of, or relating to, the splanchnoskeleton.

splanchnoskeleton (splangk-nō-skel'e-ton), *n.* [NL., < Gr. *σπλάγχνον*, pl. *σπλάγχνα*, viscera, + *σκελετόν*, skeleton.] The splanchnic or visceral skeleton; those hard parts of the body, collectively considered, which are developed in special relation with the viscera, and serve to support or contain them. Such are teeth, branchial arches, tracheal rings, bonelets of the eyeball and heart, penis-bones, etc. The term originated with Carus, 1828, and acquired currency through Owen and others. Its difference of meaning from *scleroskeleton* is not clear in all its applications.

splanchnotomical (splangk-nō-tom'i-kal), *a.* [< *splanchnotom-y* + *-ic-al*.] Anatomical in respect of the viscera; of or pertaining to splanchnotomy.

splanchnotomy (splangk-not'ō-mi), *n.* [< Gr. *σπλάγχνον*, pl. *σπλάγχνα*, viscera, + *-τομία*, < *τέμνειν*, *ταμεῖν*, cut.] Dissection of the viscera; the anatomy of the viscera: more commonly ★called *visceral anatomy*.

splash (splash), *v.* [A var. of *plash*[1], with unorig. *s*, regarded as intensive; perhaps sug-

gested by the appar. relation of *smash* to *mash*[1].] **I.** *trans.* 1. To spatter or bespatter, as with water, water and mud, or any other liquid.

In carving a partridge, I *splashed* her with gravy from head to foot. *Sydney Smith*, To Francis Jeffrey, 1806.

2. To dash or throw about in splotches: as, to *splash* dirty water on one.—3. To accomplish with splashing or plashing.

Spliced eye. Same as *eye-splice*.—**Splicing-clamp**, a clamp used to hold the ends or parts to be spliced.—★**To splice the main-brace.** See *main-brace*.

splice (splīs), *n.* [< *splice*, *v.*] **1.** The joining together of two ropes or parts of a rope by interweaving part of the untwisted strands of each, or the union so effected. The *short splice* is used for a rope where it is not to pass through blocks. The *long splice* or *round splice* is made by unlaying the ends of ropes that are to be joined together and following the lay of one rope with a strand of the other until all the strands are used, and then neatly tucking the ends through the strands so that the size of the rope will not be changed. This occupies a great extent of rope, but by the three joinings being fixed at a distance from one another the increase of bulk is diminished, hence it is adapted to run through the sheave-hole of a block, etc. The *eye-splice* or *ring-splice* forms a sort of eye or circle at the end of a rope, and is used for splicing in thimbles, etc. See cut under *eye-splice*.

Splices of Ropes.

8. In *spoil-five*, a drawn game.—**Spoils system**, in *politics*, the practice of treating the public offices not as public trusts, to be administered primarily for the public interest, but as spoils of war, to be taken from members of the defeated party and given to members of the successful party—the emoluments and distinction of holding such offices being regarded as rewards for services rendered to the successful party, and the influence resulting from the possession of the offices being expected to be used for the maintenance of that party in power: a term of depreciation. The name is derived from a remark made in a speech in the United States Senate, in January, 1832, by Mr. Marcy of New York; speaking of and for the New York politicians, he said, "They see nothing wrong in the rule that to the victor belong the spoils of the enemy." This system had previously attained great power in the State of New York; under Jackson's administration it prevailed in national politics, and was soon adopted by nearly all parties, and applied to local as well as State and national offices.—**To shoot to spoil.** See *shoot.*—**Syn. 1.** *Plunder, Booty*, etc. See *pillage*, *n.*

spoil (spoil), *v.*; pret. and pp. *spoiled* or *spoilt*, ppr. *spoiling*. [Early mod. Pg. *espondeo* = It. *spondeo*, < L. *spondeus*, *spondæus*, < Gr. σπονδεῖος, a spondee, so called as used (probably as double spondee) in hymns accompanying libations, prop. adj. (sc. πούς, a foot), of or pertaining to a libation, < σπονδή, a drink-offering, libation to the gods, pl. σπονδαί, a solemn treaty, a truce, < σπένδειν, pour out, make a libation; root uncertain. Cf. L. *spondere*, answer: see *sponsor*.] In *anc. pros.*, a foot consisting of two long times or syllables, one of which constitutes the thesis and the other the arsis: it is accordingly tetrasemic and isorrhythmic. The spondee is principally used as a substitute for a dactyl or an anapest. In the former case it is a *dactylic spondee* (– – for – ⏑ ⏑), in the latter an *anapestic spondee* (⏑ ⏑ – for ⏑ ⏑ –). An *irrational spondee* represents a trisemic foot, trochee, or iambus (– ⏑ for – ⏑, or ⏑ – for ⏑ –). It is found in the even places of trochaic lines and in the odd places of iambic lines, also in logaœdic verses, especially as representing the initial trochee ("basis"). A foot consisting of two spondees is called a *dispondee*.—**Double spondee, greater spondee**, in *anc. pros.*, a foot consisting of two tetrasemic longs (– – – –), and accordingly double the magnitude of an ordinary (single) spondee (– –).

Spondiaceæ (spon-di-ā'sē-ē), *n. pl.* [NL. (Kunth, 1824), < *Spondias* + *-aceæ*.] A name for the plant family *Anacardiaceæ*.

Spondias (spon'di-as), *n.* [NL. (Linnæus, 1737), < Gr. σπονδιάς, a false reading of σποδιάς, a tree supposed to be the bullace.] A genus of polypetalous trees, of the family *Anacardiaceæ*, type of the tribe *Spondieæ*. It is characterized by polygamous flowers with eight or ten stamens and four or five styles which are free at the apex. There are 6 species, dispersed through tropical regions of both hemispheres. They bear alternate odd-pinnate leaves, often crowded at the ends of the branches, with opposite and often very taper-pointed leaflets. The small short-pedicelled flowers form spreading terminal panicles. Each flower contains four or five spreading petals and a free ovary of as many cells, which becomes in fruit a fleshy drupe with a thick stone. The leaves and bark often yield medicinal and principally astringent preparations; the fruit is often austere and laxative; that of one species is valued in Brazil as a remedy in fevers. The fruits of several species are known as *hog-plums*. *S. purpurea*, the purple or Spanish plum, is often cultivated in the West Indies, and is readily propagated by cuttings. *S. lutea*, a tree resembling the ash and reaching 40 or 50 feet, bears yellowish flower-buds, used as a sweetmeat with sugar, and a yellow oval fruit known as *Jamaica plum* or *golden apple*. *S. dulcis*, a similar tree abundant in most Polynesian islands, and known as *Otaheite apple*, yields a large yellow fruit with the smell of apples and an agreeable acid flavor, to the eye contrasting handsomely with the dark-green foliage. The tree is widely cultivated elsewhere in the tropics. A Brazilian species, perhaps a form of *S. dulcis*, produces long aërial roots which descend and form at the ground large black hollow and cellular tubers containing about a pint of water, supplying in dry weather the needs both of the tree and of travelers. *S. mangifera* of India is the source of a gum resembling gum arabic, known as *hog-gum*, and of several medicinal remedies. Its smooth yellowish-green fruit is known as *wild mango*, or *amra*, and is eaten pickled or made into curries.

Spondieæ (spon-dī'ē-ē), *n. pl.* [NL. (Bentham and Hooker, 1862), < *Spondias* + *-eæ*.] A tribe of dicotyledonous choripetalous plants, of the family *Anacardiaceæ*, distinguished from the tribe *Mangifereæ* by an ovary with from two to five cells (instead of one), the ovules usually or always pendulous. It includes forty-five genera, of which *Spondias* is the type. They are mainly tropical or South African, and are mostly trees with pinnate leaves.

spondil†, *n.* An obsolete spelling of *spondyl*.

spondulics (spon-dū'liks), *n.* [Also *spondoolics*, *spondoolix*; origin obscure.] Originally, paper money; now, any money; funds. [Slang, U.S.]

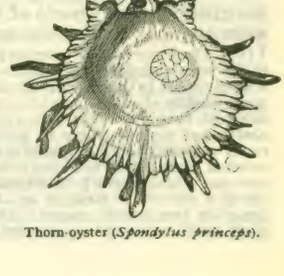
spondylexarthrosis (spon-di-leks-är-thrō'sis), *n.* [NL., < Gr. σπόνδυλος, a vertebra, + ἐξάρθρωσις, dislocation, < ἐξ, out, + ἄρθρον, a joint.] Dislocation of the vertebræ.

Spondylidæ[1] (spon-dil'i-dē), *n. pl.* [NL. (J. E. Gray, 1826), < *Spondylus* + *-idæ*.] A family of marine bivalves, related to the *Limidæ* and to the scallops, typified by the genus *Spondylus*; the thorn-oysters. The valves are dissimilar, the right one being the larger, and attached at the beak, the left generally flat or concave; the ligament is internal. Over 80 species are known, inhabiting chiefly tropical seas. The extinct species are numerous. Formerly also *Spondylea*. See cut under *Spondylus*.

Spondylidæ[2] (spon-dil'i-dē), *n. pl.* [NL., < *Spondylis* + *-idæ*.] In *entom.*, a family of phytophagous coleopterous insects, typified by the genus *Spondylis*, having deeply impressed sensitive surfaces of the antennæ, and the tarsi not dilated. The family was erected by Le Conte and Horn to receive all the aberrant *Cerambycidæ* of Lacordaire, probably representing in the modern fauna remnants of the undifferentiated types of a former geologic age. The genera and species are few. Also *Spondylii*.

Spondylis (spon'di-lis), *n.* [NL. (Fabricius, 1775), < Gr. σπόνδυλος, σφόνδυλος, a vertebra, joint: see *spondyl*.] A genus of phytophagous ★beetles, typical of the family *Spondylidæ*.

spondylitis (spon-di-lī'tis), *n.* [NL., < Gr. σπόνδυλος, a vertebra, + *-itis*.] Arthritis of a vertebra.—**Spondylitis deformans**, arthritis deformans involving the vertebræ.



spondylolisthesis (spon-di-lol-is-thē'sis), *n.* [NL., < Gr. σπόνδυλος, a vertebra, + ὀλίσθησις, a slipping, < ὀλισθάνειν, slip, < ὄλισθος, slipperiness.] A displacement forward of the last lumbar vertebra on the sacrum.

spondylolisthetic (spon-di-lol-is-thet'ik), *a.* [< *spondylolisthesis* (*-et-*) + *-ic*.] Pertaining to, of the nature of, or affected with spondylolisthesis.

spondylopathia (spon″di-lō-path'i-ą), *n.* [NL., < Gr. σπόνδυλος, a vertebra, + πάθος, suffering.] Disease of the vertebræ.

spondylous (spon'di-lus), *a.* [< *spondyl* + *-ous*.] Of or pertaining to a spondyl; like a vertebra; vertebral.

Spondylus (spon'di-lus), *n.* [NL. (Linnæus, 1758), < L. *spondylus*, < Gr. σπόνδυλος, σφόνδυλος, a vertebra, joint: see *spondyl*.] **1.** A genus of bivalves, representing the family *Spondylidæ*, formerly referred to the *Ostræidæ* or *Pectinidæ*. They are remarkable for the character of their spines and the richness of their coloring. Some are known as *thorn-oysters*, *spring-oysters*, and *water-clams*.

Thorn-oyster (*Spondylus princeps*).

2. [*l. c.*] An oyster of this genus.—3. [*l. c.*] A vertebra.

sponet, *n.* A Middle English form of *spoon*[1].

spong (spong), *n.* [Prob. a form of *spang*, a clasp, brooch (taken as a point, a gore ?): see *spang*[1].] A projection of land; an irregular, narrow, projecting part of a field. [Obsolete or prov. Eng.]

The tribe of Judah with a narrow *spong* confined on the kingdom of Edom.
Fuller, Pisgah Sight, II. iv. 2. (*Trench.*)

★ **sponge** (spunj), *n.* [Formerly also *spunge;* < ME. *sponge, spunge, spounge* (= D. *spongie, spons*), < OF. *esponge*, F. *éponge* = Pr. *esponja, esponga* = Sp. Pg. *esponja* = It. *spogna, spugna* = AS. *sponge* = Gael. Ir. *sponc*, < L. *spongia*, < Gr. σπογγιά, also σπόγγος (Attic σφόγγος), a sponge, any spongy substance, = L. *fungus*, a mushroom, fungus; perhaps akin to Gr. σομφός, spongy, porous, and to Dan. Sw. *svamp*, a sponge, fungus, = Icel. *svöppr*, a sponge, and so to Goth. *swamms*, a sponge, = OHG. *swam, swamp*, MHG. *swam, swamp* (*swamb-*), G. *schwamm* = MLG. *swam, swamp*, LG. *swamm, swamp*, a sponge, fungus: see *swamp*, and cf. *spunk* and *fungus*.]

1. A fixed aquatic organism of a low order, various in form and texture, composed of an aggregate of amœbiform bodies disposed about a common cavity provided with one or more inhalent and exhalent orifices (ostioles and oscules), through which water pours in and out. The proper sponge-substance is traversed by a water-vascular system or set of irrigating canals, and in nearly all cases is supported and strengthened by a skeleton in the form of horny fibers, or silicious or calcareous spicules. The streaming of the water is kept up by the vibration of cilia in the water-vascular system—that is, by the lashing of flagella borne upon the individual sponge-cells. These so much resemble flagellate infusorians that some naturalists regarded sponges as compound infusorians, and consequently as protozoans. Those cells which have definite form are spindle-shaped, or flask-shaped, and provided with flagella, round the base of which there may be a little rim or collar, as in those protozoans known as collar-bearing monads, or *Choanoflagellata*. Sponges propagate by budding or gemmation, a process involving cell-fission or ordinary division of cells. They also reproduce sexually by ova and spermatozoa. Sponge-germs resulting from fission are called *gemmules*. The spermatozoa are spindle-shaped. The ova are like ordinary amœbiform cells, and are usually shed into the canals and pass out of the system to be developed; in some species they develop in the substance of the parent. The embryo is hollow with a ciliated surface, and later acquires inhalent and exhalent pores. The living tissue proper of sponges is disposed in three layers or sets of cells, as in all higher animals. These are an ectoderm, cuticle, or out-layer; an endoderm, innermost layer, or in-layer; and a mesoderm, middle layer, or mid-layer, which may be quite thick. It is from the mid-layer that the reproductive elements, and all the many forms of skeletal elements, are derived. Special sense-organs have been described in some sponges. (See cut under *synocil*.) Sponges as a class or phylum of animals have many technical names—as *Acnidophora*, because they have no cnidæ or stinging-organs (compare *Cnidaria*); *Amorphozoa*, from their shapelessness, or rather their many shapes; *Parazoa*, from their position with respect to both *Protozoa* and *Metazoa;* *Porifera, Poriferata, Porozoa*, and *Polystomata*, from their many pores or openings (see cut under *Porifera*); *Spongiæ, Spongiaria, Spongida, Spongiozoa*, etc. They are divided into various primary groups, the most tangible of which are *Calcarea* or chalk sponges, *Hexactinellida*, or silicious sponges with triaxon spicules, and *Demospongiæ*, including the keratose and the remainder of the silicious sponges. But the groups have been classified and named in various ways; and it has been thought that the sponges cannot be treated by the ordinary methods of classification. See also cuts under *ciliate, Spongilla, monadiform, Euplectella*, and *Hyalonemidæ*.

Ascetta primordialis, one of the Chalk-sponges: a part of one side of the body removed, exposing the ventriculus.

o, osculum, mouth, or exhalent aperture; *p*, one of the many ostioles or inhalent pores; *i*, endoderm; *t*, ectoderm, in which triradiate spicules are embedded; *g*, ovum.

2. The fibrous framework of a colony of sponge-animalcules, from which the animalcules themselves have been washed out, and from which the gritty or sandy parts of the colony, if there were any, have been taken away. See *skeleton*, 1 (*b*). The framework of sponges is of different characters in the several orders. The slime-sponges have none, or scarcely any. In the ordinary fibrous sponges the skeleton is a quantity of interlacing fibers and layers, forming an intricate network. This is further strengthened in the chalky and glassy sponges by hard spicules, either separately embedded in the general skeletal substance, called *ceratode*, or solidified in a kind of latticework. (See *Calcispongiæ, Silicispongiæ*.) The chalk-needles or calcareous spicules are either straight or oftener rayed in three-armed or four-armed crosses. The sand-needles or silicious spicules present an extraordinary and beautiful variety. Among them are many starry figures and wheel-like forms, resembling snow-crystals; others are still more curious, in the forms of crosses, anchors, grapnels, shirt-studs, bodkins, etc. The six-rayed star is the characteristic shape in the glass-sponges. (See *Hexactinellida*.) Sponge-spicules are named in an elaborate special vocabulary. (See *sponge-spicule*.) The glass-sponges have some commercial value from their beauty as objects of curiosity; but a few of the fibrous sponges are the only others out of many hundreds of species, both fossil and recent, of any economic importance. Sponges, when wetted, swell to a much greater size, and become very flexible; they are therefore used as vehicles and absorbents of water and other liquids, in wiping or cleansing surfaces, erasing marks, as from a slate, etc. See *bath-sponge, Euspongia*, and *Hippospongia*.

The *Spounge*, and the Reed, of the whiche the Jewes zaven oure Lord Eyselle and Galle, in the Cros.
Mandeville, Travels, p. 10.

3. Any sponge-like substance. (*a*) In *baking*, dough before it is kneaded and formed, when full of globules of carbonic acid generated by the yeast or leaven. (*b*) A metal when obtained in a finely divided condition, the particles having little coherence, and the mass more or less of a spongy texture. Thus, a "metallic sponge" of iron is obtained by the reduction of brown hematite ore by cementation with charcoal in the so-called "Chenot process" for the manufacture of steel. Spongy iron is also prepared on a large scale by the reduction of various ores, and in this form is used for purifying water. Platinum-sponge may be prepared by gently heating the double chlorid of platinum and ammonium. Platinum-black is a black powder not differing much in its properties from platinum-sponge, except that it is less dense; it may be made to take on the spongy character by repeated ignition in a mixture of air and a combustible gas: both are used as oxidizing agents.

4. A tool for cleaning a cannon after its discharge. The sponge used for smooth-bore guns consists of a cylinder of wood covered with sheepskin or some similar woolly fabric, and fitting the bore of the gun rather closely; this is secured to a long handle, or, for field-guns, to the reverse end of the rammer. For modern rifled guns and breech-loaders, sponges of different forms and materials have been introduced. A common form is a cylinder to which bristles are fixed, forming a cylindrical brush, the rounded end being also covered with the bristles. See cut under *gun-carriage*.

5. Figuratively, one who or that which absorbs without discrimination, and as readily gives up, when subjected to pressure, that which has been absorbed.—6. One who persistently lives upon others; a sycophantic or cringing dependent; a hanger-on for the sake of maintenance; a parasite.

Better a penurious Kingdom then where excessive wealth flowes into the gracelesse and injurious hands of common *sponges* to the impoverishing of good and loyall men. *Milton*, Reformation in Eng., ii.

7. In the *manège*, the extremity or point of a horseshoe answering to the heel.—8. The coral, or mass of eggs, under the abdomen of a crab. [Chesapeake Bay.]—**Bahama sponge**, one of three species or varieties of bath-sponges procured from the Bahamas.—**Burnt sponge**, sponge that has been burnt, used in the treatment of goiter and scrofulous swellings.—**Calcareous sponge**, a chalk-sponge.—**Crumb-of-bread sponge**. See *Halichondria*.—**Dog-head sponge**, a kind of bath-sponge, *Spongia agaricina punctata*.—**Fibrous sponge**, any horny sponge.—**Glove-sponge**, a finger-sponge; a reef-sponge.—**Hardhead sponge**, a kind of bath-sponge, the hardhead, *Spongia dura*.—**Holy sponge**, in the *Gr. Ch.*, a piece of compressed sponge which the deacon uses in the office of prothesis to gather together the portions in the disk under the holy bread, and with which he wipes the disk after communion.—**Honeycomb sponge**, the grass-sponge, *Spongia equina cerebriformis*.—**Horny sponge**, a fibrous or fibrosilicious sponge; a sponge of the group *Ceratosa*, as distinguished from a chalk-sponge or glass-sponge.—**Pyrotechnical sponge**. Same as *amadou*.—**Red sponge**, *Microciona prolifera*, the red beard of the oyster of the northern United States.—**Reef-sponge**, a kind of bath-sponge, *Spongia officinalis*, var. *tubulifera*, growing on the Florida reefs and in the West Indies.—**Sheepswool sponge**. See *sheepswool*.—**Sponge tent**. See *tent*.—**Toilet-sponge**, a bath-sponge of fine quality; a Turkish sponge.—**To set a sponge**, in *baking*, to leaven a small mass of dough, to be used in leavening a larger quantity.—**To throw up the sponge**, in *pugilism*, to toss up the sponge used to freshen a fighter, in acknowledgment of his defeat; hence, in general, to acknowledge that one is conquered or beaten; submit; give up the contest or struggle. [Slang.]—**Turkey cup-sponge**, *Spongia adriatica*.—**Vegetable sponge**. See *sponge-gourd*.—**Velvet sponge**, a fine soft sponge of the West Indies and Florida, *Spongia equina*, var. *meandriformis*.—**Vitreous sponge**, a glass-sponge.—**Waxed sponge**. Same as *sponge tent*.—**Yellow sponge, zimocca sponge**. See *bath-sponge*. (See also *boring-sponge, cup-sponge, finger-sponge, flint-sponge, glass-sponge, grass-sponge, horse-sponge, wool-sponge*.)

sponge (spunj), *v.*; pret. and pp. *sponged*, ppr. *sponging*. [Formerly also *spunge;* = D. *sponsen* = F. *éponger* = Sp. *esponjar*, sponge, < LL. *spongiare*, wipe off with a sponge; cf. Gr. σπογγίζειν, sponge; from the noun.] **I.** *trans.* 1. To cleanse or wipe with a sponge: as, to *sponge* the body; to *sponge* a slate or a cannon.

Brush thou, and *spunge* thy cloaths to,
That thou that day shalt weare.
Babees Book (E. E. T. S.), p. 73.

2. To wipe out with a sponge, as letters or writing; efface; remove with a sponge; destroy all traces of: with *out, off*, etc.

Every little difference should not seem an intolerable blemish necessarily to be *spunged out*.
Hooker, Eccles. Polity, v. 19.

Specifically—3. To dampen, as in cloth-manufacturing.—4. To absorb; use a sponge, or act like a sponge, in absorbing: generally with *up*: as, to *sponge up* water that has been spilled.

They *spunged up* my money while it lasted, borrowed my coals and never paid for them, and cheated me when I played at cribbage.
Goldsmith, Citizen of the World, xxvii.

5. To gain by sycophantic or mean arts.

Here wont the dean, when he 's to seek,
To *sponge* a breakfast once a week,
Swift, Richmond Lodge and Marble Hill.

"What else have you been *spunging?*" said Maria. . . . "*Spunging*, my dear! It is nothing but four of those beautiful pheasants' eggs, which Mrs. Whitaker would quite force upon me." *Jane Austen*, Mansfield Park, x.

6. To drain; harass by extortion; squeeze; plunder.

How came such multitudes of our own nation . . . to be *spunged* of their plate and money?
South, Sermons, I. xii.

7. In *baking*, to set a sponge for: as, to *sponge* bread.

II. *intrans.* 1. To gather sponges where they grow; dive or dredge for sponges.

There were a few small open boats engaged in *sponging* from Apalachicola, which were not entered upon the custom-house books. *Fisheries of U. S.*, V. ii. 824.

2. To live meanly at the expense of others; obtain money or other aid in a mean way: with *on*.

She was perpetually plaguing and *spunging on* me.
Swift, To Dr. Sheridan, April 24, 1736.

sponge-animalcule (spunj'an-i-mal″kūl), *n.* A sponge-cell. See cut under *monadiform*.

sponge-bar (spunj'bär), *n.* A sand-bar or rock bottom on which sponges grow. [Florida.]

sponge-cake (spunj'kāk'), *n.* A very light sweet cake made of flour, eggs, and sugar, and variously flavored: so called from its light, spongy substance.

sponge-crab (spunj'krab), *n.* A crab with which a sponge is habitually cancrisocial, as a member of the genus *Dromia*. See cut under *Dromia*.

sponge-cucumber (spunj'kū″kum-bėr), *n.* Same as *sponge-gourd*.

sponge-diver (spunj'dī″vėr), *n.* One who dives for sponges; a sponge-fisher.

sponge-farming (spunj'fär″ming), *n.* The industry of breeding and rearing sponges. *Encyc. Brit.*, XXII. 428.

sponge-fisher (spunj'fish″ėr), *n.* One who fishes for sponges, or is engaged in the sponge-fishery.

sponge-fishery (spunj'fish″ėr-i), *n.* The process or occupation of fishing for sponges.

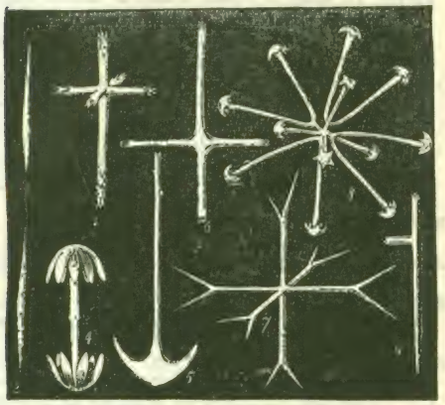
sponge-glass (spunj'glȧs), *n.* 1. A bucket with a glass bottom, used in searching for sponges. *Fortnightly Rev.*, N. S., XXXIX. 179.—2. The flint-sponge, *Hyalonema mirabilis*, found on the coast of Japan.

sponge-gourd (spunj'gōrd), *n.* The washing- or towel-gourd, *Luffa Luffa*, and also *L. acutangula*. The netted fiber from the interior of the fruit is used for washing and other purposes, and is hence called *vegetable sponge* or *dish-rag*. See *Luffa* and *strainer-vine*.

sponge-hook (spunj'hůk), *n.* See *hook*.

spongelet (spunj'let), *n.* [< *sponge* + *-let*.] 1. A little sponge. *Encyc. Dict.*—2. In *bot.*, same as *spongiole*.

sponge-moth (spunj'môth), *n.* The gipsy-moth. [Eng. and (recently) U. S.]



spongeous (spun'jus), *a.* [< *sponge* + *-ous*. Cf. *spongious*.] Same as *spongy*.

sponger (spun'jėr), *n.* [Formerly also *spunger;* < *sponge* + *-er*[1].] 1. One who uses a sponge.—2. A person or vessel engaged in fishing for sponges. *Fisheries of U. S.*, V. ii. 823.—3. In *cloth-manuf.*, a machine in which cloth is dampened previous to ironing. It has a perforated adjustable cylinder, which is filled with steam, and about which the cloth is rolled.—4. A parasitical dependent; a hanger-on for maintenance; a sponge.

Trencher-flies and *spungers*. *Sir R. L'Estrange*.

sponge-spicule (spunj'spik″ūl), *n.* One of the calcareous or silicious spicules peculiar to sponges. They generally appear in more or less modified geometrical figures, with definite axes represented by a non-skeletal rod or axial canal, around which the lime or silica is deposited in concentric layers. There may be one such axis or several. Sponge-spicules are either calcareous or silicious; according to their position and relations, they are either supporting-spicules or skeleton-spicules (megascleres), or flesh-spicules or tension-spicules (micro-

scleres). Schulze has classified them, according to position, more elaborately into *spicula autodermalia, autogastralia, basalia*, etc. They are also grouped primarily according to their axes, next according to their rays, and finally ac-

cording to their many individual figures. Thus, both calcareous and silicious spicules are *monaxon, diaxon, triaxon*, or *tetraxon*. Some silicious spicules are anaxon or polyact, giving stellate figures, either regular, as the *oxyaster, euaster*, and *sterraster*, or irregular, as the *spiraster, spirula*, and *corona*. These anaxon spicules are always flesh-spicules or microscleres. The monaxon spicules are either megascleres or microscleres; of the former are the *strongylus* or *strongylon, oxystrongylus, oxyus* or *oxyon, tylotus*, and *tylostylus;* of the latter are the *toxius* or *toxon, toxodragma, sigma, sigmadragma, isochela, anisochela, diancistra, trichodragma*, etc. Of triaxon silicious forms are the *oxyhexact, oxypentact, oxytetract, oxydiact;* the *hexaster, oxyhexaster, discohexaster, graphiohexaster, floricome*, and *plumicome;* the *pinula, scopula, amphidisk, uncinate*, and *clavula*. The tetraxon spicules are divided into *monactinal, diactinal, triactinal*, and *tetractinal*. The above names and classes (excepting those from Schulze) are substantially according to Lendenfeld. Sollas, the monographer of the sponges in the ninth edition of the "Encyclopædia Britannica," uses a similar set of terms and many others. Among the terms employed by these investigators may be noted *acerella, amphiaster, amphiastrella, amphitetrad, amphitriæne, anatriæne, anthaster, arculus, aster, calthrops, candelabrum, chela, chiaster, cladome, cladus, cymba, desma, diancistron, dichotriæne, echinella, ectaster, endaster, hexaster, meniscoid, microrhabd, microstrongylon, mi oxeon, orthotriæne, pentact, polyact, polyaxon, protriæne, pterocymba, pycnaster, rhabd* or *rhabdus, sanidaster, sigmaspire, sigmella, spheraster, spherula, spinispirula, spirastrella, stellate (n.), stylus, tetract, triact, triæne, trichite, trichotriæne, triona, tylon*, etc. Sponge-spicules are occasionally absent, as in gelatinous sponges. They are small or few in horny sponges, such as are used for the bath. In the glass-sponges they make magnificent structures, like spun glass, of elegant figures, and constitute most of the bulk of the sponge. See also cuts under *Haliphysema, Euplectella, Hyalonemidæ*, and *sponge*.

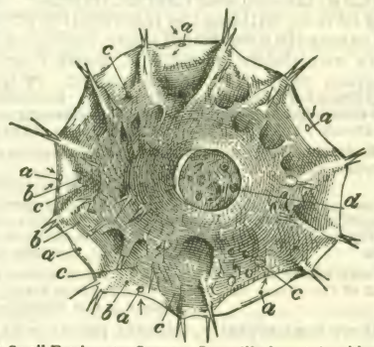
sponge-tongs (spunj'tôngz), *n. sing.* and *pl.* Tongs used for taking sponges.

sponge-tree (spunj'trē), *n.* An evergreen shrub or small tree, *Acacia Farnesiana*, widely diffused through the tropics, and found in the United States along the Gulf of Mexico. It has slender zigzag branches, bipinnate leaves, stipular spines, and bright-yellow heads of very fragrant flowers, much used by perfumers. It is often planted for ornament.

spongewood (spunj'wůd), *n.* 1. The hat-plant, *Æschynomene aspera*, or its pith. See *hat-plant* and *Æschynomene*.—2. A plant with spongy bark, *Gastonia cutispongia*, of the *Araliaceæ*, the only species of its genus. It is an erect shrub with pinnate leaves and a panicle a foot long consisting of crowded branches with the flowers umbeled at the ends.

Spongiæ (spon'ji-ē), *n. pl.* [NL., pl. of L. *spongia*, a sponge: see *sponge*.] Sponges; the mesodermalian class of *Cœlentera*, having a branching canal-system (the organs of which are developed from cells of the mesoglœa, or primary mesoderm), simple epithelia, endodermal collar-cells, and no cnidoblasts or movable appendages. The class is divided by Lendenfeld into two subclasses: the *Calcarea*, with one order, *Calcispongia;* and the *Silicea*, with three orders, *Hexactinellida, Chondrospongiæ*, and *Cornacuspongiæ*, with many suborders, tribes, etc., and about fifty living families, besides several fossil ones. The class dates back to the Silurian. See *sponge*.

spongian (spon'ji-an), *n.* [< *Spongiæ* + *-an*.] A member of the *Spongiæ;* any sponge.



spongicell (spon'ji-sel), *n.* [< L. *spongia*, a sponge, + *cella*, a cell.] A sponge-cell.

spongicolous (spon-jik'ō-lus), *a.* [< L. *spongia*, a sponge, + *colere*, inhabit.] Inhabiting sponges.

Spongidæ, Spongiidæ (spon'ji-dē, spon-jī'i-dē), *n. pl.* [NL., < *Spongiæ* + *-idæ*.] 1. Sponges; the *Spongiæ*.—2. A family of horny or fibrous sponges, typified by the genus *Spongia*, to which various limits have been assigned. In the most restricted sense the family is represented by such forms as the bath-sponges, and now called *Euspongidæ*.

spongiform (spon'ji-fôrm), *a.* [< L. *spongia*, a sponge, + *forma*, form.] 1. Having the form or structure of a sponge; poriferous, as a member of the *Spongiæ;* of or pertaining to the *Spongiæ*. Hence—2. Sponge-like; spongy; soft, elastic, and porous, like an ordinary bath-sponge, noting various objects or substances not sponges. —**Spongiform quartz**, floatstone.

Spongilla (spon-jil'ä), *n.* [NL. (Lamarck, 1816), dim. of *Spongiæ*, the sponges: see *sponge*.] A genus of fresh-water sponges typical of the family *Spongillidæ*. The type-species is *S. lacustris*, which grows on the banks of rivers and ponds,

A Small Fresh-water Sponge, *Spongilla lacustris*, with one exhalent aperture, seen from above.
a and *b*, ostioles, or inhalent apertures; *c*, ciliated chambers; *d*, osculum, or exhalent aperture. (Arrows indicate the direction of the current of water.)

on submerged timber and other supports, forming thick greenish incrustations. It represents a highly specialized and somewhat aberrant family, *Spongillidæ*. See also cuts under *ciliate* and *Porifera*.

Spongillidæ (spon-jil'i-dē), *n. pl.* [NL., < *Spongilla* + *-idæ*.] The only family of sponges which are not marine, characterized by their gemmules, and typified by the genus *Spongilla*.

spongilline (spon'ji-lin), *a.* [< *Spongilla* + *-ine*[1].] Pertaining to the *Spongillidæ*, or having their characters.

spongin (spun'jin), *n.* [< *sponge* + *-in*[2].] The proper horny or fibrous substance of sponges; ceratose or ceratode. Also *spongiolin*.

sponginblast (spun'jin-blâst), *n.* [< *spongin* + Gr. *βλαστός*, a germ.] One of the cells of sponges from which spongin is produced; the formative blastema in which spongin arises. *W. J. Sollas*, Encyc. Brit., XXII. 420. Also *spongoblast*.

sponginblastic (spun-jin-blas'tik), *a.* [< *sponginblast* + *-ic*.] Producing spongin, as a sponginblast; formative or germinating, as spongin.

sponginess (spun'ji-nes), *n.* The state or character of being soft and porous, or spongy; porosity: said of various objects and substances not sponges.

sponging-house (spun'jing-hous), *n.* [Formerly also *spunging-house;* < *sponging*, verbal n. of *sponge*, *v.*, 6, + *house*[1].] A victualing-house or tavern where persons arrested for debt were kept by a bailiff for twenty-four hours before being lodged in prison, in order that their friends might have an opportunity of settling the debt. Sponging-houses were usually the private dwellings of bailiffs, and were so named from the extortionate charges made upon prisoners for their accommodation therein.

A bailiff by mistake seized you for a debtor, and kept you the whole evening in a *spunging-house*.
Swift, Advice to Servants (General Directions).

Spongiocarpeæ (spon″ji-ō-kär'pē-ē), *n. pl.* [NL., < Gr. *σπογγιά*, a sponge, + *καρπός*, a fruit, + *-cæ*.] An old order of algæ, founded upon a single species, *Polyides rotundus*. The fronds are blackish-red, cylindrical, cartilaginous, from 3 to 6 inches long, and attached by a disk, with an undivided stipe, which becomes repeatedly dichotomous above. The cystocarps are in external flesh-colored wart-like protuberances. Now included with many others in the family *Rhizophyllidaceæ*.

spongiole (spon'ji-ōl), *n.* [= F. *spongiole*, < L. *spongiola*, dim. of *spongia*, a sponge: see *sponge*.] In *bot.*, a former name of the delicate tissue of a root-tip, from its supposed property of sucking up moisture like a sponge. Also called *spongelet*.

sp, Spongiole (magnified).

spongiolin (spon'ji-ō-lin), *n.* [< *spongiole* + *-in*[2].] Same as *spongin*. *W. J. Sollas*, Encyc. Brit., XXII. 416.

spongiolite (spon'ji-ō-līt), *n.* [< Gr. *σπογγίον*, dim. of *σπόγγος*, sponge (see *sponge*), + *λίθος*, stone.] A fossil sponge-spicule; one of the minute silicious elements of a sponge in a fossil state.

spongiolitic (spon″ji-ō-lit'ik), *a.* [< *spongiolite* + *-ic*.] Of the nature of a spongiolite; containing spongiolites, or characterized by their presence: as, *spongiolitic* flint.

spongiopiline (spon″ji-ō-pī'lin), *n.* [< Gr. *σπογγίον*, dim. of *σπόγγος*, sponge, + *πῖλος*, felt, + *-ine*[2].] A substitute for cataplasms. It is a thick cloth into which sponge is incorporated in the weaving, in a manner analogous to that of pile-weaving, to form a uniform pile, and coated on the opposite side with rubber.

spongioplasm (spon'ji-ō-plazm), *n.* [< Gr. *σπογγίον*, dim. of *σπόγγος*, sponge, + *πλάσμα*, anything formed or molded: see *plasm*.] The substance, resembling neuroglia, which supports the so-called "primitive tubules" or subdivisions of nerve-fiber containing hyaloplasm. *Nansen*, 1886.

The primitive tubes are the meshes in a supporting substance designated as "*spongioplasm*," a substance described as similar to the neuroglia which forms the sheath of the nerve tube or fibre. *Amer. Jour. Psychol.*, I. 487.

spongioplasmic (spon″ji-ō-plaz'mik), *a.* [< *spongioplasm* + *-ic*.] Of the nature of, or pertaining to, spongioplasm. *Amer. Jour. Psychol.*, I. 487.

spongiose (spon'ji-ōs), *a.* [< L. *spongiosus:* see *spongious*.] Same as *spongy*.

spongious (spon'ji-us), *a.* [< F. *spongieux* = Sp. Pg. *esponjoso* = It. *spugnoso*, < L. *spongiosus, spongeosus*, porous, < *spongia*, a sponge: see *sponge*.] Spongy.

spongiozoön (spon″ji-ō-zō'on), *n.*; pl. *spongiozoa* (-ä). [NL., < Gr. *σπογγίον*, a sponge, + *ζῷον*, an animal.] A sponge. Also *spongozoön*.

spongite (spon'jīt), *n.* [< L. *spongia*, sponge, + *-ite*[2].] A fossil sponge.

spongitic (spon-jit'ik), *a.* [< *spongite* + *-ic*.] Of the nature of a fossil sponge; containing or characterized by the fossil remains of sponges.

spongoblast (spong'gō-blâst), *n.* [< Gr. *σπόγγος*, sponge, + *βλαστός*, germ.] Same as *sponginblast*.

Spongodieæ (spong-gō-dī'ē-ē), *n. pl.* [NL., < Gr. *σπογγώδης, σπογγοειδής*, sponge-like, spongy, + *-eæ*.] An old name for a group of grass-green algæ, typified by the genus *Codium*. They form spongy spherical or cylindrical floating masses, consisting of branched tubes.

spongoid (spong'goid), *a.* [< Gr. *σπογγοειδής, σπογγώδης* (also *σφογγοειδής, σφογγώδης*), sponge-like, < *σπόγγος*, sponge, + *εἶδος*, form.] Spongiform, in any sense; spongy.

spongological (spong-gō-loj'i-kal), *a.* [< *spongolog-y* + *-ic-al*.] Of or pertaining to spongology, or the science of sponges.

spongologist (spong-gol'ō-jist), *n.* [< *spongolog-y* + *-ist*.] One who is versed in the science of sponges.

spongology (spong-gol'ō-ji), *n.* [< Gr. *σπόγγος*, a sponge, + *-λογία*, < *λέγειν*, speak: see *-ology*.] The science of sponges; the study of the *Spongiæ*, and the body of knowledge thence obtained.

spongomeral (spong'gō-mēr-al), *a.* [< *spongomere* + *-al*.] Of or pertaining to a spongomere; choanosomal, as that part of a sponge which is characterized by flagellated chambers.

spongomere (spong'gō-mēr), *n.* [< Gr. *σπόγγος*, a sponge, + *μέρος*, a part.] The upper, choanosomal part of a sponge, characterized by the presence of flagellated chambers: distinguished from *hypomere*. *Encyc. Brit.*, XXII. 415.

spongozoön (spong-gō-zō'on), *n.* [< Gr. *σπόγγος*, sponge, + *ζῷον*, animal.] Same as *spongiozoön*. *Hyatt.*

spongy (spun'ji), *a.* [Formerly also *spungy;* < *sponge* + *-y*[1].] 1. Of the nature or character of a sponge; spongiform or spongoid.—2. Resembling a sponge in certain particulars; soft or elastic and porous; of open, loose, compressible texture, like a bath-sponge; punky, pithy, or soft-grained, as wood; boggy or soggy, as soil; absorbent; imbibitive. See cuts under *cellular* and *cystolith*.

That sad breath his *spongy* lungs bestow'd.
Shak., Lover's Complaint, l. 326.

Here pits of crag, with *spongy*, plashy base,
To some enrich th' uncultivated space.
Crabbe, Works, II. 9.

3†. As it were soaked with drink; drunken. [Rare.]

What not put upon
His *spongy* officers, who shall bear the guilt
Of our great quell?
Shak., Macbeth, i. 7. 71.

4†. Moist; wet; rainy.

Thy banks with pioned and twilled brims,
Which *spongy* April at thy best betrims,
To make cold nymphs chaste crowns.
Shak., Tempest, iv. 1. 65.

Spongy bones, cancellated bones; specifically, the sphenoturbinals.—**Spongy cartilage**. Same as *elastic carti-*

lage (which see, under *elastic*).—**Spongy platinum**, platinum-sponge. See *sponge*, *n.*, 3.

before and abaft each of the paddle-boxes of a steamer; also, the framework itself. (*b*) In a warship, a similar projecting structure, in which a gun is placed: designed to enable the gun to be trained forward and aft.—**Sponson-beams**, the projecting beams which contribute to form sponsons.

sponsor (spon′sor), *n.* [< L. *sponsor*, a surety, LL. a sponsor in baptism, < *spondere*, pp. *sponsus*, promise; cf. Gr. σπονδαί (pl. of σπονδή), a truce, < σπένδειν, pour a libation, as when making a solemn treaty: see *spondee*. From L. *spondere* are also ult. *despond*, *respond*, *correspond*, *spouse*, *espousal*, etc.] 1. A surety; one who binds himself to answer for another, and is responsible for his default; specifically, one who is surety for an infant at baptism, professing the Christian faith in its name, and guaranteeing its religious education; a godfather or godmother. The custom of having sponsors in baptism is as old as the second century. See *godfather*.—2. [*cap.*] [NL.] In *entom.*, a genus of coleopterous insects.

sponsorial (spon-sō′ri-al), *a.* [< *sponsor* + *-i-al*.] Of or pertaining to a sponsor.

sponsorship (spon′sor-ship), *n.* [< *sponsor* + *-ship*.] The state of being a sponsor.

spontaneity (spon-tā-nē′i-ti), *n.* [< F. *spontanéité* = Sp. *espontaneidad* = Pg. *espontaneidade* = It. *spontaneità*, < ML. **spontaneita(t-)s*, < LL. *spontaneus*, spontaneous: see *spontaneous*.] 1. Spontaneous character or quality; that character of any action of any subject by virtue of which it takes place without being caused by anything distinguishable from the subject itself. *Spontaneity* does not imply the absence of a purpose or external end, but the absence of an external incitement or external efficient cause.

2. In *biol.*, the fact of apparently automatic change in structure, or activity in function, of animals and plants, whereby new characters may be acquired, or certain actions performed, under no influence of external conditions or stimulus; animal or vegetable automatism. (*a*) The inherent tendency of an individual organism to vary in structure without reference to its conditions of environment, as when a plant or animal sports; spontaneous variability. Some of the most valuable strains of domestic animals and cultivated plants have arisen thus spontaneously. (*b*) The tendency to purposeless activity of the muscular system of animals, whereby they execute movements independent of external stimulus. Such actions, though voluntary, lack recognizable motive, and appear to depend upon the tension of a vigorous nervous system refreshed by repose. Such spontaneity is notable in the great activity of children and the gambols of young animals.—**Spontaneity of certain cognitive faculties**, in the philosophy of Kant, the self-activity of those faculties which are not determined to act by anything in the sense-impressions on which they act. But the conception is not made very clear by Kant.

spontaneous (spon-tā′nē-us), *a.* [= F. *spontané* = Sp. Pg. *espontaneo* = It. *spontaneo*, < LL. *spontaneus*, willing, < L. **spon(t-)s*, will, only in gen. *spontis* and abl. *sponte*, of one's own will, of one's own accord.] 1. Proceeding from a conscious or unconscious internal impulse; occurring or done without the intervention of external causes; in a restricted sense, springing from one's own desire or volition, apart from any external suggestion or incitement. Of late the employment of *spontaneous* in the sense of 'irreflective' or 'not controlled by a definite purpose' is creeping in from the French; but this is an objectionable use of the term.

> The *spontaneous* grace with which these homely duties seemed to bloom out of her character.
> *Hawthorne*, Seven Gables, v.

> Now my speculation is that advantageous permanent changes are always produced by the *spontaneous* action of the organism, and not by the direct action of the environment. *W. K. Clifford*, Lectures, I. 101.

> A man whose nature leads him to a *spontaneous* fulfilment of the Divine will cannot be conceived better.
> *H. Spencer*, Social Statics, p. 277.

2. Growing naturally, without previous human care.

> *Spontaneous* flowers take the place of the finished parterre. *Goldsmith*, Citizen of the World, xxxi.

3. Growing as native; indigenous. [Rare.]

> Whence they had their Indian corn I can give no account; for I don't believe that it was *spontaneous* in those parts. *Beverley*, Hist. Virginia, iv. ¶ 20.

4. In *biol.*, instinctive or automatic, as some actions of animals which depend upon no external stimulus and are performed without apparent motive or purpose; uninfluenced by external conditions, as a change in structural character. Compare *spontaneity*, 2. Spontaneous actions may be either voluntary, in a usual sense, as the gambols of puppies or kittens, or involuntary and quite uncontrollable by the will. Of the latter class, some are abnormal, as spontaneous (in distinction from *induced*) somnambulism, and these are also called *idiopathic*.—**Center of spontaneous rotation.** See *rotation*.—**Spontaneous axis**, an axis of rotation of a body under instantaneous forces, in case there is no translation in the first instant.—**Spontaneous cause**, a cause that is moved to causing by the end or the object.—**Spontaneous combustion.** See *combustion*.—**Spontaneous dislocation.** See *dislocation*, 2 (*a*).—**Spontaneous energy**, free energy, unrepressed and unforced.—**Spontaneous evolution**, in *obstet.*, the spontaneous expulsion of the fetus in a case of shoulder presentation, the body being delivered before the head.—**Spontaneous generation.** See *generation* and *abiogenesis*.—**Spontaneous suggestion**, suggestion by the action of the laws of association, without the intervention of the will.=**Syn. 1.** *Willing*, etc. (see *voluntary*), instinctive, unbidden.

spontaneously (spon-tā′nē-us-li), *adv.* In a spontaneous manner; with spontaneity.

spontaneousness (spon-tā′nē-us-nes), *n.* The character of being spontaneous; spontaneity.

spontoon (spon-tön′), *n.* [Formerly also *esponton*; = G. *sponton*, < F. *sponton*, *esponton*, F. dial. *éponton* = Sp. *espontón* = Pg. *espontão*, < It. *spontone*, *spuntone*, a sharp point, a bill, javelin, pike, spontoon; cf. *spuntare*, shoot forth, break off the point, blunt; *puntone*, a point, < *punto*, a prick, a point: see *point*[1].] A kind of halberd or partizan formerly serving as the distinguishing arm for certain officers of the British infantry. Compare *half-pike*. Also called *demi-pike*.

spook (spök), *n.* [Also *spuke*; < D. *spook*, MD. *spoocke* = MLG. *spōk*, *spūk*, LG. *spook* = G. *spuch* (obs. except in dial. use), also *spuk* (after LG.) = Sw. *spöke* (cf. D. *spooksel*, MD. *spoocksel*, Dan. *spögelse*), a spook, ghost. There is nothing to show any connection with Ir. *puca*, elf, sprite, = W. *pwca*, *pwci*: see *puck*, *pug*[1].] A ghost; a hobgoblin. [Now colloq.]

> Woden, who, first losing his identity in the Wild Huntsman, sinks by degrees into the mere *spook* of a Suabian baron, sinfully fond of field-sports.
> *Lowell*, Among my Books, 1st ser., p. 118.

spook (spök), *v. i.* [= D. *spoken* = MLG. *spoken* = G. *spuken*, *spucken* = Sw. *spöka* = Dan. *spöge*; from the noun.] To play the spook. [Rare.]

> Yet still the New World *spooked* it in his veins,
> A ghost he could not lay with all his pains.
> *Lowell*, Fitz Adam's Story.

spookish (spö′kish), *a.* [< *spook* + *-ish*[1].] 1. Like a spook or ghost; ghostly.—2. Given over to spooks; congenial to ghosts; haunted: as, a *spookish* house.—3. Affected by a sense or fear of ghosts; suggestive of the presence or agency of spooks: as, a *spookish* circumstance; a *spookish* sensation. [Colloq. in all uses.]

spooky (spö′ki), *a.* [< *spook* + *-y*[1].] Same as ★*spookish*, in any sense. [Colloq.]

spool (spöl), *n.* [< ME. *spole* (not in AS.), < MD. *spoele*, D. *spoel*, a spool, quill, = MLG. *spōle*, LG. *spole* = OHG. *spuolo*, *spuolā*, MHG. *spuole*, G. *spule*, a spool, bobbin, = Icel. *spōla* = Sw. Dan. *spole*, a spool (cf. It. *spola*, *spuola*, bobbin, OF. *epolet*, spindle, < Teut.); perhaps akin to Icel. *spölr*, a rail, a bar: see *spale*.] 1. A small cylinder of wood or other material (with a projecting disk at each end), upon which thread or yarn is wound; a reel.—2. The revolving metal shaft of an anglers' reel, upon which the fishing-line is wound. See cut under *reel*.

spool (spöl), *v. t.* [< *spool*, *n.*] To wind on a spool.

spool-cotton (spöl′kot″n), *n.* Cotton thread wound on spools.

spooler (spö′lėr), *n.* [< *spool* + *-er*[1].] One who winds, or a machine used in winding, thread or yarn on spools. *Ure*, Dict., IV. 122.

spool-holder (spöl′hōl″dėr), *n.* 1. A stand for one or more spools of sewing-thread, on which the spools are mounted on pins, so as to turn freely as the thread is unwound. Also *spool-stand*.—2. In *warping*, a creel on which spools are placed on skewers.

spooling-machine (spö′ling-ma-shēn″), *n.* A machine for winding thread on spools.

spooling-wheel (spö′ling-hwēl), *n.* Same as *spole*, 2. *Halliwell*.

spool-stand (spöl′stand), *n.* Same as *spool-holder*, 1.

spoom† (spöm), *v.* [Supposed to be a var. of *spume*, q. v. Cf. *spoon*[2].] I. *intrans.* *Naut.*, to sail steadily and rapidly, as before the wind.

> We'll spare her our main-top sail;
> She shall not look us long, we are no starters.
> Down with the fore-sail too! we'll *spoom* before her.
> *Fletcher*, Double Marriage, ii. 1.

II. *trans.* To cause to scud, as before the wind.

> *Spoom* her before the wind, you'll lose all else!
> *Fletcher* (*and another*), Two Noble Kinsmen, iii. 4.

spooming (spö′ming), *p. a.* Rushing before the wind: in the quotation perhaps used erroneously in the sense of 'foaming,' 'surging,' 'roaring.'

> O Moon! far *spooming* Ocean bows to thee.
> *Keats*, Endymion, iii.

★**spoon**[1] (spön), *n.* [< ME. *spoon*, *spone*, *spon*, *span*, < AS. *spōn*, a splinter of wood, chip, = OFries. *spōn*, *span* = D. *spaen*, *spaan* = MLG. *spōn*, LG. *spoon* = MHG. *spān*, G. *span*, a thin piece of wood, shaving, chip, = Icel. *spānn*, *spǫnn* = Sw. *spån* = Dan. *spaan*, a chip; root uncertain. Cf. *span-new*, *spick-and-span-new*.] 1†. A thin piece of wood; a splinter; a chip.

> A fyre of *sponys*, and lowe of gromis
> Full soun woll be att a nende [an end].
> *Booke of Precedence* (E. E. T. S., extra ser.), p. 41.

2. A utensil consisting of a bowl or concave part and a handle, used for conveying liquids or liquid food to the mouth. Spoons were originally of wood, later of horn or metal. They are now made usually of silver, gold, iron, or mixed metal, of wood, horn, shell, or other materials, in various sizes and shapes, and for a great variety of purposes. Compare *dessert-spoon*, *egg-spoon*, *table-spoon*, etc.

> He must have a long *spoon* that must eat with the devil.
> *Shak.*, C. of E., iv. 3. 62.

3. Something wholly or in part like a spoon (def. 2) or the bowl of a spoon in shape. Specifically—(*a*) The blade of an oar when broad and slightly curved, or an oar with such a curved blade. (*b*) A bright spoon-shaped piece of metal or other substance, swiveled above hooks, used as a lure or decoy in fishing. It revolves as it is drawn through the water. (*c*) A piece cut from the horn of an ox or bison, in the shape of an elongated bowl of a spoon, six to eight inches in length. It is used in gold-washing, and for testing the value of any kind of detrital material or pulverized ore. (*d*) A club the striking-surface of which is somewhat hollowed, used in the game of golf. (*e*) The spoonbill or paddle-fish. (*f*) In *ornith.*, the spatulate dilatation at the end of the bill of a spoon-billed bird. (*g*) In *cotton-manuf.*, a weighted gravitating arm in the stop-motion of a drawing-frame. One of these is held in position by the tension of each sliver, and in case the sliver breaks or the can becomes empty, and the tension is thus relieved, it falls, and, actuating a belt-shifter, causes the driving-belt to slip from the fast pulley to the loose pulley, thus stopping the machine. (*h*) In *archery*, same as *petticoat*, 5.—**Apostle's spoon.** See *apostle-spoon*.—**Bag and spoon.** See *bag*[1].—**Deflagrating-spoon**, a small spoon of metal, upon which a substance which is to be deflagrated is subjected to the action of heat.—**Eucharistic spoon.** Same as *labis*.—**Maidenhead spoon.** See *maidenhead*.—**To be born with a silver spoon in one's mouth.** See *born*[1].—**Wooden spoon.** (*a*) At Cambridge University, the student whose name stands last in the Mathematical Tripos. (*b*) At Yale, formerly, the student who took the last appointment at the Junior Exhibition; later, the most popular student in a class.

★**spoon**[1] (spön), *v.* [< *spoon*[1], *n.*] **I.** *trans.* **1.** To take up or out with a spoon or ladle; remove with a spoon; empty or clean out with a spoon: often with *up:* as, to *spoon up* a liquid.

Ours, . . .
An age of scum, *spooned* off the richer past.
Mrs. Browning, Aurora Leigh, v.

2. To lie close to, the face of one to the back of the other, as the bowl of one spoon within that of another. Compare *spoon-fashion.* [Colloq.]

What the deuce can she find in that *spooney* of a Pitt Crawley? . . . The fellow has not pluck enough to say Bo to a goose. *Thackeray*, Vanity Fair, xxxiv.

★**spoor** (spör), *n.* [< D. *spoor* = MLG. *spor* = OHG. MHG. *spor*, G. *spur* = Icel. *spor* = Sw. *spår* = Dan. *spor*, track, = AS. *spor*, a track, trace, footprint. Cf. *speer*[1], *spur.*] The track or trail of a wild animal or animals, especially such as are pursued as game; slot; hence, scent: used originally by travelers in South Africa.

spoor (spör), *v.* [< *spoor*, *n.* Cf. *speer*[1].] **I.** *intrans.* To follow a spoor or trail.

After searching and *spooring* about for another hour, we were obliged to abandon pursuit.
The Field, Feb. 17, 1887. (*Encyc. Dict.*)

II. *trans.* To track by the spoor.

The three bulls, according to the natives, have been *spoored* into the dense patch of bush above the kloof.
Harper's Mag., LXXVII. 192.

spoorer (spör′ėr), *n.* One who follows or tracks game by the spoor or scent.

Ventvogel . . . was one of the most perfect *spoorers* I ever had to do with.
H. R. Haggard, King Solomon's Mines, iii.

spoorn†, *n.* [Origin obscure.] The name of a fiend or hobgoblin whose nature does not appear to be determinable.

Urchins, Elves, Hags, Satyrs, . . . Kitt-with-the-candlestick, Tritons, . . . the *Spoorn*, the Mare, the Man-in-the-oak. *Middleton*, The Witch, i. 2.

Most antiquarians will be at fault concerning the *spoorne*, Kitt-with-the-candlestick, Boneless, and some others.
Scott, Letters on Demonology, note.

The scene of fairy revels, . . . the haunt of bulbeggars, witches, . . . the *spoorn.* *S. Judd*, Margaret, i. 5.

sporaceous (spō-rā′shius), *a.* [< *spore* + *-aceous.*] In *bot.*, pertaining to spores; contributing to spores.

Sporades (spor′a-dēz), *n. pl.* [NL., < Gr. σποράδες, sc. νῆσοι, 'the scattered islands,' a group of islands off the west coast of Asia Minor, pl. of σποράς, scattered: see *sporadic.*] **1.** A group of scattered islands in the Greek Archipelago. —**2.** [*l. c.*] In *anc. astron.*, stars which were not included in any constellation.

sporadial (spō-rā′di-al), *a.* [< Gr. σποράς (σποραδ-), scattered (see *sporadic*), + *-i-al.*] Scattered; sporadic. [Rare.]

★**sporadic** (spō-rad′ik), *a.* [= F. *sporadique* = Sp. *esporádico* = Pg. *esporadico* = It. *sporadico,* < NL. *sporadicus,* < Gr. σποραδικός, scattered, < σποράς, scattered, < σπείρειν, scatter: see *spore*[2].] Separate; single; scattered; occurring singly, or apart from other things of the same kind; widely or irregularly scattered; of exceptional occurrence (in a given locality); straggling.

If there was discontent, it was in the individual, and not in the air; *sporadic,* not epidemic.
Lowell, New Princeton Rev., I. 158.

Sporadic cholera. See *cholera,* 2.—**Sporadic dysentery,** dysentery occurring in scattered cases, which have no apparent common origin.

sporadical (spō-rad′i-kal), *a.* [< *sporadic* + *-al.*] Same as *sporadic.* *Arbuthnot.*

sporadically (spō-rad′i-kal-i), *adv.* In a sporadic manner; separately; singly; dispersedly.

sporadicalness (spō-rad′i-kal-nes), *n.* The quality of being sporadic.

Rare even to *sporadicalness.*
W. D. Whitney, Amer. Jour. Philol., V. 287.

sporal (spō′ral), *a.* [< *spore*[2] + *-al.*] Relating to or resembling spores.

sporange (spō-ranj′), *n.* [< *sporangium.*] In *bot.*, same as *sporangium.*

sporangia, *n.* Plural of *sporangium.*

sporangial (spō-ran′ji-al), *a.* [< *sporangium* + *-al.*] **1.** Of or relating to the sporangium: as, the *sporangial* layer.—**2.** Containing spores; having the character of a sporangium; pertaining to sporangia.

sporangidium† (spō-ran-jid′i-um), *n.*; pl. *sporangidia* (-ä). [NL., dim. of *sporangium.*] In *bot.*: (*a*) The columella in mosses. (*b*) A sporangium.

sporangiferous (spō-ran-jif′e-rus), *a.* [< NL. *sporangium* + L. *ferre* = E. *bear*[1].] In *bot.*, bearing or producing sporangia.

sporangiform (spō-ran′ji-fôrm), *a.* [< NL. *sporangium* + L. *forma,* form.] In *bot.*, having the form or appearance of a sporangium.

sporangioid (spō-ran′ji-oid), *a.* [< NL. *sporangium* + Gr. εἶδος, appearance.] In *bot.*, having the appearance of a sporangium.

sporangiole (spō-ran′ji-ōl), *n.* [< NL. *sporangiolum.*] In *bot.*, same as *sporangiolum.*

sporangiolum (spō-ran-jī′ō-lum), *n.*; pl. *sporangiola* (-lä). [NL., dim. of *sporangium.*] In *bot.*, a small sporangium produced in *Thamnidium* and *Dicranophora,* genera of *Mucoraceæ,* in addition to the large sporangium. The spores are similar in both. The term has also been used as a synonym for *ascus.*

sporangiophore (spō-ran′ji-ō-fōr), *n.* [< NL. *sporangiophorum,* < *sporangium* + Gr. -φορος, < φέρειν = E. *bear*[1].] In *bot.*, the axis or receptacle which bears the sporangia; a sporophore bearing sporangia. See *sporophore.*

sporangiophorum (spō-ran-ji-of′ō-rum), *n.*; pl. *sporangiophora* (-rä). [NL.: see *sporangiophore.*] In *bot.*, same as *sporangiophore.*

sporangiospore (spō-ran′ji-ō-spōr), *n.* [< Gr. σπορά, σπόρος, seed, + ἀγγεῖον, vessel, + σπορά, σπόρος, seed.] In *bot.*, one of the peculiar spores of the *Myxomycetes.* See *Myxomycetes.*

sporangium (spō-ran′ji-um), *n.*; pl. *sporangia* (-ä). [NL., < *spora,* a spore, + Gr. ἀγγεῖον, vessel.] **1.** In *bot.*, a spore-case; the case or sac within which spores (asexual reproductive cells) are produced. While most evident in cryptogams, the sporangium, more or less modified, is also found in phanerogams. The sporangium receives different names, in accordance with the kind of spores produced: as, *macrosporangium, microsporangium, oösporangium, zoösporangium,* etc. In mosses *sporangium* is usually the same as *capsule,* but by some authors it is restricted to the spore-case or sac lining the cavity of the capsule. See *spore-sac* and *spore.*

2. In *zoöl.*, the spore-capsule or spore-receptacle of the *Mycetozoa.* *W. B. Carpenter*, Micros., § 334.

Also *sporange.*

sporation (spō-rā′shon), *n.* [< *spore*[2] + *-ation.*] In *biol.*, a mode of generation which consists in the interior division of the body into a mass

of spores or germs, which are freed upon the rupture of the body-wall; also, spore-formation. Usually called *sporulation*.

spore[1]†, *n.* A Middle English form of *spur*.

spore[2] (spōr), *n.* [= F. *spore*, < NL. *spora*, a ★spore, < Gr. σπορά, a sowing, seed-time, seed sown, seed, produce, offspring; cf. σπόρος, a sowing, seed-time, seed, produce; < σπείρειν, sow, scatter; cf. *sperm*[1].] 1. In *bot.*, a general name for the typically unicellular reproductive bodies which, directly or indirectly, are capable of reproducing the plant. The name is given to all the reproductive bodies of cryptogamous plants, which are the analogues of the seeds of the higher or flowering plants, from which they further differ by having no embryo. In the majority of cases a spore consists of a nucleated mass of protoplasm, inclosing starch or oil as reserve nutritive material, surrounded by a cell-wall. In those cases in which the spore is capable of germination immediately on the completion of its development, the cell-wall is a single delicate membrane consisting of cellulose; but in those cases in which the spore must pass through a period of quiescence before germination, the wall is thick and may consist of two layers, an inner, the *endospore*, which is delicate and consists of cellulose, and an outer, the *exospore*, which is thick and rigid, frequently dark-colored, and beset externally with spines or bosses, and which consists of cutin. In certain plants, as some algæ and fungi, spores are produced which are for a time destitute of any cell-wall. They are further peculiar in that they are motile, on which account they are called *zoöspores*. In the various divisions of cryptogams the spores are produced in many different ways and under various conditions. See *æcidiospore*, *ascospore*, *bispore*, *carpospore*, *chlamydospore*, *clinospore*, *macrospore*, *microspore*, *oöspore*, *prothospore*, *pseudospore*, *pycnidiospore*, *stylospore*, *teleutospore*, *tetraspore*, *uredospore*, *zoöspore*, *zygospore*, etc.

Spores.

1. Of *Lycopodium clavatum*. 2. Of *Selaginella marginata*, germinating. 3. Of *Isoëtes lacustris*. 4. Of *Equisetum arvense*. 5. Of *Marsilea quadrifolia*. 6. Of *Salvinia natans*. 7. Of *Marattia fraxinifolia*. 8. Of *Anemia* sp. 9. Of *Polypodium aureum*. 10. Of *Parmelia ciliaris*. 11. Of *Parmelia parietina*. 12. Of *Ceramium purpureum*. 13. Of *Coleochæte pulvinata*.

2. In *zoöl.*, the seed or germ of an organism, of minute size, and not of the morphological value of a cell, such as one of the microscopic bodies into which the substance of many protozoans is resolved in the process of reproduction by sporation; a sporule; a gemmule, as of a sponge.—3. In *biol.*, an organic body of extremely minute size, and not subject to ordinary classification; a sporozoid or zoöspore; a living germ, as a seed of certain diseases.—4. Figuratively, a germ; a seed; a source of being.

> The *spores* of a great many ideas are floating about in the atmosphere. *O. W. Holmes*, Old Vol. of Life, p. 46.

Cellular spore, compound spore. Same as *sporidesm*.—**Cystocarpic spore,** a carpospore.—**Helicoid, secondary,** etc., **spores.** See the adjectives.—**Multilocular, plurilocular,** or **septate spore.** Same as *sporidesm*.

spore-capsule (spōr'kap″sūl), *n.* A sporangium; a spore-case.

spore-case (spōr'kās), *n.* 1. In *bot.*, the sporangium, or immediate covering of the spores, of cryptogams.—2. In *zoöl.*, a spore-capsule.

spore-cell (spōr'sel), *n.* In *bot.*, a spore, or a cell which gives rise to a spore.

spore-formation (spōr'fôr-mā″shon), *n.* In *biol.*, the origination of spores; the vital process whereby spores are produced. (*a*) A kind of multiple fission or interior subdivision of many unicellular organisms, by which they become converted into a mass of spores or sporules. See *spore*[2], and cut under *Protomyxa*. (*b*) The formation of asexual reproductive bodies or spores, as in bacteria, fungi, algæ, ferns, etc.

spore-group (spōr'grōp), *n.* In *bot.*, same as *sporidesm*.

spore-plasm (spōr'plazm), *n.* In *bot.*, the protoplasm of a sporangium that is devoted to the formation of spores.

sporert, *n.* A Middle English form of *spurrier*.

spore-sac (spōr'sak), *n.* In *bot.*, in mosses, the sac lining the cavity of the sporangium, which contains the spores.

sporget. A Middle English form of *spurge*[1] and *spurge*[2].

sporid (spor'id), *n.* [< NL. *sporidium*.] In *bot.*, a sporidium.

sporidesm (spor'i-dezm), *n.* [< NL. *spora*, spore, + Gr. δέσμη, a bundle.] In *bot.*, a pluricellular body which becomes free like a spore, and in which each cell is an independent spore with the power of germination. Also called *spore-group*, *semen-multiplex*, *compound spore*, *multilocular spore*, *cellular spore*, *plurilocular spore*, *septate spore*, etc. *De Bary*.

sporidia, *n.* Plural of *sporidium*.

sporidiferous (spō-ri-dif'e-rus), *a.* [< NL. *sporidium* + L. *ferre* = E. *bear*[1].] In *bot.*, bearing sporidia. Also *sporidiiferous*.

sporidiole (spō-rid'i-ōl), *n.* [< NL. *sporidiolum*.] In *bot.*, same as *sporidiolum*.

sporidiolum (spō-ri-dī'ō-lum), *n.*; pl. *sporidiola* (-lă). [NL., dim. of *sporidium*.] In *bot.*, one of the minute globose bodies produced upon slender pedicels by germinating spores in the *Uredinales*. Also called *promycelial spores*. They are regarded by Tulasne as spermatia.

sporidium (spō-rid'i-um), *n.*; pl. *sporidia* (-ă). [NL., < Gr. σπορά, σπόρος, seed (see *spore*[2]), + dim. *-ίδιον*.] In *bot.*: (*a*) A name restricted by some to the reproductive organs or so-called spores which are borne upon and detached from a promycelium; by others also given to the spores produced in asci or ascospores. (*b*) A spore. See *promycelium*.

sporier†, *n.* An obsolete form of *spurrier*.

sporiferous (spō-rif'e-rus), *a.* [< NL. *spora*, spore, + L. *ferre* = E. *bear*[1].] In *bot.* and *zoöl.*, bearing or producing spores.

sporification (spō″ri-fi-kā'shon), *n.* [< NL. *spora*, spore, + L. *-ficatio*, < *-ficare*: see *-fy*.] In *bot.* and *zoöl.*, the process of bearing spores; production of spores; spore-formation.

sporiparity (spō-ri-par'i-ti), *n.* [< *sporiparous* + *-ity*.] Reproduction by means of spores; the character of being sporiparous. See *sporation*, *sporulation*.

sporiparous (spō-rip'a-rus), *a.* [< NL. *spora*, spore, + L. *parere*, produce.] Reproducing by means of spores or sporular encystment, as an infusorian; sporogenous. *W. S. Kent*.

sporling (spôr'ling), *n.* A variant of *sparling*[1].

sporne†, *v.* and *n.* A Middle English form of ★*spurn*.

sporoblast (spō'rō-blast), *n.* [< NL. *spora*, spore, + Gr. βλαστός, germ.] 1. In *bot.*, Körber's term for *merispore*.—2. The germ or rudiment of a spore.

Sporobolus (spō-rob'ō-lus), *n.* [NL. (R. Brown, 1810), so called with ref. to the seed, which is loose and readily scattered; < Gr. σπορά, σπόρος, seed, + βάλλειν, cast forth.] A genus of grasses, of the tribe *Agrostideæ*, type of the subtribe *Eusgrosteæ*. It is characterized by a diffuse or cylindrical and spike-like panicle, generally containing very numerous and small one-flowered spikelets, each with three awnless glumes, the flowering glume equal to the others or shorter, and the grain free and often readily deciduous from the glumes and palet. In typical species the pericarp, unlike that of most grasses, is a utricle; other species having the usual caryopsis were formerly made a distinct genus by some authors. There are about eighty species, widely scattered through temperate and warmer regions, numerous in America, but with only one species, *S. pungens*, in Europe. They are commonly perennials, slender or sometimes coarse, the leaves flat or rolled, the panicle various, sometimes inclosed in the leaf-sheaths, the spikelets sometimes minute. They are known in general as *dropseed-grass*, some as *rush-grass* (which see).

sporocarp (spō'rō-kärp), *n.* [< NL. *spora*, spore, + Gr. καρπός, fruit.] In *bot.*, a pluricellular body developed as the product of a sexual act, serving essentially for the formation of spores, and ceasing to exist after having once, with comparative rapidity, formed a number of spores. The fructification developed from an archicarp or procarp in *Fungi* and *Rhodophyceæ* is a sporocarp; such, also, is the sporogonium in *Musci*. The term is also used for the capsule-like structure formed by the indusium inclosing the sporangia in the heterosporous *Filicales* (Goebel). See cuts under *Marsilea* and *mildew*.

Sporocarpeæ (spō-rō-kär'pē-ē), *n. pl.* [NL., < *sporocarp* + *-eæ*, from the nature of the fruit.] A group proposed by some systematists to include certain well-marked classes of fungi, such as the *Ascomycetes* and *Uredinales*. They are characterized by the production of sporocarps. See cut under *ascus*.

sporocarpium (spō-rō-kär'pi-um), *n.*; pl. *sporocarpia* (-ă). [NL., < *spora*, spore, + Gr. καρπός, fruit.] In *bot.*, a sporocarp.

Sporochnaceæ (spō-rok-nā'sē-ē), *n. pl.* [< *Sporochnus* + *-aceæ*.] A family of olive-colored seaweeds, of the class *Phæosporeæ*, taking its name from the genus *Sporochnus*. The fronds are cylindrical or tubular, branching, and composed within of elongated cuboidal cells, which become smaller and roundish at the surface; the fructification is in external scattered sori. The family contains 6 genera and about 25 species.

Sporochnus (spō-rok'nus), *n.* [NL. (Agardh, 1844), < Gr. σπορά, seed, + χνόος, χνοῦς, down, bloom.] A genus of olive-colored inarticulate seaweeds, of the class *Phæosporeæ*, giving name to the family *Sporochnaceæ*. There are about thirteen species, widely separated in distribution. ★

sporocyst (spō'rō-sist), *n.* [< NL. *spora*, spore, + Gr. κύστις, a bag or pouch: see *cyst*.] In *zoöl.*: (*a*) The cyst, sac, or capsule which is developed in the process of sporular encystment; any unicellular organism which becomes encysted and proceeds to sporulation. (*b*) A cyst or sac containing spores or germs, such as is developed in the larval state of certain flukes, or trematoid worms, as *Bucephalus;* this state of such worms; a redia containing cercariæ. See *redia*, and cuts under *cercaria*, *germarium*, and *Trematoda*.

A, Ramified Sporocyst of *Bucephalus;* *B*, part of same, more magnified: *a*, outer, *b*, inner coat; *c*, *d*, germ-masses; *C*, one of these, more magnified still.

sporocystic (spō-rō-sis'tik), *a.* [< *sporocyst* + *-ic*.] In *zoöl.*: (*a*) Containing spores, as a cyst. (*b*) Contained in a cyst, as spores; encysted. (*c*) Embryonic and asexual, as a stage of a trematoid worm; of or pertaining to a sporocyst.

sporocyte (spō'rō-sīt), *n.* [< NL. *spora*, spore, + Gr. κύτος, a hollow.] In *bot.*, the mother-cell of a spore. *Goebel*.

sporoderm (spō'rō-dėrm), *n.* [< NL. *spora*, spore, + Gr. δέρμα, skin.] In *bot.*, the covering or coating of a spore (exospore and endospore).

sporoduct (spō'rō-dukt), *n.* [< NL. *spora*, spore, + L. *ducere*, carry: see *duct*.] A duct or passage in which spores are lodged, or through which they pass.

sporogen (spō'rō-jen), *n.* [< NL. *spora*, spore, + Gr. *-γενής*, producing: see *-gen*.] In *bot.*, a plant producing spores instead of seed.

sporogenesis (spō-rō-jen'e-sis), *n.* [< NL. *spora*, spore, + Gr. γένεσις, generation: see *genesis*.] 1. The origination of spores; spore-formation.—2. Reproduction by means of spores. Also *sporogony*.

sporogenous (spō-roj'e-nus), *a.* [< NL. *spora*, spore, + Gr. *-γενής*, producing: see *-genous*.] Reproducing or reproduced by means of spores; sporiparous; bearing or producing spores.—**Sporogenous layer,** in hymenomycetous fungi, same as *hymenium*.—**Sporogenous tissue,** in *bot.*, the tissue from which the spores are developed.

sporogone (spō'rō-gōn), *n.* [< NL. *sporogonium*.] In *bot.*, same as *sporogonium*.

sporogonium (spō-rō-gō'ni-um), *n.*; pl. *sporogonia* (-ă). [< NL. *spora*, spore, + Gr. γονή, generation.] In *bot.*, the sporocarp in the *Musci*. It is the capsule or "moss-fruit," with its various appendages, being the whole product of the sexual act, and remaining attached to, but not in organic connection with, the plant bearing the sexual organs. See *Musci*, and cut under *moss*.

sporogony (spō-rog'ō-ni), *n.* [< NL. *spora*, spore, + Gr. *-γονία*, < *-γόνος*, producing: see *-gony*.] Same as *sporogenesis*, 2.

sporoid (spō'roid), *a.* [< NL. *spora*, spore, + Gr. εἶδος, form.] Resembling a spore; sporular.

sporologist (spō-rol'ō-jist), *n.* [< **sporolog-y* (< NL. *spora*, spore, + Gr. *-λογία*, < λέγειν, speak) + *-ist*.] In *bot.*, a botanist, especially a lichenologist, who gives prominence to the spore as a basis of classification.

sporont (spō'ront), *n.* [< Gr. σπορά, seed, + ὤν (ὀντ-), being, ppr. of εἶναι, be: see *ens* and *be*[1].] A gregarine not provided with an epimerite, or proboscidiform organ which attaches the parasite to its host: distinguished from *cephalont*.

sporophore (spō'rō-fōr), *n.* [< NL. *spora*, spore, + Gr. *-φόρος*, < φέρειν = E. *bear*[1].] In *bot.*: (*a*) A placenta. (*b*) The branch or part of the thallus which bears spores or spore mother-cells. The various forms are further distinguished as *gonidiophore*, *sporangiophore*, *ascophore*, etc. (*c*) In *Archegoniateæ*, a sporophyte. Also called *encarpium*.—**Compound sporophore,** a sporophore formed by the cohesion of the ramifications of separate hyphal branches.—**Filamentous sporophore.** Same as *simple sporophore*.—**Simple sporophore,** a sporophore consisting of a single hypha, or branch of a hypha.

sporophoric (spō-rō-for'ik), *a.* [< *sporophore* + *-ic*.] Having the character of a sporophore.

sporophorous (spō-rof'ō-rus), *a.* [As *sporophore* + *-ous*.] In *bot.*: (*a*) Spore-bearing. (*b*) Of or pertaining to the sporophore.

sporophyas (spō-rof'i-as), *n.* [NL. (A. Braun), < *spora*, spore, + Gr. φύειν, produce.] Same as *sporophydium*.

sporophydium (spō-rō-fid'i-um), *n.*; pl. *sporophydia* (-ä). [NL. (T. F. Allen, 1888), < *spora*, spore, + Gr. *φύειν*, produce, + *-ίδιον*, dim. suffix.] In *bot.*, in the *Characeæ*, a term applied to the whole fruit, including the spore proper, its basal cell, and the enveloping cells. It is the same, or nearly the same, as the *antheridium* of Sachs and Goebel, the *sporophyas* of Braun, the "enveloped *oögonium*" of Celakowsky, and the *sporangium* of authors in general. See *spermocarp*.

sporophyl, sporophyll (spō'rō-fil), *n.* [< NL. *sporophyllum*, < *spora*, spore, + Gr. *φύλλον*, a leaf.] In *bot.*, the leaf or leaf-like organ which bears the spores, or receptacles containing the spores (*i. e.* sporangia), in vascular plants. It is usually more or less modified and unlike the normal leaves, as in the spikes of *Lycopodium*, *Selaginella*, *Ophioglossum*, etc. See cuts under these words, also under *Osmunda*, *polypody*, and *sorus*.

sporophyte (spō'rō-fīt), *n.* [< NL. *spora*, spore, + Gr. *φυτόν*, plant.] In *bot.*, the segment or stage of the life-cycle of the higher cryptogams (*Pteridophyta*, *Bryophyta*) in which the non-sexual organs of reproduction are borne. It is a stage in what has been called the alternation of generations, and is the fern-plant, club-moss plant, etc., of popular language. It bears the spores in countless numbers. By some authors the word *sporophore* is used for *sporophyte*. Compare *oöphyte* and *oöphore*. See *Musci*.

sporophytic (spō-rō-fit'ik), *a.* [< *sporophyte* + *-ic*.] In *bot.*, belonging to, resembling, or characteristic of a sporophyte.

sporosac (spō'rō-sak), *n.* [< NL. *spora*, spore, + L. *saccus*, sack: see *sack*[2].] 1. In *Hydrozoa*, a degenerate medusiform person; one of the simple generative buds or gonophores of certain hydrozoans in which the medusoid structure is not developed. *Encyc. Brit.*, XII. 554. —2. In *Vermes*, a sporocyst or redia. See *sporocyst* (*b*).

sporostegium (spō-rō-stē'ji-um), *n.*; pl. *sporostegia* (-ä). [NL., < *spora*, spore, + Gr. *στέγειν*, cover, roof.] In *bot.*, in the *Characeæ*, the characteristic spirally twisted or furrowed shell of the oöspore. It is thick and hard, usually black or brown in color, and consists of five cells which arise from the base of the spore. It is the so-called *Chara-fruit*.

sporous (spō'rus), *a.* [< *spore*[2] + *-ous*.] In *bot.*, of or pertaining to a spore.

Sporozoa (spō-rō-zō'ä), *n. pl.* [NL., < Gr. *σπορά*, seed, + *ζῷον*, an animal.] 1. Mouthless parasitic corticate protozoans, a class of *Protozoa*, formerly synonymous with *Gregarinida*, but more comprehensive, including many organisms not usually classed with the gregarines. They are parasitic, and occur in almost all animals. Most are very minute. The *Sporozoa* have been divided into four subclasses, *Gregarinidea*, *Coccidiidea*, *Myxosporidia*, and *Sarcocystidia*, and more recently into *Telosporidia* and *Neosporidia*. Also called *Cytozoa*.

2. [*l. c.*] Plural of *sporozoön*.

sporozoan (spō-rō-zō'an), *a.* and *n.* [< *Sporozoa* + *-an*.] I. *a.* Having the characters of the *Sporozoa*; pertaining to the *Sporozoa*.

II. *n.* A member of the *Sporozoa*.

sporozoic (spō-rō-zō'ik), *a.* [< *Sporozoa* + *-ic*.] Same as *sporozoan*.

sporozooid (spō-rō-zō'oid), *n.* [< Gr. *σπόρος*, seed, + *zooid*.] In *biol.*, a zoöspore.

sporozoön (spō-rō-zō'on), *n.*; pl. *sporozoa* (-ä). [NL.: see *Sporozoa*.] An individual of the *Sporozoa*; a sporozoan.

Sporran of the modern form.

sporran (spor'an), *n.* [< Gael. *sporan* = Ir. *sparan*, a purse, pouch.] In Highland costume, the purse hanging down from the belt in front of the kilt. It is commonly of fur. In its present form, as a large and showy adjunct to the dress, it is not very old. See also cut under *purse*.

sport (spōrt), *v.* [< ME. *sporten*; by apheresis from *disport*.] I. *trans.* 1. To amuse; divert; entertain; make merry: commonly with a reflexive object.

Ffor to *sport hym* a space, & speike with tho kynges.
Destruction of Troy (E. E. T. S.), l. 7909.

I shall *sport myself* with their passions above measure.
B. Jonson, Cynthia's Revels, v. 3.

2†. To represent by any kind of play.

Now *sporting* on thy lyre the loves of youth.
Dryden, tr. of Persius's Satires, vi. 9.

3. To display sportively or with ostentation; show off; show; exhibit.

By-and-by, Captain Brown *sported* a bit of literature.
Mrs. Gaskell, Cranford, i.

A man . . . must *sport* an opinion when he really had none to give. *J. H. Newman.*

4. To spend in display. [Australia.]

W. Broome, Notes on Pope's Odyssey, ix. 432.

8. In *zoöl.* and *bot.*, an animal or a plant, or any part of one, that departs suddenly or singularly from the normal type of structure. A sport is generally an individual variation of apparently spontaneous origin. The difference from the normal type is usually slight, but may be quite marked. If perpetuated, it becomes a strain, breed, or variety. Sports are observed chiefly among domesticated animals and cultivated plants. Many of the beautiful or curious hothouse-flowers are mere sports that are produced by high cultivation, crossing, or accident, and some valued breeds of domestic animals have arisen in like manner. Sports are frequently very persistent for many generations, even when they are not preserved by selection: "experience does not show that those varieties which are called 'sports' are unstable." (*Galton.*) Monstrous characters are sometimes acquired, but mere monstrosities or malformations are not usually called *sports*. Compare *spontaneity*, 2 (*a*), and *freak of nature* (under *freak*[2]).

9. A sporting man; one who is interested in open-air sports; hence, in a bad sense, a betting man; a gambler; a blackleg. [Colloq.]

To issue with force, as a liquid through a narrow orifice, or from a spout; spurt: as, blood *spouts* from an artery.

Like a raving torrent, struggling amongst the broken rocks and lesse free passages, at length he *spouts* down from a wonderfull height into the valley below.
Sandys, Travailes, p. 73.

2. To discharge a fluid in a jet or continuous stream; send out liquid as from a spout or nozle; specifically, to blow, as a whale.

With youre mouthe ye vse nowther to squyrt nor *spowt.*
Babees Book (E. E. T. S.), p. 135.

When the larger Cetacea come up to breathe, the expired vapor suddenly condenses into a cloud; and, if expiration commences before the spiracle is actually at the surface, a certain quantity of spray may be driven up along with the violent current of the expelled air. This gives rise to the appearance termed the *spouting* of Whales, which does not arise, as it is commonly said to do, from the straining off of the sea-water swallowed with the food, and its expulsion by the nostrils. *Huxley,* Anat. Vert., p. 348.

3. To speak volubly and oratorically; talk or recite in a declamatory manner, especially in public; speechify. [Colloq.]

For anything of the acting, *spouting,* reciting kind I think he has always a decided taste.

spout (spout), *n.* [< ME. *spoute, spowte* = MD. *spuyte,* D. *spuit* = Sw. *spruta,* a spout: see *spout, v.,* and cf. *sprout, n.*] 1. A pipe, tube, or trough through which a liquid is poured, and which serves to guide its flow. Similar tubes, etc., are used for finely divided solids, as grain. The spout of a small vessel, as a pitcher, may be a mere fold or doubling of the rim, or may be a piece put on the outside, a notch having been cut in the rim to allow the liquid to pass, or may be a closed tube, as in a tea-pot or aftaba. See cut under *mill.*

She dreamt to-night she saw my statua,
Which, like a fountain with an hundred *spouts,*
Did run pure blood. *Shak.,* J. C., ii. 2. 77.

The walls surmounting their roofes, wrought thorow with potsheards to catch and strike down the refreshing winds; having *spowts* of the same.
Sandys, Travailes, p. 116.

2. A lift or shoot in a pawnbroker's shop; hence, vulgarly, the shop itself.

Pawnbrokers, . . . before *spouts* were adopted, used a hook to lift the articles offered in pawn.
N. and Q., 7th ser., VII. 56.

3. A continuous stream of fluid matter issuing, actually or seemingly, from a pipe or nozle; a jet or column, as of water.

Before this grotto is a long poole into which ran divers *spouts* of water from leaden escollop basins.
Evelyn, Diary, Feb. 27, 1644.

Specifically—(*a*) A waterspout.

They say furthermore that in certeyne places of the sea they sawe certeyne stremes of water, which they caule *spoutes,* faulynge owt of the ayer into the sea.
R. Eden, First Books on America (ed. Arber), p. 386.

2. Full of spirit or vigor; brisk; lively; vivacious; animated; spirited; gay.

I am glad you are so *sprightly*. You fought bravely.
Beau. and Fl., Knight of Malta, ii. 1.

Let me tell you, that *sprightly* grace and insinuating manner of yours will do some mischief among the girls here. *Sheridan*, The Rivals, ii. 1.

=**Syn. 2.** See *animation*.

sprightly† (sprīt′li), *adv.* [Prop. *spritely;* ⟨ *sprightly, a.*] In a sprightly manner; with vigor, liveliness, or gaiety. *Shak.*, W. T., iv. 4. 53.

sprigtail (sprig′tāl), *n.* 1. The pintail or sprig, a duck, *Dafila acuta*. See cut under *Dafila*.—2. The sharp-tailed or pin-tailed grouse, *Pediocetes phasianellus columbianus:* more fully *sprig-tailed grouse*. See cut under *Pediocetes*.

sprig-tailed (sprig′tāld), *a.* Having a sprigged or sharp-pointed tail, as a bird; pin-tailed: as, ★the *sprig-tailed* duck, *Dafila acuta*.

spring (spring), *v.*; pret. *sprang* or *sprung*, pp. *sprung*, ppr. *springing*. [Also dial. *sprink;* ⟨ ME. *springen, spryngen* (pret. *sprang, sprong*, pl. *sprungen, sprongen*, pp. *sprungen, sprongen, sprunge*), ⟨ AS. *springan, sprincan* (pret. *sprang, spranc*, pl. *sprungon*, pp. *sprungen*), spring, = OS. *springan* = OFries. *springa* = D. *springen* = MLG. *springen* = OHG. *springan*, MHG. OF. *espringuier*, etc., spring, dance, = It. *springare*, kick about (⟨ OHG.); prob. akin to Gr. σπέρχεσθαι, move rapidly, be in haste, σπερχνός, hasty. Cf. Lith. *sprugti*, spring away, escape. Hence *spring, n.*, and ult. *springal*[1], *springal*[2], the causal *spreng* (now mostly merged in *spring*), *sprinkle*, etc.] **I.** *intrans.* 1. To leap up; jump.

Whan Gonnore this saugh, she *spronge* for ioye.
Merlin (E. E. T. S.), ii. 210.

They would often *spring*, and bound, and leap, with prodigious agility. *Swift*, Gulliver's Travels, iv. 1.

2. To move with leaps; bound along; rush.

Than *spronge* forth Gawein and his companye a-monge the forreyours, that many were there slain and wounded.
Merlin (E. E. T. S.), iii. 587.

The horses, *springing* from under the whip of the charioteer, soon bore us from the great entrance of the palace into the midst of the throng that crowded the streets.
W. Ware, Zenobia, I. 58.

Specifically—**3.** To start up; rise suddenly, as a bird from a covert.

Watchful as fowlers when their game will *spring*.
Otway, Venice Preserved, i. 1.

4. To be impelled with speed or violence; shoot; fly; dart.

And sudden light
Sprung through the vaulted roof. *Dryden.*

The blood *sprang* to her face.
Tennyson, Lancelot and Elaine.

Out *sprang* his bright steel at that latest word.
William Morris, Earthly Paradise, II. 285.

5. To start, recoil, fly back, etc., as from a forced position; escape from constraint; give; relax; especially, to yield to natural elasticity or to the force of a spring. See *spring*, *n.*, 9.

Thor [Jacob] wrestelede an engel with,
Senwe [sinew] *sprungen* fro the lith [limb].
Genesis and Exodus (E. E. T. S.), l. 1804.

No sooner are your . . . appliances withdrawn than the strange casket of a heart *springs* to again.
Carlyle, Sartor Resartus, ii. 6.

6. To be shivered or shattered; split; crack.

Whene his spere was *sprongene*, he spede hym fulle 3erne, Swappede owtte with a swerde, that swykede hym never.
Morte Arthure (E. E. T. S.), l. 1794.

East and Tom were chatting together in whispers by the light of the fire, and splicing a favourite old fives bat which had *sprung*. *T. Hughes*, Tom Brown at Rugby, i. 9.

7. To come into being; begin to grow; shoot up; come up; arise; specifically, of the day, to dawn: said of any kind of genesis or beginning, and often followed by *up*.

The derke was done & the day *sprange*.
Destruction of Troy (E. E. T. S.), l. 1076.

Hadst thou sway'd as kings should do, . . .
Giving no ground unto the house of York,
They never then had *sprung* like summer flies.
Shak., 3 Hen. VI., ii. 6. 17.

In the night, when the Land winds came, they anchored, and lay still till about 10 or 11 a Clock the next day, at which time the Sea-breeze usually *sprang up* again, and enabled them to continue their Course.
Dampier, Voyages, II. i. 106.

Alone the sun arises, and alone
Spring the great streams.
M. Arnold, In Utrumque Paratus.

8. To take one's birth, rise, or origin (from or out of any one or any thing); be derived; proceed, as from a specified source, stock, or set of conditions.

This folc, *sprungen* of Israel,
Is vnder God timed wel.
Genesis and Exodus (E. E. T. S.), l. 4023.

My only love *sprung* from my only hate!
Shak., R. and J., i. 5. 140.

9†. To come into view or notice; be spread by popular report; gain fame or prevalence.

Thus withinne a whyle his name is *spronge*
Bothe of his dedes and his goode tonge.
Chaucer, Knight's Tale, l. 579.

The word shal *springen* of him into Coloyne.
Flemish Insurrection (Child's Ballads, VI. 271).

10. To rise above a given level; have a relatively great elevation; tower.

Up from their midst *springs* the village spire,
With the crest of its cock in the sun afire.
Whittier, Prophecy of Samuel Sewall.

Above this *springs* the roof, semicircular in general section, but somewhat stilted at the sides, so as to make its height greater than the semi-diameter.
J. Fergusson, Hist. Indian Arch., p. 119.

11. To warp, or become warped; bend or wind from a straight line or plane surface, as a piece of timber or plank in seasoning.

The battens are more likely to *spring* fairly than when the curves are nearly straight. *Thearle*, Naval Arch., § 21.

12. To bend to the oars and make the boat leap or spring forward, as in an emergency: often in the form of an order: as, "*Spring* ahead hard, men!"—**Springing bow.** In *violin-playing*, a staccato passage, produced by dropping the bow on the strings so that it rebounds by its own elasticity, is said to be played with a *springing bow*. Also called *spiccato*, and, when the bow rebounds to a considerable distance, *saltato*.—**Syn.** *Leap, Jump*, etc. See *skip*1, *v. i.*

II. *trans.* **1.** To cause to leap or dart; urge or launch at full speed.

So they spede at the spoures, they *sprangene* theire horses, Hyres theme hakenayes hastyly there aftyre.
Morte Arthure (E. E. T. S.), l. 483.

I *spring* my thoughts into this immense field.
J. Hervey, Meditations, II. 129.

2. To start or rouse, as game; cause to rise from the earth or from a covert; flush: as, to *spring* a pheasant.

The men *sprange* the birdes out of the busshes, and the haukes sorynge ouer them bete them doune, so that the men mought easily take them.
Sir T. Elyot, The Governour, i. 18.

Here 's the master fool, and a covey of coxcombs; one wise man, I think, would *spring* you all.
Greene, Friar Bacon and Friar Bungay.

3. To bring out hastily or unexpectedly; produce suddenly; bring, show, contrive, etc., with unexpected promptness, or as a surprise.

I may perhaps *spring* a wife for you anon.
B. Jonson, Bartholomew Fair, v. 3.

Surprised with fright,
She starts and leaves her bed, and *springs* a light.
Dryden, tr. of Ovid's Metamorph., x. 153.

The friends to the cause *sprang* a new project. *Swift.*

It 's a feast at a poor country labourer's place when he *springs* sixpenn'orth of fresh herrings.
Mayhew, London Labour and London Poor, I. 53.

4. To jump over; overleap.

Far be the spirit of the chase from them [women]!
Uncomely courage, unbeseeming skill;
To *spring* the fence, to rein the prancing steed.
Thomson, Autumn, l. 575.

5†. To cause to spring up or arise; bring forth; generate.

Two wellis there bethe, I telle thee,
That *sprynggythe* oyle, there men may see.
Political Poems, etc. (ed. Furnivall), p. 142.

Their indulgence must not *spring* in me
A fond opinion that he cannot err.
B. Jonson, Every Man in his Humour, i. 1.

6†. To scatter as in sowing; strew about; shed here and there; sprinkle (a liquid).

Before theise Ydoles men sleen here Children many tymes, and *spryngen* the Blood upon the Ydoles; and so thei maken here Sacrifise. *Mandeville*, Travels, p. 170.

7. To sprinkle, as with fine drops, particles, or spots; especially, to moisten with drops of a liquid: as, to *spring* clothes. [Now only prov. Eng.]

With holi water thou schalt me *springe*,
And as the snowe I schal be whyt.
Political Poems, etc. (ed. Furnivall), p. 253.

8. To shiver; split; crack: as, to *spring* a bat; the mast was *sprung*.

Our shippes [were] in very good plight, more then that the Mary Rose, by some mischance, either *sprang* or spent her fore-yarde. *Hakluyt's Voyages*, I. 609.

9. To cause to burst or explode; discharge.

I *sprung* a mine, whereby the whole nest was overthrown. *Addison*, Spectator.

10. To shift out of place; relax; loosen.

The linch-pins of the wagon are probably lost, and the tire of the wheels *sprung*. *H. B. Stowe*, Oldtown, p. 178.

Specifically—**11.** To relax the spring of; cause to act suddenly by means of a spring; touch off, as by a trigger: as, to *spring* a trap; to *spring* a rattle; also figuratively: as, to *spring* a plot or a joke.

He shall weave his snares,
And *spring* them on thy careless steps.
Bryant, Antiquity of Freedom.

12. To bend by force, as something stiff or strong.—**13.** To insert, as a beam in a place too short for it, by bending it so as to bring the ends nearer together, and allowing it to straighten when in place: usually with *in:* as, to *spring in* a slat or bar.—**14.** In *arch.*, to commence from an abutment or pier: as, to *spring* an arch.—**15.** *Naut.*, to haul by means of springs or cables: as, to *spring* the stern of a vessel around.—**16.** In *carp.*, to unite (the boards of a roof) with bevel-joints in order to keep out wet.—**To spring a butt** (*naut.*). See *butt*2.—**To spring a leak.** See *leak*.—**To spring her luff** (*naut.*). See *luff*2.

★**spring** (spring), *n.* and *a.* [< ME. *spring, springe*, a leap, *spreng, sprynge*, a spring (of water), a rod, a sprig, < AS. *spring, sprynġ*, a leap, a spring, fountain, ulcer, = OS. *spring* (in *aho-spring* = AS. *ēa-sprynġ*, a well, 'water-spring') = OFries. *spring* (in *spedelspring*) = MLG. *sprink* = OHG. *spring, sprung*, MHG. *sprinc, sprunc*, G. *spring*, a spring of water (cf. *sprung*, a leap), = Sw. Dan. *spring*, a leap, run, spring (cf. Sw. *språng*, a leap, bound, water-spring); from the verb: see *spring*, *v.*] I. *n.* **1.** The act of springing or leaping. (*a*) A leaping or darting; a vault; a bound.

The Indian immediately started back, whilst the lion rose with a *spring*, and leaped towards him.
Addison, Spectator, No. 56.

(*b*) A flying back; the resilience of a body recovering its former state by its elasticity.

The bow well bent, and smart the *spring*.
Cowper, Human Frailty.

2. The act or time of springing or appearing; the first appearance; the beginning; birth; rise; origin: as, the *spring* of mankind; the *spring* of the year; the *spring* of the morning or of the day (see *dayspring*). [Archaic except as in def. 3 and its figurative use.]

Men, if we view them in their *spring*, are at the first without understanding or knowledge at all.
Hooker, Eccles. Polity, i. 6.

This river taketh *spring* out of a certain lake eastward.
B. Jonson, Masque of Blackness.

So great odds there is between the *Spring* and Fall of Fortune. *Baker*, Chronicles, p. 126.

At morning *spring* and even-fall
Sweet voices in the still air singing.
Whittier, Mogg Megone, ii.

Specifically—**3.** The first of the four seasons of the year; the season in which plants begin to vegetate and rise; the vernal season (see *season*); hence, figuratively, the first and freshest period of any time or condition.

Rough winter spent,
The pleasant *spring* straight draweth in ure.
Surrey, The Louer Comforteth Himself.

My hasting days fly on with full career,
But my late *spring* no bud or blossom shew'th.
Milton, Sonnets, ii.

4. That which springs or shoots up. (*a*†) A sprout; shoot; branch; sapling.

Springis and plantes, any spryg that growt out of any tree. *Arnold's Chron.*, p. 168.

This canker that eats up Love's tender *spring*.
Shak., Venus and Adonis, l. 656.

(*b*) A young wood; any piece of woodland; a grove; a shrubbery. [Obsolete or prov. Eng.]

When the *spring* is of two years' growth, draw part of it for quick-sets. *Evelyn*, Sylva, III. viii. § 23.

(*c*†) A rod; a switch.

For ho so spareth the *spring* spilleth hus children;
And so wrot the wise to wissen us alle.
Piers Plowman (C), vi. 139.

5†. A youth; a springal.

The one his bowe and shafts, the other *Spring*
A burning Teade about his head did move.
Spenser, Muiopotmos, l. 292.

Ca' me nae mair Sir Donald,
But ae *spring* Donald your son.
Lizie Lindsay (Child's Ballads, IV. 65).

6†. Offspring; race.

Who on all the human *spring* conferred confusion.
Chapman. (*Imp. Dict.*)

7. Water rising to the surface of the earth from below, and either flowing away in the form of a small stream or standing as a pool or small lake. Rivers are chiefly fed, both before and after being joined by their various affluents, by underground springs, and some pools of water large enough to be called ponds or even lakes are supplied in the same way. The conditions under which springs are formed are exceedingly variable, at once as regards the quantity of water, its temperature, the amount and nature of the gaseous and solid substances which it holds in solution, and the manner in which it is delivered at the surface; hence springs are variously designated in accordance with these peculiarities, the most familiar terms used for this purpose being *shallow, simple, common*, or *surface; hot, boiling, thermal; mineral, medicinal;* and *spouting*, or *geyser*, as this kind of spring is more generally called. Shallow or surface springs ordinarily furnish water which is pretty nearly pure, can be used for drinking, and does not differ much in temperature from the mean of the locality where they occur. They are due to the fact that the water falling on the surface in the form of rain, or furnished by melting snow, sinks to a certain depth (according as the soil and underlying rocks are more or less porous or permeable), where it is held in greater or less quantity according to the amount of rainfall and the thickness and relative position of the various permeable and impermeable formations with which it is brought in contact, but seeks under the influence of gravitation to escape, and makes its appearance at the surface when the topographical or geological conditions are favorable. Thus, a bed of gravel or sand resting on a mass of clay (the former being very permeable, the latter almost impermeable) will become saturated with water below a certain depth, the distance from the surface of the saturated sand or gravel, or the *line of saturation*, as it is called, varying with the climate and season. If, however, there be an adjacent ravine or valley which is cut deep enough to expose the line of junction of the permeable and impermeable formations, the water will escape along this line in greater or less quantity, giving rise to springs, which will vary in number and copiousness with the varying conditions which present themselves. The water of such springs, not having descended to any great depth, will not vary much in temperature from the mean of the locality. Very different are the conditions in the case of thermal or hot springs, which may have any temperature up to boiling, and of which the water may have been heated either by coming from great depths or by contact with volcanic rocks; hence thermal springs are phenomena very characteristic of volcanic and geologically disturbed or faulted regions, and those hot springs which are of the geyser type (see *geyser*) are most interesting from the scenic point of view. The medicinal properties and curative effects of various hot springs are of great practical importance; and many such springs, in Europe and the United States, are places much resorted to by invalids and pleasure-seekers. The variety of constituents, both solid and gaseous, held in solution by different hot springs is very great. From the medicinal point of view, springs are variously classi-

fied, and without regard to temperature, because the nature and quantity of the substances which the water contains are not by any means entirely dependent on temperature, although in general the hotter the water the larger the amount of foreign matter likely to be held in solution, while a high temperature is undoubtedly in many cases an important element in the therapeutic effect produced. A convenient classification of mineral waters, from the medicinal point of view, is into (*a*) indifferent, (*b*) earthy, (*c*) sulphurous, (*d*) saline, (*e*) alkaline, (*f*) purgative, (*g*) chalybeate. *Indifferent* waters are such as contain but a small amount of foreign matter—often so little, indeed, that they might well be classed as *potable*, but they are usually thermal. Their mode of therapeutic action is not well understood, and by some the imagination is thought to play an important part as a curative agency. Examples of well-known and much-visited springs of this class are Schlangenbad in Nassau; Gastein in Salzburg; Teplitz in Bohemia; Plombières in France; Lebanon, New York; Hot Springs, Bath Court House, Virginia; Clarendon Springs, Vermont; Hot Springs, Arkansas, etc. *Earthy* waters contain a large amount of mineral matter in solution, calcium sulphate predominating in quantity. Examples: Leuk, Switzerland; Bagnères-de-Bigorre, France; Bath, England; Sweet Springs and Berkeley Springs, West Virginia. *Sulphurous* waters are weak solutions of alkaline sulphurets, the mineral constituents ranging from a few grains to a hundred or more in the gallon, and the sulphur from a trace to 4 parts in 10,000; some are cold, others hot. Examples: many of the most frequented springs of the Pyrenees, as Cauterets, Eaux-Bonnes, Eaux-Chaudes, Bagnères-de-Luchon; Aix-la-Chapelle, Prussia; Harrogate, England; White Sulphur, West Virginia; and many others. *Saline* springs: these are very numerous, both hot and cold, common salt being the predominating ingredient; but besides this there are usually present salts of lime, magnesia, soda, iron, iodine, and bromine. Examples: Kissingen, Bavaria; Wiesbaden, Baden-Baden, Niederselters, in Germany; St. Catherines, Canada; Saratoga, New York. *Alkaline* waters: these contain salts of soda, potash, lime, and magnesia; also, more or less commonly, lithia, strontia, and traces of iodine, bromine, fluorin, and arsenic. Examples: Vichy in France; Bilin in Bohemia; Heilbrunn, Ems, in Germany. *Purgative* waters, containing especially the sulphate of magnesia, and also of soda, often in large quantity, as in the case of the Püllna water, which has 1,986 grains to the gallon, mostly sodium and magnesium sulphates. Examples: Sedlitz, Carlsbad, and Püllna, Bohemia; Cheltenham and Scarborough, England. *Chalybeate* waters, in which salts of iron are the essential ingredient. Examples: Schwalbach, Nassau; Spa, Belgium; Pyrmont, Germany.

8. Figuratively, any fount or source of supply.

Macb. The *spring*, the head, the fountain of your blood
Is stopp'd; the very source of it is stopp'd.
Macd. Your royal father's murder'd.
Shak., Macbeth, ii. 3. 103.

9. An elastic body, as a strip or wire of steel coiled spirally, a steel rod or plate, strips of steel suitably joined together, a mass or strip of india-rubber, etc., which, when bent or forced from its natural state, has the power of recovering it again in virtue of its elasticity. Springs are used for various purposes—as for diminishing concussion, as in carriages; for motive power, as in clocks and watches; for communicating motion by sudden release from a state of tension, as a bow, the spring of a gun-lock, etc.; for measuring weight and other force, as in the spring-balance; as regulators to control the movement of wheel-works, etc.

To the trunk again, and shut the *spring* of it.
Shak., Cymbeline, ii. 2. 47.

10. In *entom.*, a special elastic organ by which an insect is enabled to spring into the air. (*a*) The springing-organ of species of the family *Poduridæ*. It consists of several bristle-like appendages at the end of the abdomen, which are united at their bases and bent under the body. In leaping, the end of the abdomen is first bent down and then suddenly extended, bringing the elastic bristles with great force against the ground. See cut under *springtail*. (*b*) The springing-organ of a skipjack beetle, or elater. It consists of a spine extending backward from the prosternum and received in a cavity of the mesosternum. When the insect is placed on its back, it extends the prothorax so as to bring the spine to the edge of the mesosternal cavity; then, suddenly relaxing the muscles, the spine descends violently into the cavity, and the force given by this sudden movement causes the base of the elytra to strike against the supporting surface with such power that the body is thrown into the air. See cut under *click-beetle*.

11. Any active or motive power, physical or mental; that by which action is produced or propagated; motive.

Self-love, the *spring* of motion, acts the soul.
Pope, Essay on Man, ii. 59.

12. Capacity for springing; elastic power; elasticity, either physical or mental.

Heav'ns! what a *spring* was in his arm! *Dryden.*
Th' elastic *spring* of an unwearied foot,
That mounts the stile with ease, or leaps the fence.
Cowper, Task, i. 135.

13. *Naut.*: (*a*) The start, as of a plank; an opening in a seam; a leak.

Each petty hand
Can steer a ship becalmed; but he that will
Govern and carry her to her ends must know . . .
Where her *springs* are, her leaks; and how to stop 'em.
B. Jonson, Catiline, iii. 1.

(*b*) A crack in a mast or yard, running obliquely or transversely. (*c*) A line made fast to the bow or quarter of a ship, in order to pull the head or stern in any required direction. (*d*) A rope extending from some part of a ship to another ship, or to a fixed object, to cant or move the ship by being hauled upon.—14. A quick and cheerful tune; a skip. [Obsolete or Scotch.]

We will meet him,
And strike him such new *springs*, and such free welcomes,
Shall make him scorn an empire.
Fletcher (*and another?*), Prophetess, v. 2.

Last night I play'd . . .
"O'er Bogie" was the *spring*.
Ramsay, Gentle Shepherd, i. 1.

15. In *falconry*, a collection of teal.

A *spring* of teels. *Strutt*, Sports and Pastimes, p. 97.

Presently surprising a *spring* of teal.
Daily Telegraph, Dec. 26, 1885. (*Encyc. Dict.*)

Atmospheric, bituminous, boiling, caballine spring. See the adjectives.—**Backlash-spring.** See *backlash*.—**C spring.** See *C-spring*.—**Carbonated springs.** See *carbonate*[2].—**Compound spring,** a spring in which springs of different types are combined.—**Intermittent or intermitting spring.** See *intermittent*.—**Platform-spring,** a form of spring used for heavy vehicles, consisting of four semi-elliptical steel springs arranged as a sort of resilient skeleton platform.—**Pneumatic spring,** a device in which air is confined and made by its elasticity to perform the functions of a spring. It may be a simple air-bag or a cylinder with a close-fitting piston, etc. Also called *air-spring*, *air-cushion*.—**Spiral spring,** a coiled spring used chiefly where the pressure to be resisted is direct and in line with the axis of the spring. See cut under *oiler*.—**Spring of a beam or of a deck,** the curve of a beam or deck upward from a horizontal line.—**Spring of pork,** the lower part of the fore quarter, which is divided from the neck, and has the leg without the shoulder.=**Syn. 7.** *Fountain*, etc. See *well*[1].

II. *a.* Pertaining to, suitable for, or occurring or used in the spring of the year: as, *spring* fashions; *spring* wheat.—**Spring canker-worm.** See *canker-worm*.—**Spring cress,** an American bittercress, *Cardamine bulbosa*, common in wet places, bearing white flowers in early spring.—**Spring crocus,** an early crocus, *Crocus vernus*, having blue, white, or party-colored flowers, perhaps the most common garden species.—**Spring fare,** the first fare of fish taken any year. Fishermen make about two fares of cod in a year, and the first or spring fare, which commences early in April, is of a superior quality. [New England.]—**Spring fever.** See *fever*[1].—**Spring grinder.** See *grinder*.—**Spring lobster.** See *lobster*, 2.—**Spring mackerel.** See *mackerel*[1].—**Spring safety-valve.** See *safety-valve*.—**Spring snowflake.** See *snowflake*, 3.

springal[1]†, **springald**[1]† (spring′al, -ald), *n.* [< ME. *springal*, *spryngal*, *spryngold*, *espringold* = MHG. *springal*, *springolf*, < OF. *espringale*, *espringalle* (AF. also *springalde*), also *espingalle*, *espinguale*, and also *espringole*, *espringarde*, *espingarde* (= Pr. *espingala* = Sp. Pg. *espingarda* = It. *spingarda*, ML. *spingarda*), a military engine, also a dance, < *espringuier*, *espringhier*, *espringier*, *espinguer*, *espinguier*, spring, dance (= It. *springare*, *spingare*, kick about), < OHG. *springan*, spring, jump: see *spring*.] A military engine, resembling the ballista, used in Europe in the middle ages.

Eke withynne the castelle were
Spryngoldes, gunnes, and bows, archers.
Rom. of the Rose, l. 4191.

springal[2], **springald**[2] (spring′al, -ald), *n.* [Also *springel*, *springall*, *springold*, *springow*, < *spring* + *-ald*, equiv. to *-ard* (the word being then perhaps suggested by *springal*[1], *springald*[1]), or else + *-al*, equiv. to *-el*, *-le*, AS. *-ol*, as in E. *brittle*, *newfangle*, etc. Cf. *spring*, *n.*, 5, *springer*, 1 (*b*).] A young person; a youth; especially, a young man. [Obsolete or Scotch.]

A *Springald*, adolescens.
Levins, Manip. Vocab. (E. E. T. S.), p. 16.

Ha, well done! excellent boy! dainty, fine *springal!*
Middleton, More Dissemblers Besides Women, v. 1.

springard† (spring′ärd), *n.* Same as *springal*[1].

spring-back (spring′bak), *n.* In *bookbinding*, a false back put on the sewed sections of a book, which springs upward when the book is opened flat, but returns to its proper position when the book is closed. The outer or true back does not change its outward curve, being kept stiff on library books by sheets of stiff paper, in large blank books by molded pasteboard or sheets of thin steel.

spring-balance (spring′bal″ans), *n.* See *balance*.

spring-band (spring′band), *n.* In a vehicle, a loop or strap used to unite the arms of an elliptic spring.

spring-bar (spring′bär), *n.* In a vehicle, a bar upon the ends of which the body is supported. It lies parallel with the axle, and rests upon the center of the elliptic spring.

spring-beam (spring′bēm), *n.* 1. A beam reaching across a wide space, without a central support.—2. In *ship-building*, a fore-and-aft timber uniting the outer ends of the paddle-box beams, and carrying the outboard shaft-bearing.—3. An elastic bar at the top of a tilt-hammer, jig-saw, or mortising-machine, to accelerate the fall, or afford return motion.—4. In a railroad-car, one of two heavy timbers resting on the springs of a six-wheel car-truck, and serving to support the bolster-bridges, which, through the bolster, support the car-body.—5. In *carp.*, the tie-beam of a truss.

spring-beauty (spring′bū″ti), *n.* 1. A common American wild flower of the genus *Claytonia*, especially *C. Virginica*, a low, succulent herb, sending up from a deep-set tuber in early spring a simple stem bearing a pair of narrow leaves and a loose gradually developing raceme of pretty flowers, which are white or rose-colored with deeper veins. See cut under *Claytonia*. The smaller *C. Caroliniana*, with spatulate or oval leaves, is more northern except in the mountains.—2. In *entom.*, a beautiful little butterfly of America, *Erora læta*, which appears in spring, and has the hind wings in the male brown bordered with blue, in the female mostly blue. *S. H. Scudder.* [Recent.]

spring-bed (spring′bed), *n.* 1. A mattress formed of spiral springs or a fabric woven of coiled spiral wire, set in a wooden frame.—2. In a cloth-shearing machine, a long elastic plate of steel fastened to the framing of the machine to press the fibers of the cloth within the range of the cutting edges.

spring-beetle (spring′bē″tl), *n.* A beetle of the family *Elateridæ;* an elater; a click-beetle. See cut under *click-beetle*. Also *springing-beetle*. See *spring*, *n.*, 10 (*b*).

spring-bell (spring′bel), *n.* A species of rush-lily, *Sisyrinchium Douglasii*. See *rush-lily*.

spring-block (spring′blok), *n.* 1. *Naut.*, a common block or deadeye connected to a ring-bolt by a spiral or india-rubber spring. It is attached to the sheets, so as to give a certain amount of elasticity.—2. In a vehicle, a piece of wood fixed on the axle as a support for the spring.—3. In a car-truck, a distance-piece placed above or below an elliptic spring.

spring-board (spring′bōrd), *n.* An elastic board used in vaulting, etc.

springbok (spring′bok), *n.* [< S. African D. *spring-bok* (= G. *spring-bock*), a wild goat, < *spring*, = E. *spring*, + *bok* = E. *buck*[1].] A beautiful gazel, *Gazella euchore*, so called by the Dutch colonists of South Africa, where it abounds,

Springbok (*Gazella euchore*).

from its agility in springing upward when alarmed or as it scours the plain in escaping from its pursuers. It is of lithe and graceful form and handsome coloration, in which a rich tawny brown is varied with pure-white and black. Also *spring-boc*, *spring-buck*, *sprink-buck*, and *springer*.

spring-box (spring′boks), *n.* 1. The box which contains the mainspring of a watch or other mechanism; the barrel.—2. A box or some similar receptacle closed by a lid which opens or shuts by the elasticity of a spring or some similar device. See *palpal*.—3. In *upholstery*, the wooden frame within which the springs, as of a mattress or of the seat of a sofa, are contained.

spring-buck (spring′buk), *n.* Same as *springbok*. *Imp. Dict.*

spring-carriage (spring′kar″āj), *n.* A wheeled carriage mounted upon springs.

spring-cart (spring′kärt), *n.* A light cart mounted upon springs.

springe[1] (sprinj), *v. t.*; pret. and pp. *springed*, ppr. *springeing*. [< ME. *sprengen*, < AS. *sprengan*,

causal of *springan*, spring: see *spring*, and cf. *spreng* (of which *springe* is the proper form (cf. *singe*, as related to *sing*), now only dialectal).] To sprinkle. *Halliwell.* [Prov. Eng.]

springe[2] (sprinj), *n.* [< ME. *springe*, < *springen*, spring: see *spring*, *v.* Cf. *springle*, and D. *spring-net*, a spring-net, OHG. *springa*, MHG. *sprinke*, a bird-snare.] A noose or snare for catching small game; a gin. It is usually secured to an elastic branch, or small sapling, which is bent over and secured by some sort of trigger which the movements of the animal will release, when it flies up and the noose catches the game.

A woodcock to mine own *springe*.
Shak., Hamlet, v. 2. 317.

I will teach thee a *springe*, Tony, to catch a pewit.
Scott, Kenilworth, xli.

springe[2] (sprinj), *v.*; pret. and pp. *springed*, ppr. *springeing*. [< *springe*[2], *n.*] **I.** *trans.* To catch in a springe.

We *springe* ourselves, we sink in our own bogs.
Fletcher (*and another*), Queen of Corinth, iv. 4.

II. *intrans.* To set springes; catch game by means of springes.

springe[3] (sprinj), *a.* [< *spring*, *v.*] Active; nimble; brisk; agile. [Prov. Eng.]

The squire 's pretty *springe*, considering his weight.
George Eliot, Silas Marner, xi.

★**springer** (spring'ėr), *n.* [< *spring* + *-er*[1].] 1. One who or that which springs, in any sense. (*a*) A growing plant, shrub, or tree; a sapling.

The young men and maidens go out into the woods and coppices, cut down and spoil young *springers* to dress up their May-booths. *Evelyn*, Sylva, IV. iv. § 4.

(*b*) A youth; a lad. *Halliwell.* [Prov. Eng.]

2. In *arch.*: (*a*) The impost or place where the vertical support to an arch terminates, and the curve of the arch begins. (*b*) The lower voussoir or bottom stone of an arch, which lies immediately upon the impost. (*c*) The bottom stone of the coping of a gable. (*d*) The rib of a groined roof or vault. See *cross-springer*.— 3. A dog of a class of spaniels resembling the cocker, used, in sporting, to spring or flush game. See *spaniel*.

The *Springer* is smaller than the former (the Water Spaniel), of elegant form, gay aspect, and usually white with red spots, black nose and palate.
Quoted in *N. and Q.*, 7th ser., V. 376.

4. The springbok.— 5. A grampus.—**Springer antelope**, the springbok.

Springfield gun, rifle. See *gun*[1], *rifle*[2], also cut under *bullet*.

spring-flood (spring'flud), *n.* [< ME. *spring-flood* (= D. *spring-vloed* = G. *spring-fluth* = Sw. Dan. *spring-flod*); as *spring* + *flood*.] Same as *springtide*.

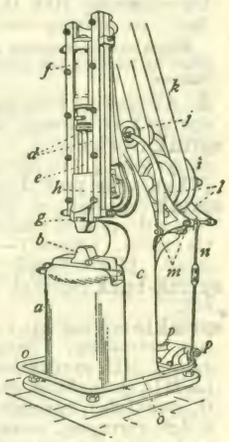
Than shal she [the moon] been evene atte fulle alway,
And *spryng-flood* laste bothe nyght and day.
Chaucer, Franklin's Tale, l. 342.

spring-fly (spring'flī), *n.* A caddis-fly.

spring-forelock (spring'fōr″lok), *n.* A cotter-key having a spring in the entering end to prevent its accidental withdrawal. *E. H. Knight.*

spring-garden† (spring'gär″dn), *n.* A word of doubtful meaning, possibly a corrupt form; perhaps, according to Nares, a garden where concealed springs were made to spout jets of water upon the visitors.

Sophocles [bound]. Thy slave, proud Martius?
. . . not a vein runs here
From head to foot, but Sophocles would unseam, and
Like a *spring-garden* shoot his scornful blood
Into their eyes durst come to tread on him.
Beau. and Fl., Four Plays in One, Play 1st.



spring-gun (spring'gun), *n.* A gun which is discharged by the stumbling of a trespasser upon it, or against a wire connected with the trigger; also, a gun similarly set for large animals, as bears or wolves.

spring-haas (spring'häs), *n.* [< S. African D. *spring-haas*, < *spring* (= E. *spring*) + *haas*, a hare, = E. *hare*: see *spring* and *hare*[1].] The Cape jumping-hare, *Pedetes caffer*, a kind of jerboa, of the family *Dipodidæ*. See cut under *Pedetes*.

spring-halt (spring'hâlt), *n.* [Also, corruptly, *string-halt*; < *spring* + *halt*[1].] An involuntary convulsive movement of the muscles of either hind leg in the horse, by which the leg is suddenly and unduly raised from the ground and lowered again with unnatural force; also, the nervous disorder on which such movements depend, and the resulting gait.

One would take it,
That never saw 'em pace before, the spavin
Or *springhalt* reign'd among 'em.
Shak., Hen. VIII., i. 3. 13.

spring-hammer (spring'ham″ėr), *n.* A machine-hammer in which the blow is partly or wholly made by a spring to which tension has been imparted by mechanism during the lift of the hammer-head. In some hammers the spring is a volume of confined and compressed air. In the accompanying cut *a* is the anvil-block; *b*, anvil; *c*, frame; *d*, guides for hammer; *e*, piston-rod; *f*, cylinder; *g*, hammer; *h*, crank (driven by the pulley *i*) which lifts the hammer, at the same time compressing the air in the air-spring cylinder *f*; *j*, idler-pulley which tightens the driving-belt *k* when pressed against the belt by the action of the rock-lever *l*, the rod *n*, and the foot-lever or treadle *o*— the rock-lever *l* being pivoted to the frame at *m*, while the treadle is pivoted to it at *p*. Pressure upon the treadle by the foot tightens the belt, and the hammer is then raised. The treadle is then relieved from pressure, the belt is slackened on the pulley *i*, and the compressed air, acting on the piston, delivers the blow, the belt then slipping easily over the pulley *i*.

Spring-hammer.

spring-hanger (spring'hang″ėr), *n.* A U-shaped strap of iron serving to support the end of a semi-elliptical car-spring.

spring-head (spring'hed), *n.* 1. A fountain-head; a source.

Water will not ascend higher than the level of the first *spring-head* from whence it descendeth.
Bacon, Advancement of Learning, i.

2. A clutch, button, or other connecting device at the end of an elliptic carriage-spring.

spring-headed† (spring'hed″ed), *a.* Having heads that spring afresh. [Rare.]

Spring-headed Hydres, and sea-shouldring Whales.
Spenser, F. Q., II. xii. 23.

spring-hook (spring'hůk), *n.* 1. In locomotives, a link connecting the driving-wheel spring to the frame.— 2. A latch or door-hook having a spring-catch to keep it fast in the staple.—3. A fish-hook set like a spring-trap, with a supplementary hook, which, on being released, fixes itself in the fish; a snap-hook. Also called *spear-hook*.

spring-house (spring'hous), *n.* A small building constructed over a spring or brook, where milk, fresh meat, etc., are placed in order to be kept cool in or near the running water. [U. S.]

As I was a-settin' in the *spring-house*, this mornin', a-workin' my butter, I says to Dinah, "I'm goin' to carry a pot of this down to Miss Scudder."
H. B. Stowe, Minister's Wooing, iv.

springiness (spring'i-nes), *n.* 1. The state or property of being springy; elasticity.

The air is a thin fluid body endowed with elasticity and *springiness*, capable of condensation and rarefaction.
Bentley.

2. The state of abounding with springs; wetness; sponginess, as of land.

★**springing** (spring'ing), *n.* [< ME. *springing*, *spryngynge*; verbal n. of *spring*, *v.*] 1. The act or process of leaping, arising, issuing, or proceeding; also, growth; increase.

The Poo out of a welle smal
Taketh his firste *springing* and his sors.
Chaucer, Prol. to Clerk's Tale, l. 49.

Thou visitest the earth, and waterest it. . . . Thou makest it soft with showers; thou blessest the *springing* thereof. Ps. lxv. 10.

2. In *arch.*, the point from which an arch springs or rises; also, a springer.

springing (spring'ing), *p. a.* Liable to arise; contingent: as, *springing* uses. See *use*.

springing-beetle (spring'ing-bē″tl), *n.* Same as *spring-beetle*.

springing-course (spring'ing-kōrs), *n.* See *course*[1].

springing-hairs (spring'ing-hãrz), *n. pl.* The locomotory cilia of some infusorians, as the *Halteriidæ*, by means of which these animalcules skip about.

springing-line (spring'ing-līn), *n.* The line from which an arch springs or rises; the line in which the springers rest on the imposts, and from which the rise or versed sine is calculated.

springing-time† (spring'ing-tīm), *n.* [< ME. *springing time*; < *springing* + *time*.] The time of the new growing of plants; spring-time; spring.

[T]he furst age of man locond & light,
The *springynge tyme* clepe "ver."
Babees Book (E. E. T. S.), p. 169.

springing-tool (spring'ing-töl), *n.* In *iron-working*, same as *hanging-tool*.

springing-wall (spring'ing-wâl), *n.* In *building*, a buttress.

spring-jack (spring'jak), *n.* In *teleg.*, a device for inserting a loop in a line-circuit. It usually consists of a plug to be inserted between two spring-contacts, the ends of the loop being joined to metallic strips fixed to the opposite sides of the insulating plug. If the latter is entirely of insulating material, it becomes a *spring-jack cut-out*.

spring-latch (spring'lach), *n.* A latch that snaps into the keeper after yielding to the pressure against it. See cuts under *latch*.

springle (spring'l), *n.* [= D. G. *sprenkel*, a noose, snare, springe, = Sw. *spränkla*, a springle, = Dan. *sprinkel*, trellis; a dim. of *spring*, *springe*, in similar senses: see *spring*, *springe*[2].] 1. A springe.

They [woodcocks] arriue first on the north coast, where almost euerie hedge serueth for a roade and euerie plashoote for *springles* to take them.
R. Carew, Survey of Cornwall, fol. 25.

2. A rod about four feet in length, used in thatching. *Halliwell.* [Prov. Eng.]

springless (spring'les), *a.* [< *spring* + *-less*.] Lacking springs or spring. (*a*) Having no springs, or natural fountains of water. (*b*) Lacking elastic springs: as, a *springless* wagon.

springlet (spring'let), *n.* [< *spring* + *-let*.] A little spring; a small stream.

But yet from out the little hill
Oozes the slender *springlet* still.
Scott, Marmion, vi. 37.

spring-ligament (spring'lig″a-ment), *n.* The inferior calcaneoscaphoid ligament of the sole of the foot, connecting the os calcis or heel-bone with the scaphoid, supporting the head of the astragalus, and forming part of the articular cavity in which the latter is received.

springlike (spring'līk), *a.* Resembling spring; characteristic of spring; vernal: as, *springlike* weather; a *springlike* temperature.

There the last blossoms *spring-like* pride unfold.
Savage, Wanderer, v.

spring-line (spring'līn), *n.* In *milit. engin.*, a line passing diagonally from one pontoon of a bridge to another.

spring-lock (spring'lok), *n.* A lock which fastens itself automatically by a spring when the door or lid to which it is attached is shut. Also called *latch-lock*.

spring-mattress (spring'mat″res), *n.* See *mattress* and *spring-bed*.

spring-net (spring'net), *n.* A bird-net which can be shut by means of a spring and trigger; a flap-net. A net of similar form is used for trapping rabbits.

springold[1]†, *n.* Same as *springal*[1].

springold[2]†, **springowt**†, *n.* Same as *springal*[2].

spring-oyster (spring'ois″tėr), *n.* A thorn-oyster. See cut under *Spondylus*.

spring-padlock (spring'pad″lok), *n.* A padlock which locks automatically by means of a spring when the hasp is pressed into its seat.

spring-pawl (spring'pâl), *n.* A pawl actuated by a spring.

spring-plank (spring'plangk), *n.* A transverse timber beneath a railway truck-bolster, forming a support for the bolster-springs. *E. H. Knight.*

spring-pole (spring'pōl), *n.* A pole fastened so that its elasticity can be used for some mechanical purpose.—**Spring-pole drilling**, a method of boring holes in rock for oil, water, or any other purpose, in which the rods and drill are suspended from a spring-pole, which by its elasticity lifts them up after every stroke. The down motion is effected by hand-power, or sometimes a stirrup is added to enable the driller to use his feet. Prospecting-holes of from two to three inches in diameter can be bored with this simple apparatus to the depth of one or two hundred feet, or even more.

spring-punch (spring'punch), *n.* A punch which has a spring to throw it back after it has been driven down by pressure. This is usually done only in quick-working punches which are driven by the blows of a hammer, or in hand-punches such as those used by shoemakers, railway conductors, etc.

spring-searcher (spring'sėr″chėr), *n.* A tool having steel prongs projected by springs, used to detect defects in a cannon-bore.

spring-shackle (spring'shak″l), *n.* 1. A shackle closed by a spring.— 2. A shackle connecting two springs, or connecting a spring to a rigid part: used in vehicles, etc.

spring-stay (spring'stā), *n.* *Naut.* See *stay*[1].

spring-stud (spring'stud), *n.* A rod passed through the axis of a coil-spring to hold the

spring in place. The upper end works in a guide. See cut under *oiler*.

springtail (spring'tāl), *n.* **1.** A collembolous thysanurous insect which leaps or skips about by means of abdominal hairs acting like a spring, as any poduran. In these creatures the anal bristles are united and bent under the body, forming a spring by the aid of which they leap to a great height. They are found in gardens, in hotbeds, on manure-heaps in winter, and on snow, and may also be seen on the surface of water in quiet pools. See *Collembola*, 2, *Podura*, and *Thysanura*.

Springtails.
1, *Degeeria nivalis*; 2, a poduran; both greatly enlarged.

2. A thysanurous insect of the suborder *Cinura*, oftener called *bristletail*. See *Cinura*, *Lepisma*, and cut under *silverfish*.—**3.** One of certain minute mecopterous insects of the panorpid genus *Boreus*, found in moss and on the surface of snow; a snow-fly. This insect springs, but not by means of anal appendages.

spring-tailed (spring'tāld), *a.* Springing by means of the tail, or having a spring on the tail, as a collembolous insect; thysanurous; podurous.

spring-tide (spring'tīd), *n.* [= D. *spring-tij*, spring-tide, = G. *spring-zeit*, high tide, = Sw. Dan. *spring-tid*, spring-tide; as *spring*, *v.*, rise, + *tide*.] **1.** The tide which occurs at or soon after the new and full moon, and rises higher than common tides, the ebb sinking correspondingly lower. At these times the sun and moon are in a straight line with the earth, and their combined influence in raising the waters of the ocean is the greatest, consequently the tides thus produced are the highest. See *tide*.

Hence—**2.** Figuratively, any great flood or influx.

Yet are they doubly replenished by the first and latter *spring-tides* of devotion. *Sandys*, Travailes, p. 160.

springtide (spring'tīd), *n.* [< *spring*, *n.*, 3, + *tide*.] Springtime.

Sounds as of the *springtide* they, . . .
While the chill months long for May.
D. G. Rossetti, Love's Nocturn.

springtime (spring'tīm), *n.* Spring.

Primrose, first-born child of Ver,
Merry *spring-time's* harbinger.
Fletcher (*and another*), Two Noble Kinsmen, i. 1.

spring-tool (spring'tōl), *n.* A light tongs closing by a spring, used by glass-blowers.

spring-trap (spring'trap), *n.* **1.** A trap working by a spring, which may cause a door or bar to fall when the detent is released by the moving of the bait, or may throttle the victim, as in an ordinary form of mouse-trap, etc.—**2.** A form of steam-trap. *E. H. Knight*.

spring-valve (spring'valv), *n.* **1.** A valve fitted with a spring, which holds it to its seat except when it is opened by extraneous force.—**2.** A safety-valve with which is connected a spring-balance, graduated to any required number of pounds, and acting as a check on the valve until the determined pressure is attained. See cut under *safety-valve*.

spring-wagon (spring'wag″on), *n.* A wagon the bed of which rests on springs.

spring-water (spring'wâ″tėr), *n.* Water issuing from a spring: in contradistinction to *river-water*, *rain-water*, etc.

Spare Diet, and *Spring-water* clear,
Physicians hold are good.
Prior, Wandering Pilgrim.

spring-weir (spring'wēr), *n.* A kind of weir arranged to drop to the bottom at low water, and allow the fish to pass over it with the incoming tide, while at high water it is lifted up. It is worked from the shore by means of capstans and ropes, so that it forms an impassable barrier to the fish, which are retained as the tide passes out, and are thus taken in large numbers. [Maine.]

spring-worm (spring'wėrm), *n.* A pin-worm, as *Oxyuris vermicularis*; a small threadworm. See cut under *Oxyuris*.

springwort (spring'wėrt), *n.* [< ME. *sprynge-wurt*, *sprungwurt*; < *spring* + *wort*1.] In European folk-lore, a plant to which various magical virtues were attributed, among them that of drawing down the lightning and dividing the storm: identified by Grimm with the caper-spurge, *Euphorbia Lathyris*. *Dyer*, Folk-lore of Plants.

springy (spring'i), *a.* [< *spring* + *-y*1.] **1.** Having elasticity like that of a spring; elastic; light: as, *springy* steel; a *springy* step.

Which vast contraction and expansion seems unintelligible by feigning the particles of air to be *springy* and ramous. *Newton*, Opticks, iii. query 31.

2. Abounding with springs or fountains; wet; spongy: as, *springy* land.

sprink (springk), *v. t.* [A dial. var. of *spring*; cf. *sprinkle*.] To sprinkle; splash. *Halliwell*. [Obsolete or prov. Eng.]

sprink (springk), *n.* [< *sprink*, *v.*] **1**†. A sprinkle; a drop, as of water. *Howell*, Arbor of Amitie (1568). (*Nares*.)—**2.** A crack or flaw. *Halliwell*. [Prov. Eng.]

sprink-buck (springk'buk), *n.* Same as *springbok*.

★**sprinkle** (spring'kl), *v.*; pret. and pp. *sprinkled*, ppr. *sprinkling*. [Early mod. E. *sprenkle*, *sprenkyll*, < ME. *sprenkelen*, *sprynklen*, *springgolen* (= MD. *sprinckelen*, *sprenckelen*, D. *sprenkelen* = G. *sprenkeln*), sprinkle; freq. of ME. *sprengen*, < AS. *sprengan*, causal of *springan*, *sprincan*, spring: see *spreng* and *spring*. Cf. *sprink*.] **I.** *trans.* **1.** To scatter in drops or particles; let fall in minute quantities here and there; strew.

To *sprenkylle*; spergere, fundere. *Cath. Ang.*, p. 356.

Take to you handfuls of ashes of the furnace, and let Moses *sprinkle* it toward the heaven in the sight of Pharaoh. Ex. ix. 8.

2. To besprinkle; bespatter or bestrew; overspread with drops or particles, as of a powder, liquid, coloring matter, etc.

Valerianus . . . at last was flayed aliue, and *sprinkled* with Salt. *Purchas*, Pilgrimage, p. 357.

3. To cleanse with drops, as of water; wash; purify.

Having our hearts *sprinkled* from an evil conscience. Heb. x. 22.

4. To distribute here and there; diffuse.

Upon the heat and flame of thy distemper
Sprinkle cool patience. *Shak.*, Hamlet, iii. 4. 124.

These and such other reflections are *sprinkled* up and down the writings of all ages. *Steele*, Spectator, No. 11.

5. To diversify by objects placed here and there over the surface; dot.

Spacious meads, with cattle *sprinkled* o'er.
Cowper, Task, i. 164.

II. *intrans.* **1.** To issue in fine drops or particles; be sprinkled.

It will make the water *sprinkle* up in a fine dew. *Bacon*.

2†. To send out sparks; scintillate; sparkle.

Toward the lady they come fast rennyng,
And sette this whele uppon her hede,
As eny hote yren yt was *sprynggolyng* rede.
MS. Laud. 416, f. 70. (*Halliwell*.)

3. To rain slightly: used impersonally: as, does it *sprinkle*?—**4.** To scatter a liquid or any fine substance so that it may fall in small particles.

The priest . . . shall *sprinkle* of the oil with his finger. Lev. xiv. 16.

5†. To dart hither and thither.

The siluer scalit fyschis on the grete,
Ouer thowrt clere stremes *sprinkilland* for the hete,
With fynnys schinand broun as synopare.
Gavin Douglas, tr. of Virgil, p. 400.

sprinkle (spring'kl), *n.* [< ME. *sprynkil*, *sprenkill*, *sprenkylle* (cf. MHG. G. *sprengel*); from the verb.] **1**†. A utensil for sprinkling; a sprinkler; specifically, a brush for sprinkling holy water; an aspersorium.

And the litil *sprynkil* of ysop wetith in bloode, that is in the nethir threswold, and sprengith of it the ouerthreswold, and either post. *Wyclif*, Ex. xii. 22.

She alway smyld, and in her hand did hold
An holy-water-*sprinckle*, dipt in deowe.
Spenser, F. Q., III. xii. 13.

2. A sprinkling, or falling in drops; specifically, a light rain.

He meets the first cold *sprinkle* of the world,
And shudders to the marrow.
Browning, Ring and Book, II. 213.

3. That which is sprinkled about; hence, a scattering or slight amount; a sprinkling.—**4.** A light tinkling sound; a tinkle. [Rare.]

At Sorrento you hear nothing but the light surges of the sea, and the sweet *sprinkles* of the guitar.
Landor, Imag. Conv., Tasso and Cornelia.

5. *Milit.*, same as *morning-star*, 2.

sprinkled (spring'kld), *a.* [< *sprinkle* + *-ed*2.] Marked by small spots; appearing as if sprinkled from a wet brush: specifically noting a kind of decoration of pottery, the edges of cheaply bound books, etc.

★**sprinkler** (spring'klėr), *n.* [< *sprinkle* + *-er*1.] **1.** One who or that which sprinkles. Especially —(*a*†) A spherical or barrel-shaped vase having a small spout. Such vases were grasped in the hand, and the liquid contents thrown out with a jerking motion. (*b*) A brush for sprinkling holy water. Compare *aspersorium*, 1. (*c*) A device for spraying water over plants, or over a lawn, etc.

2. *Milit.*, same as *morning-star*, 2.—**Holy-water sprinkler.** See *holy*.

sprinkling (spring'kling), *n.* [Verbal n. of *sprinkle*, *v.*] **1.** The act of one who sprinkles, in any sense of the word; aspersion.

Your uncleanly unctions, your crossings, creepings, censings, *sprinklings*. *Bp. Hall*, Epistles, i. 1.

2. A small quantity falling in distinct drops or parts, or coming moderately: as, a *sprinkling* of rain or snow. Hence—**3.** A small amount scattered here and there, as if sprinkled.

We have a *sprinkling* of our gentry, here and there one, excellently well learned. *Burton*, Anat. of Mel., p. 197.

4. In *bookbinding*, the operation of scattering a shower of fine drops of color on the trimmed edges of the leaves to produce a mottled effect. It is done by striking a brush charged with color against a rod held above the edges of the book to be sprinkled.

sprint (sprint), *v. i.* [Also dial. *sprunt*; a later form of *sprent*1, q. v. Cf. *spurt*2, *spirt*2.] To run at full speed, as in a short-distance foot-race. *Nineteenth Century*, XXI. 520.

sprint (sprint), *n.* [< *sprint*, *v.*] A run at full speed, as in a short-distance foot-race.

sprinter (sprin'tėr), *n.* A contestant in a sprint-race; a short-distance runner. *Encyc. Brit.*, XXI. 61.

sprinting (sprin'ting), *n.* [Verbal n. of *sprint*, *v.*] The act or the sport of running at full speed, as in a short-distance foot-race.

sprint-race (sprint'rās), *n.* A short-distance foot-race.

sprint-runner (sprint'run″ėr), *n.* Same as *sprinter*. *The Century*, XL. 206.

sprit1† (sprit), *v.* [< ME. *sprutten*, < AS. *spritan*, *spryttan* (= LG. *sprutten* = G. *spritzen*, *sprützen*), sprout, a secondary form of *spreótan*, sprout: see *sprout*. Cf. *spirt*1, *spurt*1.] **I.** *intrans.* To sprout; bud; germinate, as barley steeped for malt.

The withi thet *sprutteth* ut. *Ancren Riwle*, p. 86.

II. *trans.* To throw out with force from a narrow orifice; eject; spurt. *Sir T. Browne*.

sprouting (sprou'ting), *n.* 1. In fungi, same as *pullulation*, 2. — 2. Same as *spitting*, 2.

spruce[1]† (sprös), *n.* [An abbr. of *Spruce leather*, also *Pruce leather*, where *Spruce* or *Pruce* is an attributive use of the older E. name of Prussia; < ME. *Spruce*, a variant, with unorig. initial *S-*, of *Pruce*, *Prus*, *Pruys* (also in comp. *Pruslond*, *Pruyslond*), < OF. *Pruce* (F. *Prusse*), < ML. *Prussia* (G. *Preussen* = D. *Pruissen* = Sw. Dan. *Preussen*), Prussia: see *Prussian*. The name *Spruce*, Prussia, was not only used in the phrase *Spruce leather*, or *Pruce leather*, but also in connection with fashionable apparel ("apparreyled after the manner of Prussia or *Spruce*," Hall, Henry VIII., an. 1), and also allusively, somewhat like *Cockayne*, as a land of luxury ("He shall liue in the land of *Spruce*, milke and hony flowing into his mouth sleeping"— Chapman, "Masque of Middle Temple and Lincoln's Inn"). Hence prob. the adj. *spruce*[2]. Cf. *spruce*[2].] Prussian leather. Compare *Pruce*.

Spruce, corium pumicatum.
Levins, Manip. Vocab. (E. E. T. S.), p. 182.

spruce[2] (sprös), *a.* [Sc. also *sprush;* prob. an extended use of *spruce*[1], in allusion to fashionable apparel: see *spruce*[1]. This adjective cannot be derived, as some attempt to derive it, from ME. *prous*, *preus*, < OF. *proz*, F. *preux*, brave, etc. (see *prow*[2]), or from E. dial. *sprug*[1] or *sprack*.] 1. Smart in dress and appearance; affecting neatness or dapperness, especially in dress; trim; hence often, with a depreciatory force, dandified; smug.

Now, my *spruce* companions, is all ready, and all things neat? *Shak.*, T. of the S., iv. 1. 116.

Be not in so neat and *spruce* array
As if thou mean'st to make it holiday.
Beaumont, Remedy of Love.

A *spruce* young spark of a Learned Clerk.
Barham, Ingoldsby Legends, I. 227.

2. Over-fastidious; excessively nice; finical.

Taffeta phrases, silken terms precise,
Three-piled hyperboles, *spruce* affectation.
Shak., L. L. L., v. 2. 407.

Salmacis would not be seen of Hermaphroditus till she had *spruced up* her self first. *Burton*, Anat. of Mel., p. 335.

2. To brown, as the crust of bread, by heating the oven too much. *Halliwell.* [Prov. Eng.]

II. *intrans.* To become spruce; assume or affect an air of smartness in dress: often followed by *up*. [Chiefly colloq.]

But two or three years after, all of a sudden, Dench, he seemed to kind o' *spruce up* and have a deal o' money to spend. *H. B. Stowe*, Oldtown, p. 193.

★**spruce**[3] (sprös), *n.* [An abbr. of *spruce-fir*.] A coniferous tree of the genus *Picea;* a spruce-fir. The species are handsome evergreens of a conical habit, often of great economic worth. Some related trees are also called spruce. See specific names below.

For masts, &c., those [firs] of Prussia which we call *spruce* and Norway are the best. *Evelyn*, Sylva, I. xxii. § 2.

Black spruce, *Picea Mariana*, a species of spruce growing 50 or 60 feet high, found through British America, the northern United States, and in the Alleghanies to North Carolina. Its light soft wood is largely made into lumber, and is used in construction, in ship-building, for piles, etc. An essence of spruce is obtained from its branches, used in making spruce-beer.—**Blue spruce.** Same as *white spruce* (*c*).—**Double spruce**, the black spruce.—**Douglas spruce**, *Pseudotsuga mucronata*. See *Pseudotsuga*, and *Oregon pine* (under *pine*[1]).—**Essence of spruce**, a thick liquid with a bitterish acidulous astringent taste, obtained by boiling and evaporation from the young branches of the Norway spruce, the black spruce, and perhaps other species. It is used in making spruce-beer.—**Hemlock spruce.** See *hemlock-spruce*.—**Himalayan** or **Indian spruce**, *Picea Smithiana*, of the temperate Himalayas and Afghanistan, a tree 150 feet high, affording a pale straight-grained timber, durable only under shelter.—**New Zealand spruce**, the imou-pine, or red pine, *Dacrydium cupressinum*, a beautiful tree with long weeping branches. From the young growth Captain Cook made an antiscorbutic spruce-beer. See *imou-pine*.—**Norway spruce**, *Picea Abies*, a spruce of middle and northern Europe and northern Asia. It attains a height of 150 feet, forms extensive forests, endures severe cold, and on mountains reaches an elevation of 4,500 feet. Its tough and elastic wood is the white deal of Europe, excellent for building, furniture, masts, spars, etc. It is the source of Burgundy pitch. See *pitch*[2].—**Oil of spruce**, oil of hemlock.—**Red spruce**, a stunted form of the black spruce, growing in swamps.—**Single spruce.** Same as *white spruce* (*a*).—**Spruce bud-louse**, an aphid of the subfamily *Chermesinæ*, *Adelges abieticolens*, which deforms the end-shoots of the spruce in the United States, producing large swellings sometimes mistaken for the natural cones. In Europe *A. coccineus* and *A. strobilobius* have the same habit.—**Spruce bud-worm**, the larva of a tortricid moth, as *Tortrix fumiferana*, which eats the end-buds of the spruce in northeastern parts of the United States, especially in Maine. Other spruce bud-worms are the reddish-yellow, *Epinotia ratzeburgiana*; the black-headed, *Thiodia variana*; and the red, *Gelechia obliquistrigella*.—**Spruce cone-worm**, the larva of a phycid moth, *Dioryctria reniculella*, which bores the fresh young cones of spruces in the United States.—**Spruce leaf-hopper**, an oblong shining-black leaf-hopper, *Athysanus abietis*, which punctures spruce-needles in May and June in the United States.—**Spruce plume-moth**, *Oxyptilus tenuidactylus*. Its larva feeds on spruce, and it is the only member of the *Pterophoridæ* known to infest any conifer.—**Spruce saw-fly**, a common saw-fly, *Lophyrus abietis*, whose pale-green larvæ defoliate spruce, fir, pine, and cedar in the United States, but especially spruce.—**Spruce timber-beetle**, *Xyloterus bivittatus*, the most injurious of several scolytids which attack the spruce in the United States. Others are *Xyloborus* (or *Xyleborus*) *cælatus*, *Cryptturgus atomus*, *Pityophthorus materiarius*, and *Hylurgops pinifex*.—**Tideland spruce**, *Picea Sitchensis*, a spruce found from Alaska to California near the coast, best developed near the mouth of the Columbia river, where for 50 miles in each direction it forms a forest-belt 10 or 15 miles wide. It grows from 140 to 180 feet high, and furnishes an important light, soft, and straight-grained timber, largely manufactured into lumber, and used for construction, inside finish, cooperage, dunnage of vessels, etc. *Sargent*.—**White spruce.** (*a*) *Picea Canadensis*, the most important timber-tree of subarctic America, extending into northern New England, and at its best in northern Montana. Its timber in commerce is not distinguished from that of the black spruce. Also *single spruce*. (*b*) *P. Engelmanni*, the most valuable timber-tree of the central Rocky Mountain region, where it forms extensive forests. Its wood is of a white or pale-yellow color, light and soft, in Colorado affording lumber, fuel, and charcoal. The bark is rich in tannin, which is locally utilized. (*c*) *P. Parryana*, a rare and local mountain species of the western United States. Also called *blue spruce*, *Colorado blue spruce*.

Branchlet, with Cone, of Norway Spruce (*Picea Abies*).

spruce[4] (sprös), *n.* An abbreviation of *spruce-beer*. [Colloq.]

"Come, friend," said Hawk-eye, drawing out a keg from beneath a cover of leaves, . . . "try a little *spruce*; 'twill . . . quicken the life in your bosom."
J. F. Cooper, Last of Mohicans, vi.

spruce-beer (sprös'bēr), *n.* [A partial translation and accommodation (as if 'beer of spruce' or spruce-fir (< *spruce*[3] + *beer*[1]), or as if *Spruce beer*, i. e. 'beer of Spruce' or Prussia (< *Spruce*, or *Pruce*, Prussia (see *spruce*[1]), + *beer*[1])) of G. *sprossen-bier*, lit. 'sprouts-beer,' obtained from the young sprouts of the black spruce-fir, < *sprossen*, pl. of *spross*, a sprout (= E. *sprot*), + *bier* = E. *beer*: see *sprot*[1] and *beer*[1].] A beer made from the leaves and small branches of the spruce-fir, or from the essence of spruce, boiled with sugar or molasses, and fermented with yeast. There are two kinds, the brown and the white, of which the latter is considered the better, as being made with white sugar instead of molasses. Spruce-beer is an agreeable and wholesome beverage, and is useful as an antiscorbutic.

spruce-duff (sprös'duf), *n.* Duff formed by spruce-trees. See *duff*, 3. [Local, U. S.]

The soil . . . consisted of from two to four feet of what is known among the woodsmen of northern New York as *spruce-duff*, which is composed of rotten spruce-trees, cones, needles, etc. *Pop. Sci. Mo.*, XIII. 289.

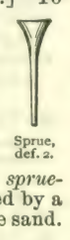
spruce-fir (sprös'fėr), *n.* [A partial translation and accommodation (as if 'fir of Spruce' or Prussia, < *Spruce*, or *Pruce*, Prussia, + *fir*[1]: see *spruce*[3], and the quot.) of the G. *sprossen-fichte*, the spruce-pine or -fir, whose sprouts furnish the beer called *spruce-beer*, < *sprossen*, pl. of *spross*, a sprout, + *fichte*, pine, fir. Cf. *spruce-beer*.] Same as *spruce*[3]: applied somewhat specifically to the Norway spruce.

spruce-grouse (sprös'grous), *n.* The Canada grouse. See *grouse*, and cut under *Canace*.

spruce-gum (sprös'gum), *n.* A resinous exudation from the balsam-fir, *Abies balsamea*, used as a masticatory.

spruce-leather† (sprös'leтн'ėr), *n.* Same as *spruce*[1].

sprucely (sprös'li), *adv.* In a spruce manner; smartly; trimly; smugly.



spruceness (sprös'nes), *n.* The state or character of being spruce; smartness of appearance or dress.

spruce-ocher (sprös'ō″kėr), *n.* [Appar. < *Spruce*, Prussia (see *spruce*[1]), + *ocher*.] Brown or yellow ocher.

spruce-partridge (sprös'pär″trij), *n.* The spotted or Canada grouse, *Canace* or *Dendragapus canadensis*: so called in New England, Canada, etc., in distinction from the ruffed grouse, there known as the *partridge*, and because the bird is highly characteristic of the coniferous woods. See cut under *Canace*.

spruce-pine (sprös'pīn), *n.* See *pine*[1].

sprucify (sprö'si-fī), *v. t.*; pret. and pp. *sprucified*, ppr. *sprucifying*. [< *spruce*[2] + *-i-fy*.] To make spruce or fine; smarten. *Urquhart*, tr. of Rabelais, iii. 37. (*Davies*.) [Rare.]

Sprue, def. 2.

sprue[1] (sprö), *n.* [Origin obscure.] **1.** In casting metal, one of the passages leading from the "skimming-gate" to the mold; also, the metal which fills the sprue or sprue-gate after solidification: same as *dead-head*, 1 (*a*). Also called *spruegate*.—**2.** A piece of metal or wood used by a molder in making the ingate through the sand. *E. H. Knight*.

spur (spėr), *n.* [< ME. *spure, spore,* < AS. *spora,* a spur (*hand-spora,* 'hand-spur,' talon), = MD. *spore,* D. *spoor,* a spur, also a track, = MLG. *spore* = OHG. *sporo,* MHG. *spore, spor,* G. *sporn* = Icel. *spori* = Sw. *sporre* = Dan. *spore,* spur (cf. OF. *esporon, esperon,* F. *éperon* = Pr. *espero* = OSp. *esporon,* Sp. *espolón* = Pg. *esporão* = It. *sperone, sprone* (> E. obs. *speron*), also without the suffix, OSp. *espuera,* Sp. *espuela* = Pg. *espora,* a spur, < OHG. *sporo,* acc. *sporon*); orig. 'kicker,' from its use on the heel; from the root of *spurn, v.* Cf. *speer*[1], *spoor, speron,* from the same ult. root.] 1. A pointed instrument worn on the heel by a horseman to goad the horse. The earliest mediæval spurs were without rowels (see *prick-spur, goad-spur*); another form had a ball from which a short point projected, and was called the *ball-and-spike spur.* The rowel was first introduced in the thirteenth century, but was not common until the beginning of the fourteenth. The spurs of the fourteenth and fifteenth centuries are sometimes of extraordinary length on account of the projection of the steel flanchers which kept the heel far from the horse's side. See *rowel-spur* (with cut), also cut under *prick-spur.*

Forms of Spurs.
a, knight's spur (12th or 13th century); *b*, brass spur (Henry IV.); *c*, long-spiked rowel-spur (Edward IV.); *d*, long-necked brass spur (Henry VII.); *e*, steel spur (Henry VIII.).

Wyth-oute *spores* other spere spakliche he loked.
Piers Plowman (B), xviii. 12.

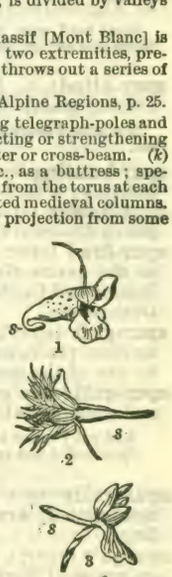
Mount thou my horse, and hide thy *spurs* in him,
Till he have brought thee up to yonder troops,
And here again. *Shak.,* J. C., v. 3. 15.

2. Anything which goads, impels, or urges to action; incitement; instigation; incentive; stimulus: used in this sense in the phrase *on* or *upon the spur of the moment*—that is, on a momentary impulse; suddenly; hastily; impromptu.

What need we any *spur* but our own cause
To prick us to redress? *Shak.,* J. C., ii. 1. 123.

If you were my counsel, you would not advise me to answer *upon the spur of the moment* to a charge which the basest of mankind seem ready to establish by perjury.
Scott, Guy Mannering, lvi.

3. Some projecting thing more or less closely resembling a horseman's spur in form or position. (*a*) A root of a tree; a large lateral root.



By the *spurs* pluck'd up
The pine and cedar. *Shak.,* Tempest, v. 1. 47.

Yet is thy root sincere, sound as the rock,
A quarry of stout *spurs* and knotted fangs.
Cowper, Yardley Oak, l. 117.

(*b*) *pl.* Short small twigs projecting a few inches from the trunk. *Halliwell.* [Prov. Eng.] (*c*) A snag; a spine; specifically, in *herpet.*: (1) An anal spur. (2) A calcar of some frogs. (*d*) In *entom.*, a spine or stiff bristle on the leg. (*e*) In *ornith.*: (1) A horny modification of the integument of a bird's foot, forming an outgrowth of the nature of a claw, usually sharp-pointed and supported on a bony core, and used as a weapon of offense and defense; a calcar. Such a spur differs from a claw mainly in not ending a digit, but being an offset from the side of the metatarsus; it is also characteristic of though not confined to the male, and is therefore a secondary sexual character. It is familiar as occurring on the shank of the domestic cock and other gallinaceous birds, and is sometimes double or treble, as in *Pavo bicalcaratus* and in the genera *Galloperdix, Ithaginis,* and *Polyplectron.* See cuts under *calcarate, Galloperdix, Ithaginis, pea-fowl, Polyplectron, Rasores,* and *tarsometatarsus.* (2) A similar horny outgrowth on the pinion-bone of the wing in various birds, resembling a claw, but differing in being a lateral offset not terminating a digit. It occurs in certain geese, plovers, pigeons, and jacanas, and is double in the screamer. See cuts under *jacana, Palamedea,* and *spur-winged.* (*f*) In *sporting,* a gaff, or sharp piercing or cutting instrument fastened upon the natural spur of a game-cock in the pit. (*g*) In *mammal.,* the calcar of some bats. (*h*) In *phys. geog.*, a ridge or line of elevation subordinate to the main body or crest of a mountain-range; one of the lower divisions of a mountain-mass, when this, as is frequently the case, is divided by valleys or gorges. See *mountain-chain.*

The ground-plan of the latter massif [Mont Blanc] is one long ridge, which, except at the two extremities, preserves a very uniform direction, and throws out a series of long *spurs* to the north-west.
Bonney, The Alpine Regions, p. 25.

(*i*) A climbing-iron used in mounting telegraph-poles and the like. (*j*) In *carp.*, a brace connecting or strengthening a post and some other part, as a rafter or cross-beam. (*k*) In *arch.*, any offset from a wall, etc., as a buttress; specifically, the claw or griffe projecting from the torus at each of the angles of the base of early Pointed mediæval columns. (*l*) In *bot.*, a calcar; a slender hollow projection from some part of a flower, as from the calyx of columbine and larkspur and the corolla of violets. It is usually nectariferous, being the nectary (nectarium) of Linnæus. The term is also rarely applied to a solid spur-like process. See also cuts under *nectary, columbine,* and *Delphinium.* (*m*) In *fort.*, a wall that crosses a part of the rampart and joins it to an anterior work. (*n*) In *ship-building:* (1) A shore or piece of timber extending from the bilgeways, and fayed and bolted to the bottom of the ship on the stocks. (2) A curved piece of timber serving as a half beam to support the deck where a whole beam cannot be placed. (3) A heavy timber extended from a pier or wharf against the side of a ship to prevent the ship from striking against the pier. (*o*) In *hydraul. engin.*, a wing-dam, or projection built out from a river-bank to deflect the current. (*p*) On a casting, a fin, or projection of waste metal. (*q*) A small piece of refractory clay ware with one or more projecting points, used in a kiln to support or separate articles in a saggar during firing, and to prevent the pieces from adhering to the saggar and to each other. Also called *stilt.* *E. H. Knight.* (*r*) In an auger, a projecting point on the edge, which makes the circular cut, from which the chip is removed by the lip. *E. H. Knight.* See cut under *auger.* (*s*) The prong on the arms of some forms of patent anchors, for the purpose of catching on the bottom and making the fluke bite or take hold more quickly. See cut under *anchor.* (*t*) In *printing,* a register-point. [Eng.] (*u*) In *anat.*, the angle at which the arteries leave a cavity or trunk. *Dunglison.* (*v*) In *mining,* a branch of a vein; a feeder or dropper.—**Anal spurs.** See *anal.*—**Hot o' the spur.** See *hot*[1].—**Order of the Golden Spur,** an old order of the papal court, of which the badge was a Maltese cross with rays between the arms, and having a small spur hanging from it. Having sunk into neglect, it was superseded in 1841 by the Order of St. Sylvester.—**Scotch spur,** in *her.*, a bearing representing a prick-spur without rowel.—**Spur-pepper.** See *Capsicum.*—**Spur system,** in *hort.*, a method of pruning grape-vines in which the ripened wood of the preceding season is cut back close to the old stem or arm, so as to leave spurs bearing one, two, or three buds, the spurs being so selected as to provide for shoots at equal distances. The growing shoots are trained to a position at right angles to the arm, whether this is horizontal or vertical, and are topped after the formation of one, two, or three bunches of grapes upon each.—**Spur valerian.** See *Centranthus.*—**To win one's spurs,** to gain a title to knighthood (because spurs were given as a reward for gallant or valiant action); hence, to establish a title to honorable recognition and reward.—**With spur and yard†,** with whip and spur—that is, at once.

s, Spur in the flowers of (1) *Impatiens biflora,* (2) *Tropæolum Moritzianum,* (3) *Orchis mascula,* (4) *Myosurus minimus.*

Trusteth wel that I
Wol be hire champyon *with spore and yerde,*

spurge-olive (spėrj'ol″iv), *n.* The mezereon.

spurgewort (spėrj'wėrt), *n.* [< late ME. *spurge-woort:* see *spurge*[2] and *wort*[1].] **1.** Any plant of the family *Euphorbiaceæ*.—**2**†. The fetid iris, *Iris fœtidissima*.

spurging† (spėr'jing), *n.* [Verbal n. of *spurge*[1], *v.*] Purging. *B. Jonson*, Masque of Queens.

spur-hawk (spėr'hâk), *n.* A dialectal form of *sparhawk* for *sparrow-hawk*. [Eng.]

spur-heeled (spėr'hēld), *a.* In *ornith.*, having a very long straightened hind claw; lark-heeled: specifically noting the coucals or cuckoos of the genus *Centropus*.

spuriæ (spū'ri-ē), *n. pl.* [NL., fem. pl. (sc. *pennæ*, feathers) of *spurius*, spurious: see *spurious*.] The packet of feathers growing on the bastard wing, winglet, or alula; the bastard quills, composing the alula. See cut under *alula*.

spurious (spū'ri-us), *a.* [= Sp. Pg. *espurio* = It. *spurio*, < L. *spurius*, of illegitimate birth, hence in gen. not genuine, false; perhaps akin to Gr. σπορά, seed, offspring, < σπείρειν, sow: see *spore*[2].] **1.** Not legitimate; bastard: as, *spurious* issue.

Her *spurious* first-born. *Milton*, S. A., l. 391.

2. Not proceeding from the true source or from the source pretended; not being what it pretends or appears to be; not genuine; counterfeit; false; adulterated.

Spurious gems our hopes entice,
While we scorn the pearl of price.
Cowper, Self-diffidence (trans.).

3. In *zoöl.*: (*a*) False; resembling a part or organ, but not having its function: as, *spurious* eyes or limbs. (*b*) Having the functions of an organ, but morphologically different from it: as, the *spurious* legs, or prolegs, of a caterpillar. (*c*) Aborted or changed so that the normal functions no longer exist: as, the *spurious* or aborted front legs of certain butterflies. (*d*) Erroneous; incorrectly established: as, a *spurious* genus or species. See *pseudogenus*.—**4.** In *bot.*, false; counterfeit; apparent only.—**Spurious Baltimore,** the orchard-oriole, *Icterus spurius*, formerly supposed to be a variety of the Baltimore oriole. Also called *bastard Baltimore*.—**Spurious claw,** in *entom.*, same as *empodium*.—**Spurious dissepiment,** in *bot.*, a partition in an ovary or pericarp not formed by parts of the carpels, but by an outgrowth commonly from the back of the carpel. See *dissepiment*.—**Spurious hermaphrodites.** See *hermaphrodite*, 1.—**Spurious ocellus,** a circular spot of color without any well-defined central spot or pupil.—**Spurious pareira.** See *pareira*.—**Spurious primary,** in *ornith.*, the first or outermost primary or remex of a bird's wing which has at least ten primaries and the first one very short, rudimentary, or functionless. Also called *spurious quill*.—**Spurious proposition, rainbow, stemma,** etc. See the nouns.—**Spurious sarsaparilla.** See *Hardenbergia*.—**Spurious vein,** in *entom.*, a faintly indicated vein or nervure of the wing, traceable only by a strong reflected light, particularly of certain hymenopters.—**Spurious wing,** in *ornith.*, the ala spuria, or bastard wing; the alula. See *spuriæ*, and cut under *alula*. [This use of *spurious* has no reference to the condition of a first primary so called. See above.]=**Syn. 2.** *Spurious*, *Supposititious*, and *Counterfeit* agree in expressing intent to deceive, except that *counterfeit* may be used with figurative lightness where no dishonorable purpose is implied. *Spurious*, not genuine, expresses strong disapprobation of the deception, successful or attempted. *Supposititious* applies only to that which is substituted for the genuine; it thus expresses a class under the *spurious*: a *supposititious* work of Athanasius is not one that is supposed to have been written by him, but one that is palmed off upon the public as being the genuine text of a work that he is known to have written; a *supposititious* child is a changeling; was the Tichborne claimant the genuine or a *supposititious* Sir Roger? *Counterfeit* applies also to a class under the *spurious*—namely, to that which is made in attempted imitation of something else: as, a *counterfeit* coin, bank-note, signature. Chatterton's manuscripts were *spurious*, but not *supposititious;* as they were not exact imitations of any particular manuscripts of early days, they would hardly be called *counterfeit*. See *factitious*.

spuriously (spū'ri-us-li), *adv.* In a spurious manner; counterfeitly; falsely.

spuriousness (spū'ri-us-nes), *n.* **1.** Illegitimacy; the state of being bastard, or not of legitimate birth: as, *spuriousness* of issue.—**2.** The state or quality of being spurious, counterfeit, false, or not genuine: as, the *spuriousness* of drugs, of coin, or of writings.

spur-leather (spėr'leтн″ėr), *n.* A strap by which a spur is secured to the foot.

I could eat my very *spur-leathers* for anger!
B. Jonson, Every Man in his Humour, ii. 1.

spur-legged (spėr'leg″ed or -legd), *a.* Having spurs or spines on the legs or feet. The *Leptidæ* are known as *spur-legged* flies.

spurless (spėr'les), *a.* [< *spur* + *-less*.] Without a spur, in any sense.

spurling (spėr'ling), *n.* A spelling of *sparling*.

spurling-line (spėr'ling-līn), *n.* *Naut.*: (*a*) A line connected with the axis of a wheel by which a telltale or index is made to show the position of the helm. (*b*) A rope stretched across between the two forward shrouds, having thimbles spliced into it to serve as fair-leaders for the running rigging.

spur-money† (spėr'mun″i), *n.* Money exacted for wearing spurs in church. See the quotation.

Our cathedrals (and above all St. Paul's) were, in Jonson's time, frequented by people of all descriptions, who, with a levity scarcely credible, walked up and down the aisles, and transacted business of every kind, during divine service. To expel them was not possible; such, however, was the noise occasioned by the incessant jingling of their spur-rowels, that it was found expedient to punish those who approached the body of the church, thus indecently equipped, by a small fine, under the name of *spur-money*, the exaction of which was committed to the beadles and singing-boys.
Gifford, Note to B. Jonson's Every Man out of his [Humour, ii. 1.

spurn[1] (spėrn), *v.* [< ME. *spurnen*, *spornen*, < AS. *speornan* (**spornan*, *ge-speornan*, *ge-spornan*, **spurnan*, in Somner, not authenticated), also in comp. *æt-speornan*, *æt-spornan* (pret. *spearn*, pl. *spurnon*, pp. *spornen*) = OS. *spurnan* = OHG. *spurnan* = Icel. *sporna*, *spyrna*, also *sperna*, kick against, spurn with the feet, = L. *spernere*, despise; ult. connected with *spur*.] **I.** *trans.* **1.** To kick against; kick; drive back or away with the foot.

And Galashin with his fote *spurned* his body to grounde.
Merlin (E. E. T. S.), ii. 199.

Am I so round with you as you with me,
That like a football you do *spurn* me thus?
Shak., C. of E., ii. 1. 83.

2†. To strike against.

Aungils in hondis schullen beere thee,
Lest thou *spurne* thi foot at a stoon.
Hymns to Virgin, etc. (E. E. T. S.), p. 48.

3. To reject with disdain; scorn to receive or consort with; treat with contempt.

O how my soul would *spurn* this ball of clay,
And loathe the dainties of earth's painful pleasure!
Quarles, Emblems, v. 13.

II. *intrans.* 1. To kick.

I purpose not to *spurn* against the prick, nor labour to set up that which God pulleth down.
Bp. of Ely, in J. Gairdner's Richard III., iv.

2†. To dash the foot against something; light on something unexpectedly; stumble.

No wight on it *sporneth*
That erst was nothynge, into nought it torneth.
Chaucer, Troilus, ii. 797.

The maid . . . ran upstairs, but, *spurning* at the dead body, fell upon it in a swoon. *Martinus Scriblerus*, i. 8.

3†. To dash; rush.—4. To manifest disdain or contempt in rejecting anything; make contemptuous opposition; manifest contempt or disdain in resistance.

It is very sure that they that be good will bear, and not *spurn* at the preachers.
Latimer, 3d Sermon bef. Edw. VI., 1549.

Thou art regardless both of good and shame,
Spurning at virtue and a virtuous name.
Fletcher, Faithful Shepherdess, v. 3.

spurn[1] (spėrn), *n.* [< ME. *spurn, sporn;* < *spurn*[1], *v.*] 1. A blow with the foot; a kick.

I'le tosse that heele a yard above his head
That offers but a *spurne*.
Heywood, Royal King (Works, ed. Pearson, 1874, VI. 31).

2†. A stumble; a fall. *Joseph of Arimathie* (E. E. T. S.), p. 19.—3. Disdainful rejection; contemptuous treatment.

The insolence of office, and the *spurns*
That patient merit of the unworthy takes.
Shak., Hamlet, iii. 1. 73.

4. In *mining*, one of the narrow pillars or connections left between the holings, and not cut away until just before the withdrawal of the sprags. [South Staffordshire coal-field, England.]

spurn[2] (spėrn), *n.* [A var. of *spur*, after *spurn*[1], *v.* Cf. G. *sporn*, spur, orig. an acc. form: see *spur, n.*] 1. A spur. [Prov. Eng.]—2. A piece of wood having one end inserted in the ground, and the other nailed at an angle to a gate-post, for the purpose of strengthening or supporting it. [Prov. Eng.]

spurn[2]† (spėrn), *v. t.* [< *spurn*[2], *n.* Cf. *spurn*[1], *v.*] To spur.

The Faery quickly raught
His poynant speare, and sharply gan to *spurne*
His fomy steed. *Spenser*, F. Q., III. i. 5.

spurn[3] (spėrn), *n.* [Early mod. E. *spoorn, spoorne;* origin obscure.] An evil spirit. *Halliwell.* [Prov. Eng.]

spurner (spėr'nėr), *n.* [< *spurn*[1] + *-er*[1].] One who spurns or rejects.

spurn-point† (spėrn'point), *n.* [< *spurn*[1] + *point.*] An old game, of uncertain nature.

He stakes heaven at *spurnpoint*, and trips cross and pile whether ever he shall see the face of God or no.
Jer. Taylor, Works (ed. 1835), I. 743.

spurnwater (spėrn'wâ″tėr), *n.* [< *spurn*[1], *v.*, + obj. *water.*] *Naut.*, a V-shaped barrier or breakwater, from 1 to 2 feet or more high, erected on sea-going vessels forward of the foremast, to shed water coming over the bows.

spur-pruning (spėr'prö″ning), *n.* A mode of pruning trees by which one or two eyes of the previous year's wood are left and the rest cut off, so as to leave spurs or short rods. Compare *spur-system*, under *spur*.

spurred (spėrd), *a.* [< *spur* + *-ed*[2].] 1. Wearing spurs: as, a *spurred* horseman.—2. In *ornith.*: (*a*) Having unusually long claws: as, the *spurred* towhee, *Pipilo megalonyx*. *S. F. Baird.* [Rare.] (*b*) Having spurs; calcarate. See *spur, n.*, 3 (*e*) (1). (*c*) Spur-heeled. (*d*) Spur-winged. —3. In *mammal., herpet.*, and *entom.*, having spurs of any kind; calcarate.—4. In *bot.*, producing or provided with a spur; calcarate.—**Spurred butterfly-pea.** See *pea*[1].—**Spurred chameleon,** *Chamæleon calcifer.*—**Spurred corolla.** See *corolla.*—**Spurred gentian.** See *gentian.*—**Spurred rye.** See *rye*[1] and *ergot*[1], 2.—**Spurred tree-frog** or **tree-toad,** *Polypedetes eques*, of Ceylon, having a calcar.

spurrer (spėr'ėr), *n.* 1. One who uses spurs. —2. Somebody or something that incites or urges on.

I doubt you want a *spurrer*-on to exercise and to amusements. *Swift*, To Pope, July 16, 1728.

spurrey, *n.* See *spurry*[2].

spurrier (spėr'iėr), *n.* [Early mod. E. also *sporyor;* < ME. *sporier, sporyer, sporer;* < *spur* + *-ier*[1].] One whose occupation is the making of spurs.

Ods so, my *spurrier!* put them on, boy, quickly.
B. Jonson, Staple of News, i. 1.

spur-royal (spėr'roi″al), *n.* [Also *spur-ryal, spur-rial;* < *spur* + *royal.* Cf. *ryal.*] An English gold coin issued by James I., and worth 15*s.* or 16*s.* 6*d.* (about $3.63 or $3.99). It was so named from the resemblance of the sun on its reverse to the rowel of a spur.

Obverse.

Spur-royal of James I.—British Museum. (Size of the original.)

She has nine *spur-royals*, and the servants say she hoards old gold.
Beau. and Fl., Scornful [Lady, i. 1.

spurry[1]† (spėr'i), *a.* [< *spur* + *-y*[1].] Radiating, like the points on a spur-rowel. *Chapman*, Iliad, xix. 367.

spurry[2] (spur'i), *n.* [Also *spurrey;* < OF. *spurrie,* < MD. *sporie, spurie, speurie, spurrie,* D. *spurrie,* spurry; cf. G. *spörgel, spergel* (> Sw. Dan. *spergel*), < ML. *spergula,* spurry; origin obscure.] A plant of the genus *Spergula*. The common species is *S. arvensis*, the corn-spurry, from whose seeds a lamp-oil has sometimes been extracted. Knotted spurry, more properly called *knotted pearlwort*, is *Sagina nodosa*. The lawn-spurry (or properly lawn-pearlwort) is *Sagina glabra*. The sand-spurry is of the genus *Tissa*. See *Spergula*.

Spurrie [F.], *spurry*, or frank; a Dutch herb and an excellent fodder for cattel. *Cotgrave.*

spur-shell (spėr-shel), *n.* A shell of the genus *Imperator* (formerly called *Calcar*): so named from its resemblance to the rowel of a spur. The term extends to some similar trochiform shells. See cut under *Imperator*.

spur-shore (spėr'shōr), *n.* *Naut.*, same as *spur*, 3 (*n*) (1).

spurt[1], **spirt**[1] (spėrt), *v.* [Both spellings are in use, *spirt* being etymologically more correct, and *spurt* appar. the more common spelling; a transposed form of *sprit*[1] (like *bird*[1], *bird*[2], transposed forms of *brid, bride*[1]): see *sprit*[1]. The word is prob. confused with *spurt*[2], *spirt*[2].] I. *intrans.* 1†. To sprout; shoot.

Shall a few sprays of us, . . .
Our scions, put in wild and savage stock,
Spirt up so suddenly into the clouds,
And overlook their grafters?
Shak., Hen. V., iii. 5. 8.

Did you ever see a fellow so *spurted* up in a moment? He has got the right ear of the duke, the prince, princess, most of the lords, but all the ladies.
Marston, The Fawne, ii. 1.

2. To gush or issue out suddenly in a stream, as liquor from a cask; rush with sudden force from a confined place in a small jet or stream.

Thus the small jet, which hasty hands unlock,
Spirts in the gardener's eyes who turns the cock.
Pope, Dunciad, ii. 178.

The Prince's blood *spirted* upon the scarf.
Tennyson, Geraint.

II. *trans.* To throw or force out in a jet or stream; squirt: as, to *spurt* water from the mouth; to *spurt* liquid from a tube.

With toonge three forcked furth *spirts* fyre.
Stanihurst, Æneid (ed. Arber, p. 59), ii.

Toads are sometimes observed to exclude or *spirt* out a dark and liquid matter behind.
Sir T. Browne, Vulg. Err., iii. 13.

spurt[1], **spirt**[1] (spėrt), *n.* [< *spurt*[1], *spirt*[1], *v.* Cf. *sprout, sprit*[1], *sprot*[1], *n.*] 1†. A shoot; a sprout; a bud.

These nuts . . . have in the mids a little chit or *spirt*.
Holland, tr. of Pliny, xv. 22.

2. A forcible gush of liquid from a confined place; a jet.

Water, dash'd from fishy stalls, shall stain
His hapless coat with *spirts* of scaly rain.
Gay, Trivia, iii. 106.

3. A brief and sudden outbreak.

A sudden *spurt* of woman's jealousy.
Tennyson, Merlin and Vivien.

4. A school of shad. [Connecticut.]

spurt[2], **spirt**[2] (spėrt), *v. i.* [Both spellings are in use, *spirt* being etymologically the more correct, and *spurt* the more common spelling; also rarely *spert;* a transposed form of **sprit* or **spret* (cf. E. dial. *sprut*, jerk), < Icel. *spretta* (for **sprenta*) (pret. *spratt*, for **sprant*), start, spring, also sprout, spout, = Sw. *spritta*, start, startle, = MHG. *sprenzen*, spout, crack; the orig. nasal appearing in *sprent*, ME. *sprenten*, bound, leap, and the noun *sprint*, dial. *sprunt*, a convulsive struggle, etc.: see *sprent, sprint.*] To make a short, sudden, and exceptional effort; put forth one's utmost energy for a short time, especially in racing.

Cambridge *spurted* desperately in turn, . . . and so they went, fighting every inch of water. *C. Reade*, Hard Cash, i.

spurt[2], **spirt**[2] (spėrt), *n.* [Cf. Icel. *sprettr*, a spurt, spring, bound, run; from the verb. Cf. *spruntl*, *sprint.*] 1. A short, sudden, extraordinary effort for an emergency; a special exertion of one's self for a short distance or space of time, as in running, rowing, etc.: as, by a fine *spurt* he obtained the lead.

The long, steady sweep of the so-called paddle tried him almost as much as the breathless strain of the *spurt*.
T. Hughes, Tom Brown at Oxford, I. vi.

In the race of fame, there are a score capable of brilliant *spurts* for one who comes in winner after a steady pull with wind and muscle to spare.
Lowell, Study Windows, p. 281.

2†. A short period; a brief interval of time.

Heere for a *spirt* linger, no good opportunitye scaping.
Stanihurst, Æneid, iii. 453.

He lov'd you but for a *spurt* or so.
Marston and Webster, Malcontent, i. 6.

spurtle[1], **spirtle**[1] (spėr'tl), *v. t.* and *i.* [Freq. of *spurt*[1], *spirt*[1]; in origin a transposed form of *sprittle, spruttle:* see *spurt*[1], *spirt*[1], *sprit*[1], *spruttle*, etc.] To shoot in a scattering manner; spurt. [Rare.]

The brains and mingled blood were *spirtled* on the wall.
Drayton, Polyolbion, ii. 283.

spurtle[2], **spirtle**[2] (spėr'tl), *n.* [Dim. of *sprit*[1]. Cf. *spurtle*[1], *spirtle*[1].] A stick used for stirring. [Prov. Eng. and Scotch.]

She left the *spurtle* sticking in the porridge.
Geo. MacDonald, Warlock o' Glenwarlock, xlix.

spurtle-blade (spėr'tl-blād), *n.* A broadsword. [Scotch.]

It 's tauld he was a sodger bred, . . .
But now he 's quat the *spurtle blade*.
Burns, Captain Grose's Peregrinations.

spur-track (spėr'trak), *n.* A short track leading from a line of railway, and connected with it at one end only.

spur-tree (spėr'trē), *n.* A West Indian shrub or small tree, *Petitia Domingensis*. Also called *yellow fiddlewood*.

spurway (spėr'wā), *n.* A horse-path; a narrow way; a bridle-road; a way for a single beast. [Prov. Eng.]

spur-whang (spėr'hwang), *n.* A spur-leather. *Scott*, Monastery. [Scotch.]

spur-wheel (spėr'hwēl), *n.* The common form of cog-wheel, in which the cogs are radial and peripheral, and made to engage corresponding cogs on another wheel. Compare cut under *pinion*. *E. H. Knight.*

Spur-wheel.

spurwing (spėr'wing), *n.* A spur-winged bird. Especially—(*a*) A jacana, or any bird of the family *Jacanidæ* or *Parridæ*, of which the spur on the wing is a characteristic. See cut under *jacana*. (*b*) A spur-winged goose. See cut under *Plectropterus*. (*c*) A spur-winged plover. See *Chettusia* and *spur-winged.*

spur-winged (spėr'wingd), *a.* Having a horny spur on the pinion, as various birds. It is a weapon of offense and defense. It is sometimes double, as is well shown in the cut under *Palamedea*. See also cuts under *jacana* and *Plectropterus.*—**Spur-winged goose,** a species of *Plectropterus*, as *P. gambensis.*—**Spur-winged plovers,** those plovers or lapwings, of the family *Charadriidæ*, and of several different genera, in which a spur is developed on the wing (including some species of these genera in which such a spur fails to develop). Wing-spurs are more frequent in this than in any other family of birds (excepting the related *Jacanidæ* or *Parridæ*). None occur, however, in the true plovers (of the genera *Chara-*

Egyptian Spur-winged Plover (*Hoplopterus spinosus*).

drius, Ægialites, Eudromias, Squatarola, etc.); they are commonest among those plovers which are related to the lapwing of Europe (*Vanellus cristatus,* which, however, has none), and which have a hind toe and often wattles on the face. The presence of spurs and wattles is often coincident. South American spur-winged plovers, with hind toe and no wattles, constitute the genus *Belonopterus;* they are two, the Cayenne and the Chilian lapwings, *B. cayennensis* and *B. chilensis;* both are crested. The type of the genus *Hoplopterus* is the Egyptian spur-winged plover, *H. spinosus,* with large spurs, a crest, no hind toe, and no wattles; it has when adult the whole crown, chin, throat, breast, flanks, and legs black, and the greater wing-coverts and some other parts white. It inhabits especially northern Africa, abounds in Egypt and Nubia, and extends into parts of Europe and Asia. It is among the birds supposed to have been a basis of the trochilus of the ancients (compare *crocodile-bird, sicsac,* and cut under *Pluvianus*). It is represented in South Africa by the black-backed spurred lapwing, *H. speciosus,* with large spurs and the top of the head white. The Indian spur-winged lapwing, *H. ventralis,* has a black cap, a black patch on the belly in white surroundings, and large spurs. Two South American forms, with spurs, but no wattles, crest, or hind toe, are the Peruvian bronze-winged lapwing, *H. resplendens,* and the little white-winged, *H. cayanus* (or *stolatus,* if the term *cayanus* be thought too near *cayennensis*); each of these has been made the basis of a different generic name. In the type of the genus *Chettusia, C. gregaria* (see cut under *Chettusia*), and several related species, a hind toe is present, and neither spurs nor wattles are developed; but the name has been used to cover various species with wattles and spurs, more properly separated under the term *Lobivanellus.* In this group it is the rule that large wattles are associated with well-developed spurs, for in those species which have very small wattles the spurs are almost or quite obsolete. Variations in these respects, and in the presence or absence of the hind toe, have caused the erection of other genera. (See *Sarciophorus, Xiphidiopterus.*) Five of the best-marked species of *Lobivanellus* proper, with large spurs, large wattles, and a hind toe, are the following: *L. senegallus,* of the Ethiopian region north of the equator; *L. lateralis,* of South Africa; *L. cucullatus,* of Java, Sumatra, etc.; *L. personatus,* of northern Australia, New Guinea, and some other islands; and *L. lobatus,* of eastern Australia from Rockingham Bay to Tasmania (see cut under *wattled*).

spurwort (spėr'wėrt), *n.* [< *spur* + *wort*[1].] The field-madder, *Sherardia arvensis:* so called from its whorls of leaves, likened to the rowel of a spur.

sput (sput), *n.* [Origin obscure.] A thimble or annular plate used to reinforce a hole in a boiler. *E. H. Knight.*

sputa, *n.* Plural of *sputum.*

sputation† (spū-tā'shon), *n.* [= F. *sputation* = Pg. *esputação,* < L. *sputare,* pp. *sputatus,* spit, spit out, < *spuere,* spit: see *spew.*] The act of spitting; that which is spit. *Harvey.*

sputative† (spū'tą-tiv), *a.* [< L. *sputare,* spit, spit out (see *sputation*), + *-ive.*] Pertaining to spitting; characterized by spitting. *Sir H. Wotton,* Reliquiæ, p. 370.

sputcheon (spuch'ọn), *n.* [Origin obscure.] In a sword-scabbard, the inner part of the mouth-piece, which holds the lining in place. *E. H. Knight.*

sputet (spūt), *v. i.* [< ME. *spute, sputi,* by aphæresis from *dispute.*] To dispute.

Whatt! thay *sputen* & speken of so spitous fylthe.
Alliterative Poems (ed. Morris), ii. 845.

sputter (sput'ėr), *v.* [Also in var. *splutter;* cf. LG. *spruttern, sputtern,* sprinkle, G. *sprudeln,* spout, squirt; freq. of the verb represented by *spout.* Cf. *spurtle*[1], *spirtle*[1].] **I.** *intrans.* 1. To spit, or eject saliva from the mouth in small or scattered bits; hence, to throw out moisture in small detached parts and with small explosions; emit small particles, as of grease, soot, etc., with some crackling or noise.

They could neither of 'em speak for Rage; and so fell a *sputt'ring* at one another like two roasting Apples.
Congreve, Way of the World, iv. 8.

Like the green wood,
That, *sputtering* in the flame, works outward into tears.
Dryden, Cleomenes, i. 1.

2. To speak so rapidly and vehemently as to seem to spit out the words, as in excitement or anger.

The soul, which to a reptile had been changed,
Along the valley hissing takes to flight,
And after him the other speaking *sputters.*
Longfellow, tr. of Dante's Inferno, xxv. 138.

II. *trans.* 1. To emit forcibly in small or scattered portions, as saliva, flame, etc.; spit out noisily.

A poisoned tongue cannot forbear to *sputter* abroad his venom. *Rev. T. Adams,* Works, I. 73.

Thus sourly wail'd he, *sputt'ring* dirt and gore;
A burst of laughter echo'd through the shore.
Pope, Iliad, xxiii. 921.

2. To emit in small particles or amounts with slight explosions: as, the candle *sputters* smoke; a green stick *sputters* out steam.—3. To utter rapidly and with indistinctness; jabber.

In the midst of caresses . . . to *sputter* out the basest accusations! *Swift.*

sputter (sput'ėr), *n.* [< *sputter, v.*] 1. The act of sputtering.—2. That which is thrown off or ejected in sputtering.

She pouted out her blubber-lips, as if to bellows up wind and *sputter* into her horse-nostrils.
Richardson, Clarissa Harlowe, IV. vii. (*Davies.*)

3. The noise made by a person who or a thing which sputters; hence, bustle; ado; excited talk; squabble.

What a deal of Pother and *Sputter* here is, between my Mistress and Mr. Myrtle, from mere Punctilio!
Steele, Conscious Lovers, iv. 1.

sputterer (sput'ėr-ėr), *n.* One who or that which sputters.

sputum (spū'tum), *n.*; pl. *sputa* (-tą). [NL., < L. *sputum,* that which is spit out, spittle, < *spuere,* pp. *sputus,* spit: see *spew.*] 1. Spittle; a salival discharge from the mouth.—2. Major Downing, May-Day. (*Bartlett.*)

★ **squadron** (skwod'ron), *n.* [= D. *escadron* = Dan. *eskadron*, < OF. *esquadron*, F. *escadron* = Sp. *escuadrón* = Pg. *esquadrão* (= G. *schwadrone* = Sw. *sqvadron*), < It. *squadrone*, a squadron, aug. of *squadra*, a squad, a square: see *squad*[1], *square*[1].] 1†. A square.

Sixe dayes iourney from Bezeneger is the place where they get Diamants; . . . it is a great place, compassed with a wall, and . . . they sell the earth within the wall for so much a *squadron*, and the limits are set how deepe or how low they shall digge. *Hakluyt's Voyages*, II. 221.

2. A body of soldiers drawn up in a square, or in regular array, as for battle; specifically, in modern armies, the principal division of a regiment of cavalry. This corresponds more or less closely to a company in the infantry, and consists of two troops, each commanded by a captain. The actual strength of a squadron varies from 120 to 200 men.

The Ordovices, to welcome the new General, had hew'n in peeces a whole *Squadron* of Horse.
Milton, Hist. Eng., ii.

3. A division of a fleet; a detachment of ships of war employed on a particular service or station, and under the command of a flag-officer.—4. Generally, any ranked and orderly body or group.—5. In early New England records (1636), one of four divisions of town land, probably in the first instance a square. The records show that *squadron* was used later in other senses: (*a*) A division of a town for highway care.

Agreed upon by the selectmen for the . . . calling out of their men to work, that is within their several *squadrons*.
Town Records, Groton, Mass., 1671.

(*b*) A school district.

Voted and chose a committee of seven men to apportion the school in six societies or *squadrons*, . . . taking the northwesterly corner for one *squadron*.
Town Records, Marlborough, Mass., 1749.

Sometimes spelled *squadrant*.

squadron (skwod'ron), *v. t.* [< *squadron*, *n.*] 1. To form into squadrons, as a body of soldiers. Hence—2. To form in order; array.

They gladly hither haste, and by a quire
Of *squadron'd* angels hear his carols sung.
Milton, P. L., xii. 367.

squail, squale (skwāl), *n.* [Also *scale;* perhaps a dial. var. of *skail*, in pl. *skails*, formerly *skayles*, a var. of *kail*[2]: see *kail*[2] and *skayles*.] 1. A disk or counter used in the game of squails.

Urge, towards the table's centre,
With unerring hand, the *squail*.
C. S. Calverley, There Stands a City.

2. *pl.* A game in which disks or counters are driven by snapping them from the edge of a round board or table at a mark in the center.—3. *pl.* Ninepins. *Halliwell.* [Prov. Eng.]

squail, squale (skwāl), *v.* [< *squail*, *n.*] **I.** *intrans.* To throw a stick, loaded stick, disk, flat stone, or other object at a mark: often applied to the throwing of sticks at cocks or geese on Shrove Tuesday, a sport formerly popular in England. *Grose.* [Prov. Eng. and New Eng.]

II. *trans.* To aim at, throw at, or pelt with sticks or other missiles.

"*Squailing* a goose before his door, and tossing dogs and cats on Shrove Tuesday" (Mr. Hunt's "Bristol"). The allusion is to the republican mayor of the city in 1651.
N. and Q., 7th ser., IV. 169.

squail-board (skwāl'bōrd), *n.* The round board upon which the game of squails is played.

squailer (skwā'lėr), *n.* A kind of throwing-stick, an improvement on that used formerly in squailing cocks or geese.

Armed with *squailers*, an ingenious instrument composed of a short stick of pliant cane and a leaded knob, to drive the harmless little squirrel from tree to tree, and lay it a victim at the feet of a successful shot.
Daily Telegraph, Nov. 30, 1881. (*Encyc. Dict.*)

squaimous†, *a.* See *squeamous*.

squaint†, *n.* An obsolete dialectal form of *swain*.

squalder (skwol'dėr), *n.* A kind of jelly-fish. See the quotation.

I have oftentimes mett with two other entities which seeme to bee of a congenerous substance with the aforenamed gellies, both of them to bee found in the salt water. One is flat and round, as broad as a mans palme, or broader, and as thick as the hand, cleare and transparent, convex on one side and somewhat like the gibbous part of the human liver, on the other side concave with a contrivance like a knott in the very middle thereof, but plainly with circular fibers about the verge or edge of it (where it is growne thin) which suffer manifest constriction and dilatation, which doe promote its natation, which is also perceptible, and by which you may discerne it to advance towards the shore, or recede from it. About us they are generally called *squalders*, but are indeed evidently fishes, although not described in any Ichthyology I have yet mett with. *Dr. R. Robinson*, To Sir T. Browne, Dec. 12, 1659 (in [Sir T. Browne's Works, I. 423).

squale, *n.* and *v.* See *squail*.

Squali (skwā'lī), *n. pl.* [NL. (Müller, 1835), pl. of L. *squalus*, a shark: see *Squalus*.] In *ichth.*, a section of elasmobranchiate fishes, or selachians, having the gill-slits lateral and plural, five, six, or seven in number; the sharks proper, as distinguished from the *Raiæ* (rays or skates, with ventral gill-slits) and from the *Holocephali* (chimeras, with gill-slits a single pair). The name has been used for groups of various extent; it is now generally restricted to the plagiostomous fishes with lateral branchial apertures and the pectoral fins regularly curved backward from the base of insertion. The *Squali* are divided into about 12 families and many genera, the nomenclature of which is by no means fixed. See *Selachii* and *shark*[1], and cuts under *selachian* and *dogfish*.

squalid (skwol'id), *a.* [< L. *squalidus*, foul, filthy, < *squalere*, be stiff, rough, or dry (with

anything), esp. be stiff or rough from negligence or want of care, be foul; cf. Gr. σκέλλειν, be dry (see *skelet, skeleton*).] **1.** Foul; filthy; extremely dirty: as, a *squalid* beggar; a *squalid* house.

Uncomb'd his locks, and *squalid* his attire.
Dryden, Pal. and Arc., i. 539.

2†. Rough; shaggy. [Rare.]

Squalidæ (skwal'i-dē), *n. pl.* [NL., < *Squalus* + *-idæ*.] A family of sharks, typified by the genus *Squalus*, to which various limits have been assigned. By Bonaparte the name was used for all true sharks. By some other writers it has been used instead of *Acanthiidæ*. See *dogfish* and *picked*[1].

squalidity (skwo-lid'i-ti), *n.* [< LL. *squalidita(t-)s*, roughness, filth, < L. *squalidus*, rough, filthy: see *squalid*.] The state of being squalid; foulness; filthiness. *Imp. Dict.*

squalidly (skwol'id-li), *adv.* In a squalid or filthy manner. *Imp. Dict.*

squalidness (skwol'id-nes), *n.* Squalidity. *Bailey.*

squaliform (skwā'li-fôrm), *a.* [< L. *squalus*, a shark, + *forma*, form.] Of, or having the characters of, the *Squali;* resembling a shark.

Squalius (skwā'li-us), *n.* [NL. (Bonaparte, 1837), < L. *squalus*, a shark. The European dace was at one time called, for no obvious reason, *Squalus minor*.] A genus of small cyprinoid fishes, many of which are known as *dace*. The type is the European dace, *Cyprinus leuciscus* of the Linnean system, now called *Leuciscus leuciscus* or *Leuciscus vulgaris*. Numerous American species fall in this genus, and are loosely known as *minnows, shiners, chubs, mullets*, etc. See cut under *dace*.

squall[1] (skwâl), *n.* [< Sw. *sqval*, a rush of water (*sqval-regn*, a violent shower of rain, a squall) (= Norw. *skval*, a gushing, rippling, rinse-water; cf. Dan. *skyl*, also *skyl-regn*, a violent shower of rain), < *sqvala*, dial. *skvala, skvåla*, gush out, = Norw. *skvala*, gush out, splash, ripple; also in secondary forms, Norw. *skvelja*, gush, splash; Norw. *skola*, wash, gush, = Icel. *skola*, wash; Icel. *skyla* = Norw. *skylja* = Dan. *skylle*, wash. The word is generally assumed to be connected with *squall*[2].] A sudden and violent gust of wind, or a succession of such gusts, usually accompanied by rain, snow, or sleet. In a ship's log-book abbreviated *q*.

A lowering *squall* obscures the southern sky.
Falconer, Shipwreck, ii. 145.

No gladlier does the stranded wreck
See thro' the gray skirts of a lifting *squall*
The boat that bears the hope of life approach.
Tennyson, Enoch Arden.

Arched squall, a remarkable squall occurring near the equator, in which a mass of black clouds collects and rapidly rises, forming a vast arch, or ring-shaped bed of cloud. The ring of cloud enlarges, and above it masses of cloud rise higher and higher until they reach the zenith. Then usually, though not invariably, a violent thunder-storm breaks forth, with vivid zigzag lightning, deafening peals of thunder, and torrents of rain, lasting, perhaps, for half an hour. The phenomenon varies in its details in different seas, but occurs most frequently and on the grandest scale in the southern part of the China Sea, the Gulf of Siam, the Sulu Sea, and particularly in the Straits of Malacca.—**Black squall**, a squall attended with a specially dark cloud.—**Bull's-eye squall**, a white squall of great violence on the west coast of Africa.—**Heavy squall**, a squall in which the wind blows with much force.—**Line-squall**, a squall accompanying the passage of the trough of a V-shaped barometric depression: so named because the squalls form a line coincident with the axis of the trough, which sweeps across the country, broadside on, with the progressive motion of the depression.—**Thick squall**, a squall in which the rain or snow obscures the view.—**To look out for squalls**, to be on one's guard; be on the watch against trouble or danger. [Colloq.]—**White squall**, a whirlwind of small radius arising suddenly in fair weather without the usual formation of clouds. The only indication of its development is the boiling of the sea beneath the current of ascending air around which the rapid gyrations take place, together with a patch of white cloud, generally formed above it at the level of condensation. These are also the conditions of a waterspout, which may or may not be completely formed, according to the energy of the whirl and the amount of vapor in the atmosphere. White squalls are infrequent, and rarely occur outside of the tropics; in general they are dangerous only to sailing vessels and small craft. =**Syn.** *Gale*, etc. See *wind*[2].

squall[1] (skwâl), *v. i.* [< *squall*[1], *n.*] To blow a squall: used chiefly impersonally: as, it *squalled* terribly. [Colloq.]

And the quarter-deck tarpauling
Was shivered in the *squalling*.
Thackeray, The White Squall.

squall[2] (skwâl), *v.* [Early mod. E. also *squawl;* < Icel. *skvala*, scream, = Sw. dial. *skvala, skvåla*, cry out, chatter, = Dan. (freq.) *skvaldre*, clamor; cf. Icel. *skella* (pret. *skall*), resound, = G. *schallen*, resound (see *scold*); cf. Sc. *squalloch, skelloch*, cry shrilly, Gael. *sgal*, howl. Cf. *squeal*[1], and see *squall*[1].] **I.** *intrans.* To cry out; scream or cry violently, as a frightened woman or a child in anger or distress: used in contempt or dislike.

You can laugh, and *squall*, and romp in full security.
Swift, Advice to Servants (General Directions).

"Send that *squalling* little brat about his business, and do what I bid ye, sir," says the Doctor.
Thackeray, Henry Esmond, iii. 5.

II. *trans.* To utter in a discordant, screaming tone.

And pray, what are your Town Diversions? To hear a parcel of Italian Eunuchs, like so many Cats, *squawl* out somewhat you don't understand.
Tunbridge Walks, in Ashton's Queen Anne, I. 328.

squall[2] (skwâl), *n.* [< *squall*[2], *v.*] A harsh cry; a loud and discordant scream; a sound intermediate in character between a squawk and a squeal.

There oft are heard the notes of infant woe,
The short thick sob, loud scream, and shriller *squall*.
Pope, Imit. of Spenser, The Alley.

squall[3] (skwâl), *n.* [Perhaps a particular use of *squall*[2].] A baby; pet; minx; girl: used vaguely, in endearment or reproach.

A pretty, beautiful, juicy *squall*.
Middleton, Michaelmas Term, i. 2.

The rich gull gallant call's her deare and love,
Ducke, lambe, *squall*, sweet-heart, cony, and his dove.
Taylor's Workes (1630).

squaller (skwâ'lėr), *n.* [< *squall*[2] + *-er*[1].] One who squalls; one who shrieks or cries aloud.

squally[1] (skwâ'li), *a.* [< *squall*[1] + *-y*[1].] **1.** Abounding with squalls; disturbed often with sudden and violent gusts of wind: as, *squally* weather.—**2.** Threatening; ominous: as, things began to look *squally*. [Colloq.]

squally[2] (skwâ'li), *a.* [Perhaps a dial. var. of *scally*.] **1.** Having unproductive spots interspersed throughout: said of a field of turnips or corn. [Prov. Eng.]—**2.** Badly woven; showing knots in the thread or irregularities in the weaving: said of a textile fabric.

squaloid (skwā'loid), *a.* [< NL. *Squalus* + Gr. *εἶδος*, form.] Like a shark of the genus *Squalus* selachian or plagiostomous, as a true shark; of or pertaining to the *Squalidæ;* squaliform.

squalor (skwol'or or skwā'lôr), *n.* [< L. *squalor*, roughness, filth, < *squalere*, be stiff or rough, as with dirt: see *squalid*.] Foulness; filthiness; coarseness.

Nastiness, *squalor*, ugliness, hunger. *Burton.*

Squalor carceris, in *Scots law*, the strictness of imprisonment which a creditor is entitled to enforce, in order to compel the debtor to pay the debt, or disclose funds he may have concealed.

Squalus (skwā'lus), *n.* [NL. (Linnæus, 1748), < L. *squalus*, a kind of sea-fish.] A genus founded by Linnæus, including all the sharks and shark-like selachians known to him (15 species in 1766). See *Acanthias*, and cut under *dogfish*.

squam (skwom), *n.* [< *Annisquam*, in Massachusetts.] An oilskin hat worn originally by fishermen and deep-water sailors; a cheap ★yellow sou'wester. [U. S.]

squama (skwā'mą), *n.*; pl. *squamæ* (-mē). [NL., < L. *squama*, a scale: see *squame*.] **1.** In *bot.*, a scale of any sort, usually the homologue of a leaf.—**2.** In *anat.* and *zoöl.*: (*a*) A scale, as of the epidermis. (*b*) A thin, expansive, scale-like part of a bone: as, the *squama* of the temporal bone (the squamosal); the *squama* of the occipital bone (the supra-occipital).—**3.** In *ornith.*, a scale-like feather, as one of those upon a penguin's wing or the throat of a humming-bird. See cut under *Squamipennes*.—**4.** In *entom.*, an elytrum.—**Squama frontalis**, the vertical part of the frontal bone.—**Squama occipitis**, the thin expanded part of the occipital bone; the supra-occipital.—**Squama temporalis**, the thin shell-like part, or the squamous portion, of the temporal bone.

squamaceous (skwą-mā'shius), *a.* [< L. *squama*, a scale, + *-aceous*.] Same as *squamous* or *squamose*.

Squamata (skwą-mā'tą), *n. pl.* [NL., neut. pl. of LL. *squamatus*, scaly: see *squamate*.] **1.** In *herpet.*, the scaly reptiles. (*a*) An order of *Reptilia*, established by Oppel in 1811. It was composed of the saurians or lizards (including crocodiles) and snakes or ophidians, divided accordingly into *Saurii* and *Ophidii*. Its contents were the modern orders *Crocodilia, Lacertilia*, and *Ophidia*, with, however, one foreign element (*Amphisbæna*). (*b*) In Merrem's system of classification (1820), same as Oppel's *Squamata* exclusive of the crocodiles, or *Loricata* of Merrem. In recent systems the order includes the mosasaurs, the lizards, the chameleons, and the serpents. Also called *Lepidosauria*, and formerly *Sauropsidia*.

2. In *mammal.*, scaly mammals; a group of the *Entomophaga* or insectivorous edentates, containing the single family *Manididæ*, the scaly ant-eaters, or pangolins, in which the body is squamated, being covered with horny overlapping scales. The group is now usually ranked as a suborder.

squamate (skwā'māt), *a.* [< LL. *squamatus*, scaly, < L. *squama*, a scale: see *squame*.] **1.** In *zoöl.*, scaly; covered with scales or squamæ; squamose or squamigerous; specifically, of or pertaining to the *Squamata*, in any sense.—**2.** In *anat.*, scale-like; forming or formed like a scale; squamous or squamiform: as, a *squamate* bone; *squamate* scales of cuticle.—**3.** In *bot.*, same as *squamose*.

squamated (skwā'mā-ted), *a.* [< *squamate* + *-ed*[2].] Same as *squamate*.

squamation (skwā-mā'shọn), *n.* [< *squamate* + *-ion*.] In *zoöl.*, the state or character of being squamate, squamose, or scaly; the collection or formation of scales or squamæ of an animal: as, the *squamation* of a lizard, snake, or pangolin. Compare *desquamation*.

squam-duck (skwom'duk), *n.* See *duck*[2].

squame (skwām), *n.* [< ME. *squame*, < L. *squama*, a scale (of a fish, serpent, etc.), a scale (of metal), scale-armor, a cataract in the eye, hull of millet, etc., LL. fig. roughness; prob. akin to *squalere*, be stiff or rough: see *squalid*.] **1†.** A thin layer; a scale.

Orpiment, brent bones, yren *squames*.
Chaucer, Prol. to Canon's Yeoman's Tale, l. 206.

2. In *zoöl.*, a scale or squama. *Huxley*, Crayfish, p. 172.

squamella (skwą-mel'ą), *n.*; pl. *squamellæ* (-ē). [NL., dim. of L. *squama*, a scale: see *squame*.] **1.** In *bot.*, same as *squamula*, 2.—**2.** [*cap.*] In *zoöl.*, a genus of zygotrochous rotifers, of the family *Coluridæ*. Same as *Metopidia*.

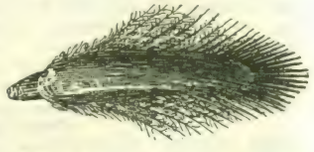
squamellate (skwą-mel'āt), *a.* [< NL. **squamellatus*, < *squamella*, q. v.] Same as *squamulate*.

squamelliferous (skwam-e-lif'e-rus), *a.* [< NL. *squamella*, a little scale, + L. *ferre* = E. *bear*[1].] In *bot.*, furnished with or bearing squamellæ.

Squamifera (skwā-mif'e-rą), *n. pl.* [NL., < F. *Squammifères* (De Blainville, 1816), < L. *squama*, a scale, + *ferre* = E. *bear*[1].] Squamous or scaly reptiles; *Reptilia* proper, as distinguished from *Nudipellifera* or *Amphibia:* also called *Ornithoides*.

squamiferous (skwą-mif'e-rus), *a.* [< L. *squama*, a scale, + *ferre* = E. *bear*[1].] **1.** Provided with squamæ or scales; squamate; squamigerous.—**2.** In *bot.*, bearing scales: as, a *squamiferous* catkin.

squamiflorous (skwā'mi-flō-rus), *a.* [< L. *squama*, a scale, + *flos* (*flor-*), flower.] In *bot.*, having flowers like scales; also, having scales bearing flowers, as in the *Coniferæ*.



squamiform (skwā'mi-fôrm), *a.* [< L. *squama*, a scale, + *forma*, form.] Having the shape, character, or appearance of a scale; squamate in form or structure; scale-like.

squamigerous (skwą-mij'e-rus), *a.* [< L. *squamiger*, scale-bearing, < *squama*, a scale, + *gerere*, bear, carry.] Provided with squamæ; squamose; squamiferous.

squamipen (skwā'mi-pen), *n.* Any fish of the group *Squamipennes* or *Squamipinnes*.

squamipennate (skwā-mi-pen'āt), *a.* [< L. *squama*, a scale, + *penna*, a wing: see *pennate*.] Having scaly feathers, as a penguin.

Squamipennes (skwā-mi-pen'ēz), *n. pl.* [NL., < L. *squama*, a scale, + *penna*, a wing, fin: see *pen*[2].] **1.** In *ichth.*, same as *Squamipinnes*.—**2.** In *ornith.*, the penguins, or *Sphenisci:* so called from the scale-like character of the plumage. [Rare.]

Squamipennes.—Scaly feather from anterior edge of wing of penguin (*Aptenodytes longirostris*), enlarged 8 times.

Squamipinnes (skwā-mi-pin'ēz), *n. pl.* [NL. (Cuvier, spelled *Squammipennes*): see *Squamipennes*.] In *ichth.*: (*a*) In Cuvier's system of classification, the sixth family of acanthopterygian fishes: so called because the soft and frequently the spinous parts of their dorsal and anal fins are covered with scales, which render it difficult to distinguish them from the body. The body is generally much compressed; the intestines are long, and the cæca numerous. The group included the families *Chætodontidæ, Ephippiidæ, Zanclidæ, Scatopha-*

gidæ, Platacidæ, Psettidæ, Pimelepteridæ, Bramidæ, Pempheridídæ, and *Tozotidæ.* (*b*) In Günther's system, a family of *Acanthopterygii perciformes,* nearly the same as (*a*), but without the *Zanclidæ, Platacidæ, Psettidæ, Bramidæ, Pempheridídæ,* and typical *Pimelepteridæ.*

squamoid (skwā′moid), *a.* [< L. *squama,* a scale, + Gr. *εἶδος,* form.] 1. Resembling a squama; squamiform; scale-like.—2. Squamous; scaly; squamate.

squamomandibular (skwā″mō-man-dib′ū-lăr), *a.* [< *squamo(us)* + *mandibular.*] Of or pertaining to the squamosal and the mandible, or lower jaw-bone: as, the *squamomandibular* articulation, characteristic of mammals. In human anatomy this joint is commonly called *temporomaxillary.*

squamomastoid (skwā-mō-mas′toid), *a.* [< *squamo(us)* + *mastoid.*] Of or pertaining to the squamous and mastoid elements of the temporal bone: as, a *squamomastoid* ankylosis.

squamoparietal (skwā″mō-pā-rī′e-tal), *a.* [< *squamo(us)* + *parietal.*] Of or pertaining to the squamosal and parietal bones: as, the *squamoparietal* suture, shortly called *squamous.*

squamopetrosal (skwā″mō-pe-trō′sal), *a.* [< *squamo(us)* + *petrosal.*] Of or pertaining to the squamosal and petrosal elements of the temporal bone: as, *squamopetrosal* ankylosis.

squamosal (skwā-mō′sal). *a.* and *n.* [< *squamose* + *-al.*] **I.** *a.* Scale-like or squamous: noting only the squamosal. See II.

II. *n.* In *zoöl.* and *anat.,* the squamous division of the temporal bone; the thin, expansive, scale-like element of the compound temporal bone; a membrane-bone, morphologically distinct from other parts of the temporal, filling a gap in the cranial walls, articulating in man and mammals with the lower jaw, in birds and reptiles with the suspensorium (quadrate bone) of the lower jaw, effecting squamous suture with various cranial bones, and forming by its zygomatic process in mammals a part of the zygoma, or jugal bar. It is remarkably expansive in man. See cuts under *Acipenser, acrodont, Balænidæ, craniofacial, Crotalus, Cyclodus, Felidæ, Gallinæ, Ichthyosauria, Ophidia, Physeter, Pythonidæ, Rana,* and *skull.*

squamose (skwā′mōs), *a.* [< L. *squamosus,* full of scales, covered with scales, < *squama,* a scale: see *squame.*] 1. In *bot.,* scaly; furnished with small appressed scales or squamæ; also, scale-like. Also *squamate, squamous.*—2. In *zoöl.,* squamous; squamiferous or squamigerous; covered with scales; scaly; specifically, in *entom.,* covered with minute scales, as the wings of lepidopterous insects; lepidopterous; squamulate.

squamosphenoidal (skwā″mō-sfē-noi′dal), *a.* [< *squamo(us)* + *sphenoidal.*] Pertaining to the squamous part of the temporal bone and the sphenoid bone: as, the *squamosphenoidal* suture. Also *squamosphenoid.*

squamotemporal (skwā-mō-tem′pō-ral), *a.* [< *squamo(us)* + *temporal*[2].] Squamosal, as a part of the temporal bone. *Owen.*

squamotympanic (skwā″mō-tim-pan′ik), *a.* Of or pertaining to the squamosal and tympanic bones: as, a *squamotympanic* ankylosis.

squamous (skwā′mus), *a.* [< L. *squamosus,* covered with scales: see *squamose.*] 1. In *zoöl.* and *anat.*: (*a*) Covered with scales; scaly; squamate; squamose; squamiferous or squamigerous. (*b*) Scale-like; squamoid; squamiform; specifically, of a bone, same as *squamosal.*—2. In *bot.,* same as *squamose.*—**Squamous bone,** the squamosal.—**Squamous bulb,** in *bot.,* a bulb in which the outer scales are distinct, fleshy, and imbricated; a scaly bulb. See *bulb.*—**Squamous cells,** flattened, dry, thin cells, as seen in the superficial layers of the epidermis.—**Squamous epithelium,** epithelium composed of thin scale-like cells, either in a single layer (*tessellated epithelium*) or in several layers (*stratified scaly epithelium*). See *epithelium.*—**Squamous portion of the temporal bone,** the squamosal: opposed to *petrous* and *mastoid* portions of the same compound bone.—**Squamous suture,** in *anat.,* a fixed articulation or synarthrosis, in which the thin beveled edge of a squamous bone overlaps another; specifically, the squamoparietal suture and squamosphenoidal suture, those by which the squamosal articulates with the parietal and alisphenoidal bones respectively. See cut under *parietal.*

squamozygomatic (skwā-mō-zī-gō-mat′ik), *a.* and *n.* [< *squamo(us)* + *zygomatic.*] **I.** *a.* In *anat.,* noting the squamous and zygomatic parts of the temporal bone: as, a *squamozygomatic* center of ossification.

II. *n.* A squamozygomatic bone; the squamosal together with its zygomatic process.

squamula (skwam′ū-lă), *n.*; pl. *squamulæ* (-lē). [L., dim. of *squama,* a scale: see *squame.*] 1. A little scale. Specifically, in *entom.*: (*a*) One of the flattened scale-like hairs or processes which in many cases clothe the lower surfaces of the tarsal joints. (*b*) The tegula or scale covering the base of the anterior wing of a hymenopterous insect. 2. In *bot.*: (*a*) A scale of secondary order or reduced size. (*b*) Same as *lodicule.* Also *squamella.*

Also *squamule.*

squamulate (skwam′ū-lāt), *a.* [< NL. **squamulatus,* < L. *squamula,* a little scale: see *squamule.*] Having little scales; covered with squamules; minutely scaly or squamose. Also *squamellate, squamulose.*

squamule (skwam′ūl), *n.* [< L. *squamula,* a little scale, dim. of *squama,* a scale: see *squame.*] In *bot.* and *zoöl.,* same as *squamula.*

squamuliform (skwam′ū-li-fôrm), *a.* [< L. *squamula,* a little scale, + *forma,* form.] Having the form or character of a squamule.

squamulose (skwam′ū-lōs), *a.* [< NL. **squamulosus,* < L. *squamula,* a little scale: see *squamule.*] Same as *squamulate.*

squander (skwon′dėr), *v.* [Not found in early use; perhaps a dial. form, a variant, with the common dial. change of initial *sw-* to *squ-,* of **swander,* which is perhaps a nasalized form of **swadder,* orig. scatter as water (?) (cf. MD. *swadderen,* dabble in water, = Sw. dial. *skvadra,* gush out, as water), itself a variant of E. dial. *swatter,* Sc. *squatter,* throw (water) about, scatter, squander, < Sw. dial. *squättra,* squander; freq. of E. dial. *swat,* var. *squat,* throw down forcibly; cf. Icel. *skvetta* = Sw. *sqvätta,* throw out, squirt, = Dan. *skvatte,* squirt, splash, squander: see *squat*[2], *squatter, swat*[2], *swatter.* The word may owe its nasalization to AS. *swindan* (pret. *swand*), vanish, waste, OHG. *swantian,* G. *ver-schwenden,* squander, etc.] **I.** *trans.* 1. To scatter; disperse. [Archaic.]

Other ventures he hath, *squandered* abroad.
Shak., M. of V., i. 3. 22.

They drive and *squander* the huge Belgian fleet.
Lryden, Annus Mirabilis, st. 67.

The fallen timber obstructed the streams, the rivers were *squandered* in the reedy morasses.
C. Elton, Origins of Eng. Hist., p. 223.

2. To spend lavishly, profusely, or prodigally; dissipate; use without economy or judgment; lavish: as, to *squander* one's money or an estate.

How much time is *squandred* away in Vanity and Folly?
Stillingfleet, Sermons, III. x.

Is he not a gay, dissipated rake, who has *squandered* his patrimony? *Sheridan,* The Duenna, ii. 3.

II. *intrans.* 1. To disperse; wander aimlessly; go at random. [Archaic.]

The wise man's folly is anatomized
Even by the *squandering* glances of the fool.
Shak., As you Like it, ii. 7. 57.

2. To waste one's substance; go to wasteful expense; spend recklessly.

He was grown needy by *squandering* upon his vices.
Swift, Change in Queen's Ministry.

squander (skwon′dėr), *n.* [< *squander, v.*] The act of squandering. *Imp. Dict.* [Rare.]

squanderer (skwon′dėr-ėr), *n.* [< *squander* + *-er*[1].] One who squanders; one who spends his money prodigally; a spendthrift; a prodigal; a waster; a lavisher.

I say he is an unthrift, a *Squanderer,* and must not expect supplyes from me. *Brome,* Sparagus Garden, iii. 5.

squanderingly (skwon′dėr-ing-li), *adv.* In a squandering manner; by squandering; prodigally; lavishly. *Imp. Dict.*

squan-fish (skwon′fish), *n.* A cyprinoid fish, *Ptychochilus grandis.* See *pike*[2], *n.*, 2 (*a*).

squanter-squash† (skwon′tėr-skwosh), *n.* Same as *squash*[2]. See the quotation.

Yet the clypeatæ are sometimes called cymnels (as are some others also), from the lenten cake of that name, which many of them very much resemble. Squash, or *squanter-squash,* is their name among the northern Indians, and so they are called in New York and New England. *Beverley,* Hist. Virginia, iv. ¶ 19.

squap (skwop), *v.* [A dial. var. of *swap.*] To strike. [Prov. Eng.]

squap (skwop), *n.* [< *squap, v.*] A blow. [Prov. Eng.]

squarable (skwâr′a-bl), *a.* [< *square*[1] + *-able.*] In *math.,* capable of being squared. *Hutton's Recreations,* p. 169.

square[1] (skwâr), *n.* [Formerly also (esp. in def. 5) *squire, squier;* < ME. *square, squar, square, sware,* a square, *squire, squyre, squyyre, squyger,* a carpenters' square, < OF. *esquare, esquarre, escairre, esquierre, esquire,* a square, squareness, F. *équerre* = Sp. *escuadra,* a square, squad, squadron, = Pg. *esquadra,* a squadron, *esquadria,* a square, a rule, *esquadro,* a right angle drawn on a board, = It. *squadra,* a square, also a squad or squadron of men (orig. a square); variant forms, with initial *s* due to the verb (see *square*[1], *v.*), of OF. *quarre* = Sp. *cuadra* = Pg. It. *quadra,* a square, < L. *quadra,* a square, fem. of (LL.) *quadrus,* square, four-cornered, < *quatuor,* four, = E. *four:* see *four, quadra*[1], *quadrate, squad*[1], *squadron.* Cf. *square*[1], *a.*] 1. In *geom.,* a four-sided plane rectilineal figure, having all its sides equal, and all its angles right angles.

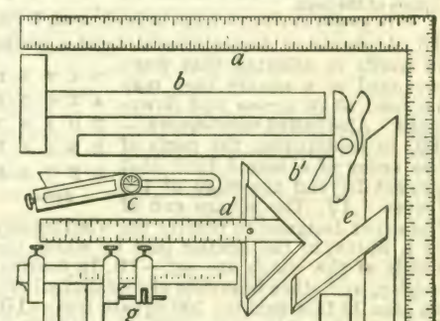
I have a parlour
Of a great *square,* and height as you desire it.
Tomkis (?), Albumazar, ii. 3.

The hard-grained Muses of the cube and *square.*
Tennyson, Princess, Prol.

2. A figure or object which nearly approaches this shape; a square piece or part, or a square surface: as, a *square* of glass.

A third court, to make a *square* with the front, but not to be built, nor yet enclosed with a naked wall.
Bacon, Building (ed. 1887).

He bolted his food down his capacious throat in *squares* of 3 inches. *Scott.*



The casement slowly grows a glimmering *square.*
Tennyson, Princess, iv. (song).

Specifically—(*a*) In *printing,* a certain number of lines forming a part of a column nearly square: used chiefly in reckoning the prices of newspaper advertisements. (*b*) A square piece of linen, cloth, or silk, usually decorated with embroidery, fringe, or lace: as, a table-*square.*

3. A quadrilateral area, rectangular or nearly so, with buildings, or sites for buildings, on every side; also, an open space formed by the intersection of streets; hence, such an area planted with trees, shrubs, or grass, and open to the public for recreation or diversion; a public park among buildings; a common; a green: as, Union *Square* in New York; Lafayette *Square* in Washington; Trafalgar *Square* in London.

The statue of Alexander the Seventh stands in the large *square* of the town.
Addison, Remarks on Italy (Works, ed. Bohn, I. 401).

4. An area bounded by four streets; a block: as, the house is four or five *squares* further up-town. —5. An instrument used by artificers, draftsmen, and others for trying or describing right angles. It consists of two rules or branches fastened perpendicularly at one end of their extremities so as to

Squares.

a, carpenters' square (of iron or steel); *b, b′,* draftsmen's T-squares of wood, *b′* having a head adjustable at any angle; *c,* bevel-square, the blade of which can be set either square or at any angle; *d,* center-square; *e,* miter-square; *f,* carpenters' try-square; *g,* square with adjustable heads and with vernier scale for measuring diameters, also called vernier calipers.

form a right angle. Sometimes one of the branches is pivoted, so as to admit of measuring other than right angles. When one rule is joined to the other in the middle in the form of a T, it is called a *T-square.*

Thou shalt me fynde as just as is a *squyre.*
Chaucer, Summoner's Tale, l. 388.

Of all kyne craftes ich contreeuede here tooles,
Of carpentrie, of kerueres, and contreeuede the compas,
And cast out by *squire* both lyne and leuell.
Piers Plowman (C), xii. 127.

A poet does not work by *square* or line,
As smiths and joiners perfect a design.
Cowper, Conversation, l. 789.

Hence—6. A true measure, standard, or pattern.

This cause I'll argue,
And be a peace between ye, if 't so please you,
And by the *square* of honour to the utmost.
Fletcher (*and another*), Love's Pilgrimage, ii. 1.

Religion being, in the pretence of their Law, the *square* of all their (otherwise ciuill) actions.
Purchas, Pilgrimage, p. 183.

7. In *arith.* and *alg.,* the number or quantity derived from another (of which it is said to be the *square*) by multiplying that other by itself: thus, 64 is the *square* of 8, for $8 \times 8 = 64$; x^2 or $x \times x$ is the *square* of x.

Light diminishes in intensity as we recede from the source of light. If the luminous source be a point, the intensity diminishes as the *square* of the distance increases. . . . This is the meaning of the law of inverse *squares* as applied to light. *Tyndall*, Light and Elect., p. 15.

8. Rule; regularity; exact proportion; hence, integrity of conduct; honest dealing. See phrases *on the square* (*c*), *out of square*, etc.

Read not my blemishes in the world's report:
I have not kept my *square;* but that to come
Shall all be done by the rule.
Shak., A. and C., ii. 3. 6.

9. A body of troops drawn up in quadrilateral form. The formation used in the sixteenth century and afterward was a nearly solid body of pikemen, to which the harquebusiers, crossbowmen, etc., formed an accessory, as by being posted on the flanks, etc. In Shakspere's time troops drawn up in battle array were primarily in squares. At the present time the square is a hollow formation, composed of four fronts, each from two to five ranks deep, having the officers, colors, etc., in the center. This formation is used to repel cavalry, or to resist any superior force which outflanks or surrounds the body of troops. See *hollow square*, below.

He alone
Dealt on lieutenantry, and no practice had
In the brave *squares* of war.
Shak., A. and C., iii. 11. 40.

Dash'd on every rocky *square*,
Their surging charges foam'd themselves away.
Tennyson, Death of Wellington.

10. A name given to various squared projections or shanks to which other parts of machines may be fitted.—**11**†. Level; equality: generally with *the*. See *on the square* (*b*), below.—**12.** In *astrol.*, quartile; the position of planets distant 90 degrees from each other. See *aspect*, 7.

Their planetary motions, and aspects,
In sextile, *square*, and trine.
Milton, P. L., x. 659.

13†. Opposition; enmity; quarrel. See *square*[1], *v. i.*, 2.—**14.** A part of a woman's dress. (*a*) The yoke of a chemise or gown: so called because often cut square or angular. [Still in provincial use.]

The sleeve-hand, and the work about the *square* on 't [a smock]. *Shak.*, W. T., iv. 4. 212.

(*b*) A square opening in the upper part of the front of a bodice, or other garment covering the throat and neck. It is usually filled in with another material, except for evening dress.

A round Sable Tippet, about 2 yards long, the Sable pretty deep and dark, with a piece of black Silk in the *Square* of the neck.
Advt. quoted in *Ashton's* Reign of Queen Anne, I. 173.

15. A puzzle or device consisting of a series of words so selected that when arranged in a square they may be read alike across and downward. Also called *word-square.*—**16.** In *bookbinding*, the parts of the cover of a bound book that project beyond the edge of the leaves.—**17.** The square end of the arbor designed to receive the winding-key of a watch, or the similar part by which the hands of the watch are set.—**18.** In *flooring, roofing*, and other branches of mechanical art, an area 10 feet square; 100 square feet.—**19.** In *her.*, a bearing representing a carpenters' square. (See def. 5.) It is represented with or without the scale.—**20.** In *organ-building*, a thin piece of wood, in or nearly in the shape of a right-angled triangle, pivoted at the right or largest angle and connected with trackers at the other angles. It serves to change the direction of the tracker-action from vertical to horizontal, or vice versa.—**A deep square**, a long projection.—**A small square**, a narrow projection.—**At square**†, in opposition; at enmity.

Square.

Marry, she knew you and I were *at square;*
At least we fell to blowes.
Promos and Cassandra, ii. 4. (*Nares.*)

She falling *at square* with hir husband.
Holinshed, Hist. Eng., iv. 8.

By the square, exactly; accurately.

Not the worst of the three but jumps twelve foot and a half *by the squier*. *Shak.*, W. T., iv. 4. 348.

Why, you can tell us *by the squire*, neighbour,
Whence he is call'd a constable.
B. Jonson, Tale of a Tub, iv. 2.

Cyclical square. See *cyclical.*—**Face of a square.** See *face*[1].—**Geometrical square.** Same as *quadrat*, 2.—**Gunners' square.** Same as *quadrant*, 5.—**Hollow square**, a body of infantry drawn up in square with a space in the middle to receive baggage, colors, drums, etc. When orders or proclamations are to be read to troops, it is usual to form a hollow square, with the files facing inward. See def. 9.—**Incuse square.** See *incuse.*—**In square**†, square.

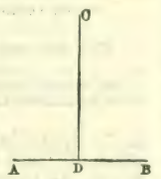
Then did a sharped spyre of Diamond bright,
Ten feete each way *in square*, appeare to mee.
Spenser, Visions of Bellay, l. 30.

Magic square. See *magic.*—**Method of least squares**, the method used by astronomers, geodesists, and others of deducing the most probable or best result of their observations, in cases in which the arithmetical mean of a number of observations of the same quantity is the most probable or best value of that quantity. The adoption of the mean value of a number of observations may be considered as the simplest application of the method of least squares. When the observed values depend upon several unknown quantities, the rule which results from the principle of the arithmetical mean is to adopt such values for the unknown quantities as to make the sum of the squares of the residual errors of the observations the least possible. When there are certain conditions that must be fulfilled, as for example, in geodesy, that the sum of the angles of each triangle must equal two right angles plus the spherical excess, the rules become still more complicated. There are also rules for calculating probable errors, etc.—**Nasik squares.** See the quotation.

Squares that have many more summations than in rows, columns, and diagonals have been investigated by the Rev. A. H. Frost (Cambridge Math. Jour., 1857), and called *Nasik squares* from the town in India where he resided; and he has extended the method to cubes (called Nasik cubes), various sections of which have the same singular properties. *Encyc. Brit.*, XV. 215.

Naval square, a square with diagonals which is painted on a ship's deck in some convenient place, for the purpose of aiding in taking the bearings of other ships or of objects on shore.—**Normal square**, the mathematical instrument called a square, for determining right angles.—**On or upon the square.** (*a*) At right angles; straight: as, to cut cloth *on the square*, as opposed to *bias*. Hence, figuratively—(*b*) On an equality; on equal terms.

They [the Presbyterians] chose rather to be lorded over once more by a tyrant . . . than endure their brethren and friends to be *upon the square* with them.
Milton, Ans. to Salmasius, x.



We live not *on the square* with such as these;
Such are our betters who can better please.
Dryden, tr. of Juvenal's Satires, iii. 179.

(*c*) Honest; just; fairly; honestly.

Keep *upon the square*, for God sees you; therefore do your duty. *Penn*, To his Wife and Children.

"Was the marriage all right, then?" "Oh, all *on the square*—civil marriage, church—everything."
George Eliot, Felix Holt, xxi.

Optical square, an instrument used in surveying for laying out lines at right angles to each other. It consists of a circular brass box containing two principal glasses of the sextant, viz. the index- and horizon-glasses, fixed at an angle of 45°. The method of using this instrument is obvious. If the observer moves forward or backward in the straight line AB, until the object B seen by direct vision coincides with another object C, seen by reflection, then a straight line drawn to C from the point at which he stands, as D, when the coincidence takes place will be perpendicular to AB.—**Out of square.** (*a*) Not drawn or cut to right angles. (*b*) Out of order; out of the way; irregular; incorrect or incorrectly.

Herodotus, in his Melpomene, scorneth them that make Europe and Asia equall, affirmynge that Europe . . . passeth them in latitude, wherin he speaketh not greatly *owt of square*. *R. Eden*, tr. of Francisco Lopez (First Books [on America, ed. Arber, p. 346).

In St. Paul's time the integrity of Rome was famous; Corinth many ways reproved; they of Galatia much more *out of square*. *Hooker*, Eccles. Polity, iii. 1.

Reducing squares, a method of copying designs or drawings on a different scale. The original is divided into squares by lines drawn at right angles to one another. The surface on which the copy is to be made is divided into the same number of squares, smaller or larger, according to the scale desired, and the lines of the design are drawn on the squares of the copy in the same relative positions that they occupy in the original. Instead of marking the original design with lines, a frame in which crossed threads or wires are set may be laid over it; or such a frame may be used in a similar way in drawing a landscape or any other subject from the original.—**Rising-square**, a square having a tongue and two arms at right angles to it, used in molding the floor-timbers in wooden ships. The tongue is in width equal to the siding size of the keel; and the seat and throat of the floor-timbers are squared across it, the risings of the floor at the head being squared across the arms. The timber-mold applied to the seating on the tongue and rising on the arm gives the shape of one side of the floor-timber; the mold reversed gives the other.—**Solid square** (*milit.*), a square body of troops; a body in which the ranks and files are equal.—**Square of an anchor**, the upper part of the shank.—**Square of sense**†. See the quotation.

I professe
My selfe an enemy to all other ioyes,
Which the most precious *square of sense* professes,
And find I am alone felicitate
In your deere Highnesse loue.
Shak., Lear (folio 1673), i. 1. 76.

[This phrase has been variously interpreted by commentators: Warburton refers it to the four nobler senses—sight, hearing, taste, and smell; Johnson makes it mean 'compass or comprehension of sense'; R. G. White, 'the entire domain of sensation'; Schmidt, 'the choicest symmetry of reason, the most normal and intelligent mode of thinking.']—**To break no squares**†, to make no difference. See the next phrase.—**To break** or **breed squares**†, **to break the square**†, to throw things out of due or just relation and harmony; make a difference.—**To reduce the square** (*milit.*). See *reduce.*—**To see how the squares go**, to see how the game proceeds, or how matters are going on.

At length they, having an oppertunitie, resolved to send Mr. Winslow, with what beaver they had ready, into England, to *see how ye squars wente*.
Bradford, Plymouth Plantation, p. 268.

One frog looked about him to *see how squares went* with their new king. *Sir R. L'Estrange.*

square[1] (skwãr), *a.* [< ME. *square, sqware, sware*, orig. two syllables, < OF. *esquarre, escarre* (equiv. to *quarré, carré*, F. *carré*), < ML. **exquadratus* (equiv. to *quadratus*), squared, square, pp. of **exquadrare*, make square: see *square*[1], *v.*, and cf. *square*[1], *n.*, and *quadrate, quarry*[1].] **1.** Having four equal sides and four right angles; quadrate; rectangular and equilateral: as, a *square* room; a *square* figure.

Thurgh a wyndow thikke, of many a barre
Of iren greet, and *square* as any sparre.
Chaucer, Knight's Tale, l. 218.

A massy slab, in fashion *square* or round.
Cowper, Task, i. 21.

2. Forming a right angle; having some part rectangular: as, a table with *square* corners.

Square tools for turning brass are ground in the same manner as triangular tools.
O. Byrne, Artisan's Handbook, p. 29.

3. Cut off at right angles, as any body or figure with parallel sides: as, a *square* apse or transept, a *square* (square-headed) window.

The east ends in this architecture [early Pointed in England] are usually *square*.
C. H. Moore, Gothic Architecture, p. 158.

4. Having a shape broad as compared with the height, with rectilinear and angular rather than curved outlines: as, a man of *square* frame.

Brode shulders aboue, big of his armys,
A harde brest hade the buerne, & his back *sware*.
Destruction of Troy (E. E. T. S.), l. 3967.

My queen's *square* brows [forehead];
Her stature to an inch. *Shak.*, Pericles, v. 1. 109.

Sir Bors it was, . . .
A *square*-set man. *Tennyson*, Holy Grail.

5. Accurately adjusted as by a square; true; just; fitting; proper.

She 's a most triumphant lady, if report be *square* to her.
Shak., A. and C., ii. 2. 190.

Should he retain a thought not *square* of her,
This will correct all. *Shirley*, Love's Cruelty, ii. 3.

Hence—**6.** Equitable; just; fair; unimpeachable.

All have not offended;
For those that were, it is not *square* to take
On those that are revenges.
Shak., T. of A., v. 4. 36.

Telling truth is a quality as prejudicial to a man that would thrive in the world as *square* play to a cheat.
Wycherley, Plain Dealer, i. 1.

7. Even; leaving no balance: as, to make the accounts *square;* to be *square* with the world.

There will be enough to pay all our debts and put us all *square*. *Disraeli*, Sybil, iii. 2.

If a man 's got a bit of property, a stake in the country, he'll want to keep things *square*. Where Jack isn't safe, Tom 's in danger. *George Eliot*, Felix Holt, xx.

8. Absolute; positive; unequivocal: as, a *square* refusal; a *square* contradiction; a *square* issue.—**9.** Leaving nothing; thorough-going; hearty.

Vn ferial beuveur. A *square* drinker, . . . one that will take his liquor soundly. *Cotgrave* (1611).

By Heaven, *square* eaters!
More meat, I say!—Upon my conscience,
The poor rogues have not eat this month.
Fletcher, Bonduca, ii. 3.

Hence—**10.** Solid; substantial; satisfying. [Colloq.]

And I've no idea, this minute,
When next a *square* meal I can raise.
New York Clipper, Song of the Tramp. (*Bartlett.*)

11. *Naut.*, noting a vessel's yards when they are horizontal and athwartships, or at right angles to the keel.—**All square**, all arranged; all right. *Dickens.*—**A square man**†. (*a*) A consistent, steadfast man. See *brick*[3], etym.

The Prince of Philosophers [Aristotle], in his first booke of the Ethicks, termeth a constant minded man, euen egal and direct on all sides, and not easily ouerthrowne by euery lit[l]e aduersitie, hominem quadratum, *a square man*. *Puttenham*, Arte of Eng. Poesie (ed. Arber), p. 113.

(*b*) A man who is fair-dealing, straightforward, and trustworthy.

Then they fill
Lordships; steal women's hearts; with them and theirs
The world runs round; yet there are *square men* still.
Ford, Lover's Melancholy, iv. 2.

They *square* up their bills with the importers either with the articles themselves or with the money they receive for them, and lay in their new stock of goods. *The Century*, XL. 317.

6. To make angular; bring to an angular position.

With that I . . . planted myself side by side with Mr. Drummle, my shoulders *squared* and my back to the fire. *Dickens*, Great Expectations, xliii.

He again *squared* his elbows over his writing. *R. L. Stevenson*, An Inland Voyage, Epil.

7. In *math.*, to multiply (a number or quantity) by itself.—8. To form into a polygon: a loose use of the word.

Summe ben 6 *squared*, summe 4 *squared*, and summe 3, as nature schapethe hem. *Mandeville*, Travels, p. 160.

9. To make "square" or "all right"; "fix"—that is, to make a corrupt bargain with; bribe; suborn: as, to *square* a subordinate before attempting a fraud. [Slang.]

The horses he had "nobbled," the jockeys "*squared*," the owners "hocussed." *Lever*, Davenport Dunn, xi.

How D—— was *squared*, and what he got for his not very valuable complicity in these transactions, does not appear. *Huxley*, Pop. Sci. Mo., XXXV. 609.

10. To find the equivalent of in square measure; also, to describe a square equivalent to. —**To square out**†, to arrange; lay out.

Mason,
Advance your Pickaxe, whilst the Carpenter *squares out*
Our new work. *Brome*, The Queens Exchange, v.

To square the circle. See *problem of the quadrature*, under *quadrature*.—**To square the course** (*naut.*), to lay out the course.—**To square the deadeyes** (*naut.*), to get the deadeyes in the same horizontal line.—**To square the ratlines** (*naut.*), to get the ratlines horizontal and parallel to one another.—**To square the yards** (*naut.*), to lay the yards at right angles with the vessel's keel by means of the braces, at the same time bringing them to a horizontal position by means of the lifts.

II. *intrans.* 1. To accord; agree; fit: as, his opinions do not *square* with mine.

He [the Duke] could never *square* well with his Eminency the Cardinal. *Howell*, Letters, I. vi. 46.

There is no church whose every part so *squares* unto my conscience. *Sir T. Browne*, Religio Medici, i. 5.

No works shall find acceptance in that day . . .
That *square* not truly with the Scripture plan.
Cowper, Charity, l. 559.

2†. To quarrel; wrangle; take opposing sides.

And when he gave me the bishopric of Winchester, he said he had often *squared* with me, but he loved me never the worse. *State Trials*, Gardiner, 5 Edw. VI., an. 1551.

Are you such fools
To *square* for this? *Shak.*, Tit. And., ii. 1. 100.

3. To take the attitude of a boxer; prepare to spar: usually with a qualifying adverb: as, to *square up;* to *square off*. [Colloq.]

"Wanted to fight the Frenchman;" . . . and he laughed, and he *squared* with his fists. *Thackeray*, Pendennis, xxxviii.

Here Zack came in with the gloves on, *squaring* on the most approved prize-fighter principles as he advanced. *W. Collins*, Hide and Seek, i. 12.

My fall was stopped by a terrible *squash*, that sounded louder to my ears than the cataract of Niagara. *Swift*, Gulliver's Travels, ii. 7.

Lemon squash. See *lemon-squash*.

squash[2] (skwosh), *n.* [An abbr. of *squanter-squash*, *squonter-squash*, < Amer. Ind. *askutasquash; asquash*, pl. of *asq*, raw, green.] The fruit of an annual plant of the gourd kind, belonging to one of several species of the genus *Cucurbita;* also, the plant itself. The very numerous and divergent varieties of the cultivated squash are reduced by good authority to three species — *C. maxima*, the great or winter squash; *C. Pepo*, including the pumpkin and also a large part of the ordinary squashes; and *C. moschata*, the musky, China, or Barbary squash. The last has a club-shaped, pear-shaped, or long cylindrical fruit with a glaucous-whitish surface. The other squashes may for practical purposes be divided into summer and winter kinds. Among the latter is the *C. maxima*, of which the fruit is spheroidal in form and often of great size, sometimes weighing 240 pounds. A variety of this is the crowned or turban squash, whose fruit has a circular projection at the top, the mark of the adherent calyx-tube. Other winter squashes are of moderate size, and commonly either narrowed toward the base into a neck which in the "crook-necks" is curved to one side, or egg-shaped and pointed at the ends, as in the (Boston) marrow, long a standard in America, or the still better Hubbard squash. The winter squash can be preserved through the season. The summer squash has a very short vine, hence sometimes called *bush-squash*. Its fruit is smaller, and is either a crook-neck or depressed in form, somewhat hemispherical with a scalloped border (see *simlin*); it is colored yellow, white, green, or green and white. Squashes are more grown in America than elsewhere, but also, especially the winter squashes, in continental Europe, and generally in temperate and tropical climates. In Great Britain the only ordinary squash is the vegetable marrow (see *marrow*[1]), or succade gourd. The summer squash is eaten before maturity, prepared by boiling. The winter squash is boiled or roasted; in France and the East it is largely used in soups and ragouts, in America often made into pies. It is also used as food for animals.

Askútasquash, their Vine-apple, Which the English, from them, call *Squashes*. *Roger Williams*, Key to Lang. of America (ed. 1643), xvi. [(Rhode Isl. Soc. Coll.).

Squashes, but more truly *squontersquashes;* a kind of mellon, or rather gourd. *Josselyn*, N. E. Rarities (1672), Amer. Antiq. Soc., IV. 193.

It is used for expressing moisture from paper prints, for bringing a film into close contact with a glass or mount, etc., and is also made in the form of a roller of soft rubber, much resembling a printers' inking-roller.

squeegee (skwē′jē), *v. t.* [< *squeegee, n.*] To treat with a squeegee or squilgee.

A glacé finish may easily be obtained by *squeegeeing* the washed print on a polished plate of hard rubber.
Sci. Amer., N. S., LX. 53.

squeezability (skwē-za-bil′i-ti), *n.* [< *squeezable* + *-ity* (see *-bility*).] The quality or state of being squeezable. *Imp. Dict.*

squeezable (skwē′za-bl), *a.* [< *squeeze* + *-able.*] 1. Capable or admitting of being squeezed; compressible.—2. Figuratively, capable of being constrained or coerced: as, a *squeezable* government. [Colloq.]

You are too versatile and too *squeezable;* . . . you take impressions too readily.
Savage, Reuben Medlicott, i. 9. (*Davies.*)

The peace-of-mind-at-any-price disposition of that [Gladstone] Cabinet had rendered it *squeezable* to any extent.
Lowe, Bismarck, II. 230.

squeeze (skwēz), *v.*; pret. and pp. *squeezed*, ppr. *squeezing.* [Early mod. E. also *squize, squise*, E. dial. also *squizzen* (also perversely *squeege*); with intensive *s-*, < ME. *queisen*,

squeeze, < AS. *cwēsan, cwȳsan, cwīsan* (in comp. *tō-cwȳsan, tō-cwēsan*), crush; cf. Sw. *qväsa*, squeeze, bruise; D. *kwetsen* = MHG. *quetzen*, G. *quetschen*, G. dial. *quetzen*, crush, squash, bruise; MLG. *quattern, quettern*, squash, bruise; Goth. *kwistjan*, destroy; Lith. *gaiszti*, destroy.] **I.** *trans.* 1. To press forcibly; subject to strong pressure; exert pressure upon: as, to *squeeze* a sponge; hence, to bruise or crush by the application of pressure: as, to *squeeze* one's fingers in a vise; apply force or pressure to for the purpose of extracting something: as, to *squeeze* a lemon.

O Phylax, spare
My *squeezed* Soul, least from herself she start.
Loose, loose the Buckle! if the time be come
That I must die, at least afford me room.
J. Beaumont, Psyche, iii. 206.

The people submit quietly when their governor *squeezes* their purses. *Pococke*, Description of the East, II. i. 151.

The ingredients for punch were all in readiness; but no one would *squeeze* the oranges till he came.
Fielding, Joseph Andrews, i. 13.

2. To press in sympathy or affection, or as a silent indication of interest or emotion: as, to *squeeze* one's hand.

He is said to be the first that made love by *squeezing* the hand. *Steele*, Spectator, No. 109.

With my left hand I took her right — did she *squeeze* it? I think she did.
Thackeray, Fitz-Boodle Papers, Dorothea.

3. To produce or procure by the application of pressure; express; extract: usually with *out*: as, to *squeeze* consent from an official.

Qveise out the jus. *Reliq. Antiq.*, I. 302.

When day appeared, . . . I began againe to *squise out* the matter [from a wound], & to annoint it with a litle salue which I had.
Guevara, Letters (tr. by Hellowes, 1577), p. 146.

He [Canute] *squees'd out* of the English, though now his subjects, not his Enemies, 72, some say 82, thousand pound. *Milton*, Hist. Eng., vi.

They can *squeeze* Bourdeaux *out* of a sloe, and draw Champagne from an apple. *Addison*, Tatler, No. 131.

4. To thrust forcibly; force: with *into*, or other similar adjunct: as, to *squeeze* a gown *into* a box.

He [Webster] has not the condensing power of Shakespeare, who *squeezed* meaning *into* a phrase with an hydraulic press. *Lowell*, Study Windows, p. 318.

Schneider had provided himself at the Greenland ports with the entire costume of the Eskimo belle, and, being a small man, was able to *squeeze* himself *into* the garments.
A. W. Greely, Arctic Service, p. 176.

5. To harass or oppress by exactions or the like.

The little officers oppress the people; the great officers *squeeze* them. *Pococke*, Description of the East, I. 171.

The whole convict system is a money-making affair; . . . they all just naturally *squeeze* the convict.
The Century, XL. 221.

6. To obtain a facsimile impression of on paper, by means of water and rubbing or beating. See *squeeze*, *n.*, 3.

But the overhang of the rock makes it extremely difficult to *squeeze* satisfactorily. *Athenæum*, No. 3284, p. 455.

Squeezed-in vessel, a vessel of pottery or glass whose form indicates that it has been pressed in on opposite sides, as if nipped by the fingers. It is a common form in Roman glass bottles; and many Japanese flasks of stoneware also have this shape.

II. *intrans.* 1. To press; press, push, or force one's way through or into some tight, narrow, or crowded place; pass by pressing or pushing.

Many a public minister comes empty in; but, when he has crammed his guts, he is fain to *squeeze* hard before he can get off. *Sir R. L'Estrange.*

2. To pass (through a body) under the application of pressure.

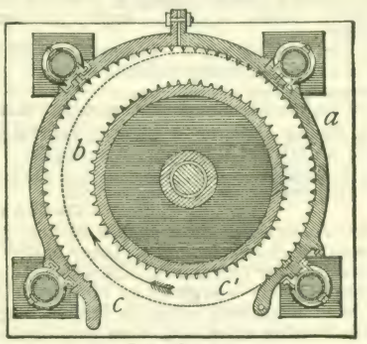
A concave sphere of gold filled with water, and sodered up, has, upon pressing the sphere with great force, let the water *squeeze* through it and stand all over its outside in multitudes of small drops like dew, without bursting or cracking the body of the gold.
Newton, Opticks, ii. 3, prop. 8.

squeeze (skwēz), *n.* [< *squeeze*, *v.*] 1. Pressure, or an application of pressure; a hug or embrace; a friendly, sympathetic, or loving grasp: as, a *squeeze* of the hand.

Had a very affectionate *squeeze* by the hand, and a fine compliment in a corner. *Gray*, Letters, I. 239.

The Squire shook him heartily by the hand, and congratulated him on his safe arrival at Headlong Hall. The doctor returned the *squeeze*, and assured him that the congratulation was by no means misapplied.
Peacock, Headlong Hall, iii.

2. Crush; crowding.



The pair of MacWhirters journeyed from Tours, . . . and, after four-and-twenty hours of *squeeze* in the diligence, presented themselves at nightfall at Madame Smolensk's. *Thackeray*, Philip, xxvi.

3. A cast or an impression, as of an inscription or a coin, produced by forcing some plastic material into the hollows or depressions of the surface; especially, such a facsimile or impression made by applying sheets of wet unsized paper to the object to be copied, and thoroughly passing over the sheets with light blows of a stiff brush, so as to force the paper into every inequality. The paper, upon drying, hardens, yielding a perfect and durable negative, or reversed copy, of the original. This method is employed by archæologists for securing faithful transcripts of ancient inscriptions.

It is to him that we owe the copies and *squeezes* of the Nabathean inscriptions. *Contemporary Rev.*, LIV. 302.

Armed, therefore, with a stock of photographic plates, and with the far more essential stock of paper for making moulds or *squeezes* from the stone, I began work on the temples of Thebes. *Harper's Mag.*, LXXVII. 297.

★ **squeezer** (skwē'zėr), *n.* [< *squeeze* + *-er*[1].] 1. One who or that which squeezes. Specifically—(*a*) In *iron-working*, a machine employed in getting the puddled ball into shape, or shingling it, without hammering. (See *puddling*.) Squeezers are of two kinds, reciprocating and rotary. The essential feature of the reciprocating form is that a movable arm or lever works against a corresponding fixed jaw, the former representing the

Rotary Squeezer.

a, ridged eccentric casing; *b*, ridged roller. The ball of metal enters at *c*, in the direction shown by the arrow, and emerges at *c'*.

hammer, the latter the anvil, of the old method of shingling with the hammer. In the rotary squeezer the puddled ball is brought into shape by being passed between a cast-iron cylinder and a cylindrical casing, the former being placed eccentrically within the latter so that the distance between their surfaces gradually diminishes in the direction of the rotation. The ball, being introduced at the widest part of the opening, is carried forward and finally delivered at the narrower end, reduced in size and ready for rolling. (*b*) In *sheet-metal working*, a crimping-machine for forcing the tops and covers of tin cans over the cylinders which form the sides of the cans. (*c*) A lemon-squeezer.

2. *pl.* A kind of playing-cards in which the face-value of each card is shown in the upper left-hand corner, and can readily be seen by squeezing the cards slightly apart, without displaying the hand.—**Alligator squeezer.** Same as *crocodile squeezer*.—**Crocodile squeezer**, a peculiar form of squeezer, having a long projecting upper jaw armed with teeth. It is used in the manufacture of iron.

squeezing (skwē'zing), *n.* [Verbal n. of *squeeze*, *v.*] 1. The act of pressing; compression.—2. That which is forced out by or as by pressure; hence, oppressive exaction.

The dregs and *squeezings* of the brain.
Pope, Essay on Criticism, l. 607.

squeezing-box (skwē'zing-boks), *n.* In *ceram.*, a cylinder of metal, through an opening in the bottom of which plastic clay is forced in a continuous ribbon of any desired section, to form lugs, handles, etc.

squeezy†, *a.* See *squeasy*.

squelch (skwelch), *n.* [Formerly also *squelsh*; prob. a var., with intensive prefix *s-*, of E. dial. *quelch*, a blow, bang.] A crushing blow; a heavy fall. [Colloq.]

But Ralpho, who had now begun
T' adventure resurrection
From heavy *squelch*, and had got up.
S. Butler, Hudibras, I. ii. 933.

★ **squelch** (skwelch), *v.* [See *squelch*, *n.*] **I.** *trans.* 1. To crush down; stamp on as if squeezing out something liquid; put an end to. [Colloq.]

'Sfoot, this Fat Bishop hath so overlaid me,
So *squelch'd* and squeezed me.
Middleton, Game at Chess, v. 3.

Here, all about the fields, is the wild carrot. You cut off its head, just before it seeds, and you think you have *squelched* it; but this is just what Nature . . . wanted you to do. *J. Burroughs*, The Century, XIX. 688.

2. To disconcert; discomfit; put down. [Colloq.]

Luke glanced shamefaced at the nosegay in his buttonhole, and was *squelched*.
J. W. Palmer, After his Kind, p. 120.

II. *intrans.* To be crushed. [Colloq.]

squelet†, *v.* A Middle English form of *squeal*.

squelert†, **squelery**†, *n.* Middle English forms of *sculler*[2], *scullery*.

squench (skwench), *v. t.* [A var., with intensive prefix *s-*, of *quench*.] To quench. *Beau. and Fl.* [Obsolete or vulgar.]

squerelt†, **squerrelt**†, **squerrilt**†, *n.* Obsolete forms of *squirrel*.

squeteague (skwē-tēg'), *n.* [Also *squetee, squitee, squit*; Narraganset.] A salt-water sciænoid fish, *Cynoscion regalis* (formerly *Otolithus regalis*), also called *weakfish, sea-salmon*, and *sea-trout* in common with some other members of the same genus. It is silvery, darker above, with many irregular, small, dark blotches tending to form oblique undulating bars. It is common from Cape Cod southward, and is a valued food-fish. A more distinctly marked fish of this kind is *C. nebulosus*, the spotted squeteague, weakfish, or sea-trout, of more southerly distribution. See *Cynoscion*.

squib (skwib), *v.*; pret. and pp. *squibbed*, ppr. *squibbing*. [A var. of **squip*, < ME. *squippen*, a var. of *swip* (ME. *swippen*), move swiftly, sweep, dash: see *swip, swipe*.] **I.** *intrans.* 1. To move swiftly and irregularly.

A battered unmarried beau, who *squibs* about from place to place. *Goldsmith*, Citizen of the World, lxxxviii.

2. [< *squib*, *n.*, 3.] To make a slight, sharp report, like that of an exploding squib.—3. [< *squib*, *n.*, 4.] To resort to the use of squibs, or petty lampoons.

II. *trans.* 1. To throw (in or out) suddenly; explode.

Thou wouldst neuer *squib* out any new Salt-petre Iestes against honest Tucca.
Dekker, Humorous Poet (Works, ed. Pearson, I. 235).

He [Mr. Brian Twyne] *squibs* in this parenthesis.
Fuller, Hist. Cambridge University, i. § 52.

2. [< *squib*, *n.*, 4.] To attack in squibs; lampoon.

squib (skwib), *n.* [< *squib*, *v.*] 1. A ball or tube filled with gunpowder, sent or fired swiftly through the air or along the ground, exploding somewhat like a rocket.

Like a *Squib* it falls,
Or fire-wingd shaft, or sulph'ry Powder Balls.
Sylvester, tr. of Du Bartas's Weeks, i. 2.

Nor nimble *squib* is seen to make afeard
The gentlewomen.
B. Jonson, Every Man in his Humour, Prol.

So *squibs* and crackers fly into the air,
Then, only breaking with a noise, they vanish
In stench and smoke. *Ford*, Broken Heart, ii. 2.

2. A reed, rush, quill, or roll of paper filled with a priming of gunpowder; a tube of some kind used to set off a charge of gunpowder, as at the bottom of a drill-hole. Also called *mote, train*, and *match*.—3. A fire-cracker, especially one broken in the middle so that when it is fired the charge explodes without a loud report.—4. A petty lampoon; a short satirical writing or sketch holding up a person or thing to ridicule.

Allowing that . . . [the play] succeeds, there are a hundred *squibs* flying all abroad to prove that it should not have succeeded. *Goldsmith*, Polite Learning, x.

5†. One who writes lampoons or squibs; a petty satirist; a paltry, trifling fellow.

The *squibs* are those who, in the common phrase of the word, are called libellers, lampooners, and pamphleteers.
Steele, Tatler, No. 88.

6. A kind of cheap taffy, made of treacle.

And there we had a shop, too, for lollipops and *squibs*.
Hood, Lines by a Schoolboy.

squibbish (skwib'ish), *a.* [< *squib* + *-ish*[1].] Flashy; light. *T. Mace*, Music's Monument. (*Davies.*)

squid (skwid), *n.* [Origin unknown.] 1. A kind of cuttlefish or calamary; a dibranchiate cephalopod with ten arms, especially of the family *Loliginidæ* or *Teuthididæ*. The name is most frequently given to the small, slender calamaries, a few inches long and with a caudal fin, which are much used as bait, but is extended (with or without a qualifying term) to many other species of different genera and families, some of which, as the giant squids, are the largest of cephalopods. See cuts under *Architeuthis, calamary, Desmoteuthis, Loliginidæ, Sepiola*, and *Spirula*, and compare those under *Dibranchiata, cuttlefish*, and *Sepia*.

2. An artificial bait or lure of metal, ivory, etc., used in angling or trolling for fish, often simply a fish-hook on the shank of which a mass of lead is melted in cylindrical or tapering form to imitate a squid (def. 1).—**False squids**, the *Loligopsidæ*.—**Flying squids**, the *Ommastrephidæ*.—**Giant squids**, the very large cephalopods of the genus *Architeuthis*, as *A. harveyi* of the Atlantic coast of North America, among those called *devil-fish*. See cut under *Architeuthis*.—**Long-armed squids**, the *Chiroteuthidiidæ*.—**Long-finned squids**, species of *Loliginidæ*. See cut under *Loliginidæ*.—**Short-finned squids**, species of *Ommastrephes*, as *O. illecebrosus*, common in New England seas and northward, and a principal source of bait.

squid (skwid), *v. i.*; pret. and pp. *squidded*, ppr. *squidding*. [< *squid*, *n.*] To fish with a squid or spoon-bait.

squidding (skwid'ing), *n.* [Verbal n. of *squid*, *v.*] The act, art, or practice of fishing with a squid.

squid-fork (skwid'fôrk), *n.* An instrument used by fishermen in baiting with a squid.

squid-hound (skwid'hound), *n.* The striped-bass, *Roccus lineatus*. See cut under *bass*.

squid-jig (skwid'jig), *n.* A squid-jigger.

squid-jigger (skwid'jig″ėr), *n.* A device for catching squids, consisting of a number of hooks soldered together by the shanks so that the points radiate in all directions. It is dragged or jerked through the water.

squid-jigging (skwid'jig″ing), *n.* The act of jigging for squids; the use of a squid-jigger; squidding.

squid-thrower (skwid'thrō″ėr), *n.* A device, on the principle of the catapult, used in trolling to cast a fishing-line seaward. *E. H. Knight.*

squier[1]†, *n.* An obsolete spelling of *squire*[1].

squier[2]†, *n.* An obsolete form of *square*[1].

squierie†, *n.* An obsolete spelling of *squiry*.

squiggle (skwig'l), *v. i.*; pret. and pp. *squiggled*, ppr. *squiggling*. [Appar. a var., with intensive prefix *s-*, of **quiggle*, E. dial. *queegle*, a var. of *wiggle:* see *wiggle*.] 1. To shake a fluid about in the mouth with the lips closed. [Prov. Eng.]—2. To move about like an eel; squirm; wriggle. [Colloq., U. S.]

squilert†, *n.* A Middle English form of *sculler*[2].

squilgee (skwil'jē), *n.* [Also *squillagee*, *squillgee*, also *squeegee*, *squegee* (see *squeegee*); origin obscure; perhaps connected with *swill*, *swile*, wash, rinse; but the term. is not explained.] 1. *Naut.*: (*a*) An implement somewhat resembling a wooden hoe, with an edge of india-rubber or thick leather, used to scrape the water from wet decks. (*b*) A small swab. (*c*) A becket and toggle used to confine a studding-sail while setting it.—2. One of several implements constructed like the nautical implement above defined (1 (*a*)), used for washing glass, in photographic work, etc. See *squeegee*, 2.

squilgee (skwil'jē), *v. t.* [< *squilgee*, *n.*] *Naut.*, to scrape (the wet decks of a ship) with a squilgee.

The washing, swabbing, *squilgeeing*, etc., lasts, or is made to last, until eight o'clock, when breakfast is ordered, fore and aft. *R. H. Dana, Jr.*, Before the Mast, p. 100.

squilgee-toggle (skwil'jē-tog″l), *n.* A toggle with a small line fastened to it, used to secure a strap round a studdingsail while being set, so that by pulling out the squilgee when the sail is hoisted far enough the sail is released.

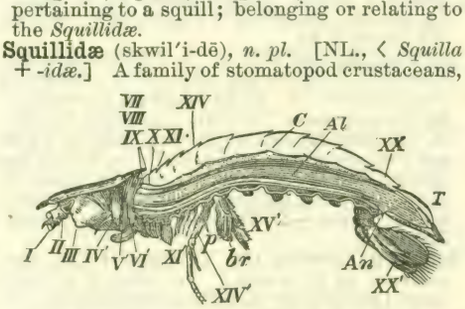
squill[1] (skwil), *n.* [< ME. *squille*, *squylle*, *sqwylle*, *squyle*, < OF. *squille*, *scille*, F. *squille*, *scille* = Sp. *esquila* = Pg. *scilla* = It. *squilla*, < L. *squilla*, *scilla*, squill, = Gr. *σκίλλα*, squill, perhaps for **σκίδλα* (as equiv. *σχῖνος* for **σχίδνος*), and so called from its splitting easily into scales, < *σχίζειν*, split: see *schism*.] 1. The medicinal bulb of *Urginea maritima*, or the plant itself; the officinal squill. See *Urginea*.—2. Any plant of the genus *Scilla* (which see). *S. nonscripta* is commonly called *bluebell*, or *wild hyacinth*. The spring squill, *S. verna*, and the autumn squill, *S. autumnalis*, are small European wild flowers of no great merit in cultivation. The star-flowered squill, *S. amœna*, is a distinct early species, the flowers indigo-blue with large yellowish-green ovary, less attractive than the species following. The early squill, *S. bifolia*, produces rich masses of dark-blue flowers very early in the spring. The Spanish squill, *S. Hispanica*, is a fine species of early summer, with a strong pyramidal raceme of large pendent usually light-blue flowers: also called *Spanish bluebell*. The Italian squill, *S. Italica*, has pale-blue flowers with intensely blue stamens. The pyramidal or Peruvian squill, *S. Peruviana*, not from Peru, but from the Mediterranean region, has pale-blue flowers with white stamens, the flowers very numerous in a regular pyramid. The Siberian squill, *S. Sibirica*, not from Siberia, but from southern Russia, is a very choice small early-flowering species, the blossom of a peculiar porcelain-blue. These are all hardy except the pyramidal squill.—**Chinese squill**, a species of *Scilla*, *S. Chinensis*.—**Compound syrup of squill**. See *syrup*.—**Oxymel of squill**. See *oxymel*.—**Pancratic squill**, a variety of the officinal squill said to be milder in its action.—**Roman squill**, the Roman hyacinth, *Hyacinthus Romanus* (*Scilla Romana* of Ker).—**Wild squill**, the American wild hyacinth, or eastern camass, *Quamasia hyacinthina*.

Squill (*Urginea maritima*).

squill[2] (skwil), *n.* [< L. *squilla*, *scilla*, a small fish of the lobster kind, a prawn, shrimp, so called from a supposed resemblance to the bulb or plant of the same name: see *squill*[1].] 1. A stomatopodous crustacean of the genus *Squilla* or family *Squillidæ;* a mantis-shrimp or squill-fish. See cuts under *mantis-shrimp* and *Squillidæ*.—2†. An insect so called from its resemblance to the preceding; a mantis. Also called *squill-insect*.

Squilla (skwil'ą), *n.* [NL. (Fabricius), < L. *squilla*, *scilla*, a prawn: see *squill*[2].] 1. The representative genus of *Squillidæ*, containing such crustaceans as *S. mantis*, the common mantis-shrimp or locust-shrimp. The southern squill of the United States is *Coronis glabriuscula*. See cuts under *mantis-shrimp* and *Squillidæ*.—2. [*l. c.*] Same as *squill*[2], 1.—3†. [*l. c.*] Same as *squill*[2], 2.

The *Squilla*, an insect, differs but little from the fish Squilla. *Moufet*, Theater of Insects, II. xxxvii.



squillagee (skwil'ą-jē), *n.* Same as *squilgee*.

squillante (skwil-lan'te), *a.* [It., ppr. of *squillare*, clang, ring.] In *music*, ringing; bell-like in tone.

squill-fish (skwil'fish), *n.* A squill, or some similar crustacean.

squillian (skwil'i-an), *a.* [= F. *squillien;* as L. *squilla*, squill (see *squill*[2]), + *-ian*.] Of or pertaining to a squill; belonging or relating to the *Squillidæ*.

Squillidæ (skwil'i-dē), *n. pl.* [NL., < *Squilla* + *-idæ*.] A family of stomatopod crustaceans,

Locust-shrimp (*Squilla scabricauda*), in longitudinal vertical section.

I–XX, the somites; I'–XX, their appendages, of most of which the bases only are seen. *Al*, alimentary canal; *C*, heart; *An*, anus; *T*, telson; *br*, branchiæ; *P*, penis.

typified by the genus *Squilla*, to which the *Stomatopoda* are sometimes restricted; the mantis-shrimps or gastrurans. The pseudogenus *Alima* and at least two other spurious genera were named from larval forms of this family. Other good genera than the type are *Coronis* and *Gonodactylus*. Also called *Squilloidea*.

squill-insect† (skwil'in″sekt), *n.* Same as *squill*[2], 2. *N. Grew.*

squillitic (skwi-lit'ik), *a.* [< L. *squilliticus*, *scilliticus*, < Gr. *σκιλλιτικός*, pertaining to the squill: see *squill*[2].] Of, pertaining to, or obtained from squills.

A decoction of this kind of worms sodden in *squilliticke* vinegre. *Holland*, tr. of Pliny, xxx. 3.

squimble-squamble†, *adv.* Same as *skimble-scamble*. *Cotgrave.*

squint† (skwin), *v. i.* and *t.* [Also *squean*, *skeen*, *sken*, also *squinny*, formerly *squiny;* cf. *squint*.] To squint.

As doctors in their deepest doubts
Stroke up their foreheads hie;
Or men amazde their sorrow flouts
By *squeaning* with the eye.
Armin's Italian Taylor and his Boy (1609). (*Nares.*)

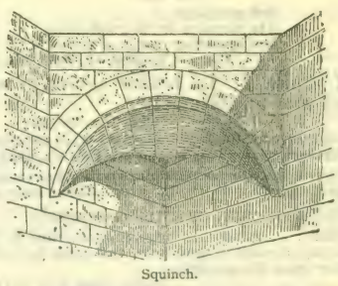
squinance† (skwin'ans), *n.* Same as *squinancy*, 1.

squinancy† (skwin'an-si), *n.* [Also contr. *squincy*, *squinsy;* < ME. *squinacie*, *sqwinacie*, < OF. *esquinancie*, *squinancie*, quinsy: see *quinsy*.] 1. Quinsy.

Diseases that be verie perillous: . . . to wit, the Pleuresie, *Squinancie*, inflammation, sharpe Feuer, or Apoplexie. *Guevara*, Letters (tr. by Hellowes, 1577), p. 285.

2. The quinsywort.

squinancy-berry† (skwin'an-si-ber″i), *n.* Same as *quinsy-berry*.



squinancy-wort† (skwin'an-si-wėrt), *n.* Same as *quinsywort*.

squince†, *n.* [Early mod. E. *squynce;* var. of *squincy*, etc.] Same as *squinancy*.

Diseases and sickenesses, as *squynces*.
Sir T. Elyot, The Governour, iii. 22.

squinch[1] (skwinch), *n.* [A var. of *sconce*[2].] In *arch.*, a small arch, or a series of arches, corbeled out, thrown across an angle, as in a square tower to support the side of a superimposed octagon. In Western architecture it is frequent as performing the function of the Eastern pendentive. The application of the term may be due to the resemblance of this structure to a corner cupboard, which was also called squinch or sconce. See cut in next column.

squinch[2] (skwinch), *n.* A dialectal variant of *quince*.

Squinch.

squincy†, *n.* [A contraction of *squinancy:* see *squinancy, quinsy*.] Quinsy.

Shall not we be suspected for the murder,
And choke with a hempen *squincy?*
Randolph, Jealous Lovers, iii. 14.

squin-eye†, *n.* A squinting eye.

squink (skwingk), *v. i.* [A dial. form of *wink:* see *squint* and *wink*.] To wink. [Prov. Eng.]

squinny (skwin'i), *v. i.* [Formerly also *squiny:* see *squin*.] To squint. [Obsolete or prov. Eng.]

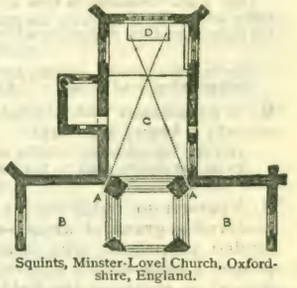
I remember thine eyes well enough. Dost thou *squiny* at me? *Shak.*, Lear, iv. 6. 140.

★**squint** (skwint), *a.* and *n.* [Not found in ME., except as in *asquint*, askew; appar. an extension of the obs. or dial. *squin*, *squean*, *sken*, prob. connected with D. *schuinen*, slant, slope, *schuin*, slant, sloping; perhaps associated with E. dial. *squink*, wink, partly a var. of *wink*, partly < Sw. *svinka*, shrink, flinch, nasalized form of *svika*, balk, flinch, fail; cf. Dan. *svigte*, bend, fail, forsake; AS. *swican*, escape, avoid. The history of the word is meager, and the forms appar. related are more or less involved.] **I.** *a.* 1. Looking different ways; characterized by non-coincidence of the optic axes; affected with strabismus: said of eyes.

Some things that are not heard
He mutters to himselfe, and his *squint* eye
Casts towards the Moone, as should his wits there lye.
Heywood, Dialogues (Works, ed. Pearson, 1874, VI. 190).

2. That looks or is directed obliquely; looking askance; indirect; oblique; sinister.

The pleasure I shall live in, and the freedom,
Without the *squint* eye of the law upon me,
Or prating liberty of tongues that envy!
Fletcher, Rule a Wife, iii. 1.



I incline to hope, rather than fear,
And gladly banish *squint* suspicion.
Milton, Comus, l. 413.

Squint quoin, in *arch.*, an external oblique angle.

II. *n.* 1. An affection of the eyes, consisting in non-coincidence of the optic axes; a squint eye; strabismus (which see).

He's blue eyes, and not to be called a *squint*, though a little cast he's certainly got. *Hood*, The Lost Heir.

2. An oblique or furtive look; a furtive glance; hence (colloquially), a leaning, an inclination: as, he had a decided *squint* toward democracy.—3. In *arch.*, an oblique opening through the walls of some old churches, usually having for its object to enable a person in the transepts or aisles to see the elevation of the host at the high altar. The usual situation for a squint is on one or both sides of the chancel arch; but they are also found in other positions, though always directed toward an altar. Generally they are not above a yard high, and 2 feet wide, but sometimes they form narrow arches 10 or 12 feet in height, as at Minster-Lovel, Oxfordshire. The name *hagioscope* is sometimes applied to them.—**Braid's squint**, the turning of the eyes simultaneously upward and inward, as if trying to look at the middle of one's own forehead, as a means of producing a hypnotic state.

Squints, Minster-Lovel Church, Oxfordshire, England.

A A, squints; B B, transepts; C, chancel; D, altar.

squint (skwint), *v.* [< *squint*, *n.*] **I.** *intrans.* 1. To look askew, or with the eyes differently directed; look askance.

He gets a crick in his neck oft-times with *squinting* up at windowes and Belconies.
Brome, Sparagus Garden, iii. 4.

Some can *squint* when they will. *Bacon.*

2. To be affected with strabismus.—3. To run or be directed obliquely; have an indirect reference or bearing.

Not a period of this epistle but *squints* towards another over against it. *Pope.*

Not meaning . . .
His pleasure or his good alone,
But *squinting* partly at my own.
Cowper, To Rev. W. Bull, June 22, 1782.

II. *trans.* **1.** To render squint or oblique; affect with strabismus.

Let him but use
An unsway'd eye, not *squinted* with affections.
Heywood, Dialogues (Works, ed. Pearson, 1874, VI. 226).

He gives the web and the pin, *squints* the eye, and makes the hare-lip. *Shak.*, Lear, iii. 4. 122.

2. To turn, cast, or direct obliquely.

Perkin . . . raised his Siege, and marched to Taunton; beginning already to *squint* one eye upon the crowne and another upon the sanctuary.
Bacon, Hist. Hen. VII., p. 183.

squinter (skwin'tėr), *n.* [< *squint* + *-er*1.] One who squints; a cross- or squint-eyed person.

I pass over certain difficulties about double images, drawn from the perceptions of a few *squinters*.
W. James, Mind, XII. 523, note.

squint-eyed (skwint'īd), *a.* **1.** Having eyes that squint; having eyes with non-coincident axes. *N. Bailey*, tr. of Colloquies of Erasmus, I. 103. —**2.** Oblique; indirect; sinister; malignant.

This is such a false and *squinteyed* praise,
Which, seeming to look upwards on his glories,
Looks down upon my fears.
Sir J. Denham, The Sophy. (*Latham.*)

3. Looking obliquely or by side-glances: as, *squint-eyed* jealousy or envy.

The hypocrite . . . looks *squint-eyed*, aiming at two things at once: the satisfying his own lusts, and that the world may not be aware of it.
Rev. T. Adams, Works, I. 494.

squintifego† (skwin-ti-fē'gō), *a.* [< *squint* + *-ifego*, an arbitrary termination.] Squinting.

The timbrel, and the *squintifego* maid
Of Isis, awe thee.
Dryden, tr. of Persius's Satires, v. 271.

squinting (skwin'ting), *n.* [Verbal n. of *squint*, *v.*] The act or habit of looking asquint; strabismus.

squintingly (skwin'ting-li), *adv.* With squint look; by side-glances.

squire1 (skwīr), *n.* [Also dial. *square*; early ★mod. E. also *squier*; < ME. *squier*, *squyer*, *squier*, *scwier*, *swyere*, by apheresis from *esquire*: see *esquire*1.] **1.** An esquire; an attendant on a knight.

Than tolde Grisandolus how he dide laugh before the abbey and in the chapell, for the *squyer* that hadde smyten his maister, and the dyuerse wordes that he hadde spoken.
Merlin (E. E. T. S.), iii. 428.

The rest are princes, barons, lords, knights, *squires*,
And gentlemen of blood. *Shak.*, Hen. V., iv. 8. 94.

2. A gentleman who attends upon a lady; an escort; a beau; a gallant.

And eke himselfe had craftily devisd
To be her *Squire*, and do her service well aguisd.
Spenser, F. Q., II. i. 21.

3. A person not noble nor a knight, but who has received a grant of arms.—**4.** In England, a landed proprietor who is also justice of the peace: a term nearly equivalent to *lord of the manor*, as meaning the holder of most of the land in any neighborhood.—**5.** In the United States, in country districts and towns, a justice of the peace, a local judge, or other local dignitary: chiefly used as a title.—**Broom-squire.** See the quotation.

"*Broom-squires?*" "So we call in Berkshire squatters on the moor who live by tying heath into brooms."
Kingsley, Two Years Ago, xiv.

Squire of dames, a man very attentive to women and much in their company.

Marry, there I'm call'd
The *Squire of Dames*, or Servant of the Sex.
Massinger, Emperor of the East, i. 2.

Squire of the body, a personal attendant, originally on a knight, but later on a courtezan; a pimp.—**Squire of the pad**†, a footpad; a highwayman.

Sometimes they are *Squires of the Pad*, and now and then borrow a little Money upon the King's High Way, to recruit their losses at the Gaming House.
Tom Brown, Works (ed. 1705).

squire1 (skwīr), *v. t.*; pret. and pp. *squired*, ppr. *squiring*. [< ME. **squiren*, *squeren*; < *squire*1, *n.*] **1.** To attend and wait upon, as a squire his lord.—**2.** To attend, as a gentleman a lady; wait upon or attend upon in the manner of a squire; escort.

For he *squiereth* me bothe up and doun,
Yet hastow caught a fals suspeccioun.
Chaucer, Prol. to Wife of Bath's Tale, l. 305.

To *squire* women about for other folks is as ungrateful an employment as to tell money for other folks.
Wycherley, Country Wife, iv. 3.

squire2†, *n.* An old form of *square*1.

squireage (skwīr'āj), *n.* [< *squire*1 + *-age*.] The untitled landed gentry; the squires of a country taken collectively. *De Morgan*, Budget of Paradoxes, p. 46. [Rare.]

squirearch (skwīr'ärk), *n.* [< *squirearch-y*.] A member of the squirearchy.

Man is made for his fellow-creatures. I had long been disgusted with the interference of those selfish *squirearchs*.
Bulwer, Caxtons, ii. 11.

squirearchal (skwīr'är-kạl), *a.* [< *squirearch* + *-al*.] Of or pertaining to a squirearchy. *Imp. Dict.*

squirearchical (skwīr'är-ki-kạl), *a.* [< *squirearch-y* + *-ic-al*.] Of, pertaining to, or characteristic of squirearchy or a squirearch. *Bulwer*, My Novel, i. 10.

squirearchy (skwīr'är-ki), *n.* [Also *squirarchy*; < *squire*1 + Gr. *ἀρχία*, rule (after analogy of *monarchy*, etc.).] **1.** In England, government by the squires, or "country gentlemen"—that is, the large landed proprietors, most of whom are justices of the peace, and who, before the Reform Bill of 1832, and to a certain extent after it, had great influence in the House of Commons. Hence—**2.** The squires themselves collectively.

squireen (skwīr-ēn'), *n.* [< *squire*1 + dim. *-een*, common in Ir. words.] In Ireland, a small landed proprietor: usually contemptuous.

Squireens are persons who, with good long leases or valuable farms, possess incomes of from three to eight hundred a year, who keep a pack of hounds, take out a commission of the peace, sometimes before they can spell (as her ladyship said), and almost always before they know anything of law or justice. *Miss Edgeworth*, Absentee, vii.

squirehood (skwīr'hụd), *n.* [< *squire*1 + *-hood*.] The state of being a squire; the rank or position of a squire. *Swift*, Letter to the King at Arms.

squirel†, *n.* An obsolete form of *squirrel*.

squirelet (skwīr'let), *n.* [< *squire*1 + *-let*.] A petty squire; a squireling. *Carlyle*, Misc., iii. 56. (*Davies.*)

squireling (skwīr'ling), *n.* [< *squire*1 + *-ling*1.] A petty squire; a squirelet.

But to-morrow, if we live,
Our ponderous squire will give
A grand political dinner
To half the *squirelings* near.
Tennyson, Maud, xx. 2.

squirely (skwīr'li), *a.* [< *squire*1 + *-ly*1.] Befitting or characteristic of a squire.

One very fit for this *squirely* function.
Shelton, tr. of Don Quixote, i. 4. (*Latham.*)

How could that oligarchy [the Southern States of the United States], with its *squirely* tastes, its free wasteful outdoor life, its love of landed property, and its contempt for manual labour, become a trading community?
The Academy, July 20, 1889, p. 32.

squireship (skwīr'ship), *n.* [< *squire*1 + *-ship*.] Same as *squirehood*. *Shelton*, tr. of Don Quixote, i. 4. (*Latham.*)

squiress (skwīr'es), *n.* [< *squire*1 + *-ess*.] The wife of a squire. *Bulwer*, Pelham, vii. (*Davies.*) [Colloq., Eng.]

squirm (skwėrm), *v. i.* [Prob. a var. of *squir*, throw with a jerk, influenced by association with *swarm* and *worm*: see *squir*.] **1.** To wriggle or writhe, as an eel or a worm; hence, to writhe mentally.

You never need think you can turn over any old falsehood without a terrible *squirming* and scattering of the horrid little population that dwells under it.
O. W. Holmes, Autocrat, v.

They [worms in the pupa state] only *squirm* a little in a feeble way now and then, and grow stiffer, till they can't *squirm* at all, and then they're mummies, and that's the end of it till the butterflies are born.
Mrs. Whitney, Leslie Goldthwaite, viii.

2. To climb by wriggling; "shin": as, to *squirm* up a tree.

squirm (skwėrm), *n.* [< *squirm*, *v.*] **1.** A wriggling motion, like that of a worm or an eel.—**2.** *Naut.*, a twist in a rope.

squirr, *v.* See *squir*.

squirrel (skwur'el or skwir'el), *n.* [Early mod. E. also *squirril*, *squerrel*, *squirel*, *squiril*; < ME. *squirel*, *squyrelle*, *scurel*, *swerelle*, *swyrelle*, < OF. *esquirel*, *escurel*, *escuirel*, *escureul*, *escureuil*, *escurieu*, F. *écureuil* = Pr. *escurol* = Sp. Pg. *esquilo* (cf. It. *scojattolo*, *scojatto*), < ML. *sciuriolus*, *sciurellus* (also, after Rom., *scuriolus*, *scurellius*, *escurellus*, corruptly *sirogrillus*, *cirogrillus*, *experiolus*, *asperiolus*, etc.), dim. of L. *sciurus*, < Gr. *σκίουρος*, a squirrel, lit. 'shadow-tailed,' < *σκιά*, shadow, + *οὐρά*, tail. For the sense, cf. E. dial. *skug*, a squirrel, lit. 'shade': see *skug*.] **1.** A rodent quadruped of the family *Sciuridæ* and genus *Sciurus*, originally and specifically *Sciurus vulgaris* of Europe. Squirrels have pointed ears and a long bushy tail; they are of active arboreal habits, and are able to sit up on their hind quarters and use the fore paws like hands. *S. vulgaris*, called in England *skug*, is a squirrel 8 or 10 inches long (the tail being nearly

as much more), with an elegant reddish-brown coat, white below, and the ears tufted or penciled. It lives in trees, is very agile and graceful in its movements, feeds on all kinds of small hard fruits, nests in a hole, hibernates to some extent in the colder latitudes, and brings forth usually three or four young. It is readily tamed, and makes an interesting pet. The North American squirrel nearest to this one is the chickaree, or red squirrel, *S. hudsonius*. (See cut under *chickaree*.) The common gray squirrel of the United States is *S. carolinensis*. (See cut under *Sciurus*.) Fox- or cat-squirrels are several large red, gray, or black species of North America. (See cut under *fox-squirrel*.) North America (including Mexico and Central America) is very rich in squirrels; southern Asia and Africa are less rich, while South America and Europe have each but a single species of *Sciurus* proper. In the extension of the name *squirrel* to other genera of the family, the species of *Tamias*, *Spermophilus*, and *Cynomys* are distinguished as *ground-squirrels* or *prairie-squirrels*, and some of them are also called *marmot-squirrels* (see cuts under *chipmunk*, *Spermophilus*, *owl*, and *prairie-dog*); those of *Sciuropterus* and *Pteromys* are *flying-squirrels* (see cuts under *flying-squirrel* and *Sciuropterus*). The scale-tailed squirrels of Africa belong to a different family, *Anomaluridæ*. (See cut under *Anomaluridæ*.) Certain Australian marsupials, as phalangers or petaurists, which resemble squirrels, are improperly so called. (See cut under *Acrobates*.) Some *Sciuridæ* have other vernacular names, as *skug*, *assapan*, *taguan*, *jelerang*, *hackee*, *chickaree*, *gopher*, *sisel*, *suslik*, *prairie-dog*, *wishtonwish*, etc.; but *squirrel*, without a qualifying term, is practically confined to the genus *Sciurus*, all the many members of which resemble one another too closely to be mistaken. See the technical names, and cut under *Xerus*.

2. In *cotton-manuf.*, one of the small card-covered rollers used with the large roller of a carding-machine. Also called *urchin*.—**Barking squirrel**, the prairie-dog: an early name of this animal as brought to notice by Lewis and Clarke in 1814.—**Burrowing squirrel**, Lewis and Clarke's name (1814) of a prairie-dog, or some related prairie-squirrel.—**Chipping-squirrel**, the chipmunk.—**Federation squirrel**, the thirteen-lined spermophile, or striped gopher: so called in allusion to the thirteen stripes of the flag of the original States of the American Union. *S. L. Mitchill*, 1821. See cut under *Spermophilus*.—**Hunt the squirrel.** See *hunt*. (See also *flying-squirrel*, *prairie-squirrel*, *sugar-squirrel*.)

squirrel-bot (skwur'el-bot), *n.* A bot-fly, *Cuterebra emasculator*, whose larvæ infest the genital and axillary regions of various squirrels and gophers in the United States, particularly the scrotum and testicles of the male of *Tamias striatus*, the striped chipmunk.

squirrel-corn (skwur'el-kôrn), *n.* A pretty spring wild flower, *Bikukulla Canadensis*, of eastern North America. It has elegant dissected leaves, graceful racemes of a few cream-colored heart-shaped blossoms, and separate yellow tubers which resemble kernels of Indian corn. See *Dicentra*. Less commonly called *turkey-corn*.

squirrel-cup (skwur'el-kup), *n.* The hepatica or liverleaf, *Hepatica Hepatica*.

squirrel-fish (skwur'el-fish), *n.* **1.** Any fish of the family *Holocentridæ*, and especially of the genus *Holocentrus*. The numerous species are remarkable for the development of sharp spines almost everywhere on the surface of the body. The name refers to the noise they make when taken out of the water, which suggests the bark of a squirrel. *H. ascensionis* of the West Indies, occasional on the United States coast, is chiefly of a bright-red color, with streaks shining lengthwise; its bright tints and quick movements make it one of the most conspicuous denizens of rocky tide-pools. See cut under *Holocentridæ*.

2. The serrano, *Diplectrum fasciculare*, distinguished by the segregation of the serræ at the angle of the preoperculum into two groups. It is common in the West Indies, and also along the southern United States coast to North Carolina.—3. A local name of the pinfish, *Lagodon rhomboides*.

squirrel-grass (skwur′el-gras), *n.* Same as *squirreltail*.

squirrel-hake (skwur′el-hāk), *n.* A gadoid fish, *Urophycis chuss;* the white hake. See *chuss*, *hake*[2], 2, and cut under *Phycis*.

squirrel-hawk (skwur′el-hâk), *n.* The ferruginous rough-legged hawk, *Archibuteo ferrugineus*, the largest and handsomest bird of its genus, found in California and most other parts of western North America from British America southward: so called because it preys extensively upon ground-squirrels and related rodents. It is 23 inches long and 55 in extent; when adult the under parts are nearly white,

Squirrel-hawk (*Archibuteo ferrugineus*).

with rich chestnut flags barred with black; the tail is mostly white, clouded with silver-gray, and tinged with bay; and the dark upper parts are much varied with brownish red.

squirrel-lemur (skwur′el-lē″mėr), *n.* A lemur of the subfamily *Galagininæ*, and especially of the genus *Galago*. See cut under *Galago*.

squirrel-lock (skwur′el-lok), *n.* Squirrel-fur from the under sides of the body. In gray squirrels it is pale-yellow, and it is used for lining winter garments.

squirrel-monkey (skwur′el-mung″-ki), *n.* One of many kinds of small South American monkeys with a long, bushy, and non-prehensile tail: so called from their general aspect. (*a*) Any member of the family *Hapalidæ* or *Mididæ;* a marmoset. See cut under *Hapale*. (*b*) Especially, a saimiri or titi of the genus *Chrysothrix*, as the death's-head, *C. sciureus*. See *saimiri*, and compare *saguin*.

Squirrel-monkey (*Chrysothrix sciureus*).

squirrel-mouse (skwur′el-mous), *n.* Same as *dormouse*.

squirrel-petaurist (skwur′el-pe-tâ″rist), *n.* A squirrel-phalanger.

squirrel-phalanger (skwur′el-fā-lan″jėr), *n.* An Australian flying-phalanger, or petaurist, as *Petaurus* (*Belideus*) *sciureus*, a marsupial mammal resembling a squirrel in some respects.

squirrel-shrew (skwur′el-shrö), *n.* A small insectivorous mammal of the family *Tupaiidæ*, as a banxring or a pentail. See cuts under *Tupaia* and *Ptilocercus*.

squirreltail (skwur′el-tāl), *n.* One of several grasses of the genus *Hordeum*. (*a*) In Great Britain, *H. maritimum*, and sometimes *H. murinum*, the wall-barley, and *H. nodosum*, the meadow-barley. (*b*) In the United States, chiefly *H. jubatum*, but in California also *H. murinum*, there naturalized and, as elsewhere, a pest, infesting wool, also the throats, etc., of animals, with its long barbed awns.

squirt (skwėrt), *v.* [E. dial. also *swirt;* perhaps < LG. *swirtjen*, squirt. The equiv. verb *squitter* can hardly be connected.] **I.** *trans.* 1. To eject with suddenness and force in a jet or rapid stream from a narrow orifice: as, to *squirt* water in one's face.

> The hard-featured miscreant . . . coolly rolled his tobacco in his cheek and *squirted* the juice into the fire-grate.
> *Scott*, Guy Mannering, xxxiii.

2. To spatter or bespatter.

> They know I dare
> To spurn or baffle them, or *squirt* their eyes
> With ink. *B. Jonson*, Apol. to Poetaster.

II. *intrans.* 1. To issue suddenly in a thin jet or jet-like stream, as from a syringe, or a narrow orifice suddenly opened; spurt.

> The oars seemed to lash the water savagely, like a connected row of swords, and the spray *squirted* at each vicious stroke. *C. Reade*, Hard Cash, i.

2†. To prate; blab. [Old slang.]—**Squirting cucumber.** See *Ecballium*.

squirt (skwėrt), *n.* [< *squirt*, *v.*] 1. An instrument with which a liquid may be ejected in a strong jet-like stream; a syringe.

> His weapons are a pin to scratch and a *squirt* to bespatter. *Pope*.

2. A small jet: as, a *squirt* of water.—3. A system of motion of a fluid, where the motion is everywhere irrotational, and where there is no expansion except at isolated points.—4. Looseness of the bowels; diarrhea. [Low.]—5. A small, insignificant, but self-assertive fellow; an upstart; a cad. [Colloq.]—6. A hasty start or spurt. [Colloq.]

> How different from the rash jerks and hare-brain'd *squirts* thou art wont, Tristram, to transact it with in other humours—dropping thy pen, spurting thy ink about thy table and thy books. *Sterne*, Tristram Shandy, iii. 28.

7. A sea-squirt; an ascidian or tunicary.

squirter (skwėr′tėr), *n.* [< *squirt* + *-er*[1].] One who or that which squirts. *O. W. Holmes*, Poet at the Breakfast-Table, v.

> This sudden *stab* of rancour I misdoubt.
> *Shak.*, Rich. III., iii. 2. 89.

Stabat Mater (stā′bat mā′tėr). [So called from the first words of the Latin text, *Stabat mater*, 'The mother (sc. of Jesus) was standing': L. *stabat*, 3d pers. sing. imperf. ind. of *stare*, stand (see *stand*); *mater* = Gr. *μήτηρ* = E. *mother:* see *mother*.] 1. In the *Rom. Cath. liturgy*, a sequence on the Virgin Mary at the crucifixion, written about 1300 by Jacobus de Benedictis (Jacopone da Todi). It has also been ascribed to Innocent III. and others, and was probably modeled on older hymns such as the staurotheotokia of the Greek Church. It is sung after the Epistle on the Feasts of the Seven Dolours of the Blessed Virgin Mary on the Friday before Good Friday and on the third Sunday in September. 2. A musical setting of this sequence. Famous examples have been written by Palestrina, Pergolesi, Rossini, Dvořák, and others.

stabber (stab′ėr), *n.* [< *stab* + *-er*[1].] 1. One who stabs; one who murders by stabbing.

Fluidness and *stability* are contrary qualities. *Boyle.*

4. Continuance in the same state; permanence; specifically, an additional or fourth vow of continuance in the same profession, and residence for life in the same monastery, imposed upon monks by the Benedictine rule.—**5.** That character of equilibrium, or of a body in equilibrium, in virtue of which, if the position is disturbed, it tends to be restored. The term is especially used in this sense with reference to ships and floating bodies, in which the distance of the center of gravity below the metacenter is the measure of the stability. This may be considered as the difference between the distance of the center of flotation from the metacenter, called the *stability of figure*, and the distance of the center of gravity from the metacenter, called the *stability of load*. The stability under sail is also considered.—**Moment of stability.** See *moment.*—**Syn. 1** and **2.** Immobility, permanence. See *stable*[2].

stabilization (stab″il-i-zā′shọn), *n.* [‹ *stabilize* + *-ation*.] The act of rendering stable; stablishment. Also spelled *stabilisation*.

The transformation of "stable" matter into "unstable" that takes place during the assimilation of food is necessary, because, during the activity of the organism, forces are constantly becoming "fixed," and with this "fixation of force" goes "the *stabilisation* of matter."
Mind, XII. 602.

stabilize (stab′il-īz), *v. t.*; pret. and pp. *stabilized*, ppr. *stabilizing*. [‹ L. *stabilis*, firm (see *stable*[2]), + *-ize*.] To render stable. Also spelled *stabilise*.

A written literature, the habit of recording and reading, the prevalence of actual instruction, work yet more powerfully in the same direction; and when such forces have reached the degree of strength which they show in our modern enlightened communities, they fairly dominate the history of speech. The language is *stabilized*, especially as regards all those alterations which proceed from inaccuracy. *Whitney*, Life and Growth of Lang., p. 158.

stabilizer (stab′il-ī-zėr), *n.* Something that stabilizes; a device for maintaining the stability of an aëroplane or airship.

stabilte†, *n.* A Middle English form of *stability*.

stacca (stak′ą̈), *n.* A Welsh dry measure, equal to three Winchester bushels.

staccatissimo (ståk-kà-tis′i-mō), *a.* [It., superl. of *staccato*, detached: see *staccato*.] In *music*, ★very staccato.

★**staccato** (ståk-kä′tō), *a.* [‹ It. *staccato*, pp. of *staccare*, for *distaccare*, separate, detach: see *detach*.] In *music*, detached; disconnected; abrupt; separated from one another by slight pauses: used both of single tones in a melody and of chords: opposed to *legato*. Three grades of staccato are sometimes recognized—the slightest being marked by dots over or under the notes with a sweeping curve (*a*), the next by dots without the curve (*b*), and the greatest by pointed strokes instead of dots (*c*). In each

case something is subtracted from the duration of each note, and given to a rest or silence. On keyboard-instruments like the pianoforte and organ, a staccato effect is produced by a variation of the usual touch in the action either of the fingers, of the wrist, or of the forearm; in bow-instruments like the violin, by an abrupt detached motion of the bow, or by a springing bow; in wind-instruments, by stopping the mouthpiece with the tongue (sometimes called *tonguing*); and in the voice, either by a detached action of the breath or by a closing of the glottis. The word is also used sometimes to note an abrupt emphatic style of speaking or writing.—**Staccato mark**, in *musical notation*, a dot or pointed stroke added over or under a note to indicate a staccato rendering.—**Staccato touch**, in playing the pianoforte or organ, a touch designed to produce a clear and musical staccato effect.

stacher (staċh′ėr), *v. i.* A Scotch form of *stacker*[1].

Stachydeæ (stā-kid′ē-ē), *n. pl.* [NL. (Dumortier, 1829), ‹ *Stachys* (assumed stem *Stachyd-*) + *-eæ*.] A tribe of dicotyledonous sympetalous plants, of the family *Menthaceæ*. It is characterized by a five- or ten-nerved or -veined calyx, a corolla with the upper lip erect, concave, and commonly galeate or arched, the lower lip three-cleft and spreading, four perfect ascending or included stamens, with the forward pair longer, and a four-parted ovary forming in fruit four dry nutlets fixed by a small basal or slightly oblique scar. It includes 34 genera, of which *Stachys* is the type; other

important genera are *Physostegia, Prunella, Phlomis, Ballota, Galeopsis, Lamium,* and *Leonurus.* See cut under *self-heal.*

Stachys (stā'kis), *n.* [NL. (Rivinus, 1690), < L. *stachys,* < Gr. στάχυς, a plant, woundwort, *Stachys arvensis,* so called from the spiked flowers; a particular use of στάχυς, an ear of corn, a spike, in gen. a plant.] A genus of plants, of the family *Menthaceæ,* type of the tribe *Stachydeæ.* It is characterized by flowers with the five calyx-teeth equal or the posterior larger, the corolla-tube somewhat cylindrical and either included in or exserted from the calyx, the upper lip usually entire and arched, the anther-cells usually diverging, and the ovary forming nutlets which are obtuse or rounded at the top. Over 200 species have been described, of which about 150 are now thought to be distinct. They are widely dispersed through the temperate zones, occur within the tropics on mountains, and extend in a few cases into frigid and subalpine regions. They are lacking in Australia and New Zealand, and nearly so in Chile and in South Africa. Twenty-three species occur in the United States; 11 are eastern, of which *S. aspera* is the most common, and *S. palustris* the most widely diffused. Several species, especially *S. sylvatica* of Europe, are known as *hedge-nettle,* and several others as *woundwort,* particularly *S. Germanica.* For *S. Betonica* see *betony,* and for *S. palustris* see *clown-heal.* Several species are occasionally cultivated for ornament, as *S. lanata,* a woolly-leafed plant much used for edgings. *S. Sieboldi,* an esculent recently introduced from Japan, cultivated in France under the name of *crosnes,* produces numerous small white tubers which may be eaten boiled or fried or prepared as a preserve. The tubers are said to decay rapidly if exposed to the air, and are kept in the ground or packed in sand; their taste is compared to that of the sweet potato, followed by a peculiar piquant flavor.

Stachytarpheta (stak″i-tär-fē'tä), *n.* [NL., so called from the thick flower-spikes; prob. an error for **Stachytarpheia,* < Gr. στάχυς, a spike, + ταρφειός, thick, dense, < τρέφειν, thicken.] A name given by Vahl in 1805 to *Valerianoides,* a genus of dicotyledonous sympetalous plants, of the family *Verbenaceæ.* It is characterized by sessile spiked flowers with a narrow five-ribbed five-nerved calyx, a corolla with five spreading lobes, two perfect stamens with divaricate anther-cells, and a two-celled ovary ripening into two hard dry oblong or linear one-seeded nutlets. There are about 45 species, natives of tropical and subtropical America, with one species, *Valerianoides Indica,* also dispersed through tropical Africa and Asia. They are herbs or shrubs bearing opposite or alternate toothed and commonly rugose leaves. The flowers are white, blue, purple, or scarlet, solitary in the axils of bracts, and sessile or half-immersed in the axis of the more or less densely crowded terminal spikes. The species are sometimes called *bastard* or *false vervain. V. Jamaicensis* is the *gervao* (which see), from its use sometimes called *Brazilian tea.* This and other species, as *V. mutabilis,* a handsome ever-blooming shrub, are occasionally cultivated under glass.

★**stack**[1] (stak), *n.* [< ME. *stack, stacke, stakke, stak, stac,* < Icel. *stakkr,* a stack of hay (cf. *stakka,* a stump), = Sw. *stack* = Dan. *stak,* a stack, pile of hay; allied to *stake*[1], and ult. from the root of *stick*[1]. Hence *staggard*[2].] **1.** A pile of grain in the sheaf, or of hay, straw, pease, etc., gathered into a circular or rectangular form, often, when of large size, coming to a point or ridge at the top, and thatched to protect it from the weather.

> The whole prairie was covered with yellow wheat *stacks.*
> *Harper's Mag.,* LXXVIII. 531.

2. A pile of sticks, billets, poles, or cordwood; formerly, also, a pyre, or burial pile.

> Against every pillar was a *stack* of billets above a man's height, which the watermen that bring wood down the Seine . . . laid there. *Bacon,* Nat. Hist., § 249.

3. A pile or group of other objects in orderly position. (*a*) In *printing,* a flat pile of paper, printed or unprinted, in a press-room or bindery. (*b*) *Mil.,* the pyramidal group formed by a number of muskets with fixed bayonets when stacked. (*c*) In *paper-making,* four or more calendering-rolls in position. (*d*) In libraries, a set of book-shelves one above the other, whether placed against a wall or standing in the middle of a room.

4. A number of funnels or chimneys standing together.—**5.** A single chimney or passage-way for smoke; the chimney or funnel of a locomotive or steam-vessel: also called *smoke-stack.* See cuts under *passenger-engine* and *puddling-furnace.*—**6.** A high detached rock; a columnar rock; a precipitous rock rising out of the sea. The use of the word *stack* with this meaning is very common on the coast of Scotland and the adjacent islands (especially the Orkneys), and is almost exclusively limited to that region.

> Here [in Shetland] also, near 200 yards from the shore, stands the *Stack* of Snalda, a grand perpendicular column of rock, at least sixty, but more probably eighty, feet high, on the summit of which the eagle has annually nested from time immemorial. *Shirreff,* Shetland, p. 5.

7. A customary unit of volume for fire-wood and coal, generally 4 cubic yards (108 cubic feet). The three-quarter stack in parts of Derbyshire is said to be 105 or 106 cubic feet.—**8.** *pl.* A large quantity; "lots": as, *stacks* of money. [Slang.]=**Syn. 1.** *Shock,* etc. See *sheaf*[1].

★**stack**[1] (stak), *v. t.* [< ME. *stakken* (= Sw. *stacka* = Dan. *stakke*), stack; from the noun.] **1.** To pile or build in the form of a stack; make into a regularly formed pile: as, to *stack* grain.

> Your hay is well brought in, and better *stacked* than usual. *Swift,* To Dr. Sheridan, Sept. 19, 1725.

2. To make up (cards) in a designed manner, so as to secure an unfair advantage; pack.—**To stack arms,** to stand together muskets or rifles in definite numbers, as three together, so that they form a tent-shaped group.

stack[2] (stak). An obsolete or dialectal preterit of *stick*[1] (and *stick*[2]).

stackage (stak'āj), *n.* [< *stack*[1] + *-age.*] **1.** Grain, hay, etc., put up in stacks. [Rare.] *Imp. Dict.*—**2.** A tax on things stacked. *Imp. Dict.*

stack-borer (stak'bōr″ėr), *n.* An instrument for piercing stacks of hay, to admit air, where the hay is in danger of damage from heating.

stacken-cloud† (stak'n-kloud), *n.* A cumulus cloud.

> The rapid formation and disappearance of small cumuli is a process constantly going on in particular kinds of weather. These little *stacken-clouds* seem to form out of the atmosphere, and to be resolved again as rapidly into it. *Forster,* Atmospheric Phenomena, p. 58.

stacker[1] (stak'ėr), *v. i.* [Sc. also *stakker, stacher;* < ME. *stakeren,* also *stakelen,* < Icel. *stakra,* push, stagger, freq. of *staka,* push, punt; cf. *stjaka,* punt, push with a stake (*stjaki,* a punt-pole), = Dan. *stage* = Sw. *staka,* push, punt with a stake, = MD. *staken, stacken,* set stakes, dam up with stakes, give up work, = E. *stake*[1]: see *stake*[1], *v.* Doublet of *stagger.*] **1.** To stagger. [Prov. Eng.]

> She rist her up, and *stakereth* heer and ther.
> *Chaucer,* Good Women, l. 2687.

2†. To stammer. *Prompt. Parv.,* p. 471.

stacker[2] (stak'ėr), *n.* [< *stack*[1] + *-er*[1].] An attachment to a threshing-machine for raising and delivering the straw from the machine, either upon a wagon or upon a stack. It consists of an endless-belt elevator running in a trough that can be placed at any angle, the whole being mounted on wheels, and connected by belting with the thresher, or with the engine or other motor. Also called *straw-* or *hay-elevator.*—**Pneumatic stacker,** a pipe attached to a thresher or husking-machine through which the husks, etc., are blown to a bin or stack.

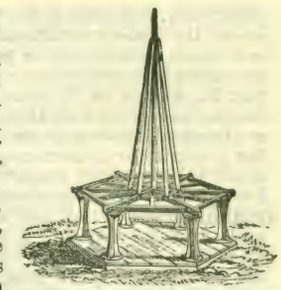
stacket (stak'et), *n.* [< G. *stacket,* a palisade, stockade; appar. connected with *stack*[1].] A stockade. *Scott.*

stack-funnel (stak'fun″el), *n.* A pyramidal open frame of wood in the center of a stack. Its object is to allow the air to circulate through the stack, and prevent the heating of the grain. See *stack-stand.*

stack-guard (stak'gärd), *n.* A covering for a haystack or rick, whether for the top or the exposed side. Sometimes it is suspended from posts temporarily set up.

Stackhousia (stak-hou'si-ä), *n.* [NL. (Sir J. E. Smith, 1798), named after John *Stackhouse,* an English botanist (died 1819).] A genus of plants, type of the family *Stackhousiaceæ.* It consists of about 13 species, all Australian except 2, which are natives, one of New Zealand, the other of the Philippine Islands. They are small herbs with a perennial herbaceous or woody rootstock, producing unbranched or slightly divided flower-bearing stems and alternate linear or spatulate leaves, which are entire and slightly fleshy or coriaceous. The flowers are white or yellow, borne in spikes terminating the branches, or in clusters along the main stem. Each flower consists of a small three-bracted calyx, an elongated often gamopetalous corolla with five included stamens, a thin disk, and a free ovary with from two to five styles or style-branches.

Stackhousiaceæ (stak-hou-si-ā'sē-ē), *n. pl.* [NL. (Lindley, 1836), < *Stackhousia* + *-aceæ.*] A family of dicotyledonous choripetalous plants, of the order *Sapindales.* It is characterized by a hemispherical calyx-tube, having five imbricated lobes, five erect imbricated and often united petals, and as many alternate stamens. From the related families *Celastraceæ* and *Rhamnaceæ* it is especially distinguished by its lobed ovary, which is sessile, roundish, and from two- to five-celled, and ripens from two to five indehiscent globose or angled one-seeded carpels, which are smooth, reticulated, or broadly winged. It consists of the genus *Stackhousia* and the monotypic Australian genus *Macgregoria.*



stacking-band (stak'ing-band), *n.* A band or rope used in binding thatch or straw on a stack.

stacking-belt (stak'ing-belt), *n.* Same as *stacking-band.*

stacking-stage (stak'ing-stāj), *n.* A scaffold or stage used in building stacks.

stack-room (stak'röm), *n.* In libraries, a room devoted to stacks of book-shelves; a book-room.

stack-stand (stak'stand), *n.* A basement of timber or masonry, sometimes of iron, raised on props and placed in a stack-yard, on which to build a stack. Its object is to keep the lower part of the stack dry, and exclude vermin. Such stands are more common in European countries than in the United States.

Stack-stand with Stack-funnel.

stack-yard (stak'-yärd), *n.* [< *stack*[1] + *yard*[2]. Cf. *staggard*[2].] A yard or inclosure for stacks of hay or grain.

stacte (stak'tē), *n.* [< L. *stacte, stacta,* < Gr. στακτή, the oil that trickles from fresh myrrh or cinnamon, fem. of στακτός, dropping, oozing out, < στάζειν, drop, let fall drop by drop.] One of the sweet spices which composed the holy incense of the ancient Jews. Two kinds have been described—one, the fresh gum of the myrrh-tree, *Balsamodendron Myrrha,* mixed with water and squeezed out through a press; the other, the resin of the storax, *Styrax officinalis,* mixed with wax and fat.

> Take unto thee sweet spices, *stacte,* and onycha, and galbanum. Ex. xxx. 34.

stactometer (stak-tom'e-tėr), *n.* [Also *staktometer;* < Gr. στακτός, dropping, oozing out (see *stacte*), + μέτρον, a measure.] A glass tube having a bulb in the middle, and tapering to a fine orifice at one end, used for ascertaining the number of drops in equal bulks of different liquids. Also called *stalagmometer.*

stad†. A Middle English form of the past participle of *stead.*

stadda (stad'ä), *n.* [Origin obscure.] A double-bladed hand-saw, used for cutting comb-teeth. Also called *steady.*

staddle (stad'l), *n.* [Also *stadle,* and more orig. *stathel,* Sc. *staithle,* contr. *stail, stale,* < ME. *stathel,* < AS. *stathol, stathul, stathel,* a foundation, base, seat, site, position, firmament (= OS. *stadal* = OFries. *stathul* = MLG. *stadel* = OHG. *stadal,* MHG. A prop or support; a staff; a crutch.

> His weake steps governing
> And aged limbs on cypresse *stadle* stout.
> *Spenser,* F. Q., I. vi. 14.

2. The frame or support of a stack of hay or grain; a stack-stand.

> Oak looked under the *staddles* and found a fork.
> *T. Hardy,* Far from the Madding Crowd, xxxvi.

3. A young or small tree left uncut when others are cut down.

> It is commonlie seene that those yoong *staddles* which we leaue standing at one & twentie yeeres fall are vsuallie at the next sale cut downe without any danger of the statute, and serue for fire bote, if it please the owner to burne them.
> *W. Harrison,* Descrip. of England, ii. 22. (*Holinshed.*)
>
> At the edge of the woods a rude structure had been hastily thrown up, of *staddles* interlaced with boughs.
> *S. Judd,* Margaret, ii. 5.

4. In *agri.,* one of the separate plots into which a cock of hay is shaken out for the purpose of drying.

staddle (stad'l), *v. t.*; pret. and pp. *staddled,* ppr. *staddling.* [Also *stadle;* < *staddle, n.*] **1.** To leave the staddles in, as a wood when it is cut.

> First see it well fenced, ere hewers begin,
> Then see it well *stadled,* without and within.
> *Tusser,* April's Husbandry.

2. To form into staddles, as hay.

staddle-roof (stad'l-röf), *n.* The roof or covering of a stack.

stade[1] (stād), *n.* Same as *stathe.*

stade[2] (stād), *n.* [In ME. *stadie,* q. v.; = F. *stade* = Sp. *estadio* = Pg. *estadio* = It. *stadio,* < L. *stadium,* a furlong: see *stadium.*] A furlong; a stadium.

> The greatness of the town, by that we could judge, stretcheth in circuit some forty *stades.*
> *Donne,* Hist. Septuagint (1633), p. 71. (*Latham.*)

stadholder (stad'hōl″dėr), *n.* [Also spelled *stadtholder* (= F. *stathouder*); a partial accommodation of MD. *stadhouder,* a deputy, legate, vicar, substitute, lieutenant, esp. a viceroy, a governor of a province, esp. in Holland, in later use (D. *stadhouder* = G. *statthalter*), a governor, a chief magistrate, lit. 'stead-holder,' lieutenant, "locum-tenens" (Kilian); < MD. *stad, stede,* D. *stede, stee* (= OHG. MHG. *stat,* G. *statt,* place, = AS. *stede,* E. *stead,* place), + *houder* = G. *halter* = E. *holder:* see *stead* and *holder.* In an-

other view, reflected in the false spelling *stadtholder*, the first element is supposed to be D. *stad* = G. *stadt*, a town, city (a particular use of the preceding); but this is an error, due to the fact that D. *stad*, in its lit. sense 'place,' is now obsolete; moreover, a stadholder is not the 'keeper of a city.'] Formerly, in the Netherlands, (*a*) the governor or lieutenant-governor of a province; (*b*) the chief magistrate of the United Provinces of the Netherlands.

stadholderate (stad′hōl″dėr-āt), *n.* [Also spelled *stadtholderate* (= F. *stathoudérat*); < *stadholder* + *-ate*[3].] The office of a stadholder. *The Academy*, July 20, 1889, p. 32.

stadholdership (stad′hōl″dėr-ship), *n.* [Also spelled *stadtholdership*; < *stadholder* + *-ship*.] ★Same as *stadholderate*.

stadia (stā′di-ą), *n.* [< ML. *stadia*, a station, a fem. form, orig. pl. of the neut. *stadium*, a stage, station, stadium: see *stadium*.] **1.** A station temporarily occupied in surveying.—**2.** An instrument for measuring distances by means of the angle subtended by an object of known dimensions. The instrument commonly so called, intended for rough military work in action, consists of a small glass plate with figures of horsemen and foot-soldiers as they appear at marked distances, or with two lines nearly horizontal but converging, crossed by vertical lines marked with the distances at which a man appears of the height between the first lines.

3. In *civil* and *topographical engin.*, the method or the instruments by which what are called *stadia measurements* are made. This use is almost exclusively limited to the United States, where this method of measuring distances is extensively employed. Stadia measurements are based on the geometrical principle that the lengths of parallel lines subtending an angle are proportioned to their distances from the apex of that angle. The essential appliances for this kind of work are a pair of fine horizontal wires (which are usually of platinum, but which may be spider-webs, or even lines ruled or photographed on the glass), in addition to the ordinary horizontal and vertical wires in the diaphragm of a telescope, and a staff or graduated rod (the stadia rod)—these giving the means of measuring with considerable precision the angle subtended by the whole or any part of a vertical staff, and thus furnishing the data for determining the distance of the rod from the point of sight. This may be accomplished by making the subtending angle variable (that is, by making the wires movable) and the space on the staff fixed in length, or by having the angle constant (that is, the wires fixed in position) and reading off a varying length on the staff; the latter is the method now most generally used. The wires may be applied to the telescope of any suitable instrument, as a theodolite or transit-theodolite; but the method is specially well adapted for use in plane-tabling, the wires being inserted in the telescope of the alidade. This arrangement has been extensively used in the United States, and has given excellent results. The intervals between the wires are frequently arranged so that at a distance of 100 feet a space of one foot shall be intercepted on the rod; but there are also instruments made in which the number of wires is increased, the method of reading varying accordingly.

stadie†, *n.* [ME., < L. *stadium*, a race-course, a furlong: see *stade*[2], *stadium*.] A race-course; a stadium.

Yif a man renneth in the *stadie* or in the forlonge for the corone, than lieth the mede in the corone for whiche he renneth. *Chaucer*, Boëthius, iv. prose 3.

stadiometer (stā-di-om′e-tėr), *n.* [< Gr. στάδιον (see *stadium*) + μέτρον, measure.] A modified theodolite in which the directions are not read off, but marked upon a small sheet, which is changed at each station. The distances as read on the telemeter can also be laid down. The stadiometer differs from the plane-table in that the alidade cannot be ★moved relatively to the sheet.

stadium (stā′di-um), *n.*; pl. *stadia* (-ą). [< L. *stadium*, < Gr. στάδιον, a fixed standard of length, specifically 600 Greek feet (see def. 1), a furlong (nearly), hence a race-course of this length, lit. 'that which stands fast,' < ἱστάναι (√ στα), stand: see *stand*. Cf. *stade*[2], *stadie*.] **1.** A Greek itinerary unit, originally the distance between successive stations of the shouters and runners employed to estimate distances. The stadium of Eratosthenes seems to have been short of 520 English feet; but the stadium at the race-course at Athens has been found to be between 603 and 610 English feet. The Roman stadium was about the same length, being one eighth of a Roman mile.

Hence—**2.** A Greek course for foot-races, disposed on a level, with sloping banks or tiers of seats for spectators rising along its two sides and at one end, which was typically of semicircular plan. The course proper was exactly a stadium in length. The most celebrated stadia were those of Olympia and Athens. The latter has been, in great part, restored.

3. A stage; period; in *med.*, a stage or period of a disease, especially of an intermittent disease.

Mohammed was now free once more; but he no longer thought of carrying on his polemic against the Meccans or of seeking to influence them at all. In his relations to them three *stadia* can be distinguished, although it is easier to determine their character than their chronology. *Encyc. Brit.*, XVI. 550.

stadlet†, *n.* An obsolete form of *staddle*.

Stadmannia (stad-man′i-ą), *n.* [NL. (Lamarck, 1793), named after *Stadmann*, a German botanical traveler.] A genus of trees, belonging to the family *Sapindaceæ* and tribe *Nephelieæ*. It is distinguished from the nearly related genus *Nephelium* (which see) by the absence of petals and by a somewhat spherical calyx with 5 broad obtuse teeth, warty branches, and small velvety plum-like berries. The only species, *S. Sideroxylon*, is a native of Mauritius. It has alternate abruptly pinnate leaves with from three to six pairs of oblong obtuse leaflets, oblique at the base, each leaflet narrow, entire, smooth, and finely reticulated. The small pedicelled flowers form axillary branching panicles, with conspicuous long-exserted erect stamens. It is known as *Bourbon ironwood*. See *Macassar oil*, under *oil*.

stadtholder, stadtholderate (stat′hōl″dėr, -āt), etc. Erroneous spellings of *stadholder*, etc. ★

staff[1] (ståf), *n.*; pl. *staves*, *staffs* (stävz, ståfs). [< ME. *staff*, *staffe*, *staf* (gen. *staves*, dat. *stave*, pl. *staves*), < AS. *stæf*, in a very early form *staeb*, pl. *stafas*, a stick, staff, twig, letter (see etym. of *book*), = OS. *staf* = OFries. *stef* = D. *staf* = MLG. Gael. *stob*, a stake, stump; prob. related to OHG. *stabēn*, be stiff, from an extended form of the root *sta* of *stand*: see *stand*. Not connected with L. *stipes*, a stock, post, which is cognate with E. *stiff*. Hence *stave*, q. v.] **1.** A stick or pole. Specifically—(*a*) A stick used as a walking-stick, especially one five or six feet long used as a support in walking or climbing.

In his hand a *staf*. *Chaucer*, Gen. Prol. to C. T., l. 495.

He [the pilgrim] had a long *staffe* in his hand with a nobbe in the middle, according to the fashion of those Pilgrims *staffes*. *Coryat*, Crudities, I. 20.

(*b*) A stick used as a weapon, as that used at quarter-staff; a club; a cudgel.

A god to-hande *staffe* therowt he hent,
Befor Roben he lepe.
Robin Hood and the Potter (Child's Ballads, V. 20).

The wars are doubtful;
And on our horsemen's *staves* Death looks as grimly
As on your keen-edg'd swords.
Fletcher, Humorous Lieutenant, i. 1.

(*c*) A stick used as an ensign of authority; a baton or scepter. Compare *baton*, *club*[1], *mace*[1].

The Earl of Worcester
Hath broke his *staff*, resign'd his stewardship.
Shak., Rich. II., ii. 2. 59.

(*d*) A post fixed in the ground; a stake.

The rampant bear chain'd to the ragged *staff*.
Shak., 2 Hen. VI., v. 1. 203.

(*e*) A pole on which to hoist and display a flag: as, a flag-*staff*; an ensign-*staff*; a jack-*staff*.

The flag of Norway and the cross of St. George floated from separate *staffs* on the lawn.
B. Taylor, Northern Travel, p. 295.

(*f*†) The pole of a vehicle; a carriage-pole.

His newe lady holdeth him so narowe
Up by the brydel, at the *staves* ende,
That every word he dred it as an arowe.
Chaucer, Anelida and Arcite, l. 184.

(*g*) The long handle of certain weapons, as a spear, a halberd, or a poleax.

There stuck no plume in any English crest
That is removed by a *staff* of France.
Shak., K. John, ii. 1. 318.

Their *staves* upon their rests they lay.
Drayton, Nymphidia.

(*h*) A straight-edge for testing or truing a line or surface: as, the proof-*staff* used in testing the face of the stone in a grind-mill. (*i*) In *surv.*, a graduated stick, used in leveling. See *cross-staff*, *Jacob's-staff*, and cut under *leveling-staff*. (*j*) One of several instruments formerly used in taking the sun's altitude at sea: as, the fore-*staff*, back-*staff*, cross-*staff*. See these words. (*k*) In *ship-building*, a measuring and spacing rule. (*l*) The stilt of a plow.

2. In *surg.*, a grooved steel instrument having a curvature, used to guide the knife or gorget through the urethra into the bladder in the operation of lithotomy.—**3.** In *arch.*, same as *rudenture*.—**4.** Something which upholds or supports; a support; a prop.

He is a *stafe* of stedfastnes bothe erly & latte
To chastes siche kaytifes as don ayenst the lawe.
Political Poems, etc. (ed. Furnivall), p. 3.

The boy was the very *staff* of my age, my very prop.
Shak., M. of V., ii. 2. 70.

Bread is the *staff* of life. *Swift*, Tale of a Tub, iv.

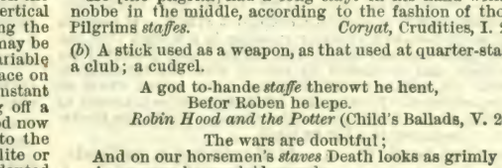
5†. A round of a ladder. *Latham*.—**6.** A body of assistants or executive officers. (*a*) *Milit.*, a body of military officers and officials who assist a commander of troops in the execution of his functions of command, administration, and supply. They form a distinct class from the officers in command of the troops in the unit to which they are assigned. The staff takes its name from the unit commanded, as a *regimental*, *brigade*, or *department* staff. The *general staff* is the military staff of the chief executive or the commander-in-chief. The General Staff Corps of the United States Army is a body of officers, including the chief of staff, charged with the organization, distribution, equipment, and training of the military forces. It proposes legislative action, revises estimates for appropriations, exercises supervision over inspections and military education, prepares plans for national defense and mobilization, collects military information, and records the military operations of the armies of the United States. Foreign armies have corps performing approximately the same duties. (*b*) A body of executive officers attached to any establishment for the carrying out of its designs, or a number of persons, considered as one body, intrusted with the execution of any undertaking: as, the editorial and reporting *staff* of a newspaper; a hospital *staff*.

The Archbishop [Becket] had amongst his chaplains a *staff* of professors on a small scale.
Stubbs, Medieval and Modern Hist., p. 143.

7†. A letter of the alphabet. See etymology of *book*.

The firrste *staff* iss nemmnedd I. *Ormulum*, l. 4312.

8†. A line; a verse; also, a stanza.



Nerehande *stafe* by *staf*, by gret diligence,
Sauyng that I most metre apply to;
The wourdes meue, and sett here & ther.
Rom. of Partenay (E. E. T. S.), l. 6555.

If we consider well the forme of this Poeticall *staffe*, we shall finde it to be a certaine number of verses allowed to go altogether and ioyne without any intermission, and doe or should finish vp all the sentences of the same with a full period. *Puttenham*, Arte of Eng. Poesie, p. 54.

I can sing but one *staff* of the ditty neither.
B. Jonson, Poetaster, ii. 1.

Cowley found out that no kind of *staff* is proper for a heroic poem, as being all too lyrical. *Dryden*.

9. In *musical notation*, a set of five horizontal lines on which notes are placed so as to indicate the pitch of intended tones. Both the lines and the spaces between them are significant, and are called *degrees*: they are numbered from below upward. When the nine degrees of the staff are not sufficient for the notation of a melody or chord, it is extended by means of *added lines* above or below. In general, the successive degrees of the staff are understood to correspond to the successive degrees of the scale or to the successive white keys of the keyboard, irrespective of the fact that the intervals thus indicated are not equal to each other. An absolute pitch for the staff-degrees is indicated by a clef placed at the beginning. (See *clef*.) Gregorian music is customarily written on a staff of four lines, and the only clef used is the C clef. The staff with its appropriate notation is a development from the early medieval neumes, which were originally dots, dashes, or compound marks, whose relative position or shape indicated the relative pitch of successive tones. To make this notation more precise a horizontal line was drawn across the page to mark the pitch of some given tone, as C or F, and the neumes were arranged above or below this line. Later, a second line was added, and then others, only the lines being at first regarded as significant. What was called the *great* or *grand staff* was such a staff of eleven lines. In harmonic or concerted music, two or more staffs are used together, and are connected by a brace. See *brace*[1], 5, and *score*[1], 9. Also *stave*, especially in Great Britain.

10. In *her.*, same as *fissure*, 5.—**Bishop's staff.** See *crozier*, 1.—**Cantoral staff, cantor's staff,** the official staff of a cantor or precentor: it is primarily the baton with which he beats time, but is often large, and elaborately ornamented, becoming a mere badge of office. Also called *baton*.—**Davis's staff,** a kind of quadrant formerly used in navigation.—**Episcopal staff,** in *her.*, the representation of a bishop's or pastoral staff, usually entwined with a banderole which is secured to the shaft below the head. See cut under *banderole*.—**Foliiferous staff.** See *foliiferous*.—**Jeddart staff,** a form of battle-ax used by mounted men-at-arms: so named from the town of Jedburgh, in Scotland, the arms of which bear such a weapon. Also called *Jedwood ax*. *Fairholt*.—**Marshal's staff.** See *marshal*.—**Northern staff,** a quarter-staff.—**Palmer's staff,** in *her.*, same as *bourdon*[1], 3.—**Papal staff,** in *her.*, a staff topped with the papal cross of three cross-bars.—**Pastoral staff,** a staff borne as an emblem of episcopal authority by or before bishops, archbishops, abbots, and abbesses. In the Western Church it is usually headed with a volute, suggesting a shepherd's crook, and in the Greek Church it generally has a T-shaped head, often curved upward and inward at the ends; in the Roman Catholic and some other churches it bears a cross in the case of an archbishop, and a double cross in the case of a patriarch. See *cambuca*, *crozier*, *pateressa*, *sudarium*.—**Pilgrim's staff.** See *pilgrim*.—**Red staff,** in *milling*, a straight-edge used to test the dress of a millstone. It is so called because it is rubbed with red chalk or ocher, by means of which inequalities on the surface of the stone are detected.—**Ring-and-staff investiture.** See *ecclesiastical investiture*, under *investiture*.—**Short staff,** the cudgel used in ordinary cudgel-play similar to the modern single-stick as distinguished from quarter-staff.—**Staff raguly,** in *her.*, either a pallet couped raguly, or the representation of a trunk of a tree with short projections on the opposite sides, as of limbs sawed off.—

To argue from the staff to the corner†, to raise some other question than that under discussion. *Abp. Bramhall*, Works, II. 94. (*Davies.*)—**To break a staff.** Same as *to break a lance* (which see, under *break*).—**To go to sticks and staves.** See *stick*³.—**To have the better** or **worse end of the staff,** to be getting the best or worst of a matter. *Court and Times of Charles I.*, II. 94.—**To set down** (or **up**) **one's staff**†, to stop and rest, as a traveler at an inn; abide for a time.

staff² (staf), *n.* [Said to be from G. *staffieren*, to fit out. See *stuff*, *n.*] In *building*, plastering in portable sheets or slabs, prepared for nailing on a frame. It is made by mixing the mortar with a durable fibrous material, as shavings, hemp, and the like. First employed at the Paris Exposition of 1878, and extensively used in the construction of the buildings of the Chicago Exposition in 1893.

staff-angle (staf'ang″gl), *n.* In *plastering*, a square rod of wood, standing flush with the wall on each of its sides, at the external angles of plastering, to protect them from injury.

Staff-bead.

staff-bead (staf'bēd), *n.* In *arch.*, an angle-bead.

staff-captain (staf'kap″tān), *n.* The senior grade in the navigating branch of the British navy.

staff-commander (staf'kọ-mán″dėr), *n.* The second grade in the navigating branch of the British navy. See *master*¹, 1 (*b*).

staff-degree (staf'dē-grē″), *n.* In *musical notation*, a degree of a staff, whether line or space.

staff-duty (staf'dū″ti), *n.* The occupation or employment of an officer who serves on a staff, especially of one who, not originally a staff-officer, has been detached from his regiment, and attached to a staff.

staffed (staft), *a.* [< *staff* + *-ed*².] **1.** In *her.*, surrounded or combined with staffs: as, an annulet *staffed*, a ring from which staffs or scepters radiate.—**2.** Provided with a staff or body of officers; officered. [Recent.]

A powerful church of the new type, *staffed* by friends and pupils of Pusey, rose in the centre of R———.
Mrs. Humphry Ward, Robert Elsmere, xxxiii.

staffelite (staf'e-līt), *n.* [< *Staffel* (see def.) + *-ite*².] A somewhat altered apatite, occurring in botryoidal reniform shapes of a green color, incrusting the phosphorite found at Staffel, near the Lahn, in Prussia.

staff-herding (staf'hėr″ding), *n.* In *old Eng. forest law*, the grazing of cattle in charge of a herdsman. This was restrained or forbidden as more injurious to the herds of deer than if there were no herdsman to drive away the deer, and the cattle had to find their own feeding-ground.

staff-hole (staf'hōl), *n.* In *metal.*, a small hole in a puddling-furnace through which the puddler heats his staff. *Weale.*

staffier† (staf'iėr), *n.* [= D. *staffier*, an attendant, < OF. *estaffier*, a lackey, footboy that runs by the stirrup, etc., < It. *staffiere*, *staffiero*, a lackey, footboy, < *staffa*, a stirrup (ML. *staffa*) (> dim. *stafetta*, a little stirrup, a courier, > Sp. Pg. *estafeta* = F. *estafette*, > D. *estafette* = G. *staffette* = Sw. *stafett* = Dan. *stafet*, a courier), < OHG. *stapfo*, *staffo*, MHG. G. *stapfe*, a footstep (also a stirrup?), < OHG. MHG. *stepfen*, also OHG. *staphōn*, MHG. *stapfen*, step, tread, = E. *step*: see *step*, and cf. OBulg. *stopa*, a spur. The notion reflected on the def. as given in most dictionaries, that *staffier* means a 'staff-bearer,' and is connected with *staff*, is erroneous.] A footman; an attendant.

Before the dame, and round about her,
March'd whifflers and *staffiers* on foot,
With lackies, grooms, valets, and pages,
In fit and proper equipages.
S. Butler, Hudibras, II. ii. 650.

staffish† (staf'ish), *a.* [In Sc. corruptly *staffage*; < *staff* + *-ish*¹.] Like a staff; rigid; hence, intractable. *Ascham*, Toxophilus (ed. 1864), p. 111.

staff-man (staf'man), *n.* A workman employed in silk-throwing.

staff-notation (staf'nō-tā″shọn), *n.* In *musical notation*, the entire system of signs used in connection with the staff: opposed, for example, to the *tonic sol-fa notation*, in which no staff is used.

staff-officer (staf'of″i-sėr), *n.* **1.** An officer serving on the staff of a military commander.—**2.** An officer of a staff corps or department, such as the General Staff Corps, Adjutant-General's Department, etc. While serving as a staff-officer, an officer cannot assume command of troops without special authority.

staff-sergeant (staf'sär″jent), *n.* A sergeant either serving on the non-commissioned staff of a military commander or attached to one of the staff corps or departments.

staff-sling† (staf'sling), *n.* [ME. *staffeslynge*, *stafslinge*; < *staff* + *sling*¹.] A weapon consisting of a sling combined with a short staff. The staff was held with both hands and whirled around. The weapon seems to have thrown larger missiles than the ordinary sling and with greater force. Distinguished from *cord-sling*. Also called *fustibale*, *fustibalus*.

This geaunt at him stones caste
Out of a fel *staf-slinge*.
Chaucer, Sir Thopas, l. 118.

Staff-sling, about the 10th century. (From Viollet-le-Duc's "Dict. du Mobilier français.")

staff-stone (staf'stōn), *n.* Same as *baculite*.

staff-striker† (staf'strī″kėr), *n.* A sturdy beggar; a tramp.

Many became *staf-strikers*, . . . and wandered in parties of two, three, and four from village to village. *R. Eden*, quoted in Ribton-Turner's Vagrants and Vagrancy, p. 53.

staff-surgeon (staf'sėr″jọn), *n.* A senior grade of surgeons in the British navy.

staff-tree (staf'trē), *n.* A vine or tree of the genus *Celastrus*. The best-known species is the American *C. scandens*, a twiner with ornamental fruit, otherwise named *climbing bittersweet*, *waxwork*, *staff-vine*, and *fevertwig* (see the last, and cut under *bittersweet*). The seeds of the East Indian *C. paniculatus* have long been in repute among Hindu physicians for their stimulating and acrid properties, and are applied externally or internally for the relief of rheumatism, etc. They yield an expressed oil, also an empyreumatic, known as *oleum nigrum*.

staff-vine (staf'vīn), *n.* See *staff-tree*.

stag (stag), *n.* [E. dial. also *steg*, Sc. also *staig*; early mod. E. *stagg*, *stagge*; < ME. *steg*, *stagge*, < Icel. *steggr*, *steggi*, a male animal (a male fox, cat, a gander, drake, etc.), lit. 'mounter,' < *stīga* = AS. *stīgan*, mount: see *sty*¹. Hence *staggard*¹, *staggon*.] **1.** The male of various animals, especially of the deer tribe. Specifically—(*a*) The male red-deer or a deer of other large species of the genus *Cervus* in a restricted sense; a hart, of which the female is a hind; and particularly the adult hart, at least five years old, with antlers fully developed (compare *staggard*¹, and see cuts under *antler*); in heraldry, a horned deer with branched antlers. The stag of Europe is *Cervus elaphus*, now found wild in Great Britain only in the Highlands of Scotland. It is a magnificent animal, standing 4 feet high at the shoulder, with the antlers 3 feet long, having sometimes ten points and palmated at the crown: sometimes known as a *stag of ten*. The hind is hornless and smaller. The corresponding animal in North America is the wapiti, there called *elk* (*Cervus canadensis*), larger than the European stag, with much-branched antlers sometimes upward of 4 feet long, not palmated at the end. (See cut under *wapiti*.) There are several Asiatic stags, among them the rusine deer (see *Rusa*¹, *sambur*). (*b*) A bull castrated when half-grown or full-grown; a bull-stag; a bull-segg. (*c*) A male fox; a dog-fox. (*d*) A young horse; a colt (sometimes a filly). (*e*) A gander. (*f*) A drake. (*g*) A pit or exhibition game-cock less than one year old; the cockerel of the game-fowl. (*h*) A turkey-cock. (*i*) The wren. [Local, Eng.] (*j*) A stag-beetle. [In most of these uses prov. Eng.]

2. In *com. slang*: (*a*) An outside irregular dealer in stocks, not a member of the exchange. (*b*) A person who applies for the allotment of shares in a joint-stock company, not because he wishes to hold the shares, but because he hopes to sell the allotment at a premium. If he fails in this he forbears to pay the deposit, and the allotment is forfeited.—**3.** A romping girl; a hoyden. [Prov. Eng.]—**4**†. The color of the stag; a red dirty-brown color.

Come, my Cub, doe not scorne mee because I go in *Stag*, in Buffe; heer's veluet too; thou seest I am worth thus much in bare velure.
Dekker, Satiromastix, I. 220 (ed. Pearson).

Royal stag, a stag that has antlers terminating in twelve or more points.

stag (stag), *v.*; pret. and pp. *stagged*, ppr. *stagging*. [< *stag*, *n.*] **I.** *intrans.* In *com. slang*, to act as a stag on the stock exchange. See *stag*, *n.*, 2.

II. *trans.* To follow warily, as a deer-stalker does a deer; dog; watch. [Slang.]

So you've been *stagging* this gentleman and me, and listening, have you?
H. Kingsley, Geoffry Hamlyn, v. [(*Davies.*)

stagart†, *n.* An obsolete spelling of *staggard*¹.

stag-beetle (stag'bē″tl), *n.* A lamellicorn coleopterous insect of the genus *Lucanus* or restricted family *Lucanidæ* (which see), the males of which have branched mandibles resembling the antlers of a stag. *L. cervus* is the common stag-beetle of Europe, and *L. elaphus* is the stag-beetle of the United States. The former is one of the largest of British beetles, distinguished by the enormous size of the horny and toothed mandibles in the male, and by the rather long elbowed antennæ, which end in a perfoliated club, and are composed of ten joints, the first being very long. It is common in some localities in the neighborhood of London, and is often 2 inches long, of a black color. Other species are numerous in various parts of the world. See also cut under *Platycerus*.

Stag-beetle (*Lucanus cervus*), one half natural size.

stag-bush (stag'bůsh), *n.* The black haw, *Viburnum prunifolium*.

stag-dance (stag'dăns), *n.* A dance performed by men only. [Colloq., U. S.]

stage (stāj), *n.* [< ME. *stage*, < OF. *estage*, *estaige*, *estauge*, *astage*, etc., a story, floor, stage, a dwelling-house, F. *étage*, story, stage, floor, loft, = Pr. *estatge*, a stage, = It. *staggio*, a stake, prop. banisters (ML. reflex *stagium*, *estagium*), < ML. **staticum*, lit. 'a place of standing,' or (as in It. *staggio*) 'that which stands,' < L. *stare*, pp. *status*, stand: see *state*, *stand*. Cf. *étagère*. In the sense of 'the distance between two points,' the word was prob. confused with OF. *estage*, < L. *stadium*, < Gr. στάδιον, a measure of distance: see *stadium*, *stade*², *stadie*.] **1**†. A floor or story of a house.

The Erle ascended into this tour quickly,
As sone as he myght to hiest *stage* came.
Rom. of Partenay (E. E. T. S.), l. 4925.

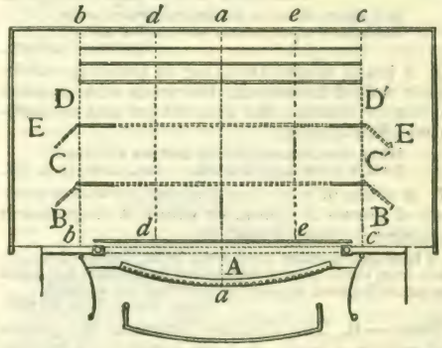
Litul John stode at a window in the mornynge,
And lokid forth at a *stage*.
Robin Hood and the Monk (Child's Ballads, V. 8).

2†. A house; building.

Ther buth seriauns in the *stage*
That serueth the maidenes of parage.
King Horn (E. E. T. S.), p. 58.

3. In *arch.*, the portion between a projection and the retreat next above it in a medieval buttress; also, one of the horizontal divisions of a window separated by transoms.—**4.** A floor or platform elevated above the ground or common surface, for the exhibition of a play or spectacle, for public speakers or performers, or for convenience of view, use, or access: as, a *stage* for a mountebank; a *stage* for speakers in public.

Give order that these bodies
High on a *stage* be placed to the view.
Shak., Hamlet, v. 2. 389.



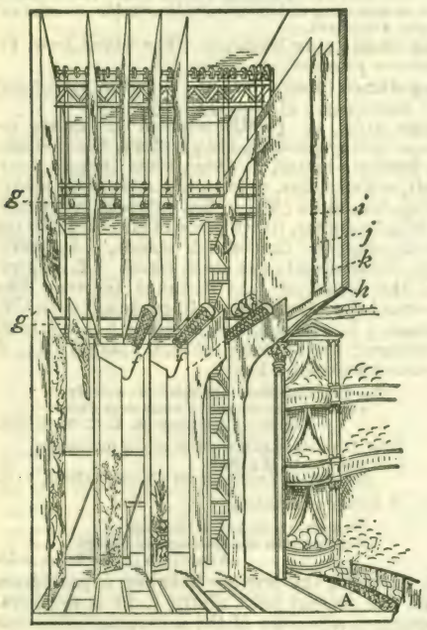
Specifically—(*a*) A floor elevated for the convenience of performing mechanical work and the like; a scaffold; a staging: as, seamen use floating *stages*, and *stages* suspended by the side of a ship, for calking and repairing. (*b*) In *printing*, a low platform on which stacks of paper are piled. (*c*) A shelf or horizontal compartment, as one of the steps of a court-cupboard.

The number of *stages* in the buffet or sideboard indicates the rank of the owner.
S. K. Handbook, Corporation and College Plate.

(*d*) The platform on which an object is placed to be viewed through a microscope. (*e*) A wooden structure on a beach to assist in landing; a landing-place at a quay or pier. It sometimes rises and falls with the tide, or is lowered or raised to suit the varying height of the water.

Getting ye starte of ye ships that came to the plantation, they tooke away their *stage*, & other necessary provisions that they had made for fishing at Cap-Anne ye year before.
Bradford, Plymouth Plantation, p. 196.

(*f*) A raised platform on which theatrical performances are exhibited; the flooring in a theater on which the actors perform. In modern theaters the stage includes not only the part which can be seen from the auditorium, but



Floor-plan of Stage.

A, proscenium; B, C, D, first, second, and third prompt-entrances respectively; B′, C′, D′, first, second, and third opposite-prompt-entrances respectively; E, wings; *a a*, center; *c c*, prompt-side (usually); *b b*, o.-p.-side; *d d*, prompt-center; *e e*, o.-p.-center.

also the spaces on each side, behind the proscenium-arch, which are used for shifting the wings or side-scenes, and are themselves called the *wings*. The part extending back from the orchestra to the proscenium-arch is called the *proscenium*. That side of the stage which is on the right (usually) of the spectator is called the *prompt-side*, because in theaters which have no prompt-box the prompter stands there. The corresponding position to the spectator's left is called the *opposite-prompt-side* (or, briefly, *o.-p.-side*). Half-way between the center and the prompt-side is the *prompt-center*, the corresponding position to the

right being called the *opposite-prompt-center* (or, briefly, *o.-p.-center*). The stage is thus divided laterally into five parts, called in order the *prompt-side*, the *prompt-center*, the *center*, the *o.-p.-center*, and the *o.-p.-side*, and these designations extend through the whole depth of the stage, as well as up into the flies: thus the five ropes by which a drop-scene is raised or lowered are known as the *prompt-side*

Section of Stage, as seen from Prompt-side.
A, proscenium; *f*, *f*, border-lights; *g*, *g'*, fly-galleries; *h*, proscenium-arch; *i*, *j*, curtains; *k*, asbestos fire-proof curtain.

rope, *prompt-center rope*, *center-rope*, etc. As regards depth, the stage is divided into *entrances* varying in number according to the number of the wings or side-scenes. That between the proscenium and the first wing is called on one side the *first prompt-entrance*, and on the other the *first o.-p.-entrance*. From the first wing to the next is the *second prompt-* or *second o.-p.-entrance*, and so on. Everything above the stage from the top of the proscenium-arch upward is called the *flies*, and includes the borders, border-lights, all needed ropes, pulleys, and cleats, the beams to which these are attached, and the fly-galleries, from the lowest of which the drop-scenes are worked. The ancient Greek theater in its original form, as developed in the fifth century B. C., had no raised stage, the actors appearing in the orchestra amid the chorus.

All the world 's a *stage*,
And all the men and women merely players.
Shak., As you Like it, ii. 7. 139.

Mirth. Pray you help us to some stools here.
Pro. Where, on the *stage*, ladies?
Mirth. Yes, on the *stage*; we are persons of quality, I assure you, and women of fashion, and come to see and to be seen. *B. Jonson*, Staple of News, Ind.

Hence—**5.** With the definite article, the theater; the drama as acted or exhibited, or the profession of representing dramatic compositions: as, to take to *the stage*; to regard *the stage* as a school of elocution.

There were also Poets that wrote onely for *the stage*, I meane playes and interludes, to recreate the people with matters of disporte.
Puttenham, Arte of Eng. Poesie, p. 20.

Lo! where *the stage*, *the* poor degraded *stage*,
Holds its warped mirror to a gaping age.
Sprague, Curiosity.

6. A place where anything is publicly exhibited; a field for action; the scene of any noted action or career; the spot where any remarkable affair occurs.

When we are born, we cry that we are come
To this great *stage* of fools. *Shak.*, Lear, iv. 6. 187.

7. A place of rest on a journey, or where a relay of horses is taken, or where a stage-coach changes horses; a station.

I have this morning good news from Gibson; three letters from three several *stages*, that he was safe last night as far as Royston, at between nine and ten at night.
Pepys, Diary, June 14, 1667.

Hence—**8.** The distance between two places of rest on a road: in some countries a regular unit.

'Tis strange a man cannot ride a *stage*
Or two, to breathe himself, without a warrant.
Beau. and Fl., Philaster, ii. 4.

Our whole *Stage* this day was about five hours, our Course a little Southerly of the West.
Maundrell, Aleppo to Jerusalem, p. 2.

9. A single step of a gradual process; degree of advance or of progression, either in increase or decrease, in rising or falling, or in any change of state: as, *stages* of growth in an animal or a plant; the *stages* of a disease; in *biol.*, a state or condition of being, as one of several successive steps in a course of development: as, the larval, pupal, and imaginal *stages* of an insect; several *stages* of an embryo.

A blysful lyf thou says I lede,
Thou woldez knaw ther-of the *stage*.
Alliterative Poems (ed. Morris), i. 410.

These three be the true *stages* of knowledge.
Bacon, Advancement of Learning, ii.

Our education is in a manner wholly in the hands of ecclesiastics, and in all *stages* from infancy to manhood.
Burke, Rev. in France.

They were in widely different *stages* of civilization.
Macaulay, Hist. Eng., vi.

10. [Abbr. of *stage-coach*.] Same as *stage-coach*; also [U. S.], an omnibus.

A parcel sent you by the *stage*.

stage-micrometer (stāj'mī-krom″e-tėr), *n.* In *microscopy*, a micrometer attached to the stage, and used to measure the size of an object under examination.

stage-plate (stāj'plāt), *n.* A glass plate with a narrow ledge along one edge, used on the stage of a microscope to hold an object when the microscope is inclined, and sometimes as the bottom plate of a growing-slide. *E. H. Knight.*

stage-play (stāj'plā), *n.* Originally, a dramatic performance; hence, a play or drama adapted for representation on the stage, as distinguished from a reading- or closet-play.

If the devil, or his instruments, should then tell him [a dying man] of a cup of sack, of merry company, of a *stage-play*, or a morris-dance, do you think he would then be so taken with the motion? *Baxter*, Saints' Rest, iv. 3.

stage-player (stāj'plā″ėr), *n.* An actor on the stage; one whose occupation is to represent characters on the stage.

Among slaves who exercised polite arts none sold so dear as *stageplayers* or actors. *Arbuthnot*, Ancient Coins.

stager (stā'jėr), *n.* [< *stage* + *-er*[1].] 1†. A player.

Dare quit, upon your oaths,
The *stagers* and the stage-wrights too (your peers).
B. Jonson, Just Indignation of the Author.

2. One who has long acted on the stage of life; a person of experience, or of skill derived from long experience: usually with *old*.

Here let me, as an *old stager* upon the theatre of the world, suggest one consideration to you.
Chesterfield, To his Son, Dec. 20, O. S. 1748.

3. A horse used for drawing a stage-coach.

stage-right (stāj'rīt), *n.* The proprietary right of the author of a dramatic composition in respect to its performance; the exclusive right to perform or authorize the performance of a particular drama. Compare *copyright*.

stageriteț, *n.* [< *stager* + *-ite*[2]; with a pun on *Stagirite*.] A stage-player. [Humorous.]

Thou hast forgot how thou amblest . . . by a play-wagon, in the high way, and took'st mad Jeronimoes part, to get seruice among the Mimickes; and when the *Stagerites* banish't thee into the Isle of Dogs, thou turn'dst Bandog. *Dekker*, Satiromastix, I. 229 (ed. Pearson).

stagery† (stā'jėr-i), *n.* [< *stage* + *-ery*.] Exhibition on the stage.

Likening those grave controversies to a piece of *Stagery*, or Scene-worke. *Milton*, An Apology, etc.

stage-setter (stāj'set″ėr), *n.* One who attends to the proper setting of a play on the stage.

M. Sardou is a born *stage-setter*, but with a leaning to "great machines," numbers of figurants, and magnificence.
The Century, XXXV. 544.

stage-struck (stāj'struk), *a.* Smitten with a love for the stage; possessed by a passion for the drama; seized by a passionate desire to become an actor.

"You are a precious fool, Jack Bunce," said Cleveland, half angry, and, in despite of himself, half diverted by the false tones and exaggerated gesture of the *stagestruck* pirate. *Scott*, Pirate, xxxix.

stag-evil (stag'ē″vl), *n.* Tetanus or lockjaw of the horse.

stage-wagon (stāj'wag″on), *n.* 1. A wagon for conveying goods and passengers, by stages, at regularly appointed times.—2†. A stage-coach.

Landor, Imag. Conv., Galileo, Milton, and a Dominican.

2. To hesitate; begin to doubt or waver in purpose; falter; become less confident or determined; waver; vacillate.

He *staggered* not at the promise of God through unbelief. Rom. iv. 20.

It was long since resolved on,
Nor must I *stagger* now in 't.
Massinger, Unnatural Combat, ii. 1.

The enterprise of the . . . newspapers stops at no expense, *staggers* at no difficulties.
Harper's Mag., LXXVII. 687.

=**Syn.** 1. *Totter*, etc. See *reel*[2].

II. *trans.* 1. To cause to reel, totter, falter, or be unsteady; shake.

I have seen enough to *stagger* my obedience.
Fletcher, Valentinian, iii. 1.

Strikes and lock-outs occur, which *stagger* the prosperity, not of the business merely, but of the state.
N. A. Rev., CXXXIX. 515.

2. To cause to hesitate, waver, or doubt; fill with doubts or misgivings; make less steady, determined, or confident.

The question did at first so *stagger* me.
Shak., Hen. VIII., ii. 4. 212.

'Tis not to die, sir,
But to die unreveng'd, that *staggers* me.
Fletcher, Double Marriage, iv. 1.

3. To arrange in a zigzag order; specifically, in *wheel-making*, to set (the spokes) in the hub alternately inside and outside (or more or less to one side of) a line drawn round the hub. The mortise-holes in such a hub are said to be *dodging*. A wheel made in this manner is called a *staggered wheel*. The objects sought in this system of construction are increased strength and stiffness in the wheel.

★**stagger** (stag'ėr), *n.* [< *stagger*, *v.*] 1. A sudden tottering motion, swing, or reel of the body as if one were about to fall, as through tripping, giddiness, or intoxication.

Their trepidations are more shaking than cold ague-fits; their *staggers* worse than a drunkard's.
Rev. T. Adams, Works, I. 127.

The individual . . . advanced with a motion that alternated between a reel and a *stagger*.
G. A. Sala, Dutch Pictures, The Ship-Chandler. (*Latham.*)

2. *pl.* One of various forms of functional and organic disease of the brain and spinal cord in domesticated animals, especially horses and cattle: more fully called *blind staggers*. A kind of staggers (see also *gid*[1] and *sturdy*[2]) affecting sheep is specifically the disease resulting from a larval brain-worm. (See *cœnure* and *Tænia*.) Other forms are due to disturbance of the circulation in the brain, and others again to digestive derangements. See *stomach-staggers*.

How now! my galloway nag the *staggers*, ha!
B. Jonson, Bartholomew Fair, iv. 3.

Hence—3. *pl.* A feeling of giddiness, reeling, or unsteadiness; a sensation which causes reeling.

Johp. And a kind of whimsie—
Mere. Here in my head, that puts me to the *staggers*.
B. Jonson, Fortunate Isles.

4. *pl.* Perplexities; doubts; bewilderment; confusion.

I will throw thee from my care for ever,
Into the *staggers* and the careless lapse
Of youth and ignorance.
Shak., All's Well, ii. 3. 170.

Blind staggers. See def. 2, above.—**Grass-staggers**, the loco-disease in horses. See *loco*, 2, and *loco-weed*.

Stagger-bush (*Pieris Mariana*). 1, flowering branch; 2, the fruits.

stagger-bush (stag'ėr-bůsh), *n.* The shrub *Pieris Mariana* of the middle and southern United States, the leaves of which have been supposed to give the staggers to animals. Its fascicles of waxy pure white or pinkish urn-shaped flowers are very beautiful, the habit of the bush less so. See cut in preceding column.

staggerer (stag'ėr-ėr), *n.* [< *stagger* + *-er*[1].] 1. One who or that which staggers.—2. A statement or argument that staggers; a poser; whatever causes one to stagger, falter, hesitate, or doubt. [Colloq.]

This was a *staggerer* for Dive's literary "gent," and it took him nearly six weeks to get over it and frame a reply.
Athenæum, Oct. 26, 1889, p. 560.

stagger-grass (stag'ėr-grȧs), *n.* The atamasco-lily, *Atamosco Atamasco:* so called as supposed to cause staggers in horses.

staggeringly (stag'ėr-ing-li), *adv.* In a staggering or reeling manner; with hesitation or doubt. *Imp. Dict.*

staggerwort (stag'ėr-wėrt), *n.* Same as *staverwort:* so called as supposed to cure the staggers, or, as Prior thinks, from its application to newly castrated bulls, called *stags*.

staggon† (stag'ǫn), *n.* [Also *stagon* (ML. *staggon*); < *stag* + *-on*, a suffix of F. origin.] A staggard. *Holinshed.*

Called in the fourth [year] a *stagon*.
Stanihurst, Descrip. of Eng., iii. 4.

stag-headed (stag'hed″ed), *a.* Having the upper branches dead: said of a tree.

They were made of particular parts of the growth of certain very old oaks, which had grown for ages, and had at length become *stag-headed* and half-dead.
Harper's Mag., LXXVIII. 787.

stag-horn (stag'hôrn), *n.* 1. A common club-moss, *Lycopodium clavatum*. Also *stag's-horn*.

Or with that plant which in our dale
We call *stag-horn*, or fox's tail.
Wordsworth, Idle Shepherd-Boys.

2. A madrepore coral, *Madrepora cervicornis* and related species, used for ornament. See cut under *Madrepore*.—**Stag-horn fern**, a fern of the genus *Alcicornium*, but especially *A. alcicorne:* so called from the fact that the fertile fronds are dichotomously forked like a stag's horn. The genus is small but widely diffused. The name is also sometimes applied to certain species of *Ophioglossum*.—**Stag-horn moss.** Same as *stag-horn*, 1.—**Stag-horn sumac.** See *sumac*.

stag-horned (stag'hôrnd), *a.* Having long serrate antennæ, as the longicorn beetle *Acanthophorus serraticornis*.

staghound (stag'hound), *n.* A hunting-dog able to overtake and cope with a stag. (*a*) The Scotch deerhound or wolf-dog, of great speed, strength, and courage, standing 28 inches or more, with a shaggy or wiry coat, usually some shade of gray. They hunt chiefly by sight, and are used in stalking the red deer, for running down the game. (*b*) A large kind of fox-hound, about 25 inches high, trained to hunt deer by scent.

staginess (stā'ji-nes), *n.* [< *stagy* + *-ness.*] 1. Stagy or exaggerated character or style; conventional theatricality. Also *stageyness*.—2. A certain stage or state of an animal; by implication, that stage when the animal is out of condition, as when a fur-bearing animal is shedding. [Colloq.]

Those signs of shedding and *staginess* so marked in the seal. *Fisheries of U. S.*, V. ii. 488.

staging (stā'jing), *n.* [Verbal n. of *stage*, *v.*] 1. A temporary structure of posts and boards for support, as in building; scaffolding.—2. The business of running or managing stage-coaches, or the act of traveling in them.

stagiont, *n.* [Appar. an altered form of *staging*, simulating *station* (ME. *stacion*, < OF. *stacion*, *estaçon*, *estachon*, *estagon*, etc.): see *station*.] Stage; a staging; a pier.

In these tydes there must be lost no iot of time, for, if you arriue not at the *stagions* before the tyde be spent, you must turne backe from whence you came.
Hakluyt's Voyages, II. 234.

Stagirite (staj'i-rīt), *n.* [Also, erroneously, *Stagyrite;* = F. *Stagyrite* = Sp. Pg. *Estagirita* = It. *Stagirita*, < L. *Stagirites*, *Stagerites*, < Gr. Σταγειρίτης, an inhabitant or a native of Stagira (applied esp. to Aristotle), < Στάγειρα, Στάγειρος (L. *Stagira*), a city of Macedonia.] A native or an inhabitant of Stagira, a city of Macedonia (Chalcidice), situated on the Strymonic Gulf; specifically, Aristotle, the "prince of philosophers" (384–322 B. C.), who was born there, and is frequently referred to as "the Stagirite."

The mighty *Stagyrite* first left the shore,
Spread all his sails, and durst the deep explore;
He steer'd securely, and discover'd far,
Led by the light of the Mæonian star.
Pope, Essay on Criticism, l. 645.

stagnancy (stag'nan-si), *n.* [< *stagnan*(*t*) + *-cy.*] 1. The state of being stagnant or without motion, flow, or circulation, as a fluid; stagnation.

4. To color by a process other than painting or coating or covering the surface. (*a*) To color (as glass) by something which combines chemically with the substance to be colored. (*b*) To color by the use of a thin liquid which penetrates the material, as in dyeing cloth or staining wood. (*c*) In *microscopy*, to impregnate with a substance whose chemical reaction on the tissue so treated gives it a particular color. The great value of staining for this purpose results from the fact that some tissues are stainable by a certain reagent to which others respond but feebly or not at all, so that some points, as the nucleus of cells, etc., may be more distinctly seen by the contrast in color. Many different preparations are used for the purpose in different cases.

5. To print colors upon (especially upon paper-hangings). [Eng.]—6†. To darken; dim; obscure.

Clouds and eclipses *stain* both moon and sun.
Shak., Sonnets, xxxv.

★**stalactite** (stā-lak'tīt), *n.* [= F. *stalactite*, < NL. *stalactites*, < Gr. σταλακτός, dropping, oozing out in drops: see *stalactic*.] 1. A deposit of carbonate of lime, usually resembling in form a huge icicle, which hangs from the roof of a cave or subterranean rock-opening, where it has been slowly formed by deposition from calcareous water trickling downward through cracks or openings in the rocks above. Water containing carbonic acid in solution, which it has gained in filtering through the overlying soil, has the power of dissolving carbonate of lime, which it deposits again upon evaporation; stalactites are hence common in regions of limestone rocks. They are sometimes white, and nearly transparent, showing the broad cleavage-surfaces of the calcite, as those of the cave near Matanzas in Cuba; but commonly they have a granular structure with concentric bands of pale-yellow to brown colors. In some caverns the stalactites are very numerous and large, and of great beauty in their endless variety of form, especially in connection with the stalagmites, the corresponding depositions accumulated beneath the stalactites upon the floor of the caverns. The caves of Adelsberg in Carniola and of Luray in Virginia are among the most celebrated for the beauty of their stalactites.

The grotto is perfectly dry, and there are no petrifications or *stalactites* in it.
Pococke, Description of the East, II. i. 41.

2. A similar form of some other mineral species, such as are occasionally observed, for example, of chalcedony, limonite, etc., but only sparingly and on a small scale.—3. A like form of lava sometimes observed in connection with volcanic outflows. Lava stalactites have been noted hanging from the roofs of lava caverns in the crater of Kilauea in Hawaii; and slender forms of a nearly uniform diameter of one fourth of an inch, and from a few inches to 20 or 30 inches in length, ornament the roofs of caverns in the lava stream which descended from Mauna Loa in the same island in 1881. Stalagmites of lava rise from the lava floor beneath.

stalactited (stā-lak'tī-ted), *a.* [< *stalactite* + *-ed*[2].] Covered with stalactites; also, formed in more or less semblance of stalactites. — **Stalactited work.** See *rustic work*, under *rustic*.

5. Sturdy and steadfast in partizanship: in *U. S. politics* [*cap.*], noting various sections of the Republican party. See the phrase.

The epithet *Stalwart* as applied to a class of politicians was first used by Mr. Blaine in 1877 to designate those Republicans who were unwilling to give up hostility and distrust of the South as a political motive. In the present contest at Albany it has by a curious transformation been appropriated by the followers of Mr. Conkling to distinguish politicians faithful to his Machine.
The Nation, June 16, 1881.

Stalwart Republican, in *U. S. hist.*, a decided or thorough-going member of the Republican party; specifically, a member of that wing of the Republican party in the State of New York which in 1880 advocated the renomination of Grant as President for a third term and in 1881 supported Roscoe Conkling in his opposition to the administration of Garfield, and antagonized the "Half-Breeds" in 1881 and following years.=**Syn. 4.** *Stout, Sturdy*, etc. (see *robust*), sinewy, brawny, muscular, strapping, powerful, valorous, resolute.

II. *n.* **1.** A strong or sturdy person.

His opinion is not favourable, Emin's *stalwarts*, whose praises had been so loudly trumpeted in Europe, proving to be for the most part brutal ruffians and abject cravens in the presence of danger. *The Academy*, Jan. 3, 1891.

stalwartness (stâl′wart-nes), *n.* Stalwart character or quality; sturdiness; stoutness; strength. *Athenæum*, Jan. 14, 1888, p. 57.

stalworth (stâl′wėrth), *a.* [Early mod. E. also *stalwoorth, stalworthe;* < ME. *stalworth, stalword, stalworthe, stalwurthe, staleworthe, stalewurthe, stelewurthe, stealewurthe*, also *stalworthy, stawurthy* (see *stalworthy*), < AS. *stælwyrthe*, found only once, in pl. *stælwyrthe*, in the sense 'good' or 'serviceable,' applied to ships; a compound peculiar to AS.: (*a*) prob. a contraction of **stathelwyrthe*, lit. 'steadfast,' 'well-based,' 'firmset,' etc., hence 'stout,' < *stathol, stathel*, foundation, base, seat, site, position, E. *staddle*, Sc. also contracted *stale, stail* (cf. AS. *stælan*, contracted from *statholian*, found, establish), + *wyrthe, weorth, wurth*, good, excellent, worth: see *staddle* and *worth*[2]. Cf. the equiv. *stathol-fæst*, steadfast, firm, stable (< *stathol*, foundation, + *fæst*, firm, fast), and *stedefæst*, E. *steadfast* (the AS. *weorth* and *fæst* as the second element of adj. compounds being used rather as adj. formatives than as independent words). Such contraction is not common in AS., and the form *stælwyrthe* has generally been otherwise explained: (*b*) < *stalu* (in comp. *stæl-*), stealing, theft, + *weorth, wurth*, worth, worthy (see *stale*[1] and *worth*[2]), but the sense 'worthy of theft,' 'worth stealing,' hence 'worth taking for use' ("captu dignæ," Gibson), cannot apply to men, and the sense 'good at stealing,' suggested by some, even if it were etymologically admissible, could not apply to ships. (*c*) In another view, lit. 'worthy of place,' i. e. fit for its place or use, serviceable, < AS. *steal, steall*, also sometimes, esp. in comp., *stæl*, a place, stall, + *weorth, wurth*, worth, worthy (see *stall*[1] and *worth*[2]). The full form *stall-* occurs in ME. *stallworthely*, a var. of *stalworthly*, and in the mod. surname *Stallworthy*. In any view, the ME. forms *staleworth, stalewurthe, stelewurthe, stealewurthe*, with medial *e*, must be regarded as irregular. In fact the orig. meaning of the compound appears to have been lost, and the ME. variations must be due to simulation of one or other of the words above considered. Hence, by further variation, *stalwarth*, and now *stalwart*, which is no longer regarded as a compound.] **1**†. Steadfast; firm-based.

That *stalworthe* sted [Constantinople] so strong was founded,
Philip hoped that holde with his help to wynne.
Alisaunder of Macedoine (E. E. T. S.), l. 1230.

Transverse section of the anther of *Isopyrum*, showing the dehiscence and the pollen-grains.

sac or body of two cells placed side by side and filled with a powdery substance, the pollen. This pollen, when mature, is discharged from the anther through various openings or pores. Theoretically the stamen is the homologue of a leaf, in which the two cells of the anther represent the infolded halves of the blade, while the connective represents the midrib and the filament the petiole of the leaf. The pollen represents the parenchyma of the leaf. The stamens of a flower are collectively called the *andrœcium.* When both stamens and pistils are present in the same flower it is said to be hermaphrodite or perfect; when only stamens are present the flower is said to be staminate or male. The number of stamens varies in different plants from one to one hundred or more, but is generally constant for the same species, and forms an important element in the system of classification. The classes in the Linnean sexual system were based upon the number and position of the stamens; and in the natural system they are still an important factor. In regard to their insertion, stamens may be hypogynous, epigynous, or perigynous, or the flower may be gynandrous (see these words). See also cuts under *anther, anthophore, diadelphous, epigynous, extrorse, introrse*, and many plant-names.—**Barren stamen.** Same as *sterile stamen.*—**Included stamens.** See *include.*—**Stamina of reason,** first truths.—**Sterile stamen,** in *bot.*, an organ or body which belongs to the series of stamens, or andrœcium, but which does not produce pollen; an imperfect stamen, as that produced by certain plants of the family *Scrophulariaceæ;* a staminodium.

Cf. also *stumble*.] **I.** *intrans.* 1. To hesitate or falter in speaking; hence, to speak with involuntary breaks and pauses.

His hew shal falewen,
& his tonge shal *stameren*, other famelen.
Political Poems, etc. (ed. Furnivall), p. 224.

The Psythian grape we dry: Lagean juice
Will *stammering* tongues and staggering feet produce.
Dryden, tr. of Virgil's Georgics, ii. 133.

The new strong wine of love,
That made my tongue so *stammer* and trip.
Tennyson, Maud, vi.

2. To stumble or stagger. [Prov. Eng.]

Stamerynge in goyng, idem quod stakerynge, waverynge.
Prompt. Parv., p. 472.

=**Syn.** 1. *Falter*, *Stammer*, *Stutter*. He who *falters* weakens or breaks more or less completely in utterance; the act is occasional, not habitual, and for reasons that are primarily moral, belong to the occasion, and may be various. He who *stammers* has great difficulty in uttering anything; the act may be occasional or habitual; the cause is confusion, shyness, timidity, or actual fear; the result is broken and inarticulate sounds that seem to stick in the mouth, and sometimes complete suppression of voice. He who *stutters* makes sounds that are not what he desires to make; the act is almost always habitual, especially in its worst forms; the cause is often excitement; the result is a quick repetition of some one sound that is initial in a word that the person desires to utter, as c-c-c-c-catch.—**Stammering bladder**, a bladder whose muscles act irregularly and spasmodically, causing painful urination. *Paget*.

II. *trans.* To utter or pronounce with hesitation or imperfectly; especially, to utter with involuntary breaks or catches: frequently with *out*.

His pale lips faintly *stammered out* a "No."
Dickens, Martin Chuzzlewit, xxxiii.

stammer (stam'ėr), *n.* [< *stammer*, *v.*] Defective utterance; a stutter: as, to be troubled with a *stammer*. See *stammering*.

stammerer (stam'ėr-ėr), *n.* [< *stammer* + *-er*[1].] One who stammers or stutters in speaking.

stammering (stam'ėr-ing), *n.* [< ME. *stamerynge*; verbal n. of *stammer*, *v.*] Hesitating speech; imperfect articulation; stuttering.

stammeringly (stam'ėr-ing-li), *adv.* With stammering; with stops or hesitation in speaking.

stamnos (stam'nos), *n.*; pl. *stamnoi* (-noi). [< Gr. στάμνος (see def.), < *ἱστάναι*, cause to stand, *ἵστασθαι*, stand: see *stand*.] In *Gr. archæol.*, a large water- or wine-vase closely resembling the hydria, but generally with a shorter neck, and provided merely with the two small handles on the sides of the paunch, the larger handle behind being absent. Sometimes called *olla*.—**Apulian stamnos**, in *Gr. archæol.*, a type of stamnos of peculiar shape, having the handles on the shoulders prolonged upward in large volutes, and the cover often surmounted by a vase of the same shape. It is called *Apulian* from the province or region where most examples are found. Often called, less correctly, *Apulian crater*.

Typical form of Stamnos.

To crush or bruise with or as with a pestle; pound or bray as in a mortar; pound; bruise; crush: as, to *stamp* ores in a stamping-mill.

Thise cokes, how they *stampe* and streyne and grynde!
Chaucer, Pardoner's Tale, l. 76.

They put the water into large jarres of stone, stirring it about with a few *stampt* Almonds.
Sandys, Travailes, p. 78.

2. To strike or beat with a forcible downward thrust of the foot.

Under my feet I *stamp* thy cardinal's hat.
Shak., 1 Hen. VI., i. 3. 49.

He frets, he fumes, he stares, he *stamps* the ground.
Dryden, Pal. and Arc., i. 446.

3. To cause to strike the ground with a sudden or impetuous downward thrust.

Red Battle *stamps* his foot, and nations feel the shock.
Byron, Childe Harold, i. 38.

4. To impress a design or distinctive mark or figure upon; mark with an impression or design: as, to *stamp* plate with arms; to *stamp* letters; to *stamp* butter.

The Romanes were wont heretofore to *stampe* their coynes of gold and silver in this city.
Coryat, Crudities, I. 59.

Egmont dined at the Regent's table, . . . in a camlet doublet, with hanging sleeves, and buttons *stamped* with the bundle of arrows. *Motley*, Dutch Republic, I. 403.

Hence—5. To certify and give validity or currency to by marking with some mark or impression; coin; mint.

We pay . . . for it with *stamped* coin, not stabbing steel.
Shak., W. T., iv. 4. 747.

6. Figuratively, to brand or stigmatize as being of a specified character; declare to be.

Dares *stamp* nothing false where he finds nothing sure.
M. Arnold, Empedocles on Etna.

7. To imprint; impress; fix deeply: as, to *stamp* one's name on a book; an event *stamped* on one's memory.

If ever I an Hope admit
Without thy Image *stampt* on it.
Cowley, The Mistress, The Soul.

God has *stamped* no original characters on our minds wherein we may read his being. *Locke*.

8. To characterize; mark.

They [Macaulay's articles] are characterized by many of the qualities of heart and mind which *stamp* the productions of an Edinburgh reviewer.
Whipple, Ess. and Rev., I. 12.

9. To affix a stamp (as a postage- or receipt-stamp) to: as, to *stamp* a letter or a newspaper.—10. To cut, or cut into various forms, with a stamp: in this sense often with *out*: as, to *stamp out* circles and diamonds from a sheet of metal.—**Stamped envelop.** See *envelop*.—**Stamped in the blind.** See *blind*[1].—**Stamped velvet**, velvet or velveteen upon which a pattern has been impressed by hot irons which leave a surface more or less lowered from the pile according to the amount of pressure applied, etc. In some cases the surface of the impressed pattern is brought to a smooth gloss. This material is used chiefly for upholstery.—**Stamped ware.** Same as *sigillated ware* (which see, under *sigillated*). *Solon.* The Old Eng. Potter, p. xiii.—**Stamped work**, metal-work decorated by means of dies and punches.—**To stamp out**, to extinguish, as fire, by stamping on with the foot; hence, to extirpate; eradicate by resorting to vigorous measures; suppress entirely; exterminate: as, to *stamp out* disease which has broken out among cattle by killing the whole herd; to *stamp out* an insurrection.

II. *intrans.* To strike the foot forcibly downward upon the ground or some other object.

A ramping fool, to brag and *stamp* and swear.
Shak., K. John, iii. 1. 122.

★**stamp** (stamp), *n.* [OHG. *stamph*, *stampf*, MHG. *stampf*, a stamping-instrument, a stamp (> F. *estampe* = It. *stampa*, a stamp); in dim. form, MLG. LG. *stempel* = OHG. *stemphil*, MHG. *stempfel*, G. (after LG.) *stempel* = Sw. *stämpel* = Dan. *stempel*, a stamp; from the verb.] 1. An instrument for crushing, bruising, or pounding; specifically, in *metal.*, that part of the machinery of a stamp-mill which rises and falls, and which delivers the blow by which the ore is reduced to the necessary fineness for being further treated for the separation of the valuable portion; by extension, the mill itself. The stamp consists of head and stem, the latter having upon it the tappet by which, through the agency of the cam or wiper which projects from an axis turned by steam- or water-power, it is raised.

There are 340 *stamps* in operation at Butte, and the amount of ore treated every day amounts to 500 tons.
Harper's Mag., LXXVII. 596.

2. An instrument for making impressions on other bodies; an engraved block, die, or the like, by which a mark may be made or delivered by pressure; specifically, a plate upon which is cut the design for the sides or back of a book.—3. A hand-tool for cutting blanks from paper, leather, etc., in various patterns, according to the shape of the cutting-edges. It operates by pressure or a direct blow, or is laid on the material and struck with a hammer. Hand-stamps are used for canceling, bating, embossing, eyeleting, and similar work.

4. A forcible or impetuous downward thrust or blow: as, he emphasized his order with a *stamp* of the foot.—**5.** An impression or mark made with a stamp; an impressed or embossed mark or pattern; particularly, an impressed mark used to certify something, or give validity or currency to it: as, the *stamp* on a coin; the *stamp* on a certified check.

What boots it to be coin'd
With Heav'n's own *stamp?*
Quarles, Emblems, v. 12.

That sacred name [the king's] gives ornament and grace; And, like his *stamp*, makes basest metals pass.
Dryden, Prol. at Opening of the New House, l. 33.

The rank is but the guinea's *stamp*. *Burns*, For a' that.

Specifically—(*a*) An official mark set upon a thing chargeable with duty or tax showing that the duty or tax is paid. (*b*) The impression of a public mark or seal required by the British government for revenue purposes to be made by its officers upon the paper or parchment on which deeds, legal instruments, bills of exchange, receipts, checks, insurance policies, etc., are written, the fee for the stamp or stamped paper varying with the nature of the instrument or the amount involved. (See *stamp-duty.*) For receipts, foreign bills of exchange, and agreements, adhesive stamps may be used, but in general the stamp must be embossed or impressed. (*c*) A small piece of paper having a certain figure or design impressed upon it, sold by the government to be attached to goods, papers, letters, documents, etc., subject to duty, or to some charge as for postage, in order to show that such duty or charge has been paid: as, postage-*stamps;* receipt-*stamps;* internal-revenue *stamps.*

6. *pl.* Stamp-duties: as, the receiver of *stamps* and taxes. See *stamp-duty.*—**7.** *pl.* Money: so called in allusion to the use of postage-stamps and small paper notes ("shinplasters") as money. [Slang, U. S.]—**8†.** That which is marked; a thing stamped; a medal.

Hanging a golden *stamp* about their necks.
Shak., Macbeth, iv. 3. 153.

9†. A coin, especially one of small value.

Ric. Oh, cruel, merciless woman,
To talk of law, and know I have no money.
Val. I will consume myself to the last *stamp*,
Before thou gett'st me.
Middleton (and others), The Widow, ii. 1.

10†. A picture cut in wood or metal, or made by impression; an engraving; a plate or eliché.

He that will not onely reade, but in manner see, the most of these exploits of the Hollanders, with other rarities of the Indies, may resort to Theodoricke and Israel de Bry, who haue in liuely *stampes* expressed these Nauigations. *Purchas*, Pilgrimage, p. 463.

When I was at Venice, they were putting out very curious *stamps* of the several edifices which are most famous for their beauty or magnificence.
Addison, Remarks on Italy (Works, ed. Bohn, I. 388).

11. Sanction; value derived from suffrage or attestation; authority.

The common people do not judge of vice or virtue by the morality or the immorality so much as by the *stamp* that is set upon it by men of figure. *Sir R. L'Estrange.*

12. Distinguishing mark; imprint; sign; indication; evidence.

If ever there was a work which carried with it the *stamp* of originality in all its parts, it is that of John Bunyan's! *Southey*, Bunyan, p. 70.

13. Make; cast; form; character; sort; kind; brand.

Those he hath . . . predestinated to be of our *stamp* or character, which is the image of his own Son, in whom, for that cause, they are said to be chosen.
Hooker, Eccles. Polity, v., App. 1.

He had wantonly involved himself in a number of small book-debts of this *stamp*. *Sterne*, Tristram Shandy, i. 12.

14. In *leather-manuf.*, a machine for softening hides by pounding them in a vat. *E. H. Knight.*—**15.** Same as *nobblin.*

In the production of "charcoal plates" (for tinplate making), the first rough forged slabs are cut into pieces termed *stamps*. *Encyc. Brit.*, XIII. 319.

16. *pl.* Legs. [Old slang.]—**Atmospheric stamp.** See *atmospheric.*—**Ball stamp**, a peculiar form of stamp (so named from the inventor) in use at the mines on Lake Superior. It is a direct-action stamp, the stem of the stamp being the continuation of the piston-rod of the steam-engine which is the motive power.—**Leavitt stamp**, an improved form of Ball stamp, used chiefly in the Lake Superior mines. One head is capable of crushing 250 tons of ore in 24 hours. This stamp works like the Nasmyth hammer, the force of gravity being aided by steam-pressure.—**Stamp Act**, an act imposing or regulating the imposition of stamp-duties; in *American colonial history*, an act, also known as *Grenville's Stamp Act*, passed by the British Parliament in 1765, providing for the raising of revenue in the American colonies by the sale of stamps and stamped paper for commercial transactions, real-estate transfers, lawsuits, marriage licenses, inheritances, etc.: it also provided that the royal forces in America should be billeted on the people. The act was to go into effect November 1st, 1765, but it aroused intense opposition, led by the assemblies of Virginia, Massachusetts, and other colonies. A "Stamp Act Congress," with delegates from many of the colonies, met at New York in October, 1765, and a petition against this and other repressive measures was sent to England. The Stamp Act was repealed in March, 1766, but the agitation was one of the leading causes in effecting the revolution.—**To put to stamp†**, to put to press; begin printing. *Hall*, Hen. VIII., an. 25.

stampage (stam′pāj), *n.* [< *stamp* + *-age.*] An impression; a squeeze.

No copy [of the rock inscription] was obtained until October, 1838, when the traveller Masson most carefully and perseveringly made a calico *stampage* and an eye-copy.
Encyc. Brit., XIII. 118.

stamp-album (stamp′al″bum), *n.* A blank book or album used by collectors for the classification and display of postage- and revenue-stamps.

stamp-battery (stamp′bat″ėr-i), *n.* A series of stamps in a machine for comminuting ores. *E. H. Knight.*

stamp-block (stamp′blok), *n.* A hollow wooden block in which mealies are pounded before being cooked. [South Africa.]

stamp-collecting (stamp′kọ-lek″ting), *n.* The act or practice of collecting postage- or revenue-stamps. See *philately.*

stamp-collector (stamp′kọ-lek″tor), *n.* **1.** A collector or receiver of stamp-duties.—**2.** One who collects postage- or revenue-stamps as articles of interest or curiosity; a philatelist.

stamp-distributer (stamp′dis-trib″ū-tėr), *n.* An official who issues or distributes government stamps.

stamp-duty (stamp′dū″ti), *n.* A tax or duty imposed on the sheets of parchment or paper on which specified kinds of legal instruments are written. Stamp-duties on legal instruments, such as conveyances and deeds, are chiefly secured by prohibiting the reception of them in evidence unless they bear the stamp required by the law. Stamp-duties were first levied in England in the reign of William and Mary.

stampede (stam-pēd′), *n.* [Formerly also *stampedo;* < Amer. Sp. *estampida*, a stampede, a particular use of Sp. *estampida*, *estampido* (= Pg. *estampido*), a crack, crash, loud report; connected with *estampar*, stamp: see *stamp*, *v.*] **1.** A sudden fright seizing upon large bodies of cattle or horses, and causing them to run for long distances; a sudden scattering of a herd of cattle or horses; hence, any sudden flight or general movement, as of an army, in consequence of a panic.

With every herd this *stampede* occurs; and, watching the proceedings, I hold that a drover ought to have rather more patience than Job.
Mortimer Collins, Thoughts in my Garden, II. 131.

2. Any sudden unconcerted movement of a number of persons actuated by a common impulse: as, a *stampede* in a political convention for a candidate who seems likely to win. Stampedes in American politics have been common since the Democratic convention of 1844.

At the first ring of the bell a general *stampede* took place; some twenty hungry souls rushed to the dining-room. *L. M. Alcott*, Hospital Sketches, p. 63.

stampede (stam-pēd′), *v.*; pret. and pp. *stampeded*, ppr. *stampeding.* [< *stampede*, *n.*] **I.** *intrans.* **1.** To become generally panic-stricken; take suddenly to flight, as if under the influence of a panic; scamper off in fright: said of herds or droves.—**2.** To move together, or take the same line of conduct, under the influence of any sudden and common impulse. See *stampede*, *n.*, 2.

II. *trans.* **1.** To cause to break and run as if panic-stricken; disperse or drive off suddenly through panic or terror.

Those most trying times when . . . the cattle are *stampeded* by a thunder-storm at night.
T. Roosevelt, Hunting Trips, p. 7.

2. To cause to move or act in a mass through some sudden common impulse: as, to *stampede* a political convention for a candidate.

stampedo† (stam-pē′dō), *n.* Same as *stampede.*

A sudden *stampedo* or rush of horses. *Irving.*

stamper (stam′pėr), *n.* [< *stamp* + *-er*[1].] **1.** One who stamps: as, a *stamper* in the post-office.—**2.** An instrument for stamping; a stamp.—**3.** *pl.* The feet; also, shoes. [Old slang.]

Strike up, Piper, a merry, merry dance,
That we on our *stampers* may foot it and prance.
Brome, Jovial Crew, i.

4. A stamping-machine. (*a*) A machine for cleaning textile fabrics, consisting of a tub revolving horizontally, and a series of wooden stamps or pestles operated by suitable machinery. (*b*) In *gunpowder-manuf.*, a machine used in small mills, consisting of ten or twelve stamps of hard wood, arranged in a row, each stamp having a bronze shoe. The material to be pulverized is placed in cavities in a block of solid oak. (*c*) In *porcelain-manuf.*, a mill for pulverizing calcined flints preparatory to treatment in the grinding-vat.

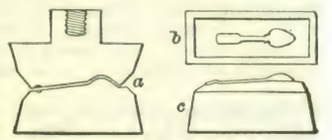
5. *pl.* In *ornith.*, the *Calcatores.*

stamp-hammer (stamp′ham″ėr), *n.* A direct-acting hammer where the hammer-block is lifted vertically, either by cams or friction-rollers, or, as is more commonly the case, by steam- or water-pressure acting on a piston in a closed cylinder. *Percy.*

stamp-head (stamp′hed), *n.* In a stamp, the rectangular or cylindrical mass of iron at the end of the stamp-stem, which by its weight gives force to the blow. To the lower end of the stamp-head is attached the shoe, a thinner piece of chilled iron or steel, which can easily be replaced, when too much worn for service, without the necessity of replacing the whole stamp-head.

stamping (stam′ping), *n.* [< ME. *stampynge;* verbal n. of *stamp*, *v.*] **1.** The act of pounding, beating, or impressing as with a stamp.—**2.** Something stamped, or made by stamping-machinery.

Groups of U-shaped soft iron *stampings*.
Electrical Rev., XXII. 174.



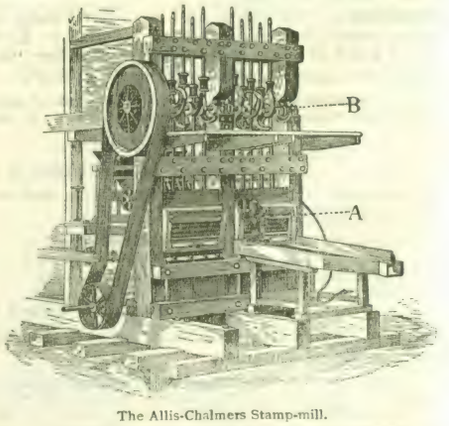
3. Same as *blocking*, 1 (*a*).

stamping-ground (stam′ping-ground), *n.* A place of habitual resort; a customary haunt. [Slang, U. S.]

stamping-machine (stam′ping-ma-shēn″), *n.* A machine for forming articles of hard materials, as metal, whether for the first rough shaping, or for decorative finishing.

stamping-mill (stam′ping-mil), *n.* Same as *stamp-mill*, 1.

stamping-press (stam′ping-pres), *n.* **1.** In *sheet-metal work*, a power-machine for making hollow ware, as pans, bowls, kitchen-utensils, etc. Machines of this class are a development of the earlier stamping-machines, the direct blow or stamp having been replaced in many instances by a continuous pressure. The essential features of the machine are two dies brought one over the other by a direct blow or by pressure. Where a continuous pressure is used by the employment of a screw, cam, toggle-joint, or eccentric, forcing one die slowly upon the other, the sheet of metal is pressed and stretched into shape. The dies are often compound—one part cutting out the blank from the sheet and another part compressing it gradually into shape—or so arranged that one part takes the blank, and holds it firmly by the edges, while a central part stretches it to the required shape. In some forms of these machines a series of dies are used successively, the blanks being pressed in part, then annealed and re-pressed until the final shape is secured. Also called *stamping-machine.*



Die used in a Stamping-press.
a, vertical section of die for forming a spoon; *b*, plan of upper die; *c*, side view of lower die.

2. A small hand-press or seal-press used by public officials and others for impressing stamps upon or affixing them to documents, either in obedience to legal requirement or as a matter of convenience or custom. Compare *seal-press.*—**3.** Same as *blocking-press.* See also *arming-press.*

stamp-machine (stamp′ma-shēn″), *n.* In *paper-manuf.*, a machine for beating rags, etc., into pulp. It consists of a number of rods fixed into a stout oak beam, and working alternately with a set below, the water passing off through an opening covered with a fine sieve. The machine is of German origin, and is used only in small factories.

stamp-mill (stamp′mil), *n.* **1.** In *metal.*, a crushing-mill employing stamps or pestles to crush ores or rock to powder preparatory to treatment for extracting metals. The stamps, which are often of great size and weight, are arranged in a row, and are usually raised by means of wipers and cams on a revolving shaft turned by steam- or water-power. The cams release the stamps in turn, and they fall on the ore placed in chambers below, the sides of these chambers being perforated to allow the escape of the crushed mate-

rial as soon as reduced to the required fineness, while a stream of water sweeps the slimes away as they are produced. Such a row of stamps is also called a *stamp-battery*. In another form of stamp-mill the stamp is placed at the end of the piston-rod of a steam-cylinder, on the principle of the steam-hammer. Also called *stamping-mill*.

2. An oil-mill employing a pestle or pestles to crush seeds and fruits.

stamp-note (stamp'nōt), *n.* In *com.*, a memorandum delivered by a shipper of goods to the searcher, which, when stamped by him, allows the goods to be sent off by lighter to the ship, and is the captain's authority for receiving them on board. *Simmonds.*

stamp-office (stamp'of″is), *n.* An office where government stamps are issued, and stamp-duties and taxes are received.

★**stance** (stans), *n.* [Early mod. E. also *staunce;* < OF. *stance, estance*, a station, situation, condition, also a stanchion, = Pr. *estansa*, station, condition, = Sp. Pg. *estancia*, a dwelling, = It. *stanza*, a station, stanza, etc., < ML. *stantia*, a chamber, a house, lit. a standing, < L. *stan(t-)s*, ppr. of *stare*, stand: see *stand*. Cf. *stanza*.] **1.** A station; a site; an area for building; a position; a stand. [Scotch.]

He fetched a gambol upon one foot, and, turning to the left hand, failed not to carry his body perfectly round, just into its former *stance*.
Urquhart, tr. of Rabelais, i. 35. (*Davies.*)

The boy answered his invitation with the utmost confidence, and danced down from his *stance* with a galliard sort of step. *Scott*, Kenilworth, x.

2†. Space; gap; distance.

Since I can do no better, I will set such a *staunce* between him and Pasiphalo that all this town shall not make them friends.
Gascoigne, tr. of Ariosto's Supposes, ii. 3.

3†. A stave or stanza.

The other voices sung to other music the third *stance*.
Chapman, Mask of Middle Temple and Lincoln's Inn.

stance† (stans), *v. t.* [< *stance, n.*] To station; place.

He ne'er advanc'd from the place he was *stanc'd*.
Battle of Sheriff-Muir (Child's Ballads, VII. 162).

stanch[1], **staunch**[1] (stänch, stänch), *v.* [< ME. *stanchen, staunchen, stawnchen, stonchen*, < OF. *estancher, estanchier, stanchier*, etc., cause to cease flowing, stop, stanch, F. *étancher*, stanch, = Pr. Sp. Pg. *estancar* = It. *stancare* (ML. *stancare*), stanch, < L. *stagnare*, stagnate, cause to cease flowing, make stagnant, ML. also stanch (blood), L. *stagnare*, cease flowing, become stagnant, < *stagnum*, a pool, standing water: see *stagnant, stagnate*. Cf. *stank*[1], *staunch*[2], *stanchion*.] **I.** *trans.* **1.** To cause to cease flowing; check the flow of.

I will *staunche* his floudes, and the great waters shal be restrayned. *Bible of* 1551, Ezek. xxxi.

Over each wound the balm he drew,
And with cobweb lint he *stanched* the blood.
J. R. Drake, Culprit Fay, p. 34.

2. To stop a flow from; dry, as a wound, by the application of a styptic.

Then came the hermit out and bare him in,
There *stanch'd* his wound.
Tennyson, Lancelot and Elaine.

3. To quench; allay; assuage. [Obsolete or archaic.]

Al weere it that a riche coveytos man hadde a ryver fletynge al of gold, yit sholde it never *staunchen* his coveytise. *Chaucer*, Boëthius, iii. meter 3.

Let my tears *stanch* the earth's dry appetite.
Shak., Tit. And., iii. 1. 14.

I *stanch* with ice my burning breast,
With silence balm my whirling brain.
M. Arnold, Saint Brandan.

4†. To free; relieve: with *of*.

Yf two brether be at debate,
Loke nother thou forther in hor hate,
But helpe to *staunche* hom *of* malice.
Babees Book (E. E. T. S.), p. 307.

II. *intrans.* **1.** To stop flowing; be stanched. [Rare.]

Immediately her issue of blood *stanched*. Luke viii. 44.

2†. To stop; cease.

And the wynde *stonchede* and blew no more,
And the meyst trunde into a bryȝt cloude.
Chron. Vilodun., p. 127. (*Halliwell.*)

stanch[1]†, **staunch**[1]† (stänch, stänch), *n.* [< *stanch*[1], *staunch*[1], *v.*] That which stanches; that which quenches or allays.

O frendship, flour of flowers, O liuely sprite of lyfe,
O sacred bond of blissful peace, the stalworth *stanch* of strife.
Poems of Vncertaine Auctors, On Frendship. (*Richardson.*)

stanch[2] (stänch), *n.* [An assibilated form of *stank*[1]; < OF. *estanche*, a pool, fish-pond, etc.: see *stank*[1].] A flood-gate in a river for accumulating a head of water to float boats over shallows; a weir. See *stank*[1]. *E. H. Knight.*

Formerly rivers used to be penned in by a series of *stanches* near shoal places, which held up the water, and, when several boats were collected in the pool above a *stanch*, it was suddenly opened, and the sudden rush of water floated the boats over the shallows below.

stand (stand), *v.*; pret. and pp. *stood*, ppr. ★*standing*. [< ME. *standen, stonden* (pres. ind. 3d pers. *standeth, stondeth*, contr. *stant, stont*, pret. *stood, stod*, pp. *stonden, standen*), < AS. *standan, stondan* (pret. *stōd* (for **stond*), pp. *standen, stonden*) = OS. *standan* = OFries. *stonda* = OHG. *stantan*, MHG. *standen* (rare) = Icel. *standa* = Sw. *stanna, stadna* = Goth. *standan* (pret. *stōth*, pp. *stōthans* for **standans*), stand; a secondary or extended form, Teut. √ *stand* (perhaps orig. based on the orig. ppr., OHG. *stānt-er, stēnt-er*, etc., = L. *stan(t-)s*, standing), parallel with a simpler form, namely, OS. *stān* = OFries. *stān* = MD. *staen*, D. *staan* = MLG. *stān*, LG. *staan* = OHG. MHG. *stān* (also with altered vowel (prob. due to association with the contrasted verb OHG. *gēn*, G. *gehen*, go), OHG. MHG. (and OS.) *stēn*, G. *stehen*) = Sw. *stå* = Dan. *staae*, stand (whence E. dial. *staw*, stand), Teut. √ *stai* (not found in AS., Icel., or Goth., and not found at all in pret. and pp., which are supplied by the pret. and pp. of *standan*, √ *stand*), orig. √ *stā* = L. *stare* (redupl. perf. *steti*, pp. *status*) = Gr. *ἱστάναι*, cause to stand, set up, mid. and pass. *ἵστασθαι*, stand, 2d aor. *στῆναι*, stand, = OBulg. *stati* = Serv. *stati* = Russ. *statĭ*, etc., also OBulg. *stoyati* = Serv. *stayati* = Bohem. *státi* = Russ. *stoyatĭ*, etc. (Slavic √ *sta* and √ *sti*, with numerous derivatives), = Skt. √ *sthā*, stand. By reason of the fundamental nature of the notion 'stand' and its innumerable phases, and of the phonetic stability of the syllable *sta*, this root has produced an immense number of derivatives, which are in E. chiefly from the L. source—namely, from the E., *stand, n., perstand*, etc., *understand, withstand*, etc.; from Scand., *staw*[1]; from the L. (from inf. *stare*), *stable*[1] (with *constable*, etc.), *stable*[2], *stablish, establish, stage, stamen, stamin* (*tamin*, etc.), *stay*[2] (*staid*, etc.), *cost*[2], *rest*[2], *contrast, obstacle, obstetric*, etc.; (from the pp. *status*) *state, estate, status, station, statist, statue, statute, armistice, interstice, solstice*, etc.; *constitute, substitute*, etc., *superstition;* (from the ppr. *stan(t-)s*) *stance, stanchion, stanza, circumstance, constant, distant, extant, substantive*, etc.; (from *sistere*, causal of *stare*) *sist, assist, consist, desist, exist, insist, persist, subsist*, etc.; while from various derivatives or extensions of the L. √ *sta* are ult. E. *stagnate, stanch, stank*[1], *tank, stank*[2], *stolid, sterile, destine, obstinate*, etc.; from the Gr., *stasis, static, apostate, ecstasy, metastasis, system, epistle, apostle*, etc. To the same ult. √ *sta*, Teut. or other, may be referred, with more or less plausibility, many E. words having a root or base appar. extended from *sta*, namely (< √ *stap* or *staf*), *staff, stave, stem*[1], *stem*[2], *step, stope, stoop*[3], *stamp, stub, stump, stiff, stifle;* (< √ *stal*) *stall*[1], *stale*[2], *steal*[2], *stalk*[2], *stell, still*[1], *stilt, stool, stout*, etc.; (< √ *stam*) *stammer, stumble, stem*[3]; (< √ *stad*) *stead, stud*[1], *steed, stithy, stathe*, etc.; and see also *standard, stare*[1], *steer*[1], *steer*[2], *stud*[2], *steel, stow, store*[3], *story*[2], etc. The list, however, is elastic, and may be indefinitely increased or diminished. See the words mentioned. The L. verb has also passed into Sp. Pg. as the substantive verb *estar*, be.] **I.** *intrans.* **1.** To be upright; be set upright; take or maintain an upright position. A *stand* between them supported a second candle.
Charlotte Brontë, Jane Eyre, xxviii.

(*b*) A stall for the sale of goods; any erection or station where business is carried on: as, a fruit-*stand*; a news-*stand*; a carriage-*stand*.

The Chief of Police [of Racine, Wisconsin], acting under instructions from the Mayor, has notified the proprietors of every cigar-store, soda-fountain, ice-cream *stand*, and confectionery shop to close on Sunday.
New York Evening Post, June 28, 1889.

(*c*) A rack, as for umbrellas and canes. (*d*) In museums, the support for a mounted specimen of natural history; especially, a perch for mounted birds, consisting of an upright and cross-bar of turned wood, usually painted or varnished. Stands are also made in many ways, in imitation of natural objects upon which birds perch or rest. Stands for mammals are usually flat boards of suitable size, rectangular or oval, and with turned border. (*e*) In a microscope, the frame or support which holds the essential parts of the instrument as well as the object under examination. It includes the tube with the coarse and fine adjustments, the stage and its accessories, the mirror, etc. See *microscope*. (*f*) In *printing*, same as *composing-stand*. 2. In *mining*, a place underground for water to stand or accumulate in; a lodge or sump.

standard¹ (stan′därd), *n.* [Early mod. E. also *standerd*; < ME. *standard*, *standerd*, *stondard*, < late AS. *standard* (= MD. *standaerd*, D. *standaard* = MLG. *stanthart*, LG. *standare* = MHG. *standert*, *stanthart*, G. *standarte* (perhaps < It.) = Sw. *standar* = Dan. *standart*), < OF. *estandart*, *estendard*, an ensign, standard, a point of rallying, F. *étendard*, an ensign, standard, flag, = Pr. *estandard*, *estandart* = Sp. *estandarte* = It. *stendardo*, an ensign, standard (cf. OF. *estandal*, *estandeille*, *standale* = It. *stendale*, an ensign); ML. *standardum*, an ensign, standard (cf. *standardus*, a stronghold, a receptacle of water): (*a*) either < OHG. *stantan* (MHG. *standen*), stand, = E. *stand*, etc., + *-art*, or (*b*) < ML. **stendere* (It. *stendere* = OF. *estendre*, etc.), < L. *extendere*, spread out, extend: see *extend*. The connection with *stand* is certain in the other uses: see *standard*², *standard*³.] **1.** *Milit.*, a distinctive flag; an ensign. Specifically—(*a*) The principal ensign of an army, of a military organization such as a legion, or of a military chieftain of high rank. In this sense it may be either a flag or a solid object carried on a pole, as the Roman eagle, or the dragon shown in the Bayeux Tapestry, or a combination of a flag with such an object. (*b*) A large flag, long in the fly in proportion to its hoist, carried before princes and nobles of high rank, especially when in military command or on occasions of ceremony. A standard of Edward III. was shaped like a long pennon, swallow-tailed, and bearing the royal arms at the hoist, the rest of the pennon being covered with fleurs-de-lis and lions semé. A standard of the Earl of Warwick, carried during the Wars of the Roses, had a cross of St. George, with the rest of the flag covered with small copies of the badge of the Nevilles, a bear and ragged staff. At the present time the word is used loosely. The so-called royal standard of Great Britain, though a standard in function, is properly a banner in form. The flags of the British cavalry regiments are called *standards*, to distinguish them from the *colors* of the infantry regiments. In the U. S. army a yellow silk regimental standard bearing the national coat of arms is carried by each cavalry regiment. The regimental standard of the cavalry corresponds to the regimental colors of the foot-troops.

2. In *bot.*, same as *banner*, 5.—**3.** In *ornith.*: (*a*) Same as *vexillum*. (*b*) A feather suggesting a standard by its shape or position. See cuts under *Semioptera* and *standard-bearer*.—**4**†. A standard-bearer; an ensign or ancient. [Rare.]

Shak., Tempest, iii. 2. 18.

★**To slope the standard.** See *slope*.

standard² (stan′därd), *n.* and *a.* [< ME. **standard*, < OF. *estandart*, *estendard*, also (AF.) *estander*, ML. (AL.) *standardum*, standard of weight and measure; appar. a particular use in England of OF. *estandart*, etc., an ensign, standard, as 'that to which one turns,' or, as in *standard*³, 'that which is set up': see *standard*¹, *standard*³.] **I.** *n.* **1.** A weight, measure, or instrument by comparison with which the accuracy of others is determined; especially, an original standard or prototype, one the weight or measure of which is the definition of a unit of weight or measure, so that all standards of the same denomination are copies of it. The only original standards of the United States for customary measures are a troy pound and a yard. At present, the fundamental standards of the United States are a certain meter and a certain kilogram, made of an alloy of iridium and platinum and preserved at the Bureau of Standards at Washington. From these the customary pound or yard is derived. See *pound*, *yard*, *meter*, *kilogram*.

2. In coinage, the proportion of weight of fine metal and alloy established by authority. The standard of gold coins in Great Britain is at present 22 carats—that is, 22 parts of fine gold and 2 of alloy; and the sovereign should weigh 123.274 grains troy. The standard of silver coins is 11 ounces 2 pennyweights of pure silver and 18 pennyweights of alloy, making together 1 pound troy; and the shilling should weigh 87.273 grains. The gold and silver coins in current use in the United States are all of the fineness 900 parts of the precious metal in 1,000, the gold dollar weighing 25.8 grains, and the silver dollar 412.5 grains.

That precise weight and fineness, by law appropriated to the pieces of each denomination, is called the *standard*.
Locke, Considerations concerning Raising [the Value of Money.

3. That which is set up as a unit of reference; a form, type, example, instance, or combination of conditions accepted as correct and perfect, and hence as a basis of comparison; a criterion established by custom, public opinion, or general consent; a model.

I know less geography than a schoolboy of six weeks' *standing*. *Lamb*, Old and New Schoolmaster.

3. A standing-place; a position or post; a stand.

You, sirrah, get a *standing* for your mistress,
The best in all the city.
Middleton, Women Beware Women, i. 3.

4. Relative position; degree; rank; consideration; social, professional, or commercial reputation; specifically, high rank: as, a member in full *standing* (of a church, society, club, or other organization); a committee composed of men of good *standing*.

Of all the causes which contribute to form the character of a people, those by which power, influence, and *standing* in the government are most certainly and readily obtained are by far the most powerful.
Calhoun, Works, I. 50.

standing (stan′ding), *p. a.* 1. Having an erect position; upright; perpendicular; hence, rising or raised; high.

Look how you see a field of *standing* corn, . . .
Rising in waves, how it doth come and go
Forward and backward. *Drayton*, Battle of Agincourt.

Wear *standing* collars, were they made of tin!
O. W. Holmes, Urania.

2. Involving the attitude or position of one who stands; performed while standing: as, a *standing* jump.

Wide was spread
That war and various; sometimes on firm ground
A *standing* fight; then, soaring on main wing,
Tormented all the air. *Milton*, P. L., vi. 243.

3. Remaining at rest; motionless; inactive; specifically, of water, stagnant.

And thoughe so be it is called a see, in very dede it is but a *stondynge* water.
Sir R. Guylforde, Pylgrymage, p. 49.

The Garigliano had converted the whole country into a mere quagmire, or rather *standing* pool.
Prescott, Ferd. and Isa., ii. 14.

4. Permanent; lasting; fixed; not transient, transitory, or occasional: as, a *standing* rule; a *standing* order.

A *standing* evidence of the care that was had in those times to prevent the growth of errours.

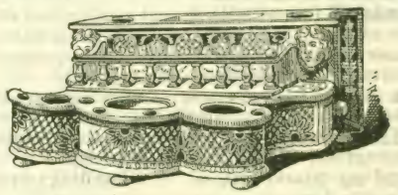
Tylor.*—**Standing table,** a permanent table, fixed in its place, or of such size and solidity that it cannot easily be moved, as the table for meals in the old English hall.

standing-cypress (stan′ding-sī″pres), *n.* A common biennial garden-flower, *Gilia coronopifolia*, native in the southern United States. In its tubular scarlet flowers and finely dissected leaves it resembles the cypress-vine; but it is of an erect wand-like habit.

standing-ground (stan′ding-ground), *n.* Place or ground on which to stand; especially, that on which one rests, in a figurative sense; a basis of operations or of argument; a fundamental principle. *W. Wilson*, The State, § 204.



standing-press (stan′ding-pres), *n.* See *press*[1].

standing-room (stan′ding-röm), *n.* Space sufficient only for standing, as in a theater where all the seats have been taken.

standing-stool (stan′ding-stöl), *n.* A small frame or machine moving on wheels, used to support a child when learning to walk.

The elf dares peep abroad, the pretty foole
Can wag without a truckling *standing-stoole*.
Fletcher, Poems, p. 130. (*Halliwell.*)

standish (stan′dish), *n.* [A reduction of **stand-dish*, < *stand* + *dish*.] An inkstand; also, a case for writing-materials.

Standish of Decorated Pottery, 18th century.
(From "L'Art pour Tous.")

In which agonie tormenting my selfe a long time, I grew by degrees to a milde dis-content; and, pausing a while ouer my *standish*, I resolued in verse to paynt forth my passion. *Nashe*, Pierce Penilesse, p. 5.

Here is another letter of Niccolini that has lain in my *standish* this fortnight. *Walpole*, Letters, II. 75.

stand-off (stand′ôf), *n.* [< *stand off:* see *stand*, *v.*] A holding or keeping off; a counteraction. [Colloq.]

The preferences of other clients, perhaps equal in number and value, who are fighting with Fabian tactics, make a complete *stand-off*. *The Atlantic*, LXVI. 672.

stand-off (stand′ôf), *a.* [< *stand off:* see *stand*, *v.*] Holding others off; distant; reserved. [Colloq.]

You always talk . . . as if there were no one but Catherine. People generally like the other two much better. Catherine is so *stand-off*.
Mrs. Humphry Ward, Robert Elsmere, i. 2.

stand-offish (stand′ôf″ish), *a.* [< *stand off* + *-ish*.] Same as *stand-off*. [Colloq.]

If the "landed gentry" were *stand-offish*, and . . . did not put themselves out of the way to cultivate Miss Shaldon's acquaintance, that young lady was all the more grateful for their reserve.
F. W. Robinson, Her Face was her Fortune, v.

stand-offishness (stand′ôf″ish-nes), *n.* The character of being repellent; the disposition or tendency to hold others at a distance. [Colloq.]

I told him I did not like this pride and *stand-offishness* between man and man, and added that if a duke were to speak to me I should try to treat him civilly.
D. C. Murray, Weaker Vessel, xxxii.

★**stand-pipe** (stand′pīp), *n.* 1. A vertical pipe erected at a well or reservoir, into which water is forced by mechanical means in order to obtain a head-pressure sufficient to convey it to a distance.—2. A small pipe inserted into an opening in a water-main.—3. An upright gas-pipe connecting the retort and the hydraulic main.—4. In a steam-engine, a boiler supply-pipe elevated enough to cause water to flow into the boiler in spite of the pressure of steam.—5. A pipe on the eduction-pipe of a steam-pump to absorb the concussions due to the pulsation and irregularities caused by the necessary use of bends and changes in the direction of pipes.—6. An upright pipe, open at the top, used in connection with a hot-water heating system to allow room for the expansion of the water when heated; an expansion-tank.—7. A portable pipe used to afford a high head of water at fires. One section of a pipe is secured to trunnions, while other sections are kept in a rack, and attached when required. When the hose is coupled, the long pipe is raised by means of a wheel, and the lower end is connected with the water-supply. Another more recent form is a derrick, elevated by two cylinders and pistons analogous in construction to these parts in a steam-engine; but the pistons are moved by the pressure of carbonic acid gas, generated, immediately as wanted, from the reaction of sulphuric acid upon a solution of sodium bicarbonate in a suitable generator. The pipe is elevated above the derrick by a wire rope, pulleys, and a hand-winch. A movable butt or nozle, which can be inclined to any desired angle up or down, or turned in any direction horizontally, is controlled by a man on the lower platform of the derrick, and a copious stream can thus be poured into or upon the top of a tall building. Also called *water-tower*.

standpoint (stand′point), *n.* [Tr. G. *standpunkt;* as *stand* + *point*[1]: a word objected to by purists.] The point at which one stands; especially, the position from which one's observations are taken and one's opinions formed or delivered; the point of view; the mental situation.

The attraction of different speakers from Sunday to Sunday stimulates thought, each treating his theme from his own *standpoint*. *A. B. Alcott*, Table-Talk, p. 91.

The great snare of the psychologist is the confusion of his own *standpoint* with that of the mental fact about which he is making his report.
W. James, Prin. of Psychol., I. 196.

stand-rest (stand′rest), *n.* A stool, bracket, or the like serving to support a person in an almost upright position, as the miserere in medieval stalls: applied especially to a contrivance like a high stool, but with the top or seat sloping instead of horizontal.

★**standstill** (stand′stil), *n.* and *a.* [< *stand still:* see *stand*, *v.*, and *still*[1], *a.*] **I.** *n.* A halt; a pause; a stop, especially in consequence of obstruction, exhaustion, or perplexity.

In consequence of this fancy the whole business was at a *stand-still*. *Greville*, Memoirs, Nov. 29, 1823.

II. *a.* Deficient in progress or advancement; unprogressive: as, a *standstill* policy.

stand-up (stand′up), *a.* 1. Standing; erect; upright; high.

He was a tall youth now; . . . he wore his tail-coat and his *stand-up* collars, and watched the down on his lip with eager impatience. *George Eliot*, Mill on the Floss, ii. 7.

2. Specifically, in *pugilism*, noting a fair boxing-match, where the combatants stand manfully to each other, without false falls: as, a fair *stand-up* fight.

His face marked with strong manly furrows, records of hard thinking and square *stand-up* fights with life.
O. W. Holmes, Poet at the Breakfast Table, i.

stane (stān), *n.* An obsolete and dialectal (Scotch) form of *stone*.

stane-raw (stān′rȧ), *n.* [Also *staniraw*, *stein-raw*, *staney-rag*, rock-liverwort, appar. < *stane*, stone, + *raw* (origin obscure).] A foliaceous lichen, *Parmelia saxatilis*, used in the Scotch Highlands for dyeing brown; black crottles. [Orkney.]

★**stang**[1] (stang), *n.* [< ME. *stange* (prob. in part < Scand.), < AS. *stæng*, *steng*, *stengc*, a pole, rod, bar, stick, stake, = MD. *stanghe*, D. *stang* = MLG. *stange* = OHG. *stanga*, MHG. *stange*, G. *stange*, a pole, = Icel. *stöng* (*stang-*) = Sw. *stång* = Dan. *stang*, a pole, stang (cf. It. *stanga*, a bar, spar, < G.); < *stingan* (pret. *stang*), pierce, sting: see *sting*[1]. Cf. *stang*[2].] 1. A wooden bar; a pole. [Obsolete or prov. Eng. or Scotch.]

He halchez al hole the haluez to-geder,

Sir Gawayne and the Green Knight (E. E. T. S.), l. 1614.

"Ye strake ower hard, Steenie—I doubt ye foundered the chield." "Ne'er a bit," said Steenie, laughing; "he has braw broad shouthers, and I just took the measure o' them wi' the *stang*." *Scott*, Antiquary, xxvi.

2†. The bar of a door. *Florio.*—3. A rod, pole, or perch used in the measurement of land. *Swift*, Gulliver's Travels, i. 2. [Prov. Eng.]—**Riding the stang**, in Scotland and the north of England, a mode of punishing brutal or unfaithful (or, sometimes, henpecked) husbands, or other offenders, by carrying them mounted on a stang through the town, with an accompaniment of jeers and rough music. The culprits have sometimes suffered by proxy, or, latterly, only in effigy.

stang[1] (stang), *v. t.* [< *stang*[1], *n.*] To cause to ride on a stang.

This Word *Stang*, says Ray, is still used in some Colleges in the University of Cambridge, to *stang* Scholars in Christmass Time being to cause them to ride on a Colt-staff or Pole, for missing of Chapel.
Bourne's Pop. Antiq. (1777), p. 410.

stang[2] (stang), *n.* [< ME. *stange*, a sting; < *sting* (pret. *stang*), sting: see *sting*[1].] 1. A sting. [Obsolete or Scotch.]

Quen the stanged mugt se
The nedder on the tree ther hange,
Thai ware al warisht of their *stange*.
Holy Rood (ed. Morris), p. 117.

My curse upon thy venom'd *stang*,
That shoots my tortured gums alang.
Burns, Address to the Toothache.

2. The weever, a fish. Also *stangster*. [Prov.]

stang[2] (stang), *v.* [< Icel. *stanga*, sting, goad, < *stöng*, a pole, stake: see *stang*[2], *n.*, and cf. *stang*[1].] **I.** *trans.* To sting.

The nedderes that ware fel
Stanged the folk of israel.
Holy Rood (E. E. T. S.), p. 117.

II. *intrans.* 1. To throb with pain; sting. *Halliwell.*—2. To cause a sharp, sudden pain; inflict a sting.

But for how lang the flee may *stang*,
Let inclination law that.
Burns, Jolly Beggars.

[Obsolete or dialectal in all uses.]

stang[3]. An obsolete or dialectal preterit of *sting*[1].

stang[4]†, *n.* An obsolete form of *stank*[1].

Stangeria (stan-jē′ri-ȧ), *n.* [NL. (T. Moore, 1853), named after Dr. *Stanger* of Natal, one of the first to collect specimens of the plant.] A genus of gymnospermous plants, of the family *Cycadaceæ* and tribe *Zamieæ*, made by some a tribe *Stangerieæ*. It is characterized by a strobile with scales imbricated in alternating series, a thick naked napiform caudex, and leaf-segments with a strong midrib and numerous unbranched or forking nerves. There are one or two species, natives of Natal. They are singular plants with the smooth irregular trunk only about a foot high or nearly subterranean, from which rise a few coarse long-stalked pinnate fern-like leaves, inflexed in the bud, the leaflets straight in the bud, linear-lanceolate, scalloped, spiny-toothed or cleft, and traversed by parallel forking veins. The fruit, a thick downy strobile or cone, is borne on a stalk surrounded by circular concave woolly bracts overlapping in two or three ranks. The male plants bear cylindrical cones with numerous stamens on the under side of their compound scales. *S. paradoxa* is called *Hottentot's-head;* small articles, as necklaces and snuff-boxes, are sometimes made from its seeds.

★**stanhope** (stan′hōp), *n.* [From a personal name.] A style of gig. The body is of the same shape as that of the tilbury. It rests upon two half elliptic cross-springs whose ends are suspended from two side-springs. The shafts are supported by iron braces and thimble-posts. The name is also, inaccurately, given to certain styles of automobiles.

Stanhopea (stan-hō′pē-ȧ), *n.* [NL. (Frost, 1829), named after Philip Henry, Earl *Stanhope*, president of the London Medico-botanical Society.] A genus of orchids, of the tribe *Vandeæ*, type of the subtribe *Stanhopieæ*. It is characterized by a loose raceme of a few large flowers with spreading and nearly equal sepals, a thick fleshy lip which is commonly wavy or twisted, a straight erect or incurved column usually prolonged and two-winged above, and pollinia with flattened stalks and scale-shaped glands. The peculiar lip is highly polymorphous and complex, bearing lateral lobes which are often thickened into a solid mass forming a spherical, oblong, or saccate hypochilium, a middle lobe or epichilium which is itself often three-lobed and attached by a distinct joint, and sometimes at its base other appendages, lobes or horns—the metachilium. There are about 20 species, natives of tropical America from Brazil to Mexico. They are epiphytes with very short stems bearing many sheaths and a single large plicate leaf. The stem soon thickens into a fleshy pseudobulb, from the base of which the flower-stem proceeds. The flowers are very remarkable for their structure, size, and rich colorings, usually brown-spotted, yellow, or purple; for their great fragrance, whence the recently introduced perfume called *stanhopea;* and for their growth downward, not upward as in ordinary plants—a habit first discovered by the accidental breaking of a flower-pot in which the blossoms had buried themselves in the earth. They are now cultivated under glass in hard-wood baskets with interstices through which the flowers protrude.

Stanhope lens, press. See *lens*, *press*[1].

stanhoscope (stan′hō-skōp), *n.* [< *Stanho(pe lens)* + Gr. σκοπεῖν, view.] A form of simple magnifying-glass, a modification of the Stanhope lens, in which the surface away from the eye is plane instead of convex.

staniel (stan′yel), *n.* [Also *stanyel*, *stannyel*, also (with the consonant *i* or *y* following *n* assimilated to *n*) *stannel*, formerly *stannell*, or assibilated to *ch*, *stanchel*, *stanchil;* < ME. *staniel*, *stanyel*, earlier **stangelle*, < AS. *stängella*, *stängilla*, a kestrel (erroneously used to gloss L. *pellicanus*) (= G. *steingall*, a staniel), < *stän*, stone, rock, + **gella*, **gilla*, < *gellan*, *gillan*, *giellan*, yell, scream, a secondary form related to *galan*, sing: see *stone* and *yell*, *gale*[1]. The word is thus nearly similar in its second element to *nightingale*[1]. The E. form *stone-gall* is partly from the AS. with the long vowel retained, and partly (as to the 2d element) due to the G. form; the form *standgall*, with the same terminal syllable, simulates *stand*, and the form *standgale* (as if equiv. to *windhover*) is a simulated form, as if < *stand* + *gale*[1].] The kestrel or windhover, *Falco tinnunculus* or *Tinnunculus alaudarius*. See cut under *Tinnunculus*.

Fab. What a dish o' poison has she dressed him!
Sir To. And with what wing the *staniel* checks at it!
Shak., T. N., ii. 5. 124.

stankie (stang′ki), *n.* Same as *stank-hen*. [Scotch.]

stannaburrow (stan′ȧ-bur″ō), *n.* [Prop. *stannerburrow*, < *stanner* + *burrow*[2], 1, 2.] See the quotation (the etymology there suggested is erroneous).

Leaving the stream a little to the right, we shall notice several small heaps of stones placed at intervals along the slope. These little mounds, which are met with in various parts of Dartmoor, are called by the moor-men *stannaburrows*, which name is probably derived from the same root as the word stannary, and they were probably tin bounds set up by the miners.
W. Crossing, Ancient Crosses of Dartmoor, p. 69, quoted [in N. and Q., 7th ser., V. 45.

stannary (stan′ȧ-ri), *a.* and *n.* [Also *stannery;* < ML. *stannaria*, a tin-mine, < L. *stannum*, tin: see *stannum*.] **I.** *a.* Relating to tin, tin-mines, or the working of tin: as, "*stannary* courts," *Blackstone*, Com., III. vi.—**Stannary court**, a court instituted at a very early period in English history for the purpose of regulating the affairs of the tin-mines and tin-miners of Cornwall.

II. *n.*; pl. *stannaries* (-riz). A region or district in which tin is mined: the English form of the Latin *stannaria* (or *stammaria*, as written in a charter of the third year of King John, 1201). The miners themselves were called *stannatores* or (rarely) *stammatores*.

For they wrongfully claim all the County of Devon to be their *Stannary*.
Petition to Parliament, 1 Ed. III., MS. in Rec. Office, [quoted in De La Beche's Geol. Rep. on Cornwall.

If by public laws the mint were ordained to be onely supplied by our *stannaries* how currently would they pass for more precious than silver mines!
Bp. Hall, Select Thoughts, § 17.

stannate (stan′āt), *n.* [< *stann(ic)* + *-ate*[1].] A salt of stannic acid.

stannel (stan′el), *n.* See *staniel*.

stanner (stan′ėr), *n.* [Origin obscure.] A small stone; in the plural, gravel. *Jamieson.* [Scotch.]

stannery[1], *a.* and *n.* See *stannary.*

stannery[2] (stan'ėr-i), *a.* [ME. *stann[e]ry;* < *stanner* + *-y*[1].] Gravelly; stony. *Palladius,* Husbondrie (E. E. T. S.), p. 86. [Obsolete or ★Scotch.]

stannic (stan'ik), *a.* [= F. *stannique;* < L. *stannum,* tin, + *-ic.*] Of or pertaining to tin; procured from tin: specifically applied to those compounds in which tin appears as a quadrivalent atom: as, *stannic* acid, $SnO(OH)_2$, an oxyhydroxid obtained from stannic oxid, which unites with bases to form salts called *stannates.*

stanniferous (sta-nif'e-rus), *a.* [< L. *stannum,* tin, + *ferre* = E. *bear*[1].] Containing or affording tin.

stannine (stan'in), *n.* [< L. *stannum,* tin, + *-ine*[2].] A brittle steel-gray or iron-black ore of tin, of a metallic luster, consisting of the sulphids of tin, copper, and iron, and generally zinc, found in Cornwall; tin pyrites. Also called, from its color, *bell-metal ore.*

stannite (stan'it), *n.* [< L. *stannum,* tin, + *-ite*[2].] Same as *stannine.*

stannotype (stan'ō-tīp), *n.* [< L. *stannum,* tin, + Gr. *τυπος,* type.] In *photog.,* a picture taken on a tin plate; a tin-type or ferrotype. *Imp. Dict.* ★

stannous (stan'us), *a.* [< L. *stannum,* tin, + *-ous.*] Of, pertaining to, or containing tin: specifically applied to those compounds in which tin appears as a bivalent atom: as, *stannous* oxid, or protoxid of tin (SnO).

stannum (stan'um), *n.* [L. *stannum, stagnum,* tin, also an alloy of silver and lead (> It. *stagno* = Sp. *estaño* = Pg. *estanho* = Pr. *estanh* = F. *étain, tain,* tin); perhaps the same as L. *stagnum,* pool, applied to a mass of fluid metal: see *stank*[1], *stagnate.* Cf. Bret. *stean* = Corn. *stean* = W. *ystaen* = Gael. *staoin* = Manx *stainny,* tin (< L. ?): see *tin.*] Tin.

stannyel, *n.* See *staniel.*

stant[1]†. A contracted form of *standeth,* third person singular present indicative of *stand.*

stant[2] (stant), *n.* Same as *stent*[3].

stantion† (stan'shon), *n.* [Appar. a var. of *stanchion.*] Same as *stemson.*

stanza (stan'zä), *n.* [Formerly also *stanzo, stanze* (= Sp. *estancia* = G. *stanze* = F. *stance*), in def. 2; < It. *stanza,* OIt. *stantia,* prop. an abode, lodging, chamber, dwelling, stance, also a stanza (so called from the stop or pause at the end of it), < ML. *stantia,* an abode: see *stance.*] 1. Pl. *stanze* (-ze). In *arch.,* an apartment or division in a building; a room or chamber: as, the *stanze* of Raphael in the Vatican.—2. In *versification,* a series of lines arranged in a fixed order of sequence as regards their length, metrical form, or rimes, and constituting a typical group, or one of a number of similar groups, composing a poem or part of a poem. *Stanza* is often used interchangeably with *strophe*—strophe, however, being used preferably of ancient or quantitative, and stanza of modern or accentual and rimed poetry. In the latter the stanza often consists of lines identical in form throughout, the arrangement of rimes alone defining the group of lines. Such a stanza is not properly a strophe. A couplet is not regarded as a stanza, and a triplet is rarely so designated. Compare *verse.* Abbreviated *st.*

> Horace . . . confines himself strictly to one sort of verse, or *stanza,* in every Ode. *Dryden,* Misc., Pref.

stanzaed (stan'zad), *a.* [< *stanza* + *-ed*[2].] Having stanzas; consisting of stanzas: as, a two-*stanzaed* poem.

stanzaic (stan-zā'ik), *a.* [< *stanza* + *-ic.*] Consisting of or relating to stanzas; arranged as a stanza. *E. C. Stedman,* Vict. Poets, p. 381.

stanzic (stan'zik), *a.* [< *stanz-a* + *-ic.*] Same as *stanzaic. E. Wadham,* Eng. Versification, p. 92.

stanzo† (stan'zō), *n.* An obsolete form of *stanza. Shak.,* As you Like it, ii. 5. 18.

stapet†, *a.* See *stapen.*

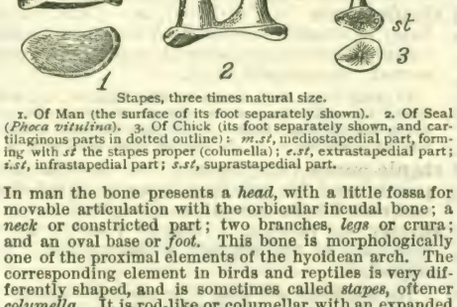
stapedial (stā-pē'di-al), *a.* [< NL. *stapedius* + *-al.*] 1. Stirrup-shaped: as, the *stapedial* bone of the ear.—2. Pertaining to the stapes or its representative, whatever its form.—**Stapedial ligament,** the annular ligament of the stapes, connecting the foot or base of the stirrup with the margin of the fenestra ovalis.—**Stapedial muscle,** the stapedius.—**Stapedial nerve,** a tympanic branch of the facial which innervates the stapedial muscle.

Stapedifera (stap-ē-dif'e-rä), *n. pl.* [NL. (Thacher, 1877), neut. pl. of *stapedifer:* see *stapediferous.*] Those animals which have a stapes, as mammals, birds, reptiles, and amphibians; all vertebrates above fishes.

stapediferous (stap-ē-dif'e-rus), *a.* [< NL. *stapedifer,* < ML. *stapes,* a stirrup, + L. *ferre* = E. *bear*[1].] Having a stapes; of or pertaining to the *Stapedifera.*

stapedius (stā-pē'di-us), *n.*; pl. *stapedii* (-ī). [NL., < ML. *stapes,* a stirrup: see *stapes.*] The stapedial muscle; a muscle of the tympanum actuating the stapes of some animals. In man the stapedius arises from a cavity hollowed out in the pyramid of the petrosal bone; its tendon passes out of a little hole in the apex of the pyramid, and is inserted into the neck of the stapes. Its action draws the head of the stapes backward, and also causes the stapes to rotate a little on a vertical axis drawn through its own center. The name is correlated with *incudius* and *malleus.* See cut under *hyoid.*

Stapelia (stā-pē'li-ä), *n.* [NL. (Linnæus, 1737), named after J. B. van *Stapel,* a Dutch physician and botanist (died 1636).] A genus of sympetalous plants, of the family *Asclepiadaceæ,* and tribe *Tylophoreæ.* It is characterized by flowers with a wheel-shaped or reflexed corolla without appendages between the five valvate lobes, and with the tube short and broadly bell-shaped or almost wanting, and by a double corona, the outer of five horizontally spreading lobes alternate with the anthers, the inner of five scales produced into erect or arching horns. There are over 70 species, natives of South Africa. Their short fleshy leafless stems are produced into four prominent angles, which are coarsely toothed, sometimes bearing transient rudiments of leaves at the apex of the new growths. Numerous dark tubercles give the stems a grotesque appearance. Some are cultivated under glass for their beautiful and varied flowers, which are commonly very large, some reaching 12 inches (*S. gigantea* sometimes 14 inches) in diameter, of singular structure and often exquisitely marbled or dotted. In other species they are dingy or unattractive, usually coarse, thick, fleshy, and short-lived, and in most species exhale transiently a fetid odor as of carrion, attracting flies, which deposit their eggs upon them in large quantities. Their colors are largely the livid-purple and lurid-reddish, yellow, and brownish hues which are associated with disagreeable odors also in *Rafflesia, Aristolochia, Candorum,* and others of the largest flowers. They are sometimes called *carrion-flowers;* a variety of *S. variegata* is known, from its blotches, as *toad-flower;* and *S. Asterias,* from its spreading narrow-parted corolla, as *starfish-flower.*



Stapelia variegata.

Stapelieæ (stap-ē-li'ē-ē), *n. pl.* [NL. (Endlicher, 1836), < *Stapelia* + *-eæ.*] A tribe of dicotyledonous sympetalous plants, of the family *Asclepiadaceæ,* based on the genus *Stapelia.* In the system of Bentham and Hooker it includes 16 genera. In that of Engler and Prantl it is not recognized, and the genera are placed in the much larger tribe *Tylophoreæ.* They commonly have short, thick, fleshy stems, coarsely angled or tubercled, without leaves except in the genus *Frerea.* One genus, *Boucerosia,* which Schumann makes a section of *Coralluma,* extends into Europe in Spain and Sicily; the others are mostly South African.

stapen†, **stapet**, *a.* Stepped; advanced. *Chaucer,* Merchant's Tale, l. 270. ★

stapes (stā'pēz), *n.* [NL., < ML. *stapes,* a stirrup, < OHG. *stapf, staph* = D. *stap,* etc., a step: see *step,* and cf. *staffier.*] In *zoöl.* and *anat.,* the inmost one of the three auditory ossicles of man and other mammals, situated in the tympanum, or middle ear. The stapes is connected on the one hand with the incus, and on the other with the fenestra ovalis, and is moved by a small muscle called the *stapedius.* The name is derived from the close resemblance in shape of the human stapes to a stirrup.

Stapes, three times natural size.

1. Of Man (the surface of its foot separately shown). 2. Of Seal (*Phoca vitulina*). 3. Of Chick (its foot separately shown, and cartilaginous parts in dotted outline): *m.st,* mediostapedial part, forming with *st* the stapes proper (columella); *e.st,* extrastapedial part; *i.st,* infrastapedial part; *s.st,* suprastapedial part.

In man the bone presents a *head,* with a little fossa for movable articulation with the orbicular incudal bone; a *neck* or constricted part; two branches, *legs* or crura; and an oval base or *foot.* This bone is morphologically one of the proximal elements of the hyoidean arch. The corresponding element in birds and reptiles is very differently shaped, and is sometimes called *stapes,* oftener *columella.* It is rod-like or columellar, with an expanded base fitting the fenestra ovalis, the other end usually showing a cross-bar. Parts of such a stapes are distinguished as *mediostapedial,* the main shaft; *extrastapedial,* the part beyond the cross-bar; *infrastapedial,* the lower arm of the cross-bar; and *suprastapedial,* the upper arm of the cross-bar—the last being supposed to represent the incus of mammals. Some of these parts may be wanting, or only represented by a ligament, or coalesced with a part of the mandibular arch. The stapes or columella furnishes the primitive actual or virtual connection of the hyoidean arch with the periotic capsule. See *stapedial, columella,* 3 (*b*), and cuts under *hyoid, Pythonidæ,* and *tympanic.*—**Annular ligament of the stapes.** See *ligament* and *stapedial.*

Staphisagria (staf-i-sag'ri-ä), *n.* [NL. (Tragus, 1546), < ML. *staphisagria, staphysagria, stafisagria,* etc.; prop. two words, *staphis agria,* < Gr. as if **σταφις ἀγρία*: *σταφίς,* a dried grape, a raisin, also (in L. *staphis*) the plant stavesacre; *ἀγρία,* fem. of *ἄγριος,* wild, < *ἀγρός,* a field, the country. The E. form of the name is *stavesacre,* q. v.] An old name for certain species of *Delphinium,* especially *D. Staphisagria,* the stavesacre, now classed as a section, and as such distinguished by a short spur, from three to five ovaries forming bladdery few-seeded capsules, and biennial habit. See *Delphinium* and *stavesacre,* also *ointment of stavesacre* (under *ointment*).

staphisagric (staf-i-sag'rik), *a.* [< *Staphisagria* + *-ic.*] Contained in or derived from *Staphisagria. Encyc. Dict.*

staphisagrine (staf-i-sag'rin), *n.* [< *Staphisagria* + *-ine*[2].] A name formerly given to an amorphous mixture of alkaloids obtained from *Delphinium Staphisagria,* or stavesacre.

staphyle (staf'i-lē), *n.* [NL., < Gr. *σταφυλή,* a bunch of grapes, also the uvula when swollen.] The uvula.

Staphylea (staf-i-lē'ä), *n.* [NL. (Linnæus, 1753), abridged from *Staphylodendron* (Tournefort, 1700), < L. *staphylodendron,* a shrub thought to have been *S. pinnata;* prob. so named from its clustered fruit, < Gr. *σταφυλή,* a bunch of grapes, + *δένδρον,* a tree.] A genus of dicotyledonous choripetalous plants, type of the family *Staphyleaceæ.* It is characterized by an ovary which is two- or three-parted to the base, contains numerous biseriate ovules, and ripens into an inflated and bladdery membranous capsule, discharging its few seeds at the apex of the two or three lobes. There are 7 species, natives of the north temperate regions of both hemispheres. They are shrubs with numerous roundish branches, bearing opposite stipulate leaves, each composed of from three to five leaflets, which are involute in the bud and are furnished with stipels. The white flowers, with five erect petals, hang from nodding panicles or racemes. The large and peculiar fruit is the source of the common name *bladder-nut.* (See cut under *nectary,* 1.) *S. pinnata,* also called *bag-nut,* common in hedgerows and thickets in Europe, bears hard smooth nuts sometimes used for rosaries.

Staphyleaceæ (staf-i-lē-ā'sē-ē), *n. pl.* [NL. (A. P. de Candolle, 1825), < *Staphylea* + *-aceæ.*] A family of dicotyledonous choripetalous plants, of the order *Sapindales,* long classed as a subfamily of the *Sapindaceæ,* from which it is distinguished by its regular bisexual flowers with the five stamens inserted outside of the base of the disk, by albuminous and sometimes arillate seeds with a straight embryo, and by opposite simple or compound leaves. It includes 22 species, of 6 genera, of which *Staphylea* is the type.

staphyline (staf'i-lin), *a.* [< Gr. *σταφύλινος,* of or pertaining to a bunch of grapes, < *σταφυλή,* a bunch of grapes, also the uvula.] 1. Having the form of a bunch of grapes; botryoidal.—2. Pertaining to the uvula or to the entire palate.—**Staphyline glands,** palatine glands.

staphylinid (staf-i-lin'id), *n.* and *a.* **I.** *n.* A rove-beetle, as a member of the *Staphylinidæ.*

II. *a.* Of or pertaining to the family *Staphylinidæ;* staphylinine.

Staphylinidæ (staf-i-lin'i-dē), *n. pl.* [NL. (Leach, 1817), < *Staphylinus* + *-idæ.*] A large and important family of brachelytrous clavicorn beetles, commonly called *rove-beetles.* They resemble the *Pselaphidæ* in having short elytra, but differ in having the abdomen flexible and consisting of eight ventral segments. The antennæ are generally eleven-jointed, the labial palpi three-jointed, and the maxillary four-jointed. The short truncate elytra usually leave most of the abdomen exposed, and this, when the beetles are disturbed, is turned up over the back, as if the insects were about to sting. A familiar example is the *Ocypus olens,* known as the *cocktail* and *devil's coach-horse.* (See *Goërius,* and cut under *devil.*) Some species discharge an odorous fluid from the tip of the abdomen. The larvæ resemble the adults, and are found under bark, in fungi, decaying plants, and the excrement of animals, in ants' nests, hornets' nests, and the nests of certain birds. It is one of the largest and most wide-spread of the families of *Coleoptera.* About 1,000 species are known in America north of Mexico, and about 5,000 in the whole world. Also *Staphilinides, Staphylini, Staphylinidæ, Staphylinii, Staphylinites.* See cuts under *Homalium* and *rove-beetle.*

staphyliniform (staf-i-lin'i-fôrm), *a.* [< NL. *Staphylinus,* q. v., + L. *forma,* form.] Resembling a rove-beetle; related to the *Staphylinidæ.*

staphylinine (staf-i-lin'in), *a.* Of or pertaining to the *Staphylinidæ.*

Staphylinus (staf-i-lī′nus), *n.* [NL. (Linnæus, 1758), < Gr. *σταφυλῖνος*, a kind of insect, < *σταφυλή*, a bunch of grapes.] The typical genus of the family *Staphylinidæ*, formerly corresponding to that family in a broad sense. Used with various limitations, it is now made type of the restricted family, and characterized by having the maxillary palpi with the fourth joint equal to or longer than the third, the marginal lines of the thorax united near the apex, the ligula emarginate, the middle coxæ slightly separate, and the abdomen narrowed at the tip. The species are numerous, and among them are the largest forms in the family. Twenty-one are known in America north of Mexico, and about 100 in the whole world.

staphylion (stā-fil′i-on), *n.* [NL., < Gr. *σταφύλιον*, dim. of *σταφυλή*, the uvula: see *staphyle*.] The median point of the posterior nasal spine. *Török.*

staphylitis (staf-i-lī′tis), *n.* [< *staphyle*, the uvula, + *-itis*.] Uvulitis.

staphyloma (staf-i-lō′mä), *n.*; pl. *staphylomata* (-ma-tä). [NL., < Gr. *σταφύλωμα*, a defect in the eye, < *σταφυλή*, a bunch of grapes.] A name given to certain local bulgings of the eyeball. —**Staphyloma corneæ**, a protrusion involving more or less of the corneæ, such as may result from preceding ulceration. Also called *anterior staphyloma*.—**Staphyloma corneæ pellucidum**, conical cornea. Also called *staphyloma pellucidum*.—**Staphyloma posticum**, posterior staphyloma; sclerochoroiditis in the back part of the eye, resulting in a thinning of the coats and consequent bulging and progressive myopia.

staphylomatic (staf″i-lō-mat′ik), *a.* [< *staphyloma(t-)* + *-ic*.] Characterized or affected by staphyloma.

staphylomatous (staf-i-lom′a-tus), *a.* [< *staphyloma(t-)* + *-ous*.] Pertaining to or of the nature of staphyloma.

staphyloplasty (staf′i-lō-plas″ti), *n.* [< Gr. *σταφυλή*, the uvula, + *πλάσσειν*, form, shape: see *plastic*.] In *surg.*, an operation for restoring the soft palate when it is defective.

staphylorrhaphy (staf-i-lor′a-fi), *n.* [< Gr. *σταφυλή*, the uvula, + *ῥαφή*, a sewing.] In *surg.*, the plastic operation for cleft palate, consisting in uniting the mucous membrane across the cleft. Also called *cionorrhaphia*, *palatorrhaphy*.

staphylotome (staf′i-lō-tōm), *n.* [< Gr. *σταφυλοτόμον*, a knife for excising the uvula, < *σταφυλή*, the uvula, + *τέμνειν*, *ταμεῖν*, cut.] In *surg.*, a knife for operating upon the uvula or the palate.

staphylotomy (staf-i-lot′ō-mi), *n.* [< Gr. **σταφυλοτομία*, the excision of the uvula, < *σταφυλή*, the uvula, + *-τομία*, < *τέμνειν*, *ταμεῖν*, cut: see *-tomy*.] In *surg.*, amputation of the uvula.

staple[1] (stā′pl), *n.* [< ME. *stapel*, *stapil*, *stapylle*, *stapul*, < AS. *stapel*, *stapol*, *stapul*, a prop, post (= OS. *stapal* = OFries. *stapul*, *stapel* = MD. *stapel*, D. *stapel*, a prop, foot-rest, a seat, pile, heap, = MLG. (*b*) The asterisk (*). See *asterisk*. (*c*) In *pyrotechny*, a small piece of inflammable composition, which burns high in air with a colored flame, and presents the appearance of a star. (*d*) A group of cracks or flaws radiating from a center.

> Three times slipping from the outer edge,
> I bump'd the ice into three several *stars*.
> *Tennyson*, The Epic.

(*e*) A spot of white or light color on the forehead of an animal.

> Onward, caballito mio,
> With the white *star* in thy forehead!
> *Longfellow*, Spanish Student, iii. 6.

(*f*) In *zoöl.*: (1) A star-animal; a starfish, or other echinoderm of obviously radiate figure, as a brittle-star, feather-star, lily-star, sand-star, or sun-star. See the compounds. (2) A stellate sponge-spicule; an aster. (*g*) In a copper-plate or lithographic printing-press, the radial spokes on the roller, which serve as handles. *E. H. Knight.*

4. Figuratively, a person of brilliant or attractive qualities; one who shines preëminently; specifically, the chief and preëminent actor or actress of a dramatic or operatic company.

> Sole *star* of all that place and time,
> I saw him—in his golden prime,
> The Good Haroun Alraschid.
> *Tennyson*, Arabian Nights.

To the naked eye the brighter stars appear to have radiating lines of light; but these are due to imperfections of vision, and are different for different observers. All the fixed stars twinkle (see *twinkling*). In a good telescope on a fine night a star shows a minute round disk surrounded by concentric rings; but these phenomena are mere effects of diffraction, and no instrument yet constructed can enable the eye to detect a fixed star's real breadth. The stars differ in brilliancy, and in this respect are said to have different magnitudes (see *magnitude,* 5). These in many cases are changeable (see *variable star*). The number of stars in the whole heavens brighter than a given magnitude m may be calculated (for stars above the 11th magnitude) by the formula $(3.3)^{1.05+m}$. The stars are very irregularly distributed in the heavens, being greatly concentrated toward the Milky Way. This is particularly true of first-magnitude stars, and again of telescopic stars. There are many clusters of stars, among which the Pleiades, the Hyades, Præsepe, Coma Berenices, and the cluster in the sword-handle of Perseus are visible to the naked eye. Other stars are associated in systems of two, three, or more. (See *multiple star.*) To most eyes the stars appear yellow, but some are relatively pale, others chromatic yellow, and still others ruddy. There are many ruddy stars in the part of the Galaxy near Lyra. L. M. Rutherfurd of New York first showed that in reference to their spectral lines the fixed stars fall under several distinct types. Type I, according to Secchi's nomenclature, embraces spectra showing strong hydrogen-lines, all others being very faint. These belong without exception to white stars, such as Sirius, Vega, Procyon, Altair, Spica, Fomalhaut, Regulus, Castor. Type II embraces spectra showing many strong metallic lines, like the sun. Almost all such stars are chrome, as Capella and Pollux; but a few are pale, as Deneb and Elwaid, and a few ruddy like Arcturus and Aldebaran. Type III consists of banded spectra, the bands shading away toward the red. These stars are all ruddy, and probably all variable. They embrace Betelgeuze, Antares, Mira Ceti, Sheat, Menkar, Pishpai, Rasalgethi. Type IV consists of spectra having three broad bands shaded away toward the blue end. These all belong to very ruddy stars, of which none are bright, and none seem to be variable. Type V consists of spectra showing bright lines. Such stars are few; their magnitudes and colors are variable. Upon careful comparison of the spectra of stars with those of the chemical elements they contain, it is found that the lines are shifted a little along the spectrum toward one end or the other, according as the star is receding from or approaching the earth. The apparent places of the fixed stars are affected in recognized ways by diurnal motion, precession, nutation, aberration, and refraction. In addition, each star has a very slow motion of its own, called its *proper motion.* There are very few cases in which this is so great as to have carried the star over the breadth of the moon's disk since the beginning of the Christian era. Many stars in one neighborhood of the heavens show, in many cases, like proper motions—a phenomenon first remarked by R. A. Proctor, and termed by him *star-drift.* But the average proper motion of the stars is away from a radiant under the left hand of Hercules, showing that the solar system has a relative motion toward that point. This is sufficient to carry a sixth-magnitude star 4.″4 in a century. The parallax (that is to say, the amount by which the angle at the earth between the star and the sun falls short of 90° when the angle at the sun between the star and the earth is equal to 90°) has been measured only for a few stars, and these few have been selected with a view of finding the largest parallaxes. That of α Centauri, which is the largest, is nearly ¾ sec. of arc. It is so difficult to measure parallax otherwise than relatively, and to free its absolute amount from variations of latitude, diurnal nutation, refraction, etc., that very little can be said to be known of the smaller parallaxes. It appears, however, that some small stars have nearly as great parallaxes as bright ones whose proper motions are not large. The various methods of ascertaining the distances of the stars depend upon two independent principles. The first method is from the parallax, by means of which the distance of the star is calculated by trigonometry. The second method depends on the ascertaining of the speed at which a double star is really moving by the shifting of the spectral lines, and then observing its angular motion. In such a case, its motion in the line of sight at elongation can be measured with the spectroscope; and from this, its orbit being known, its rate of motion at conjunction can be deduced. All these methods show that even the nearest stars are hundreds of thousands of times as remote as the sun. In order to reach more exact results it may be necessary to combine two methods so as to determine and eliminate the constant of space, or the amount by which the sum of the angles of a triangle of unit area may differ from two right angles. For the present, no decisive result has been reached. The distances of stars having been ascertained, the weights of double stars may be deduced from their elongations and periods. These weights seem to be of the same order of magnitude as that of the sun, not enormously greater or smaller.—**French stars,** three asterisks arranged in this form ***, used as a mark of division between different articles in print.—**Gloaming star,** the evening star. Compare *evening star.*—**Multiple star,** a group of two to six fixed stars within a circle of 15″ radius; in a few cases, however, stars distant a minute or more from one another are considered to form a double star. Thus, ε and 5 Lyræ, distant from one another upward of 3′, and separable by the naked eye, each of these consisting of two components distant about 3½″ from one another, with some other stars between them, are sometimes called collectively a *multiple star.* The multiple stars are distinguished as *double* [tr. of Gr. ἀστὴρ διπλοῦς], *triple, quadruple, quintuple,* and *sextuple.* Some of the double stars are merely the one in range of the other, without having any physical connection, and these are called *optical doubles.* The components of other double stars revolve the one round the other, apparently under the influence of gravitation, forming systems known as *binary stars.* The orbits of about forty of these are known. Thus, the two stars of α Centauri, distant from one another by 17.″5, revolve in about 80 years. In many cases the two components of a double star have complementary colors.—**Nebulous star.** See *nebula.*—**North star,** the north polar star. These stars are of six classes. Class I comprises the "new" or temporary stars, about a dozen in number, which have suddenly appeared very bright, in several cases far outshining Sirius, and after a few months have faded almost entirely away. They show bright lines in their spectra, indicating incandescent hydrogen. Such was the star which appeared in 133 B.C. in Scorpio, and led Hipparchus to the study of astronomy, thus inaugurating sound physical science; others appeared in 1572, 1604, and 1901. Class II embraces stars which go through a cycle of changes, more or less regular, in from four to eighteen months, most of them being at least a hundred times as bright at their maxima as at their minima. These stars are for the most part ruddy. Class III embraces irregularly variable stars, without any definite periods, and commonly undergoing very moderate changes. Class IV embraces stars which in a few days, or a month at most, go through changes of one or two magnitudes, sometimes with two maxima and two minima. Class V embraces stars which remain of constant brightness for some time, and then almost suddenly, at regular intervals, are nearly extinguished, afterward as quickly regaining their former brilliancy. There is a sixth numerous class of stars whose variations are irregular.

2. In the game of pool, to buy an additional life or lives. *Encyc. Brit.,* III. 677. [Eng.]—**To star it** (*theat.*), to appear as a star, especially in a provincial tour.

star[2] (stär), *n.* [Also *starr;* Heb. (Chal.) *shetar, shtar,* a writing, deed, or contract, < *shāṭar,* cut in, grave, write.] An ancient name for all deeds, releases, or obligations of the Jews, and also for a schedule or inventory. See *star-chamber.* Also spelled *starr.*

star-animal (stär'an″i-mal), *n.* A radiate, especially a starfish.

star-anise (stär'an″is), *n.* 1. The aromatic fruit of a Chinese shrub or small tree long supposed to be the *Illicium anisatum* of Linnæus, but recently determined to be a distinct species, *I. verum* (named by J. D. Hooker). The fruit is a stellate capsule of commonly eight carpels, each of which contains a single brown shining seed. The seeds contain four per cent. of a volatile oil with the odor and flavor of aniseed, or rather of fennel. Star-anise is used in China as a condiment and spice, and in continental Europe to flavor liquors. Also *Chinese anise.* 2. The tree which yields star-anise.—**Star-anise oil,** the aromatic essential oil of star-anise seed. The commercial anise-oil is chiefly obtained from the star-anise.

Star-apple (*Chrysophyllum Cainito*).
a, the fruit, transverse section.

star-apple (stär'ap″l), *n.* The fruit of the West Indian *Chrysophyllum Cainito,* or the tree which produces it. The fruit is edible and pleasant, of the size of an apple, a berry in structure, having ten or eight cells, which, when cut across before maturity, give the figure of a star. Also called *cainito.*

starbeam (stär'bēm), *n.* A ray of light emitted by a star. *Watts,* Two Happy Rivals. [Rare.]

star-bearer (stär'bār″ėr), *n.* Same as *Bethlehemite,* 3 (*a*).

★ **starch**[2] (stärch), *n.* [< ME. *starche* (= MHG. *sterke*, G. *stärke*), starch; so called from its use in stiffening; < *starch*[1], *a.*, stiff: see *starch*[1], *a.*] 1. A proximate principle of plants, having the formula $C_6H_{10}O_5$, or a multiple of that formula. It is a white opaque glistening powder, odorless, tasteless, and insoluble in cold water, alcohol, or ether. Aqueous solutions containing free iodine impart to starch an intense and very characteristic blue color. It is not crystalline, but occurs naturally in fine granules, which are always made up of fine concentric layers. Recent studies indicate that the starch grain is composed of two crystalloidal substances, *granulose* (α-*amylose*) and *starch cellulose* (*farinose* or β-*amylose*), and a colloidal substance. When heated with water to 50–60° C., starch swells up and forms a paste or jelly. When heated in the dry state to 150–200° C., it is converted into dextrine, a soluble gum-like body much used as a cheap substitute for gum arabic. Heated with dilute mineral acids, or digested with saliva, pancreatic juice, diastase, or certain other enzyms, starch dissolves, and is resolved into a number of products, which are chiefly dextrine, maltose, and glucose — the last two being fermentable sugars. The malting of barley by brewers effects this change in the starch of the grain, and so prepares it for vinous fermentation. Starch is widely distributed, being formed in all vegetable cells containing chloroplastids under the action of sunlight, and deposited in all parts of the plant which serve as a reserve store of plant-food. Hence grains and seeds contain an abundance of it, also numerous tubers and rhizomes, as the potato and the arrowroot, and the stem and pith of many plants, as the sago-plant. The chief commercial sources of supply are wheat, corn, and potatoes. From these it is manufactured on an extensive scale, being used in the arts, for laundry purposes, sizing, finishing calicos, thickening colors and mordants in calico-printing, and for other purposes. Starch forms the greatest part of all farinaceous substances, particularly of wheat-flour.

Cells of Potato (*Solanum tuberosum*) filled with starch-granules; *a*, *a*, granules. (All greatly magnified.)

2. A preparation of commercial starch with boiling (or less frequently cold) water, used in the laundry or factory for stiffening linen or cotton fabrics before ironing. In the sixteenth and seventeenth centuries the starch used for ruffs, cuffs, etc., was frequently colored, yellow being at one time extremely fashionable. Blue starch was affected by the Puritans.

A certaine kinde of liquide matter which they call *starch*, wherein the devill hath willed them to wash and dive their ruffes, which, when they be dry, will then stand stiffe and inflexible about their necks. *Stubbes*, Anat. of Abuses.

3. A stiff, formal manner; starchedness. [Colloq.]

This professor is to give the society their stiffening, and infuse into their manners that beautiful political *starch* which may qualify them for levees, conferences, visits.
Addison, Spectator, No. 305.

star-chamber (stär'chām″bėr), *n.* [Early mod. E. *starre-chamber* (poetically *chamber of starres* (Skelton), late AF. *chambre des estoylles*), < late ME. *sterre-chambre* (Rolls of Parliament, 1450–1460, cited by Oliphant, in "New English," I. 293), also *sterred chamber*, i. e. 'starred chamber' (ML. *camera stellata*); so called because the roof was orig. ornamented with stars, or for some other reason not now definitely known (see the quot. from Minsheu); < *star*[1] + *chamber*. The statement, made doubtfully by Blackstone and more confidently by other writers (as by J. R. Green, "Short Hist. of the Eng. People," p. 115), that the chamber was so called because it was made the depository of Jewish bonds called *stars* or *starrs* (< Heb. *shetar*) rests on no ME. evidence, and is inconsistent with the ME. and ML. forms of the name; it is appar. due to the tendency of some writers to reject etymologies that are obvious, on the unacknowledged ground that being obvious they must be "popular" and therefore erroneous.] 1. [*cap.*] In *Eng. hist.*, a court of civil and criminal jurisdiction at Westminster, constituted in view of offenses and controversies most frequent at the royal court or affecting the interests of the crown, such as maintenance, fraud, libel, conspiracy, riots resulting from faction or oppression, but freely taking jurisdiction of other crimes and misdemeanors also, and administering justice by arbitrary authority instead of according to the common law. Such a jurisdiction was exercised at least as early as the reign of Henry VI., the tribunal then consisting of the Privy Council. A statute of 3 Henry VII. authorized a committee of the council to exercise such a jurisdiction, and this tribunal grew in power (although successive statutes from the time of Edward IV. were enacted to restrain it) until it fell into disuse in the latter part of the reign of Henry VIII. In 31 Henry VIII., c. 8, a statute declared that the king's proclamation should have the force of law, and that offenders might be punished by the ordinary members of the council sitting with certain bishops and judges "in the Sterr Chamber at Westm. or elsewhere." In 1640 the court of Star Chamber was abolished by an act of 16 Charles I., c. 10, reciting that "the reasons and motives inducing the erection and continuance of that court [of Star Chamber] do now cease." As early as the reign of Edward III. a hall in the palace at Westminster, known as the "Chambre des Estoyer" (or "Etoilles"), was occupied by the king's council; and about the reign of Henry VII. appear records of "the Lords sitting in the Star Chamber," or "the Council in the Star Chamber," from which time it seems to have been regarded as the court of the Star Chamber. There is a difference of opinion whether the tribunal sitting under the act of 3 Henry VII. should be deemed the same court or not.

Starre-chamber, Camera stellata, is a Chamber at the one end of Westminster Hall, so called, as Sir Thomas Smith coniectureth, lib. 2. cap. 4, either because it is so full of windowes, or because at the first all the roofe thereof was decked with Images of guilded starres. The latter reason is the likelier, because Anno 25. H[en]. 8. cap. I. it is written the *sterred chamber*. Now it hath the signe of a Starre ouer the doore, as you one way enter therein.
Minsheu (1617).

2. Any tribunal or committee which proceeds by secret, arbitrary, or unfair methods: also used attributively: as, *star-chamber* proceedings; *star-chamber* methods.

starch-cellulose (stärch'sel″ū-lōs), *n.* See *cellulose*[2].

starch-corn† (stärch'kôrn), *n.* Spelt.

starched (stärcht or stär'ched), *p. a.* [< *starch*[2] + *-ed*[2].] 1. Stiffened with starch. — 2†. Stiffened, as with fright; stiff.

Some with black terrors his faint conscience baited,
That wide he star'd, and *starched* hair did stand.
P. Fletcher, Purple Island, vii.

3. Stiff; precise; formal.

Look with a good *starched* face, and ruffle your brow like a new boot. *B. Jonson*, Every Man out of his Humour, i. 1.

starchedly (stär'ched-li), *adv.* Stiffly; as if starched. *Stormonth.*

starchedness (stär'ched-nes), *n.* The state of being starched; stiffness in manners; formality. *L. Addison*, West Barbary, p. 105.

★ **starcher** (stär'chėr), *n.* [< *starch*[2] + *-er*[1].] One who starches, or whose occupation it is to starch: as, a clear-*starcher*. *Heywood*, Fair Maid of the Exchange.

Y-stongen with stiches that *stareth* as siluer.
Piers Plowman's Creed (E. E. T. S.), l. 553.

Her fyrie eyes with furious sparkes did *stare*.
Spenser, F. Q., III. vii. 39.

4. To be unduly conspicuous or prominent, as by excess of color or by ugliness. Compare *staring*, 3.

The homeliness of the sentiment *stares* through the fantastic encumbrance of its fine language, like a clown in one of the new uniforms! *Sheridan*, The Critic, i. 1.

=**Syn. 1.** *Gaze*, *Gape*, *Stare*, *Gloat*. *Gaze* is the only one of these words that may be used in an elevated sense. *Gaze* represents a fixed and prolonged look, with the mind absorbed in that which is looked at. To *gape* is in this connection to look with open mouth, and hence with the bumpkin's idle curiosity, listlessness, or ignorant wonder: one may *gape* at a single thing, or only *gape* about. *Stare* expresses the intent look of surprise, of mental weakness, or of insolence; it implies fixedness, whether momentary or continued. *Gloat* has now almost lost the meaning of looking with the natural eye, and has gone over into the meaning of mental attention; in either sense it means looking with ardor or even rapture, often the delight of possession, as when the miser *gloats* over his wealth.

II. *trans.* To affect or influence in some specified way by staring; look earnestly or fixedly

at; hence, to look at with either a bold or a vacant expression.

I will *stare* him out of his wits.
Shak., M. W. of W., ii. 2. 291.

To stare one in the face, figuratively, to be before one's eyes, or undeniably evident to one.

They *stare you* still *in the face.*
Milton, On Def. of Humb. Remonst.

starfinch (stär′finch), *n.* The redstart, *Ruticilla phœnicura.* See first cut under *redstart.*

starfish (stär′fish), *n.* 1. An echinoderm with five or more arms radiating from a central disk: applied to all the members of the *Asteroidea* and *Ophiuroidea* (see these words). These belong to the phylum *Echinodermata,* which contains also the sea-urchins, holothurians, crinoids, etc., though these are not usually called starfishes. In some of the asteroids or starfishes proper the disk is enlarged so as to take in nearly or quite the whole length of the rays, so that the resulting figure is a pentagon, or even a circle; but in such cases the stellate structure is evident on examination. Such are known as *cushion-stars.* In the ophiurians the reverse extreme occurs, the body being reduced to a small circular central disk, with extremely long slender rays, which in some, as the euryaleans, are branched into several thousand ramifications. (See cut under *basket-fish.*) The commonest type of starfish has five rays; whence such are popularly known as *five-fingered jack* or *fivefingers.* (See cuts under *Asterias* and *Echinaster.*) Those with more than five rays are often called *sun-starfish* or *sun-stars.* (See *Heliaster*, and cuts under *Brisinga* and *Solaster.*) The skin of starfishes is tough and leathery, and usually indurated with calcareous plates, tubercles, spines, etc. It is so brittle that dried starfishes readily break to pieces, sometimes shivering into many fragments. This fragility is at an extreme in the ophiurians, sometimes, on this account, called *brittle-stars.* (See cut under *Astrophyton.*) Lost arms are readily replaced by a new growth, if the body of the starfish is not broken. On the under side of the animal's rays may be observed rows of small holes; these are the ambulacra, through which protrude many small soft, fleshy processes — the pedicels, tube-feet, or ambulacral feet — by means of which the creatures crawl about. The ambulacra converge to a central point on the under side, where is the oral opening or mouth. The animals are extremely voracious, and do great damage to oyster-beds. They abound in all seas at various depths, and some of them are familiar objects on every sea-coast. Some of the free crinoids of stellate figure are included under the name *starfishes,* though they are usually called *lily-stars* or *feather-stars.* Encrinites are fossil starfishes of this kind. (See cuts under *Comatulidæ* and *encrinite.*) Very different as are the appearances superficially presented by a starfish, a sea-urchin, a holothurian, and a crinoid, their fundamental unity of structure may be easily shown. If, for instance, a common five-fingered jack should have its arms bent up over its back till they came to a center opposite the mouth, and then soldered together in that position by plates filling the spaces between the arms, it would make the globular or oblate spheroid figure of a sea-urchin. If a starfish should turn over on its back, and have a stem grow from the center, and then have its arms come together like the petals of a lily, it would represent a crinoid. If, again, the starfish should have its arms reduced to mere rudiments, or to tentacular appendages of an elongated leathery body, it would represent a holothurian, sea-slug, or trepang. These are the principal types of echinoderms — in fact less unlike one another than are the several stages they undergo in development, for which see *Asteroidea, Bipinnaria, Brachiolaria, echinopædium,* and *pluteus.*

Brittle Starfish (*Luidia clathrata*).

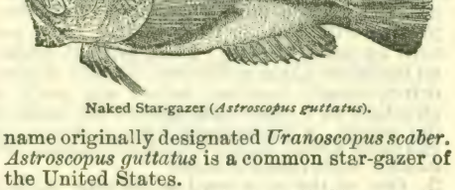
2. The butter-fish or dollar-fish. — 3. In *her.*, a bearing representing a five-pointed star, the rays surrounded by short waving flames or the like, and having a small circle in the center. — **Brittle starfish,** a brittle-star; any ophiurian. — **Cushion starfish,** a cushion-star, as *Ctenodiscus crispatus.* — **Serpent-starfish.** Same as *serpent-star.* — **Starfish-flower.** See *Stapelia.*

star-flower (stär′flou″ėr), *n.* A plant with bright stellate flowers. (*a*) Species of *Trientalis,* especially *T. Americana,* the chickweed-wintergreen. (*b*) Species of the liliaceous genus *Triteleia,* of which *T. uniflora,* a delicately colored free-blooming early flower from Argentina, is the spring star-flower. (*c*) Species of *Sternbergia.* (*d*) Any one of a few other plants with star-like flowers.

star-fort (stär′fōrt), *n.* Same as *star*[1], 6.

star-fruit (stär′frōt), *n.* A smooth tufted water-plant, *Damasonium Alisma,* of southern Europe, northern Africa, and western Asia: so called from the long-pointed radiating carpels. Another name is *thrumwort.*

star-gage (stär′gāj), *n.* See under *gage*[2].



star-gaze (stär′gāz), *v. i.* To gaze at the stars; especially, to make astronomical or astrological observations: used chiefly in the present participle.

Struck dead with ladies' eyes! — I could *star-gaze*

starling[1] (stär'ling), *n.* [< ME. *starling, sterling, sterlynge;* < *stare* (< AS. *stær*), a stare, starling (see *stare*[2]), + *-ling*[1].] 1. An oscine passerine bird, of the family *Sturnidæ* and genus *Sturnus*, as *S. vulgaris* of Europe. The common starling or stare is one of the best-known of British birds. It is 8½ inches long when adult; black, of metallic luster, iridescing dark-green on some parts, and steel-blue, purplish, or violet on others, and variegated nearly throughout with pale-buff or whitish tips of the feathers. The

Common European Starling (*Sturnus vulgaris*).

wings and tail are duller-black, the exposed parts of the feathers frosted or silvered, with velvety-black and buff edgings. The bill is yellowish, and the feet are reddish. Immature, winter, and female birds are less lustrous, and more variegated with the ochery- or tawny-brown, and have the bill dark-colored. Starlings live much about buildings, and nest in holes of walls, crannies of rock, openings in hollow trees, etc. They are sociable and gregarious, sometimes going in large flocks. They are often caged, readily tamed, and may be taught to whistle tunes, and even to articulate words. The name *starling* is extended to all birds of the family *Sturnidæ*, and some others of the sturnoid series; also, erroneously, to the American birds of the family *Icteridæ*, sometimes known collectively as *American starlings*. The last belong to a different series, having only nine primaries, etc. The bird with which the name is specially connected in this sense is *Agelæus phœniceus*, the common marsh-blackbird, often called *red-winged starling*. The name of *meadow-starling* is often applied to *Sturnella magna*. See also cuts under *Agelæinæ* and *meadow-lark*.

Looking up, I saw . . . a *starling* hung in a little cage. "I can't get out—I can't get out," said the *starling*.
Sterne, Sentimental Journey (The Passport).

2. One of a breed of domestic pigeons which in color resemble the starling.—3. Same as *rock-trout*, 2.—**American starlings.** See def. 1.—**Black starling**, a melanistic variety of the common starling.—**Cape starling** or **stare** (Latham, 1783), the black and white Indian starling of Edwards (1751), the contra from Bengal of Albin (1740), *Sturnopastor contra*: so called as erroneously described from the Cape of Good Hope (as l'étourneau du Cap de Bonne Espérance of Brisson, 1760), but found chiefly in India. It is 9 inches long; the ground-color of the plumage is black, much glossed with greenish and bronze tints and varied with white; the bill and a bare space above the eyes are orange.—**Chinese starling** (Edwards, 1743), the so-called crested grackle (Latham, 1783), *Acridotheres cristatellus* of central and southern China, and also the Philippine island Luzon (where it is supposed to have been introduced). It is 10½ inches long; the bill is yellow with rose-colored base; the feet and eyes are orange; the plumage is glossy-black with various sheen, and also varied with white; and the head is crested.—**Cockscomb-starling** or **-stare** (Latham, 1783), a remarkable African and Arabian starling, *Dilophus carunculatus*, having in the adult male the head mostly bare, with two erect caruncles or combs on the crown, and a pendent wattle on each side of the face; the plumage is chiefly isabelline gray, with black wings and tail, the former varied with white.—**Glossy starlings**, various birds, chiefly African, forming a subfamily *Lamprotornithinæ* (or *Juidinæ*) of the family

Glossy Starling (*Spreo bicolor*).

starvation (stär-vā'shọn), *n.* [< *starve* + *-ation.*] The word is noted as one of the first (*flirtation* being another) to be formed directly from a native E. verb with the L. term. *-ation.* It was first used or brought into notice by Henry Dundas, first Viscount Melville (hence called "Starvation Dundas"), in a speech on American affairs, in 1775.] The state of starving or being starved; extreme suffering from cold or hunger; hence, deprivation of any element essential to nutrition or the proper discharge of the bodily functions: often used figuratively of mental or spiritual needs.

Starvation Dundas, whose pious policy suggested that the devil of rebellion could be expelled only by fasting.
Walpole, To Rev. W. Mason, April 25, 1781.

Starvation was an epithet applied to Mr. Dundas, the word being, for the first time, introduced into our language by him, in a speech, in 1775, in an American debate, and thenceforward became a nickname: . . . "I shall not wait for the advent of *starvation* from Edinburgh to settle my judgment." *Mitford*, in Walpole's Letters (ed. Cunningham), VIII. 30, note.

Whether an animal be herbivorous or carnivorous, it begins to starve from the moment its vital food-stuffs consist of pure amyloids, or fats, or any mixture of them. It suffers from what may be called nitrogen *starvation.*
Huxley and Youmans, Physiol., § 170.

S. hist.*, the doctrine that to the separate States of the Union belong all rights and privileges not specially delegated by the Constitution to the general government; the doctrine of strict construction of the Constitution. In this form the doctrine has always been and is still held as one of the distinctive principles of the Democratic party. Before the civil war the more radical believers in the doctrine of States' rights held that the separate States possessed all the powers and rights of sovereignty, and that the Union was only a federation from which each of the States had a right to secede.—**Ecclesiastical state†, free States.** See the adjectives.—**In a state of nature.** See *nature.*—**Intermediate, maritime state.** See the adjectives.—**Middle States.** See *middle.*—**Military state**, that branch of the government of a state or nation by which its military power is exercised, including all who by reason of their service therein are under military authority and regulation.—**Purse of state**, in *her.* See *purse.*—**Reason of state.** See *reason.*—**Slave State.** See *slave*[2].—**Southern States**, the States in the southern part of the United States, generally regarded as the same as the former slave States.—**Sovereign state.** See *sovereign.*—**State of facts**, in *law*, a technical term sometimes used of a written statement of facts in the nature of or a substitute for pleadings, or evidence, or both.—**State of progress.** See *progress.*—**State's evidence.** See *king's evidence*, under *evidence.*—**States of the Church**, or **Papal States**, the former temporal dominions of the Pope. They were principally in central Italy, and extended from about Ravenna and Ancona on the Adriatic to the Mediterranean, including Rome. Their origin dates from a grant made by Pepin the Short in the middle of the eighth century. The territory was greatly reduced in 1860, and the remainder was annexed in 1870 to the kingdom of Italy (with a few small exceptions, including the Vatican and its dependencies).—**The States.** (*a*) The Netherlands. (*b*) The United States of America: as, he has sailed from Liverpool for *the States*. [Great Britain and her colonies.]—**To keep state**, to assume the pomp, dignity, and reserve of a person of high rank or degree; act or conduct one's self with pompous dignity; hence, to be difficult of access.

Seated in thy silver chair,
State in wonted manner *keep*.
B. Jonson, Cynthia's Revels, v. 3.

To lie in state, to be placed on view in some public place, surrounded with ceremonious pomp and solemnity: said of a dead person. =Syn. 1 and 2. See *situation*.

II. *a.* **1.** Of or pertaining to the community or body politic; public: as, *state* affairs; *state* policy; a *state* paper.

To send the *state* prisoners on board of a man of war which lay off Leith. *Macaulay*, Hist. Eng., V. 31.

statically (stat'i-kal-i), *adv.* In a statical manner; according to statics.

Statice (stat'i-sē), *n.* [NL. (Tournefort, 1700), < Gr. *στατική*, an astringent herb, fem. of *στατικός*, causing to stand: see *static.*] 1. A genus of plants, of the family *Plumbaginaceæ*, improperly called *Armeria* by many authors.—2. An untenable name for *Limonium*, a genus of plants of the same family. It is characterized by its acaulescent or tufted herbaceous or somewhat shrubby habit, flat alternate leaves, and commonly cymose inflorescence composed of one-sided spikes. Over 120 species have been described, natives of the sea-shore and of desert sands, mostly of the old world, and of the northern hemisphere, especially of the Mediterranean region. A smaller number occur in America, South Africa, tropical Asia, and Australia. They are usually perennials; a few are diminutive loosely branched shrubs. They are smooth or covered with scurf or dust. The leaves vary from linear to obovate, and from entire to pinnatifid or dissected; they form a rosette at the root, or are crowded or scattered upon the branches. The short-pedicelled corolla consists of five nearly or quite distinct petals with long claws, and is commonly surrounded by a funnel-shaped calyx which is ten-ribbed below, and scarious, plicate, and colored above, but usually of a different color from the corolla, which is often white with a purple or lavender calyx and purplish-brown pedicel. They are known in general as *sea-lavender.* The common European *Limonium Limonium* is also sometimes called *marsh-beet* from its purplish root; it is the *red behen* of the old apothecaries. An American species, *L. Carolinianum*, the marsh-rosemary of the coast from Newfoundland to Texas, is known as *canker-root*, from the use as an astringent of its large bitter fleshy root, which also contains tannic acid (whence its name *ink-root*). The very large roots of *L. latifolium* are used for tanning in Russia and Spain, and those of *L. mucronatum* as a nervine in Morocco under the name of *safrifa*. Other species also form valued remedies, as *L. Brasiliense*, the guaycura of Brazil and southward. Many species are cultivated for their beauty, as *L. latifolium*, and *L. arborescens*, a shrub from the Canaries.

Flowering Plant of *Limonium Carolinianum*.
a, the flower with its bracts.

Staticeæ (stā-tis'ē-ē), *n. pl.* [NL. (Reichenbach, 1828), < *Statice* + *-eæ.*] A tribe of plants, of the family *Plumbaginaceæ*, distinguished from the other tribe (*Plumbagineæ*) by flowers with a commonly spreading, scarious, and colored calyx-border, stamens united to the petals at the base or higher, and styles distinct to the middle or the base. It includes 7 genera, of which *Statice* is the type. They are commonly acaulescent plants, very largely maritime, and of wide distribution.

statics (stat'iks), *n.* [Pl. of *static* (see *-ics*). Cf. F. *statique*, < Gr. *στατική*, the art of weighing, fem. of *στατικός*, causing to stand: see *static.*] That branch of mechanics which treats of the relations of strains and stresses, or of the figures of bodies in equilibrium and of the magnitudes and directions of the pressures.—**Chemical, graphical, social statics.** See the adjectives. ★

station (stā'shon), *n.* [< ME. *stacion*, < OF. *station, stacion, estaçon, estachon, estaisun*, etc., F. *station* = Sp. *estación* = Pg. *estação* = It. *stazione* = D. G. Sw. 6. The condition or position of an animal or a plant in its habitat, or its relation to its environment: often used synonymously with *habitat* (but *habitat* is simply the place where an animal or plant lives, *station* the condition under which it lives there).

The males and females of the same species of butterfly are known in several cases to inhabit different *stations*, the former commonly basking in the sunshine, the latter haunting gloomy forests.
Darwin, Descent of Man, I. 391.

7. In *surv.*: (*a*) The place selected for planting the instrument with which an observation is to be made. (*b*) A fixed uniform distance (usually the length of a chain of 100 feet, or 66 feet, or half the length of a twenty-meter chain) into which a line of survey is divided. The stations are consecutively numbered.—8. A stock-farm. [Australia.]—9. A regular stopping-place. (*a*) One of the stages or regular stopping-places at which pilgrims to Rome or other holy place were wont to stop and rest, as a church or the tomb of a martyr. (*b*) One of the places at which ecclesiastical processions pause for the performance of an act of devotion, as a church, the tomb of a martyr, or some similar sacred spot. Hence—(*c*) The religious procession to and from or the service of devotion at these places. (*d*) One of the representations of the successive stages of Christ's passion which are often placed round the naves of churches, and by the sides of the way leading to sacred edifices, and which are visited in rotation. (*e*) In the *early church*, the place appointed at church for each class of worshipers, more especially for each grade of penitents; hence, the status, condition, or class so indicated. (*f*) A place where railway-trains regularly stop for the taking on of passengers or freight; hence, the buildings erected at such a place for railway business; a depot.

10. *Eccles.*: (*a*) In the *early church*, an assembly of the faithful in the church, especially for the celebration of the eucharist. (*b*) The fast and service on Wednesday and Friday (except between Easter and Pentecost), in memory of the council which condemned Christ, and of his passion. These are still maintained by the Greek Church, but the fast of Wednesday in the Western Church has been abrogated. (*c*) Among Roman Catholics, a church where indulgences are to be obtained on certain days.—11. Situation; position.

The head has the most beautiful appearance, as well as the highest *station*, in a human figure.
Addison, Spectator, No. 98.

12. Status; rank; standing; specifically, rank or standing in life; social state or position; condition of life; hence, high rank or standing.

statistical (stā-tis'ti-kal), *a.* [< *statistic* + *-al*.] Of or pertaining to statistics; consisting of facts and calculations or such matters: as, *statistical* tables; *statistical* information.—**Primary statistical number**, the number of a class ascertained by direct counting.—**Statistical inference**. See *inference*.—**Statistical method**, a scientific method in which results are deduced from averages as data. Political economy, the kinetic theory of gases, and Darwinian evolutionism persue statistical methods, which are also now applied to psychology.—**Statistical proposition**. See *proposition*.—**Statistical ratio**, the number of one class of things which are found associated upon the average with each one of another class of things: thus, the number of children per family is a *statistical ratio;* so is the average duration of life.

statistically (stā-tis'ti-kal-i), *adv.* In a statistical manner; by the use of statistics; from a statistical point of view.

statistician (stat-is-tish'an), *n.* [= F. *statisticien;* as *statistic* + *-ian*.] One who is versed in or collects statistics.

statistics (stā-tis'tiks), *n.* [Pl. of *statistic* (see *-ics*).] 1. A systematic collection of numbers relating to the enumeration of great classes, or to ratios of quantities connected with such classes, and ascertained by direct enumeration. Thus, a table of the populations of the different States of the American Union is called a *table of statistics;* so is a table showing the percentages of farms in different parts of the country that are mortgaged, provided these percentages have been ascertained from direct sampling, and not calculated by dividing the number of mortgaged farms by the total number of farms.

> The word *statistics*, as the name of a peculiar science, was first engrafted into our language by Sir John Sinclair. It comprehends, according to the practice of the German writers, from whom it was adopted, all those topics of inquiry which interest the statesman.
> *Monthly Rev.*, 1796, App., p. 553 (N. and Q., 6th ser., XI. [404).

2. The study of any subject, especially sociology, by means of extensive enumerations; the science of human society, so far as deduced from enumerations.—**Bureau of Statistics**. > *Rev. T. Adams*, Works, II. 168.

statlicht, *a.* A Middle English form of *stately*.

statoblast (stat'ō-blast), *n.* [< Gr. *στατός*, standing, fixed (see *static*), + *βλαστός*, a bud, germ.] One of the peculiar internal asexual buds developed in the body-cavity of the fresh-water or phylactolæmatous polyzoans, comparable to the gemmules of the fresh-water sponges, and serving for reproduction. These germs of new individuals to be reproduced agamogenetically by internal gemmation are formed in the funiculus or mesentery of the polyzoan; on the death of the parent organism, they are ruptured, and give exit to a young animal essentially like the parent. The fact that statoblasts contain no germinal vesicle, and never exhibit the phenomena of segmentation or yolk-cleavage, is conclusive against their being ova or eggs; and, moreover, an ovary producing ova occurs elsewhere in the same individual that produces statoblasts. Also called *winter bud*. See cut under *Plumatella*.

statoblastic (stat-ō-blas'tik), *a.* [< *statoblast* + *-ic*.] 1. Having the character or nature of a statoblast; of or pertaining to statoblasts: as, *statoblastic* capsules; *statoblastic* reproduction.—2. Giving rise to statoblasts; reproduced by means of statoblasts: as, a *statoblastic* polyzoan.

statocracy (stā-tok'ra-si), *n.* [< *state* + *-ocracy*, after *aristocracy*, etc.] Government or rule by the state alone, uncontrolled by ecclesiastical power.

statoscope (stat'ō-skōp), *n.* [< Gr. *στατός*, standing, fixed (see *static*), + *σκοπεῖν*, view.] A form of aneroid barometer for registering minute variations of atmospheric pressure. It consists of a sensitive metallic diaphragm exposed on the outside to the changes of atmospheric pressure, and connecting on the inside with a closed reservoir of air, of four or five liters capacity, protected from temperature-changes by non-conducting walls filled with felt and wool. Registration is effected by a long index-needle on the cylinder of a chronograph. At the beginning of observation the index is brought to zero of the scale by opening a stop-cock connecting the reservoir with the outside air, and the absolute pressure at the moment is observed with a mercurial barometer. The stop-cock is then closed, and the index-needle shows variations of pressure as small as .01 millimeter of mercury. The total limit of change that can be registered is about 5 millimeters; for pressures beyond this the instrument must be reset.

statosphere (stat'ō-sfēr), *n.* [< Gr. *στατός*, standing, fixed, + *σφαῖρα*, a globe.] The globose, chitinous, spiculiferous envelop of the protoplasm of the winter or resting stage of the fresh-water sponges. *J. A. Ryder.*

statospore (stat'ō-spōr), *n.* [NL., < Gr. *στατός*, standing, fixed, + *σπορά*, seed: see *spore*[2].] In *bot.*, a motionless or resting spore; a hypnospore.

statua† (stat'ū-ä), *n.* [< L. *statua*, an image, a statue: see *statue*.] A statue.

> Even at the base of Pompey's *statua*,

★**status** (stā′tus), *n.* [< L. *status*, standing, position, attitude, state: see *state*.] 1. Standing or position as regards rank or condition.—2. Position of affairs.—3. In *law*, the standing of a person before the law in the class of persons indicated by his or her legal qualities; the relation fixed by law in which a person stands toward others or the state. Different writers vary much in the extent of meaning implied, but in the best usage it includes liberty, citizenship, and marriage, infancy and majority and wardship or tutelage, and mental capacity or incapacity according to legal tests. It is rarely if ever used of any of those relations which are terminable by consent, such as partnership.—**Status quo**, the condition in which (the thing or things were at first or are now). Compare *in statu quo*.

statutable (stat′ū-ta-bl), *a.* [< *statute* + *-able*.] 1. Made, required, or imposed by statute; statutory: as, a *statutable* punishment.—2. Allowed by the rules; standard.

I met with one the other day who was at least three inches above five foot, which you know is the *statutable* measure of that club. *Addison*, Spectator, No. 108.

statutably (stat′ū-ta-bli), *adv.* In a manner agreeable to statute; as required or provided by statute.

★**statute** (stat′ūt), *n.* [< ME. *statut*, < OF. *statut*, *estatut*, *statu*, F. *statut* = Pr. *statut* = Sp. Pg. *estatuto* = It. *statuto*, *statuto* = D. *statuut* = G. Sw. Dan. *statut*, < LL. *statutum*, a statute, prop. neut. of L. *statutus*, pp. of *statuere*, set up, establish: see *stand*.] 1. An ordinance or law; specifically, a law promulgated in writing by a legislative body; an enactment by a legislature; in the United States, an act of Congress or of a State or Territorial legislature passed and promulgated according to constitutional requirements; in Great Britain, an act of Parliament made by the Sovereign by and with the advice of the Lords and Commons. Some early statutes are in the form of charters or ordinances, proceeding from the crown, the consent of the Lords and Commons not being expressed. Statutes are either public or private (in the latter case affecting an individual or a company); but the term is usually restricted to public acts of a general and permanent character. Strictly speaking, an ordinance established by either house of the legislature, or by both, without the assent of the executive, as a resolution, or joint resolution, is not a statute. The word has sometimes, however, been interpreted to include municipal ordinances. See also *act*, *article*, *bill*3, *by-law*, *charter*, *code*, *decree*, *edict*, *law*, *ordinance*, *petition*, *provision*.

Ac whiles Hunger was her maister there wolde none of hem chyde,
Ne stryue ageines his *statut* so sterneliche he loked.
Piers Plowman (B), vi. 321.

The *statutes* of the Lord are right. Ps. xix. 8.

Girded with frumps and curtail gibes, by one who makes sentences by the *Statute*, as if all above three inches long were confiscat. *Milton*, Apology for Smectymnuus.

What are called in England constitutional *statutes*, such as Magna Charta, the Bill of Rights, the Act of Settlement, the Acts of Union with Scotland and Ireland, are merely ordinary laws, which could be repealed by Parliament at any moment in exactly the same way as it can repeal a highway act or lower the duty on tobacco.
J. Bryce, American Commonwealth, I. 237.

2. The act of a corporation or of its founder, intended as a permanent rule or law: as, the *statutes* of a university.—3. In *foreign and civil law*, any particular municipal law or usage, though not resting for its authority on judicial decisions or the practice of nations. *Burrill; Worcester.*—4. A statute-fair. [Prov. Eng.]—**Bloody statute**, an occasional name of the Act of the Six Articles. See *the Six Articles*, under *article*.—**Declaratory statute**. See *declaratory*.—**Directory statute**. See *directory*.—**Enabling statute**, a statute which confers a power upon a person or body that did not previously possess it.—**Enlarging statute**, a statute which increases a power that already existed.—**Equity of a statute**. See *equity*.—**Estate by statute**, more fully **estate by statute merchant**, or **estate by statute staple**, in *Eng. law*, the estate or tenancy which a creditor acquired in the lands of his debtor by their seizure on judgments by confession in forms now obsolete. See *statute merchant* and *statute staple*, below.—**General statute**, a statute which relates directly to the government or the general public interest, or to all the people of the state or of a particular class, condition, or district therein. See *legislation*, also *public statute* and *local statute*.—**Local statute**. See *local legislation*, under *local*.—**Mandatory statute**. See *mandatory*.—**Penal statutes**. See *penal*.—**Private statutes**. (*a*) See *private acts*, under *private*. (*b*) Same as *special statute*.—**Public statutes**. See *public acts*, under *public*.—**Remedial statutes**, statutes the main object of which appears directly beneficent, by supplying some defect in the law or removing inconveniences, as distinguished from those the immediate aspect of which is to impose punishment or penalty, which are called *penal statutes*. Some statutes partake of both characters, for a statute which is penal as against an offender may be remedial as toward those whom it is intended to protect.—**Retroactive statute**. See *retroactive*.—**Special or private statute**, a statute which the courts will not notice unless pleaded and proved like any other fact; also, a particular or peculiar statute: as, there is a *special statute* regulating chattel mortgages on canal-boats.—**Statute against benevolences**, an English statute of 1483–4 (1 Rich. III., c. 2) abolishing the peculiar system of raising money by solicitation, called benevolences, and declaring that such exactions should not be taken for precedent.—**Statute cap**. See *cap*1.—**Statute de Donis**, more fully **Statute de Donis Conditionalibus**, an English statute of 1285 (13 Edw. I., being the Statute of Westminster, ii. c. 1) intended to put an end to the common-law doctrine that under a gift to a man and the heirs of his body he acquired absolute title by having issue, even though none should survive. The act prescribed instead that the condition stated by the giver of reversion in failure of issue should be carried into effect. Also sometimes called *statute of entail*.—**Statute labor**. See *labor*1.—**Statute lace**†. See *lace*.—**Statute law**, a law or rule of action prescribed or enacted by the legislative power, and promulgated and recorded in writing; also, collectively, the enactments of a legislative assembly, in contradistinction to *common law*. See *law*1.—**Statute merchant**, in *law*, a bond of record, now obsolete, acknowledged before the chief magistrate of some trading town, on which, if not paid at the day, an execution might be awarded against the body, lands, and goods of the obligor. See *pocket-judgment*.

A certaine blinde retayler, called the Diuell, vsed to lend money vpon pawnes or anie thing, and would let one for a need haue a thousand poundes vpon a *statute-merchant* of his soule. *Nashe*, Pierce Penilesse, p. 9.

Statute of bread and ale. See *bread*1.—**Statute of charitable uses**, an English statute of 1601 (43 Eliz., c. 4), sometimes called the *statute of Elizabeth*, for the protection of property devoted to charities. It authorized the lord chancellor to appoint commissioners to inquire into the management of such property, with power to correct abuses.—**Statute of Circumspecte Agatis**, an English statute of 1285 (13 Edw. I.), in the form of a writ addressed to the judges: so named from its first two words. It directed that the king's prohibition should not lie in spiritual matters, and that the jurisdiction of the spiritual courts should be exercised in cases of demands by a parson for tithes, mortuaries, pensions, etc., notwithstanding such prohibition.—**Statute of false pretenses**, an English statute of 1757 (30 Geo. II., c. 24) which defines and punishes the crime of false pretenses.—**Statute of fraudulent conveyances**, sometimes called the *statute of Elizabeth*. (*a*) An English statute of 1571 (13 Eliz., c. 5), re-enacted in nearly all of the United States, which declares all conveyances of property with intent to delay, hinder, or defraud creditors to be void as against such creditors. (*b*) An English statute of 1585 (27 Eliz., c. 4) making void all conveyances of land made with intent to deceive purchasers.—**Statute of Gloucester**, an English statute of 1278 (6 Edw. I.), passed at Gloucester, and relating to local franchises and judicature, damages to real property, waste, trespass, etc.—**Statute of laborers**, an English statute of 1349 (23 Edw. III.) designed to compel workmen and servants to work for the wages commonly paid in the year 1346: enacted because the pestilence had seriously decreased the number of servants, and the survivors demanded exorbitant wages.—**Statute of Lincoln**, an English statute of 1315–16 (9 Edw. II., st. 2), so called because the Parliament sat at Lincoln. It prescribed the qualifications of sheriffs. Also known as the *statute of sheriffs*.—**Statute of Marlborough (Marleberge, Marlbridge)**, an English statute of 1267 (52 Hen. III.), so called because made at Marlborough, containing twenty-nine chapters or sections relating principally to distress suits, landlord and tenant, courts, writs, etc. It is one of the earliest written laws, after the Great Charter, and is said to have been intended to defeat attempts to evade feudal dues on succession at death made by gifts inter vivos.—**Statute of merchants** (also known as the *statute of Acton Burnell*, from the place of its enactment). (*a*) An English statute or ordinance of 1283 (11 Edw. I.) for the collection of debts. (*b*) Another of 1285 (13 Edw. I.) for the same purpose.—**Statute of Merton**. Same as *provisions of Merton* (which see, under *provision*).—**Statute of military tenures**. See *military*.—**Statute of monopolies**. Same as *Monopoly Act* (which see, under *monopoly*).—**Statute of Northampton**, an English statute of 1328 (2 Edw. III.) relating to felonies, sheriffs, etc.—**Statute of Quia Emptores**, an English statute of 1289, 1290 (18 Edw. I.), which, because purchasers of land had evaded their feudal dues to the chief lord by claiming to hold under the seller as their lord, provided that upon all sales or feoffments of land in fee simple the feoffee should hold, not of his immediate feoffor, but of the next lord paramount of whom the feoffor himself held, and by the same services, thus putting an end to subinfeudation for several centuries.—**Statute of Rageman**, an English statute of 1276 (4 Edw. I.) requiring justices to "go throughout the land" to try suits for trespasses.—**Statute of Rutland, Ruddlan, or Rothlan**, an English royal ordinance of 1284 (12 Edw. I.), made at Rutland, which, among other things, forbade suits in the Exchequer except such as concerned the king and his officers, and referred to the keeping of the rolls, etc. Also called *provisions made in the Exchequer*.—**Statute of sheriffs**. Same as *statute of Lincoln*.—**Statute of Stamford**, an English statute of 1309 (3 Edw. II.) which confirmed an act of 28 Edw. I. abolishing the taking of goods, etc., by the king when on a journey except upon payment, and also abolished certain customs duties.—**Statute of Winchester or Winton**, an English statute of 1285 (13 Edw. I.) containing police regulations such as concern lesser crimes and the hue and cry, and prohibiting fairs and markets in churchyards.—**Statute of York**, an English statute of 1318 (12 Edw. II.) which relates to the administration of justice.—**Statutes of liveries**, English statutes, the first of which were in 1377 (1 Rich. II., c. 7), 1392–3 (16 Rich. II., c. 4), and 1396–7 (20 Rich. II., cc. 1 and 2), for the better preservation of the peace: so called because directed against the practice of giving distinctive liveries to retainers and partizans, whereby confederacies and hostile parties were engendered.—**Statutes of Westminster**, early English statutes, so called because made at Westminster. "The first" (1275), comprising fifty-one chapters, relates to freedom of elections, amercements, bail, extortion by officers, aid taken by lords, etc. "The second" (1285), including fifty chapters, relates to gifts, writs, pleas, court-proceedings, etc. Also known as *Statute de Donis* (which see, above). "The third" was the statute "Quia Emptores" (which see, above).—**Statute staple**, in *law*, a bond of record, now obsolete, acknowledged before the mayor of the staple or town constituting a grand mart, by virtue of which the creditor might forthwith have execution against the body, lands, and goods of the debtor on non-payment.

There is not one gentleman amongst twenty but his land be engaged in twenty *statutes staple*.
Middleton, Family of Love, i. 3.

The Great Statute, an English code of customs law of 1660 (12 Car. II., c. 4.) imposing duties which were termed the "old subsidy." (As to noted statutes on particular subjects, such as *statute of distributions*, *statute of enrolment*, *statute of fines*, *statute of frauds*, *statutes of jeofail*, *statute of Jewry*, *statute of limitations*, *statutes of mortmain*, *statute of murders*, *statute of non-claim*, *statute of præmunire*, *statute of provisors*, *statute of staple*, *statute of tillage*, *statute of uses*, *statute of wills*, see the word characterizing the statute.) = **Syn. 1.** *Enactment*, *Ordinance*, etc. See *law*1.

His [Edward IV.'s] *statute-roll* contains no acts for securing or increasing public liberties.
Stubbs, Const. Hist., § 373.

statutory (stat′ū-tō-ri), *a.* [< *statute* + *-ory*.] Enacted, required, or imposed by statute; depending on statute for its authority: as, a *statutory* provision or remedy; *statutory* fines.

The first duty of the Muse is to be delightful, and it is an injury done to all of us when we are put in the wrong by a kind of *statutory* affirmation on the part of the critics of something to which our judgment will not consent, and from which our taste revolts.
Lowell, Among my Books, 2d ser., p. 132.

The reduction of the number of public-houses to a *statutory* minimum.
Sir C. W. Dilke, Probs. of Greater Britain, vi. 6.

On the first day of July, 1885, . . . the regular *statutory* duties were imposed. *Harper's Mag.*, LXXVI. 429.

stauraxonia (stâ-rak-sō′ni-ä), *n. pl.* [NL., < Gr. *σταυρός*, a cross, + *ἄξων*, an axis.] In *promorphology*, stauraxonial organic forms, as pyramids. *Stauraxonia homopola* are figures with equal poles, whose stereometric figure is a double pyramid (two pyramids base to base). *Stauraxonia heteropola* are single pyramids with dissimilar, usually anal and oral, poles. When these have regular bases, they are *stauraxonia homostaura;* when irregular, *stauraxonia heterostaura.*

stauraxonial (stâ-rak-sō′ni-al), *a.* [< *stauraxonia* + *-al.*] Having a main axis and a definite number of secondary axes at right angles therewith, so that the stereometric figure is fundamentally a pyramid: correlated with *centraxonial.*

stauri, *n.* Plural of *staurus.*

Stauria (stâ′ri-ä), *n.* [NL. (Edwards and Haime, 1850), < Gr. *σταυρός*, a cross, a stake.] The typical genus of *Stauriidæ*, having a compound astræiform corallum growing by calicular gemmation, four cruciate primitive septa, and no columella.

staurian (stâ′ri-an), *a.* [< *Stauria* + *-an.*] Resembling or related to the genus *Stauria;* of or pertaining to the *Stauriidæ.*

Stauriidæ (stâ-rī′i-dē), *n. pl.* [NL., < *Stauria* + *-idæ.*] A family of fossil rugose corals, typified by the genus *Stauria.* The wall is well developed; the septa are complete, lamellar, and conspicuously tetramerous. The interseptal loculi are crossed by endothecal dissepiments, and there is a central tabulate area. The genera formerly included in this group are now considered heterogeneous and the term is not generally accepted.

staurolite (stâ′rō-līt), *n.* [< Gr. *σταυρός*, a cross, + *λίθος*, a stone.] A silicate of aluminium and iron occurring in reddish- to yellowish-brown or brownish-black prismatic crystals. These crystals are often twins, in the form of a cross, whence it is called *cross-stone.* Also *staurotide, grenatite.*—**Staurolite-slate,** a mica-slate through which are scattered crystals of staurolite. Rocks of this character have been found in Scotland, the Pyrenees, and New England.

staurolitic (stâ-rō-lit′ik), *a.* [< *staurolite* + *-ic.*] Pertaining to, resembling, or characterized by the presence of staurolite.

Stauromedusæ (stâ″rō-mē-dū′sē), *n. pl.* [NL., < Gr. *σταυρός*, a cross, + NL. *Medusæ*, q. v.] In Haeckel's classification, a subfamily of *Scyphomedusæ*, having four pairs of adradial gonads or four simple interradial gonads in the subumbral wall, four large perradial gastral pouches, and no special sense-organs.

stauromedusan (stâ″rō-mē-dū′san), *a.* and *n.* [< *Stauromedusæ* + *-an.*] **I.** *a.* Pertaining to the *Stauromedusæ*, or having their characters.

II. *n.* A member of the *Stauromedusæ.*

Stauropus (stâ′rō-pus), *n.* [NL. (Germar, 1813), < Gr. *σταυρός*, a cross, + *πούς* = E. *foot.*] **1.** A genus of bombycoid moths, of the family *Notodontidæ*, having the thorax woolly, the fore wings rather broad and sinuate on the hind margins, hind wings rounded, tongue weak, and the abdomen slightly tufted above. The larvæ have fourteen legs, and are naked, with humps on the middle segments and two short anal projections; the legs on the third and fourth segments are exceedingly long. When at rest they raise the large head and enlarged anal segments, and it is from their extraordinary appearance that the only European species, *S. fagi*, derives its English name of *lobster-moth.* Its larva is of a brown color, and feeds on oak, birch, beech, and apple. The only other known species is Asiatic.

2. A genus of melandryid beetles, erected by Fairmaire and Germain in 1863 on a single South American species.

stauroscope (stâ′rō-skōp), *n.* [< Gr. *σταυρός*, a cross, + *σκοπεῖν*, view.] An optical instrument, invented by Von Kobell of Munich, for examining sections of crystals, and determining the position in them of the planes of light-vibration.

stauroscopic (stâ-rō-skop′ik), *a.* [< *stauroscope* + *-ic.*] Of, pertaining to, or made by means of the stauroscope: as, *stauroscopic* examination. *Spottiswoode*, Polarisation, p. 113.

stauroscopically (stâ-rō-skop′i-kal-i), *adv.* By means of the stauroscope: as, *stauroscopically* determined systems of crystallization.

staurotide (stâ′rō-tid), *n.* [< Gr. *σταυρός*, a cross, + *-t-* + *-ide*[2].] Same as *staurolite.*

Staurotypidæ (stâ-rō-tip′i-dē), *n. pl.* [NL., < *Staurotypus* + *-idæ.*] A family of tropical American cryptodirous tortoises, represented by the genera *Staurotypus* and *Claudius.* They have nine plastral bones, the carapace with epidermal scutes, the nuchal bone with a short costiform process, and caudal vertebræ procœlous. Also *Staurotypina*, as a group of *Chelydridæ.*

staurotypous (stâ′rō-tī-pus), *a.* [< Gr. *σταυρός*, a cross, + *τύπος*, type.] In *mineral.*, having mackles or spots in the form of a cross.

Staurotypus (stâ-rot′i-pus), *n.* [NL., < Gr. *σταυρός*, a cross, + *τύπος*, type.] A genus of tortoises with a cruciform plastron, typical of the group *Staurotypina* or family *Staurotypidæ.*

staurus (stâ′rus), *n.*; pl. *stauri* (-rī). [NL., < Gr. *σταυρός*, a stake, pile, pale, cross.] A form of sexradiate sponge-spicule, resulting from the suppression of both the distal and the proximal ray. *Sollas.*

★**stave** (stāv), *n.* [< ME. *stæf, staf, stave*, pl. *staves, steves*, < AS. *stæf*, pl. *stafas*, a staff: see *staff.* *Stave* is another form of *staff*, arising from the ME. oblique and plural forms. In the sense of 'stanza' the word is prob. due to the collateral form, Icel. *stef*, a stave, refrain.] **1.** A pole or piece of wood of some length; a staff. Specifically—(*a*) In *cooperage*, one of the thin, narrow pieces of wood, grooved for the bottom, the head, etc., which compose a barrel, cask, tub, or the like. (*b*) One of the boards joined laterally to form a hollow cylinder, a curb for a well or shaft, the curved bed for the intrados of an arch, etc. (*c*) A spar or round of a rack to contain hay in stables for feeding horses; the rung of a ladder; the spoke of a wheel; etc.

The trangression is in the *stealer*.
Shak., Much Ado, ii. 1. 233.

Specifically—2. In *ship-building*, the foremost or aftmost plank in a strake, which is dropped short of the stem or stern-post and butts against a notch or jog in another plank. Also called *stealing-strake*.

When the girth of the ship at the midship section is so much in excess of each or either of those at the extremities as to cause the plates to be very narrow if the same number were retained right fore and aft, it becomes necessary to introduce *stealers*—that is to say, to cause certain plates to stop somewhere between the extremities and midships, and thus reduce the number of strakes which end on the stem and stern post.
Thearle, Naval Arch., § 138.

stealing (stē'ling), *n.* [Verbal n. of *steal*[1], *v.*] 1. The act of one who steals; theft.

Men are apt to condemn whatever they hear called *stealing* as an ill action, disagreeing with the rule of right.
Locke, Human Understanding, II. xxviii. 16.

2. That which is stolen; stolen property: used chiefly in the plural: as, his *stealings* amounted to thousands of dollars.

stealingly (stē'ling-li), *adv.* [< ME. *stelendlich*; < *stealing*, ppr., + *-ly*[2].] By stealing; slyly; secretly. [Rare.]

stealing-strake (stē'ling-strāk), *n.* Same as *stealer*, 2.

stealth (stelth), *n.* [Early mod. E. also *stelth*; < ME. *stelthe*, *stalthe* (= Icel. *stuldr* = Sw. *stöld*), stealth, with abstract formative *-th*, < AS. *stēlan*, steal: see *steal*[1]. Another form, from the Scand., is *stouth*. The older noun was *stale*[1]. Cf. *health*, *heal*[1], *wealth*, *weal*.] 1†. The act of stealing; theft.

Yf that Licurgus should have made it death for the Lacedemonians to steale, they being a people which naturally delighted in *stealth*, . . . there should have bene few Lacedemonians then left. *Spenser*, State of Ireland.

2†. A thing stolen.

On his backe a heavy load he bare
Of nightly *stelths*, and pillage severall.
Spenser, F. Q., I. iii. 16.

3. A secret or clandestine method or proceeding; means secretly employed to gain an object; surreptitious way or manner: used in a good or a bad sense.

Yef it were oon that wolde assay hym-self in eny straunge turnement by *stelthe* vnknowen whan thei were disgised that thei wolde not be knowe till thei hadde renomee of grete prowesse. *Merlin* (E. E. T. S.), iii. 502.

Let humble Allen, with an awkward shame,
Do good by *stealth*, and blush to find it fame.
Pope, Epil. to Satires, i. 136.

4†. A secret going; a stolen or clandestine visit.

I told him of your *stealth* unto this wood.
Shak., M. N. D., iii. 2. 310.

stealthful† (stelth'fûl), *a.* [< *stealth* + *-ful*.] Given to stealth; bent on stealing; stealthy.
Chapman, tr. of Homer's Hymn to Hermes, l. 369.

stealthfully† (stelth'fûl-i), *adv.* By stealing; stealthily.

stealthfulness† (stelth'fûl-nes), *n.* Stealthiness.

stealthily (stel'thi-li), *adv.* In a stealthy manner; by stealth.

stealthiness (stel'thi-nes), *n.* Stealthy character or action.

stealthy (stel'thi), *a.* Acting by stealth; sly; secretive in act or manner; employing concealed methods: as, a *stealthy* foe; characterized by concealment; furtive: as, a *stealthy* proceeding; a *stealthy* movement.

Murder . . . with his *stealthy* pace.
Shak., Macbeth, ii. 1. 54.

Footfalls of *stealthy* men he seemed to hear.
William Morris, Earthly Paradise, III. 321.

See where the *stealthy* panther left his tracks!
O. W. Holmes, A Family Record.

★**steam** (stēm), *n.* [< ME. *steem*, *stem*, < AS. *steám*, vapor, smell, smoke, = Fries. *stoame* = D. *stoom*, steam; origin unknown.] 1. Vapor; a rising vapor; an exhalation.

Fough! what a *steam* of brimstone
Is here! *B. Jonson*, Devil is an Ass, v. 4.

2. Water in a gaseous state; the gas or vapor of water, especially at temperatures above 100° C. It has a specific gravity of .625 as compared with air under the same pressure. It liquefies at 100° C. (212° F.), under a pressure of 14.7 pounds upon a square inch, or the mean pressure of the atmosphere at the sea-level. The temperature at which it liquefies diminishes with the pressure. Steam constantly rises from the surface of liquid water when not obstructed by impervious inclosures or covered by an atmosphere saturated with aqueous vapor. Its total latent heat of vaporization for 1 pound weight under a pressure of 76 centimeters of mercury (or 14.7 pounds to the square inch) is 965.7 British thermal units, or 536.5 calories for each kilogram. Its specific heat under constant pressure is .4805. (*Regnault.*) It is decomposed into oxygen and hydrogen at temperatures between 1,000° and 2,000° C. (*Deville.*) In addition to the surface evaporation of water, the change from the liquid to the gaseous state takes place beneath the surface (the gas escaping with ebullition) whenever the temperature of the liquid is raised without a corresponding increase of pressure upon it. The temperature at which this occurs under any particular pressure is the *boiling-point* for that pressure. The boiling-point of water under the atmospheric pressure at the sea-level is 100° C. or 212° F. Saturated steam has the physical properties common to all gases whose temperatures are near those of their liquefying-points, or the boiling-points of their liquids. Saturated steam when isolated, and superheated at temperatures from 100° to 110° C., and under constant pressure, expands with a given increase of temperature about five times as much as air, and at 186° C. about twice as much as air; and it must be raised to a temperature much higher than this before it will expand uniformly like air. The large quantity of latent heat in steam, its great elasticity, and the ease with which it may be condensed have rendered its use in engines more practicable than that of any other gaseous medium for the generation and application of mechanical power.

3. Water in a visible vesicular condition produced by the condensation of vapor of water in air.—4. Figuratively, force; energy. [Colloq.]

5†. A flame or blaze; a ray of light.

Steem, or lowe of fyre. Flamma. *Prompt. Parv.*, p. 473.

Absolute steam-pressure. See *pressure*.—**Dead steam.** Same as *exhaust-steam*.—**Dry steam**, saturated steam without any admixture of mechanically suspended water.—**High-pressure steam, low-pressure steam.** See *pressure*.—**Live steam**, steam which has performed no work, or only part of its work, or which is or might be available for the performance of work in an engine.—**Saturated steam**, steam in contact with water at the same temperature. In this condition the steam is always at its condensing-point, which is also the boiling-point of the water with which it is in contact. In this it differs from superheated steam of equal tension, which has a temperature higher than its condensing-point at that tension, and higher than the boiling-point of water under the same pressure.—**Specific steam-volume**, in *thermodynamics*, the volume which a unit of weight of steam assumes under specific conditions of temperature and pressure.—**Steam fire-engine.** See *fire-engine*, 2.—**Steam jet-pump.** See *pump*[1].—**Steam vacuum-pump.** See *vacuum-pump*.—**Superheated steam**, steam which at any stated pressure has a higher temperature, and for any particular weight of it a greater volume, than saturated steam (which see, above) at the same pressure. Also called *steam-gas*.—**Total heat of steam.** Same as *steam-heat*, 1.—**Wet steam**, steam holding water mechanically suspended, the water being in the form of spray or vesicles, or both.

steam (stēm), *v.* [Early mod. E. also *steem*; < ME. *stemen*, < AS. *stēman*, *stȳman* (= D. *stoomen*), steam, < *steam*, vapor, steam: see *steam*, *n.*] **I.** *intrans.* 1. To give out steam or vapor; exhale any kind of fume or vapor.

Ye mists, . . . that . . . rise
From hill or *steaming* lake.
Milton, P. L., v. 186.

2. To rise in a vaporous form; pass off in visible vapor.

When the last deadly smoke aloft did *steeme*.
Spenser, F. Q., I. xii. 2.

3. To move or travel by the agency of steam: as, the vessel *steamed* into port.

We *steamed* quietly on, past . . . the crowds of yachts at Ryde, and dropped anchor off Cowes.
Lady Brassey, Voyage of Sunbeam, I. i.

4†. To flame or blaze up.

His eyen steepe and rollyng in his heede,
That *stemede* as a forneys of a leede.
Chaucer, Gen. Prol. to C. T., l. 202.

Stemyn, or lowyn vp. Flammo. *Prompt. Parv.*, p. 473.

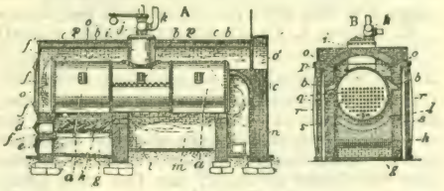
Two *stemynge* eyes. *Wyatt*, Satires, i. 53.

II. *trans.* **1.** To exhale; evaporate. [Rare.]

In slouthfull sleepe his molten hart to *steme*.
Spenser, F. Q., II. vi. 27.

2. To treat with steam; expose to steam; apply steam to for any purpose: as, to *steam* cloth; to *steam* potatoes instead of boiling them; to *steam* food for cattle; *steamed* bread.

steamboat (stēm′bōt), *n.* A vessel propelled by steam-power.



steamboat-bug (stēm′bōt-bug), *n.* A water-beetle of large size, or otherwise conspicuous. [Local, U. S.]

steamboat-coal (stēm′bōt-kōl), *n.* Coal broken small enough to pass between bars set from 6 to 8 inches apart, but too large to pass between bars less than 5 inches apart. This is the variation of size in different collieries in the Pennsylvania anthracite regions, where this size of coal is rarely prepared except to fill special orders, and where alone this term is in use.

steamboating (stēm′bō″ting), *n.* **1.** The business of operating steamboats.—**2.** Undue hurrying and slighting of work. [Colloq.]—**3.** A method of cutting many boards for book-covers at one operation, instead of cutting them singly.

steamboat-rolls (stēm′bōt-rōlz), *n. pl.* The largest rolls used in breaking coal for the market. Also called *crushers* and *crusher-rolls*. See *steamboat-coal*. [Pennsylvania anthracite regions.]

steam-boiler (stēm′boi″lėr), *n.* A receptacle or vessel in which water is heated and boiled to generate steam; particularly, a receptacle or vessel in which the water is confined, or isolated from the external air, in order to generate steam under a pressure equal to or exceeding that of the atmosphere, for the conversion of its expansive force into work in a steam-motor or -engine, or for heating purposes. The kinds of steam-boilers in use are very numerous and may be variously classified. In some the parts are rigidly joined together by rivets, bolts, stays, tubes expanded into heads, etc.; in others the parts are easily detachable one from the other, as in what are known as *sectional boilers*. Another division may be made, with reference to the treatment of the contained water, which in one class of steam-boilers is heated principally in a single mass of considerable cubic capacity, and in another is distributed in small spaces connected with each other and with the steam-space, as in what are known as *sectional safety-boilers*. A third ground of classification is the mode of applying heat. (See *cylindrical steam-boiler*, *return-flue boiler*, *horizontal tubular boiler*, *fire-tube boiler*, etc., below.) Boilers are made of wrought-iron or steel plates and tubes, or of cast-iron, or partly of wrought-iron or steel and of cast-iron. Steel of moderate tensile strength has lately been much used for boilers in which high pressures are maintained; and the present tendency of engineering in power-boilers is toward the use of as high pressures as is compatible with good lubrication, or the use of steam at as high a temperature as can be employed without decomposition of lubricants. Sectional boilers are often made partly or wholly of cast-iron, the sections being bolted or screwed together; and cast-iron is also very largely employed for low-pressure boilers used for steam-heating.—**Circulating steam-boiler**, a compound boiler in which the connected parts are unequally heated, the water rising in the more intensely heated parts, and descending in the cooler parts, to insure a rapid circulation of the water constantly in one direction.—**Compound steam-boiler.** (*a*) A battery of two or more single steam-boilers having their steam- and water-spaces connected, and acting together to supply steam to a heating-apparatus or a steam-engine. (*b*) A single boiler, or a battery of boilers, combined with other apparatus, as a feed-water heater or a superheater, for facilitating the production or for the superheating of steam. (*c*) A sectional boiler.—**Cornish steam-boiler**, the cylindrical flue-boiler invented by Smeaton. See *return-flue steam-boil r*.—**Corrugated furnace steam-boiler**, a boiler in which the plates exposed to the direct radiation from the fire and to the hot gases in the furnace are corrugated to give increased strength and to present a more extended heating-surface to the fire.—**Cylindrical steam-boiler**, a boiler with an exterior cylindrical shell, having flanged heads of much thicker iron fastened to the shell by rivets.—**Fire-tube steam-boiler**, a boiler in which the heat of the furnace is partly or wholly applied to the interior of tubes which pass through the water-space of the boiler.—**Flue steam-boiler**, a general name for all steam-boilers with an internal flue or flues, whether vertical, horizontal, or of other construction.—**Horizontal flue steam-boiler**, a horizontal steam-boiler with one or more flues through its length. (Also called *return-flue boiler*.) If cylindrical also, it is a *horizontal cylindrical flue* or *return-flue boiler*.—**Horizontal steam-boiler**, a steam-boiler in which the flues or tubes are in a horizontal position.—**Horizontal tubular steam-boiler**, a horizontal boiler with fire-tubes, through which the gases of combustion pass in a manner analogous to their passage through flues, for which the tubes are substitutes, presenting a greater extent of heating-surface than can be obtained in the same space by flues, and effectively tying the heads of the boiler together. A modern form of this boiler is shown in the cuts, which also show the method of setting it in brickwork. *a* is the shell; *b*, *b*, saddles for supporting the boiler in the masonry *c*; *d*, the furnace-door; *e*, ash-pit door; *f*, clean-out door in the boiler-front *f′*, by which the tubes are reached for cleaning; *g*, ash-pit; *h*, grate; *i*, steam-dome; *j*, safety-valve; *k*, steam-pipe; *l*, bridge-wall; *m*, combustion-chamber; *n*, back connection for passage of

the gases of combustion into the rear ends of the tubes; *o*, flue in the masonry; *o′*, uptake; *p*, flanged head; *q*, tubes; *r*, side-bars which support the masonry; *s*, dead-air spaces in the masonwork in which the air acts as a heat-insulator. The course of the gases of combustion is indicated by arrows.—**Locomotive steam-boiler**, a tubular boiler which has a contained furnace and ash-pit, and in which the gases of combustion pass from the furnace directly into horizontal interior tubes (instead of passing first under the boiler, as in the horizontal cylindrical tubular boiler), and after passing through the tubes are conveyed directly into the smoke-box at the opposite end of the tubes. The name is derived from the use of such boilers on locomotive engines, but it is typical in its application to all boilers having the construction described, and used for generating steam for stationary or portable engines, as well as for locomotives.—**Marine steam-boiler**, a boiler specially designed and adapted for supplying steam to marine engines. Compactness, as little weight as is consistent with strength, effective steaming capacity, and economy in consumption of fuel are the prime requisites of marine boilers. They are usually tubular, and short in proportion to their width, and have water-legs at the sides and water-spaces below and at the backs of their furnaces—that is, their furnaces are entirely surrounded by water-spaces except at the openings for the doors. Marine boilers are now sometimes used with forced draft—that is, air is forced from the outside into the boiler- or fire-rooms (which are sometimes made air-tight) or immediately into the fires by powerful blowers.—**Return-flue steam-boiler**, a horizontal flue-boiler with one or more interior flues through which the gases of combustion are returned to the front end of the boiler after having passed to the rear from the furnace over the bridge-wall and under the bottom of the shell.—**Rotary tubular steam-boiler.** See *rotary*.—**Sectional saiety steam-boiler**, a sectional boiler in which the water is divided into numerous small masses connected with one another by passages large enough for free circulation from one to the other, but not large enough to permit so sudden a release of pressure, in case of rupture of one of the sections, as to cause an explosion.—**Tubular steam-boiler**, a boiler a prominent feature of which is a series of either fire- or water-tubes.—**Vertical steam-boiler**, a steam-boiler in which the heating-surface of the tubes or flues is in a vertical position. When constructed with fire-tubes, it is called a *vertical tubular boiler*.

steam-box (stēm′boks), *n.* A reservoir for steam above a boiler; a steam-chest.

steam-brake (stēm′brāk), *n.* A brake applied by the action of steam admitted to a steam-cylinder the piston of which is connected by rods to the levers which apply the brake-shoes.

steam-car (stēm′kär), *n.* A car drawn or driven by steam-power; a railway-car. [U. S.]

steam-carriage (stēm′kar″āj), *n.* A road-carriage driven by steam-power.

steam-case (stēm′kās), *n.* Same as *steam-chest*.

steam-chamber (stēm′chām″bėr), *n.* **1.** A box or chamber in which articles are placed to be steamed.—**2.** A steam-chest.—**3.** A steam-dome.—**4.** The steam-room or steam-space in a boiler or engine.

★**steam-chest** (stēm′chest), *n.* **1.** The chamber in which the slide-valve of a steam-engine works. See cuts under *passenger-engine*, *rock-drill*, and *slide-valve*.—**2.** In *calico-printing*, a metallic vessel or tank in which printed cloths are steamed to fix their colors.

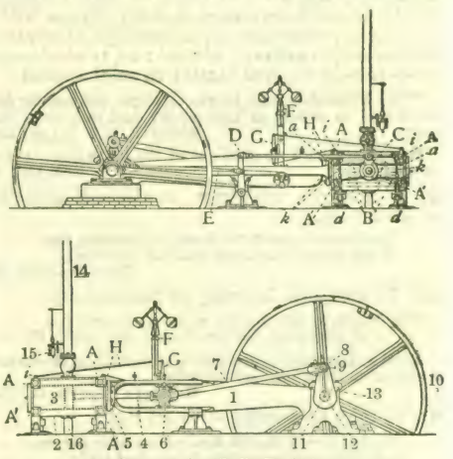
★**steam-chimney** (stēm′chim″ni), *n.* An annular chamber around the chimney of a boiler-furnace for superheating steam.

steam-cock (stēm′kok), *n.* A faucet or valve in a steam-pipe.

steam-coil (stēm′koil), *n.* A coil of pipe, either made up flat with return bends or in spiral form, used to impart heat to a room or other inclosed space or to a liquid, or, by exposure of its exterior surface to air-currents or contact of cold water, to act as a condenser.

steam-color (stēm′kul″or), *n.* In *dyeing*, a color which is developed and fixed by the action of steam after the cloth is printed.

steam-crane (stēm′krān), *n.* A crane worked by steam, frequently carrying the steam-engine upon the same frame.



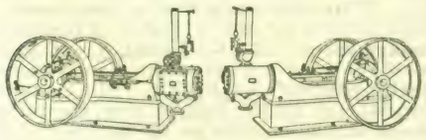
steam-cutter (stēm′kut″ėr), *n.* A ship's boat, smaller than a launch, propelled by steam.

steam-cylinder (stēm′sil″in-dėr), *n.* The cylinder in which the piston of a steam-engine reciprocates.—**Starting steam-cylinder.** Same as *starting-engine*.

steam-dome (stēm′dōm), *n.* A chamber connected with the steam-space and projecting above the top of a steam-boiler. From it the steam passes to the cylinder of a steam-engine, or to steam-heating apparatus. See cut under *steam-boiler*.

steam-dredger (stēm′drej″ėr), *n.* A dredging-machine operated by steam.

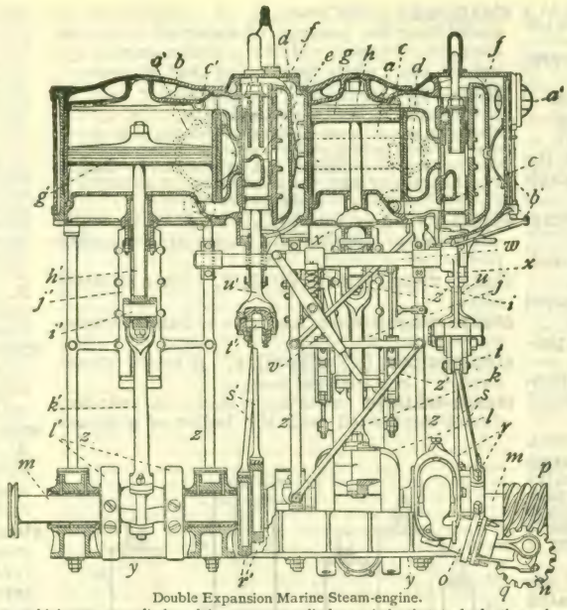
steam-engine (stēm′en″jin), *n.* An engine in which the mechanical force arising from the elasticity and expansive action of steam, or from its property of rapid condensation, or from the combination of the two, is made available as a motive power. The invention of the steam-engine has been ascribed by the English to the Marquis of Worcester, who published an account of it about the middle of the seventeenth century. By the French the invention has been ascribed to Papin, toward the close of the same century. Papin's plan contained the earliest suggestion of a vacuum under a piston by the agency of steam. The first actual working steam-engine of which there is any record was invented and constructed by Captain Savery, an Englishman, to whom a patent was granted for it in 1698. This engine was employed to raise water by the expansion and condensation of steam. The steam-engine received great improvements from the hands of Newcomen, Beighton, and others. Still it was imperfect and rude in its construction, and was chiefly applied to the draining of mines or the raising of water. Up to this time it was properly an atmospheric engine (see *atmospheric*), for the actual moving power was the pressure of the atmosphere, the steam only producing a vacuum under the piston. The steam-engine was brought to a high state of perfection by James Watt about the year 1782. The numerous and vital improvements introduced by him, both in the combination of its mechanism and in the economy of its management, have rendered the steam-engine at once the most powerful, the most easily applied and regulated, and generally speaking the least expensive of all prime movers for impelling machinery of every description. The steam-engine is properly a heat-engine, and the total work L is expressed theoretically by the equation



Steam-engine (Corliss Engine).
(The upper figure is a front view, the under a rear view.)

The steam-valve A and exhaust-valve A′ are independent of each other, and have cylindrical bearing-surfaces. An oscillatory motion is given to them by rods B, connecting with an oscillating disk C (wrist-plate) upon the side of the steam-cylinder, which is worked by an intermediate rock-lever D, driven by the eccentric-rod E, connected with an eccentric upon the main shaft. The motions of the exhaust-valves are positive, but those of the inlet-valve are varied by means of spring-catches *a*, which are adjustable to determine the points of opening and the range of motion of the valves, and are also controlled in their disengagement of the valve-stems by the governor F, rock-lever G, connecting rods H, and rock-levers *i*, all connected together in such manner that an extremely small increase or decrease of speed in the rotation of the fly wheel shaft causes the inlet-valves to be released and to close correspondingly earlier or later in the stroke. The closing is performed by exterior weights suspended from short levers on the valve-stems by the rods *k*, the motion of closing being controlled by dash pots at *d*, only the covers of which are shown. The other parts of the engine, which are common to most reciprocating engines, are 1, the bed-plate; 2, cylinder; 3, piston; 4, piston-rod; 5, stuffing-box; 6, sliding-block or cross-head; 7, connecting-rod or pitman; 8, rod end fitted to 9, the crank-wrist; 10, fly-wheel; 11, crank keyed to 12, the crank-shaft; 13, centrifugal lubricating tube; 14, steam-pipe; 15, lubricator; 16, exhaust-pipe.

$$L = QG\,(T_1 - T)/AT_1,$$



in which Q represents the total heat converted into work per unit of weight, G weight of steam, and A the thermal equivalent of a unit of work, while T_1 and T are respectively the higher and lower limits of temperature between which the steam is worked, T_1 being the absolute temperature at which the steam is inducted to the engine, and T the absolute temperature at which it is exhausted from it. Inspection of the equation shows that the work performed must vary directly as the factor $(T_1 - T)$ varies—that is, the greater the difference which can be maintained between the temperature of induction and that of eduction the greater is the amount of work performed by any given weight of steam. It is in accordance with this law that much higher steam-pressures are now adopted than were formerly employed. The factor $(T_1 - T)$ is commonly called the *temperature range* or *fall*. The varieties of steam-engines are extremely numerous. (For names of various types, with explanations of their characteristic features, see below.) The specific differences between steam-engines of the same type of construction consist chiefly in their valve-gear. (See *valve-gear*, *governor*, 6, *regulator*, *n.*, *slide-valve* (with cut), and *piston-valve*.) Of the total steam-power employed in modern industry on land, that supplied by steam-engines of the horizontal type far exceeds that furnished by steam-engines of all

other types put together. Vertical direct-acting engines of large size, as well as smaller engines of this type, are much employed. Steam-engines of the rotary type are scarcely used except for some kinds of steam hoisting-engines. Double, triple, and quadruple expansion steam-engines are now universally used in marine engineering. Many double expansion stationary engines are in use, and the economical value of the compound system has been demonstrated both theoretically and practically.—**Agricultural steam-engine**, a portable engine with a boiler, often specially adapted to burn light fuel, as chaff or straw, either by itself or in connection with wood or coal.—**Annular steam-engine**, a steam-engine having an annular piston working in an annular steam-cylinder, and having two diametrically placed piston-rods connected with the cross-head, the latter also being connected by rods to a guide-block working in the hollow cylinder forming the center of the annular steam-cylinder, this guide-block being connected with the crank by a pitman.—**Atmospheric steam-engine**. See *atmospheric engine*, under *atmospheric*.—**Beam steam-engine**, an engine in which a working-beam connects the connecting-rod with the crank-pitman, and transmits power from one to the other. See *beam-engine*.—**Compound steam-engine**, a steam-engine having two steam-cylinders of unequal size, from the smaller of which the steam, after use, passes into the larger cylinder, and completes its work by expanding against the piston in the latter.—**Concentric steam-engine**. Same as *rotary steam-engine*.—**Condensing steam-engine**, a steam-engine in which the exhaust-steam is condensed, for the purpose of removing the back-pressure of the atmosphere from the exhaust, and also to economize fuel by saving heat otherwise wasted. See *condenser*, and cut under *pulsometer*.—**Cornish steam-engine**, a single-acting condensing steam pumping-engine, first used in the mines of Cornwall. It is also used as a pumping-engine for supplying water to cities. Steam-pressure is not used to raise the water, but to lift a long loaded pump-rod, whose weight in its descent is the power employed to force up the water. The motion is regulated by a kind of hydraulic regulator invented by Smeaton, and called a *cataract*.—**Direct-acting steam-engine**, a steam-engine in which the power of the piston is transmitted to the crank without the intervention of levers, side-beams, or a working-beam.—**Disk steam-engine**, a form of rotary engine in which the steam-pistons act successively against a revolving disk set at an angle to the plane of rotation, thus imparting a gyratory motion to a central shaft upon which the disk is mounted, the end of this shaft being connected with a crank turning in the plane of rotation.—**Double-acting steam-engine**, the ordinary form of steam-engine, in which the steam acts upon both sides of the piston.—**Double-cylinder steam-engine**, a steam-engine having two steam-cylinders acting in combination with each other. See *compound steam-engine*.—**Double expansion steam-engine**. (*a*) A double-cylinder steam-engine in which steam is used expansively. (*b*) A compound steam-engine.—**Double steam-engine**, a steam-engine having two cylinders in which the pistons make either simultaneous or alternate strokes and are connected with the same crank-shaft.—**Duplex steam-engine**. Same as *double steam-engine*.—**High-pressure steam-engine**. See *high pressure*, under *pressure*.—**High-speed steam-engine**, a somewhat indefinite name for a reciprocating engine working at a high speed as compared with the much slower speed of engines with the Corliss and other

High-speed Steam-engine.

types of valve-gears. In general it may be said that engines of considerable power, making one hundred turns per minute and upward, are high-speed engines.—**Horizontal steam-engine**, a steam-engine in which the piston works horizontally.—**Inclined-cylinder steam-engine**, a form of marine engine having cylinders inclined to the horizontal.—**Inverted-cylinder steam-engine**, a steam-engine in which the cross-head is placed below the cylinder. This construction is much used for marine stationary engines.—**Low-pressure steam-engine**. See *low pressure*, under *pressure*.—**Marine steam-engine**, a steam-engine specially designed for marine propulsion. The best modern types are condensing, short-stroke, double, triple, or quadruple expansion-engines of the inverted-cylinder type. Marine engines for steam-tugs are for the most part single and often non-condensing. See cut in next column.—**Non-condensing steam-engine**, an engine that exhausts its steam without condensation. See *non-condensing*.—**Oscillating steam-engine**, a steam-engine whose cylinder oscillates on trunnions and has its piston-rod directly connected with the crank. Double engines of this type have been considerably used for marine propulsion, and some are still employed.—**Overhead steam-engine**. See *overhead*.—**Quadruple expansion steam-engine**, a steam-engine which, taking its steam at high pressure, expands it in four different operations successively, and in four or more distinct and separate steam-cylinders. The pistons of the cylinders are connected by piston-rods, cross-heads, and connecting-rods with cranks attached to a common shaft, to which rotary motion is imparted by the coacting pistons.—**Reciprocating steam-engine**, a steam-engine in which the power of steam is applied to a reciprocating piston.—**Revolving-cylinder steam-engine**, a steam-engine of which the cylinder is so mounted that it is caused to rotate by the reciprocation of the piston. Compare *rotary steam-engine*.—**Rotary steam-engine**, a steam-engine in which the piston rotates in the cylinder, or the cylinder upon the

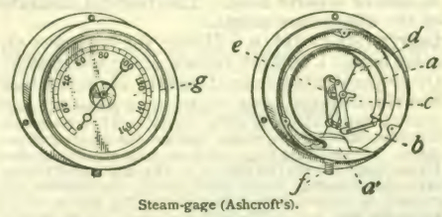
a, high-pressure cylinder; *b*, low-pressure cylinder; *c*, induction- and eduction-valve for *a* in position of exhaust from lower end and of induction to upper end of cylinder; *d*, passage for steam from *a* to *b*; *e*, induction- and eduction-valve for *b*; *f*, *f'*, balance-plates for valves of *a* and *b*; *g*, *g'*, pistons; *h*, *h'*, piston-rods; *i*, *i'*, cross-heads; *j*, *j'*, slipper-guides for cross-heads; *k*, *k'*, connecting-rods; *l*, *l'*, cranks; *m*, crank-shaft; *n*, shaft which drives feed-pump *o* and also bilge-pump (not shown) on the opposite side; *p*, worm on main shaft gearing into worm-wheel *q* on the shaft *n*, and actuating pump-plungers by crank and pitman connection; *r*, *r'*, eccentrics; *s*, *s'*, eccentric-rods; *t*, *t'*, links connected by link-blocks with valve-stems *u*, *u'*; *v*, crank-lever which turns a segmental worm-gear, keyed to the rock-shaft *w* carrying the rocker-arms *x*, *x'*, for reversing high-pressure and low-pressure valves respectively; *y*, bed-plate; *z*, columns supporting the cylinders; *z'*, tie-rods for stiffening the columns; *a'*, exhaust from low-pressure cylinder to the condenser (not shown); *a''*, butterfly throttle-valve; *b'*, gear for operating throttle-valve; *c'*, relief-valves.

piston. The name is sometimes given improperly to reciprocating engines which have a fly-wheel and crank-shaft.—**Rotatory steam-engine**. Same as *rotary steam-engine*.—**Semi-portable steam-engine**, a steam-engine which is movable with its foundation-plate, as distinguished from an engine mounted on wheels, and from one resting on a fixed foundation.—**Triple expansion steam-engine**, a steam-engine that expands its steam in three successive stages and in three or more separate and distinct cylinders, one taking its steam from the boiler, and each of the others taking its steam from the exhaust of the cylinder working at the next higher pressure. This type of marine engine is found at the present time on many of the swiftest steamships, but is being in turn superseded by the quadruple expansion-engine.—**Vertical steam-engine**, one whose piston reciprocates vertically.

steamer (stē′mėr), *n.* [< *steam* + *-er*[1].] One who or that which steams, in any sense. Specifically—(*a*) A steam-box. (*b*) A person employed in steaming oysters in shucking them for canning. (*c*) In *calico-printing*, one who steams printed cloth for fixing steam-colors. (*d*) One who steams wood for bending, etc. (*e*) A steam-generator or -boiler: as, the boiler is an excellent *steamer*. (*f*) Especially, a vessel propelled by steam; a steamship. (*g*) A fire-engine the pumps of which are worked by steam. (*h*) A vessel in which articles are subjected to the action of steam, as in washing or cookery. See *steam-chest*, 2. (1) In *paper-making*, a vessel in which old paper, fiber, etc., are treated in order to soften them. (2) An apparatus for steaming grain preparatory to grinding. (*i*) A locomotive for roads. See *road-steamer*.



steamer-cap (stē′mėr-kap), *n.* Same as *fore-and-aft*, 2.

steamer-duck (stē′mėr-duk), *n.* A South American duck of the genus *Micropterus* (or *Tachyeres*); a race-horse. See *Micropterus*, 2. This duck becomes when adult incapable of flight, but swims very rapidly, with a movement which has suggested the action of a side-wheel steamboat (whence the name).

steam-excavator (stēm′eks″kā-vā-tor), *n.* Same as *navvy*[2], 3.

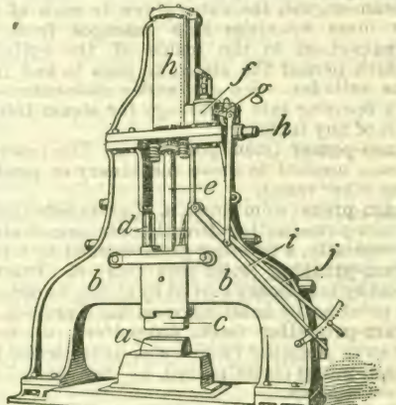
steam-fountain (stēm′foun″tān), *n.* See *fountain*.

steam-gage (stēm′gāj), *n.* An attachment to a boiler to indicate the pressure of steam; a pressure-gage. There are many forms. One of the older is a bent tube partially filled with mercury, one end of which connects with the boiler, so that the steam raises

Steam-gage (Ashcroft's).

a, hollow bent tube attached to case at *a'*, and receiving condensed water or steam under pressure through the opening at *f*; *b*, link connecting end of tube *a* with short arm of rock-lever *c*, which has at the upper end a small rack intermeshing with a pinion on the spindle of the index *d*; *e*, small coiled spring which acts upon the spindle of the index or pointer in a direction opposed to the action of the rack and pinion; *g*, dial, on which the figures indicate pressures (in pounds) above the atmospheric pressure.

the mercury according to the amount of pressure. A very common form of gage is that known as Bourdon's, which consists essentially of a flattened metal tube, closed at one end and bent circularly, into which the steam is admitted. As such a tube tends to straighten itself out by the force of the steam, the amount of pressure can easily be ascertained by an attached index-apparatus.—**Electric steam-gage**, an attachment to a steam-boiler for indicating at a distance the pressure of the steam. One form consists of a bent tube filled with mercury, which, as it rises under the pressure, closes a series of electrical circuits after the manner of a thermostat. Another form employs the expansion or movement of an ordinary steam-gage diaphragm as a circuit-closer. The closing of the circuit in each case serves to sound an alarm.



steam-gas (stēm′gas), *n.* Same as *superheated steam* (which see, under *steam*).

steam-generator (stēm′jen″e-rā-tor), *n.* A steam-boiler.

steam-governor (stēm′guv″èr-nor), *n.* See *governor*, 6.

steam-gun (stēm′gun), *n.* A gun the projectile force of which is derived from the expansion of steam issuing through the shotted tube.

steam-hammer (stēm′ham″èr), *n.* A forging-hammer operated by steam-power. It has assumed several forms, but now consists of a vertical and inverted steam-cylinder with piston and piston-rod (the rod passing through the lower cylinder-head and carrying at the end a mass of metal which forms the hammer), an anvil directly beneath the hammer and cylinder, a supporting framework, and suitable valves for the control of the steam. Steam is used to raise and may also be used to drive down the hammer. By means of the valve-system, steam is admitted below the piston to raise the hammer and to sustain it while the metal to be forged is placed on the anvil. To deliver a blow, the steam is exhausted below the piston, and the hammer is allowed to fall by its own weight. To augment the blow, live steam may be admitted above the piston to assist in driving it downward. To deliver a gentle blow, the exhaust-steam below the piston may be retained to act as a cushion. Blows can be delivered at any point of the stroke, quickly or slowly, lightly or with the full power of the combined weight of the hammer and force of steam-pressure; or the machine may be

6000- to 8000-pound double-frame Steam-hammer.

a, anvil; *b*, frame; *c*, hammer-head; *d*, guides; *e*, piston-rod; *f*, valve-chests containing valves that control induction of steam to and eduction from the cylinder *h*; *h'*, steam-pipe; *g*, rock-lever (moved by the rod *i*) connected with the valve-stems and moving the valves; *j*, tripping-mechanism by which the hammer is caused to descend from any part of the upstroke.

used as a vise or squeezer. Steam-hammers have been made with hammers weighing over one hundred tons. Another type of steam-hammer consists of two horizontal steam-cylinders placed in line, the hammers meeting over an anvil on which the forging rests.

steam-heat (stēm′hēt), *n.* 1. In *thermodynamics*, the total heat required to produce steam at any tension from water at 0° C. or 32° F. It is the sum of the sensible heat and the latent heat expressed in thermal units.—2. Heat imparted by the condensation of steam in coils, pipes, or radiators.

steam-hoist (stēm′hoist), *n.* A lift or elevator operated by a steam-engine.

steam-house (stēm′hous), *n.* In oyster-canning, a house or room where oysters are steamed.

steaminess (stē′mi-nes), *n.* Steamy or vaporous character or quality; mistiness.

steam-jacket (stēm′jak″et), *n.* An inclosure adapted for receiving steam, and applying the heat of the steam to a kettle, tank, steam-cylinder, etc., surrounded by such inclosure.

steam-jet (stēm′jet), *n.* A blast of steam caused to issue from a nozle.

steam-joint (stēm′joint), *n.* A joint that is steam-tight.

steam-kettle (stēm′ket″l), *n.* A vessel heated by steam, and used for various purposes. The

steam for heating is usually applied by induction to a steam-jacket surrounding the sides and inclosing the bottom of the kettle.

steam-kitchen (stēm'kich″en), *n.* An apparatus for cooking by steam.

steam-launch (stēm'länch), *n.* See *launch*.

steam-motor (stēm'mō″tor), *n.* A steam-engine.

steam-navigation (stēm'nav-i-gā″shon), *n.* The art of applying the power of steam to the propulsion of boats and vessels; the art of navigating steam-vessels.

steam-navvy (stēm'nav″i), *n.* A digging-machine or excavator actuated by steam.

steam-organ (stēm'ôr″gan), *n.* Same as *calliope*, 2.

steam-oven (stēm'uv″n), *n.* An oven heated by steam at high pressure.

steam-packet (stēm'pak″et), *n.* A packet propelled by steam. Compare *packet*, *n.*, 2.

steam-pan (stēm'pan), *n.* A vessel with a double bottom forming a steam-chamber. See *vacuum-pan*.

steam-pipe (stēm'pīp), *n.* Any pipe in which steam is conveyed. Specifically—(*a*) A pipe which leads from a boiler to an engine, pan, tank, etc., or from the boiler to a condenser or to the open air. (*b*) In a steam-heating or -drying apparatus or system, a name given to any one of the steam-supply pipes, in contradistinction to the corresponding return-pipe through which water of condensation is returned to the boiler.

steam-plow (stēm'plou), *n.* A gang-plow designed to be drawn by a wire rope, and operated by steam-power. Such a plow has usually eight shares arranged in a frame, four pointing in one direction and four in the other. The frame is balanced on a pair of wheels in the center, and forms an angle in the middle, so that when one half the plows are in use the others are raised above the ground. Steam-plows are used with either one or two engines. If with two engines, the plow is drawn forward and backward between them, each engine being advanced the width of the furrows after each passage of the plow. If one engine only is used, snatch-blocks and movable anchors are employed to hold the rope, the anchors being automatically advanced after each passage of the plow. Traction-engines also have been used to drag plows. See *anchor*, *porter*[2], and *plow*.

steam-port (stēm'pōrt), *n.* **1.** In a slide-valve steam-engine, the name given to each of two or more openings into passages from the steam-chest to the inside of the cylinder, which permit the steam to pass to and from the cylinder. See cut under *slide-valve*.—**2.** An opening into a passage for steam into or out of any inclosure.

steam-power (stēm'pou″ėr), *n.* The power of steam applied to move machinery or produce any other result.

steam-press (stēm'pres), *n.* A press actuated by steam-power acting directly or intermediately; specifically, a printing-press worked by steam.

steam-printing (stēm'prin″ting), *n.* Printing done by machinery moved by steam, as opposed to printing by hand-labor on hand-presses.

steam-propeller (stēm'prō-pel″ėr), *n.* Same as *screw propeller* (which see, under *screw*[1]).

steam-pump (stēm'pump), *n.* See *pump*[1] and *vacuum-pump*.

steam-radiator (stēm'rā″di-ā-tor), *n.* A nest or collection of iron pipes in ranks or coils, through which steam is passed to heat a room, etc. See cuts under *radiator*.

steam-ram (stēm'ram), *n.* See *ram*[2], 2.

steam-regulator (stēm'reg″ū-lā-tor), *n.* See *regulator*, 2.

steam-room (stēm'röm), *n.* In a steam-boiler, etc., the space which is occupied by steam.

steamship (stēm'ship), *n.* A ship propelled by steam.

steam-space (stēm'spās), *n.* A space occupied, or designed to be occupied, by steam only; particularly, in a steam-boiler, the space allowed above the water-line for receiving the vapor released by heat from the water, and permitting mechanically entrained water to drop back.

steam-table (stēm'tā″bl), *n.* **1.** A bench or table fitted with steam-tight tanks.—**2.** A tabular arrangement of data relating to steam-pressures, temperatures, and quantities of heat.

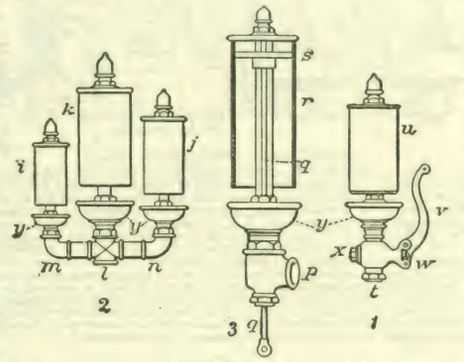
steam-tank (stēm'tangk), *n.* A chamber or inclosed vessel in which materials of any kind are treated either by direct contact with steam or with steam-heat by means of pipes coiled in the tank or a steam-jacket.

steam-tight (stēm'tīt), *a.* Capable of resisting the passage of steam, as a joint.

steam-toe (stēm'tō), *n.* In a form of steam-engine with lifting-valves, a projection on a lifting-rod connected to the valve admitting steam, which is raised through the action of a cam, tappet, or wiper.

steam-trap (stēm'trap), *n.* A contrivance for permitting the passage of water of condensation out of pipes, radiators, steam-engine cylinders, etc., while preventing that of steam.

steam-tug (stēm'tug), *n.* A steamer used for towing ships, boats, rafts, fishing-nets, oyster-dredges, etc. Such vessels are furnished with engines very powerful in proportion to the size of their hulls, and usually carry only sufficient coal for short trips.—**Steam-tug heart-murmur**, the combination of an aortic regurgitant with an aortic obstructive murmur.



steam-valve (stēm'valv), *n.* A valve which controls the opening of a steam-pipe or steam-port.

steam-vessel (stēm'ves″el), *n.* Same as *steamship*.

steam-wagon (stēm'wag″on), *n.* Same as *steam-carriage*.

steam-wheel (stēm'hwēl), *n.* A rotary steam-engine. See *steam-engine*.

steam-whistle (stēm'hwis″l), *n.* A sounding device connected with the boiler of a steam-engine, either stationary, locomotive, or marine, for the purpose of announcing hours of work, signaling, etc.

Steam-whistles.

Fig. 1 is the simplest form of steam-whistle, with adjustable lever *v*, which acts on the valve *x*, its motion being limited by a stop-pin at *w*. Steam passes through a pipe connected at *t* when the valve *x* is opened. The steam issues through openings in the base *y*, and, passing over the lower edge of the bell *u*, causes a powerful vibration producing the sound, the pitch of which depends upon the length of the bell. Fig. 2 is a chime-whistle consisting of three bells, *i*, *j*, *k*, tuned to emit the common chord or some inversion of it. It receives steam at *l*, and by branches *m*, *n*, together with *l*, distributes it to the several bases *y*. Fig. 3 is a piston-whistle. Its base *y* and bell *r* operate as described for the other whistles, the steam entering at *p*. The tone of the whistle is changed by moving up and down the piston *s* by means of the stem *q*.

steam-winch (stēm'winch), *n.* A form of winch or hoisting-apparatus in which rotatory motion is imparted to the winding axle from the piston-rod of a steam-engine, directly, or indirectly by means of tooth-gearing, the direct action giving most rapidity, the indirect most power.

steam-worm (stēm'wėrm), *n.* A spiral steam-coil. Such coils are used in tanks for heating liquids, as tan-liquor in tanneries, water in laundries, dye-works, etc., the liquid being placed in the tank enveloping the coil, while steam is passed through the latter. They are also used in some forms of calorimeter.

steamy (stē'mi), *a.* [< *steam* + *-y*[1].] Consisting of or abounding in steam; resembling steam; vaporous; misty.

> The bubbling and loud hissing urn
> Throws up a *steamy* column. *Cowper*, Task, iv. 39.

> I found an evening hour in the *steamy* heat of the Haram equal to half a dozen afternoons.
> *R. F. Burton*, El-Medinah, p. 272.

steam-yacht (stēm'yot), *n.* A yacht propelled by steam, or by steam and sails.

stean. See *steen*[1], *steen*[2], *stone*.

steaning, *n.* See *steening*.

steapsin (stē-ap'sin), *n.* [< *stea(rin)* + *p(ep)sin*.] A ferment of the pancreatic secretion which resolves fats into fatty acids and glycerin.

stearate (stē'a-rāt), *n.* [< *stear(ic)* + *-ate*[1].] A salt of stearic acid. The neutral stearates of the alkalis are soaps.

stearic (stē-ar'ik), *a.* [Irreg. for **steatic*, < Gr. *στέαρ* (*στεατ-*), stiff fat, tallow, suet: see *steatite*.] Of or pertaining to suet or fat; obtained from stearin.—**Stearic acid**, $C_{18}H_{36}O_2$, a monobasic acid, forming brilliant white scaly crystals. It is inodorous, tasteless, insoluble in water, but soluble in alcohol and ether. It burns like wax, and is used for making candles. Its compounds with the alkalis, earths, and metallic oxids are called *stearates*. Stearic acid exists in combination with glycerin as stearin, in beef- and mutton-fat, and in several vegetable fats, such as the butter of cacao. It is obtained from stearin by saponification and decomposition by an acid of the soap formed, and also from mutton-suet by a similar process.

stearin (stē'a-rin), *n.* [< *stear(ic)* + *-in*[2].] **1.** An ester or glyceride, $C_3H_5(C_{18}H_{35}O_2)_3$, formed by the combination of stearic acid and glycerin. When crystallized it forms white pearly scales, soft to the touch but not greasy, and odorless and tasteless when pure. It is insoluble in water, but soluble in hot alcohol and ether. When treated with superheated steam it is separated into stearic acid and glycerin, and when boiled with alkalis is saponified—that is, the stearic acid combines with the alkali, forming soap, and glycerin is separated. When melted it resembles wax. There are three stearins, which may all be regarded as derivatives of glycerin in which one, two, or three OH groups are replaced by the radical stearyl. Natural stearin is the tristearyl derivative of glycerin. It is the chief ingredient in suet, tallow, and the harder fats, and may be prepared by repeated solution in ether and crystallization. Candle-pitch, chandlers' gum, or residuary gum, used in the manufacture of roofing-cements, is a by-product of this manufacture.

2. A popular name for stearic acid as used in making candles.—**Lard-stearin**, the residue left after the expression of the oil from lard.

stearinery (stē'a-rin-ėr-i), *n.* [< *stearin* + *-ery*.] The process or factory for making stearin from animal or vegetable fats; the manufacture of stearin or stearin products.

stearone (stē'a-rōn), *n.* [< *stear(ic)* + *-one*.] A ketone ($C_{35}H_{70}O$) obtained by treating stearic acid with phosphorus pentoxid. It is a solid which melts at 88° C. It is very difficultly soluble in alcohol and ether.

stearoptene (stē-a-rop'tēn), *n.* [Irreg. < Gr. *στέαρ*, stiff fat, tallow, suet, + *πτηνός*, winged (volatile).] The solid crystalline substance separated from any volatile oil on long standing or at low temperatures. See *elæoptene*.

stearyl (stē'a-ril), *n.* [< *stear(ic)* + *-yl*.] The radical of stearic acid ($C_{18}H_{35}O$).

steatin (stē'a-tin), *n.* Same as *steatinum*.

steatinum (stē-a-tī'num), *n.* [NL., < Gr. *στεάτινον*, neut. of *στεάτινος*, of or pertaining to tallow or suet, < *στέαρ* (*στεατ-*), stiff fat, tallow, suet: see *steatite*.] A name given to certain pharmaceutical preparations similar to cerates, but containing considerable tallow.—**Steatinum iodoformi**, steatinum composed of mutton-tallow 18 parts, expressed oil of nutmeg 2 parts, powdered iodoform 1 part.

steatite (stē'a-tīt), *n.* [= F. *stéatite*, < L. *steatitis*, < Gr. *στεατίτης*, used only as equiv. to *στεάτινος*, *σταίτινος*, of dough made of flour of spelt, < *στέαρ* (*στεατ-*), also *στεῖαρ*, also contr. *στῆρ* (with rare gen. *στῆρος*, also *σταιτ-*), stiff fat, tallow, suet, also dough made of flour of spelt, prob. < *ἱστάναι* (√ *στα*), cause to stand, fix: see *stand*.] Soapstone: an impure massive variety of talc. Also called *potstone*.

steatitic (stē-a-tit'ik), *a.* [< *steatite* + *-ic*.] Of or pertaining to steatite or soapstone; made of steatite.

steatogenous (stē-a-toj'e-nus), *a.* [< Gr. *στέαρ* (*στεατ-*), fat, + *-γενής*, producing: see *-genous*.] Tending to produce steatosis (see *steatosis*, 2): as, *steatogenous* processes.

steatoma (stē-a-tō'mä), *n.*; pl. *steatomata* (-ma-tä). [< Gr. *στεάτωμα*, a kind of fatty tumor, < *στέαρ* (*στεατ-*), fat, tallow, suet.] A lipoma.

steatomatous (stē-a-tom'a-tus), *a.* [< *steatoma(t-)* + *-ous*.] Of the nature of a steatoma.

steatopyga (stē″a-tō-pī'gä), *n.* [NL., < Gr. *στέαρ* (*στεατ-*), fat, tallow, suet, + *πυγή*, the rump.] An accumulation of fat on the buttocks of certain Africans, especially Hottentot women.

steatopygous (stē″a-tō-pī'gus), *a.* [< NL. *steatopyga* + *-ous*.] Affected with or characterized by steatopyga; having enormously fat buttocks. *R. F. Burton*, El-Medinah, p. 60.

steatopygy (stē'a-tō-pī-ji), *n.* [< *steatopyg-ous* + *-y*[3].] The development of steatopyga, or the state of being steatopygous. *Jour. Anthrop. Inst.*, XVIII. 17.

Steatornis (stē-a-tôr'nis), *n.* [NL. (Humboldt, 1817), < Gr. *στέαρ* (*στεατ-*), fat, tallow, suet, + *ὄρνις*, a bird.] The representative genus of *Steatornithidæ*. The only species is *S. caripensis*, the guacharo or oil-bird of South America, found from Venezuela to Peru, and also in Trinidad, of frugivorous and nocturnal habits. The bird resembles and is usually classed with the goatsuckers. It is so fat that the natives prepare from it a kind of oil used for butter. See cut under *guacharo*.

steatornithic (stē″a-tôr-nith'ik), *a.* Having the characters of *Steatornis*.

Steatornithidæ (stē″a-tôr-nith'i-dē), *n. pl.* [NL., < *Steatornis* (*-ornith-*) + *-idæ*.] A family of picarian birds, represented by the genus *Steatornis*. It is related to the *Caprimulgidæ*, and is often associated with them, but differs in many important characters, and in some respects approaches the owls. The sternum has a single notch on each side behind. The palate is desmognathous, with united maxillopalatines and peculiarly shaped palatines. There are basipterygoid processes, and the rostrum of the skull is compressed. The second pectoral muscle is small, and the femorocaudal is wanting. The syrinx is entirely bronchial, and hence paired. The oil-gland is very large. The plumage is not aftershafted, and the rectrices are ten. There is only one genus and one species. See cut under *guacharo*.

steatornithine (stē-a-tôr'ni-thin), *a.* [< *Steatornis* (*-ornith-*) + *-ine*2.] Steatornithic; of or pertaining to the *Steatornithidæ*.

steatorrhea, steatorrhœa (stē″a-tō-rē′ä), *n.* [NL., < Gr. στέαρ (στεατ-), fat, suet, tallow, + ῥοία, a flow, < ῥεῖν, flow.] 1. Seborrhea.—2. The passage of fatty stools.

steatosis (stē-a-tō′sis), *n.* [NL., < Gr. στέαρ (στεατ-), fat, tallow, suet, + *-osis.*] 1. Fatty degeneration or infiltration.—2. Any disease of the sebaceous glands. Also called *steatopathia*

Steatozoön (stē″a-tō-zō′on), *n.* Same as *Demodex*.

stedt, *n.* An obsolete form of *stead*.

stedfast, stedfastly, etc. See *steadfast*, etc

steed (stēd), *n.* [< ME. *stede*, < AS. *stēda*, a stud-horse, stallion, war-horse (cf. *gestēd-hors*, stud-horse; Icel. *stedda* for **stœdda*, a mare; Sw. *sto*, a mare), < *stōd*, a stud: see *stud*1. Cf. *stot*1, *stote, stoat*1.] A horse: now chiefly poetical.

> The fiend, . . . like a proud *steed* rein'd, went haughty on,
> Champing his iron curb. *Milton*, P. L., iv. 858.

steedless (stēd'les), *a.* [< *steed* + *-less.*] Having no steeds or horses. *Whittier.*

steedyokes†, *n. pl.* Reins; thongs. [Rare.]

> Sorrowful Hector . . .
> Harryed in *steedyocks* as of earst.
> *Stanihurst*, Æneid, ii.

steek (stēk), *v.* [Also *steik;* obs. or dial. (Sc.) form of *stick*1.] I. *trans.* 1. To pierce with a sharp-pointed instrument; stitch or sew with a needle.—2. To close or shut: as, to *steek* one's eyes. *Burns.* [Obsolete or Scotch in both uses.]

> But doors were *steek'd*, and windows bar'd,
> And nane wad let him in.
> *Willie and May Margaret* (Child's Ballads, II. 172).

II. *intrans.* To close; shut.

> It es callede cloyster for it closys and *steskys*, and warely sall be lokked. *Religious Pieces* (E. E. T. S.), p. 50.

steek (stēk), *n.* [Also *steik;* a dial. (Sc.) form of *stitch.*] The act of stitching with a needle; a stitch. [Scotch.]

steel1 (stēl), *n.* and *a.* [< ME. *steel, stel, stiel, stil*, < AS. **stēle, stȳle*, earliest forms *stēli, stǣli* = MD. *stael*, D. *staal* = MLG. *stāl*, LG. *staal* = OHG. *stahal, stāl*, MHG. *stahel, stachel, stāl*, G. *stahl* = Icel. *stāl* = Sw. *stål* = Dan. *staal* = Goth. **stahla* = OPruss. *stakla*, steel; root unknown. The words *gold* and *silver* also have no L. or Gr. or other cognate terms outside of Teut. and Slavic.] I. *n.* 1. A modified form of iron, not occurring in nature, but known and manufactured from very early times, and at the present time of the highest importance in its various applications to the wants of man. Steel made by modern processes is defined as a malleable alloy of iron and carbon obtained by casting from a fluid mass. It is distinguished from wrought-iron by its homogeneity, or freedom from intermingled slag or cinder. For certain purposes, and especially for the manufacture of tools and weapons, there is no metal or metallic alloy which could take the place of steel. The most essential features of steel as compared with iron are elasticity and hardness, and these qualities can be varied in amount to a very extraordinary degree, in the same piece of steel, by slight changes in the manipulation. Steel can be hardened so as to cut glass, by rapid cooling after being strongly heated, and it can be tempered, by reheating after hardening, so as permanently to take the precise degree of hardness best adapted to the use to which it is to be applied. (See *temper.*) Steel has been known from very early times, but where and how first manufactured is not known. That it has long been in use in India, and that it is still manufactured in that country by methods precisely similar to those in use long ago are well-known facts. (See *wootz.*) It is thought by some to have been known to the pyramid-builders; but this has not yet been demonstrated, and the same is true of the ancient Semites. The words translated 'steel' in the authorized version of the Old Testament signify 'copper' or 'bronze,' and are usually rendered 'brass,' 'brazen.' That steel was clearly recognized as something distinct from iron by the author or authors of the Homeric poems cannot be proved. The earliest known and simplest method of reducing iron from its ore—the so-called "direct process"—is capable also of furnishing steel, although a sufficiently homogeneous product cannot be easily obtained by this method. This would explain how steel became known at an early period, and why it was so long before it became an article of general use, with well-established methods of manufacture. Steel is a form of iron in which the amount of carbon is intermediate between that in wrought- and that in cast-iron, and this carbon does not exist in the steel in the form of graphite, but is either combined with or dissolved in it: but the subject of the relation of carbon to iron is one of difficulty, and is now undergoing investigation at the hands of various skilled metallurgical chemists. Other ingredients besides carbon are also present in steel—namely, silicon, manganese, sulphur, and phosphorus. Of these the two first mentioned are probably never entirely wanting, and they are not especially undesirable or injurious, as is the case with the two others, of which only traces can be permitted in the best quality of steel. They are all, however, different from carbon, which latter is regarded as an essential element of steel, while the others may be looked upon as being more or less of the nature of impurities. The quality of steel varies with the amount of carbon present, and the effect of this latter element varies with the amount of impurity (silicon, etc.) present in the steel. In the case of the best bar-iron, a little over 0.3 per cent. of carbon is sufficient to give it a steely character; from 0.5 to 0.65 per cent. of carbon, according to the purity of the iron, gives a steel which can be hardened so as to strike fire with flint. Iron containing from 1 to 1.5 per cent. of carbon gives steel which, after tempering, combines the maximum hardness with the maximum tenacity. One per cent. of carbon gives, on the whole, the best steel for cutting-tools. With more than 1.5 per cent. of carbon the tenacity and weldability of the steel are diminished, although the hardness may be increased. With more than 1.7 per cent. of carbon the steel ceases to be weldable, and is with difficulty drawn out under the hammer; and from 1.8 to 2.0 per cent. is usually considered as the limit between steel and cast-iron, the steel with that amount breaking when hammered after softening by heat. Since steel is intermediate between wrought- and cast-iron in the amount of carbon which it contains, it is evident that it might be made either by carburizing the former or decarburizing the latter. The method of carburization, or *cementation* as it is generally called, is one of the oldest, perhaps the most ancient, as, although differing greatly in the details, in the essentials it is the same as the process by which the Indian wootz is manufactured. The cementation process was described in detail by Réaumur in a work published in 1722. By this method blister-steel is obtained, and this is further worked up into spring-, shear-, and double-shear steel by one or more processes of fagoting, welding, and hammering or rolling, the object of this being to give the metal greater homogeneity. A great addition to the value of this process was the invention by Huntsman, in 1740, of cast-steel, the product of the fusion in crucibles, under suitable manipulation, of blister steel, which process is still in use as first arranged almost without change. By this method, when iron of a sufficiently high grade is used, the finest quality of steel is produced, and it is only steel manufactured in this way which can be used for the best tools, weapons, and cutting instruments of all kinds. The methods of producing steel by the decarburization of pig-iron are numerous and varied. The Styrian method of decarburization in the open-hearth finery, whereby a material called *raw steel* is produced, was once of very considerable importance, but is now little used. The method of decarburizing pig-iron by puddling, which is similar in principle to the ordinary puddling process used for converting pig- into wrought-iron was formerly extensively employed, especially on the continent of Europe, the product being called *puddled steel*, this being drawn into bars, which are cut up and remelted, as is done with blister-steel in manufacturing cast-steel. Various methods have been used for producing steel by fusing pig-iron with iron ores or with wrought-iron or steel scrap, but the only one now in common use is the open-hearth or Siemens-Martin process, which was perfected commercially about 1867. In this process a bath of melted pig-iron is formed on the hearth of a Siemens regenerative furnace, and is desiliconized and decarburized partly by the action of an oxidizing flame and partly by additions of iron ore. Wrought-iron or steel scrap is also melted in the bath. When the melted mixture is sufficiently decarburized an addition of spiegeleisen or ferromanganese is made to the bath, in order to remove oxide of iron, which may be present, and to increase the content of carbon to the point desired, and then the steel thus made is tapped into the ladle. When the process is carried on with large additions of ore and little or no scrap, it is known as the pig-and-ore process; when but little ore and a great deal of scrap are used, it is known as the pig-and-scrap process. The process is also called "acid" or "basic," according as the lining of the floor and sides of the hearth are made of silicious or acid material, or of basic material such as magnesite or magnesian limestone. Still the most important of all steel producing processes, if only the amount of the metal produced is considered, is the "pneumatic" or "Bessemer" process, invented by Sir Henry Bessemer about 1856, which consists in blowing air through molten pig-iron in a "converter," or vessel of iron lined with a refractory material—the oxidation of the carbon and silicon which the pig contains, together with a small part of the iron itself, furnishing sufficient heat to keep the material in a fluid state while the operation of decarburization goes on. After complete decarburization of the iron, a certain amount of carbon is restored to the metal by the introduction of spiegeleisen or ferromanganese; this extremely important addition to the Bessemer process, without which it would hardly have been a success, was contributed by R. F. Mushet. The Bessemer process, as conducted in a converter lined with the ordinary silicious or "acid" material, is suited only for working iron which is practically free from phosphorus and sulphur, or such as is made from ore like that of Lake Superior, from which all, or nearly all, the Bessemer steel made in the United States is manufactured. By the so-called "basic" or "Thomas-Gilchrist" process, the converter having a basic (calcined dolomite) lining, iron containing a considerable amount of phosphorus is treated, and a fair quality of steel produced, the phosphorus passing into the slag during the operation, as is the case in puddling. The metal produced by the Bessemer process is generally called *Bessemer steel.* It can be produced of various grades by varying the amount of carbon which it contains, and is a material of the highest value for structural purposes—as being cheaper, and having more durability, than wrought-iron made by puddling. Its principal use is for rails. The world's production of *steel* had increased in 1909 to 53,000,000 tons, of which the United States contributed over 40 per cent.

A single span of the Forth Bridge is nearly as long as two Eiffel Towers turned horizontally and tied together in the middle, and the whole forms a complicated steel structure weighing 15,000 tons, erected without the possibility of any intermediate support, the lace-like fabric of the bridge soaring as high as the top of St. Paul's. The *steel* of which the compression members of the structure are composed contains $\frac{33}{100}$ of carbon and $\frac{65}{100}$ of manganese. The parts subjected to extension do not contain more than $\frac{18}{100}$ of carbon. *W. C. Roberts-Austen*, Nature, XLI. 36.

2. Something made of steel. Specifically—(*a*) A cutting or piercing weapon; especially, a sword. Compare *cold steel*, below. *Shak.*, M. W. of W., i. 3. 83. (*b*) A piece of steel for striking sparks from flint to ignite tinder or match. (*c*) A mirror.

> She straight replies, Send in your steel combs, with
> The *steel* you see your faces in.
> *Cartwright's Lady Errant* (1651). (*Nares.*)

(*d*) A cylindrical or slightly tapering rod of steel, sometimes having fine parallel longitudinal lines, used for sharpening carving-knives, etc. (*e*) A strip of steel used to stiffen a corset, or to expand a woman's skirt.—**Berard steel**, steel made by adding hydrogen gas to the air-blast in the Bessemer process, to remove arsenic, sulphur, and phosphorus.—**Bessemer steel**, steel made by the Bessemer process. See def. 1.—**Blistered steel.** Same as *blister-steel.*—**Carbon steel**, ordinary steel; not "special steel," but steel in which carbon is clearly the element which gives the iron those peculiar properties which justify its designation by the term *steel.*—**Cast-steel**, steel cast from a fluid mass, including crucible, open-hearth, and Bessemer steel, as distinguished from the old German, puddled, and blister steels.—**Chrome steel**, steel alloyed with chromium together with either tungsten, molybdenum, or nickel. It is now used for many purposes, such as high-grade cutting tools, armor plate, etc. See also article in the supplement.—**Cold-rolled steel**, steel to which, after it is rolled hot to approximately the required thickness, a very smooth surface and a very accurately gaged thickness are imparted by first chemically cleaning the surface and then rolling it cold between smooth surface rollers.—**Cold steel**, a cutting- and thrusting-weapon; a weapon or weapons for close quarters, as distinguished from fire-arms.—**Compressed steel**, steel which is made more dense, tenacious, and free from blow-holes by being condensed by pressure while in a fluid state. This pressure is produced in various ways, as by hydraulic machinery, by steam, by centrifugal force, by the use of liquefied carbonic acid, etc.—**Crinoline-steels.** See *crinoline.*—**Crucible steel.** Same as *cast-steel.*—**Damask steel.** See *damask.*—**Garb of steel.** See *garb*2.—**German steel**, steel from Germany. The phrase has now no definite meaning other than geographical. It formerly meant steel made in the finery from spathic ore.—**High-speed steel.** See the supplement.—**Homogeneous steel.** Same as *cast-steel.*—**Indian steel.** Same as *wootz.*—**Manganese steel**, a variety of special steel made by the addition of manganese, which element is present in various manganese steels which have been analyzed in quantity ranging from less than 1 per cent. to over 21 per cent. The qualities vary greatly with its composition.—**Mask of steel.** See *mask*3.—**Mild steel**, steel containing a small amount of carbon (Bessemer steel is frequently so designated); a metal which has some of the qualities of steel, but does not admit of being tempered, or only imperfectly so. See def. 1.—**Native steel**, the name sometimes given to small masses or buttons of steel, steely iron, or iron which has occasionally been formed by the ignition of coal-seams adjacent to deposits of iron ore.—**Nickel steel**, a variety of special steel surpassing the best carbon steel in certain important respects. Steel alloyed with 3.50 per cent. of nickel is used very largely for structural work on account of its combination of high elastic limit and ductility. Larger percentages of nickel are used for many purposes, and nickel steel is now the most important of all the alloy steels. It is now largely used for armor plate, and is coming into use for special purposes in which great strength and ductility are required.—**Run steel**, a trade-mark name (in England) of various small articles, such as bridle-bits and stirrups, made of cast-iron which has been to a certain extent rendered malleable by partial decarburization by cementation. The method is one which has been long known, but which has not come into extensive use till comparatively modern times. Also called *malleable cast-iron.*—**Silicon steel**, a variety of special steel which has been experimented with to some extent, but which has not yet become of importance.—**Special steel**, steel in which the element which gives the iron its peculiar qualities, or what distinguishes it from iron, is not carbon, but some other substance. The principal special steels are chrome, manganese, nickel, silicon, titanium, and tungsten steels, all of which have been much experimented with in recent years. While some authorities appear to maintain that the carbon in special steels is so overpowered by the special element used that its effects are entirely neutralized, others believe that some carbon is absolutely necessary that iron may become converted into what can properly be called steel.—**Styrian special steel**, steel from Styria: steel made by the Styrian process, which closely resembles the Styrian process of making malleable iron in the finery.—**Tungsten steel**, a variety of special steel, now largely employed in the manufacture of the harder grades of crucible steel. "Mushet's," "special," "imperial," and "crescent-hardened" are brands of tungsten steel now sold in the American markets. Steel may contain a much larger proportion of tungsten than it can of carbon without losing its power of being forged. In a table of thirteen analyses of tungsten steel given by H. M. Howe in his "Metallurgy of Steel" (1891), the tungsten ranges from 1.94 to 11.03 per cent.; the carbon, from 0.38 to 2.15; the manganese, from a trace to 2.66; the silicon, from .05 to .82. Tungsten steel is exceedingly hard and very brittle: it is used chiefly for the tools of lathes and planers designed for heavy work.

II. *a.* 1. Made of steel: as, a *steel* plate or buckle.

> The average strength [of the Bessemer steel used in building the Forth Bridge] is one-half greater than that of the best wrought iron, and the ductility of the *steel* plates is fully three times that of corresponding iron plates. *Sir John Fowler and Benjamin Baker*, Nineteenth Century, July, 1889, p. 39.

2. Hard as steel; inflexible; unyielding.

> Prison my heart in thy *steel* bosom's ward.

> By breezeless air to smoothest polish.
> *Wordsworth*, Sonnets Dedicated to Liberty, ii. 5.

steel[2]†, *n.* An obsolete form of *steal*[2], *stale*[2].

steel-blue (stēl'blö), *a.* and *n.* **I.** *a.* Of a lustrous dark-bluish color, resembling steel tempered blue.

II. *n.* A lustrous dark-bluish color; a darker shade than Berlin blue and less chromatic, but nearly of the same hue. See *blue.*

steel-bow (stēl'bou), *a.* [Origin and distinctive sense obscure.] See the phrase.—**Steel-bow goods**, in *Scots law*, corn, cattle, straw, and implements of husbandry, delivered by the landlord to his tenant, by means of which the tenant is enabled to stock and labor the farm, and in consideration of which he becomes bound to return articles equal in quantity and quality at the expiration of the lease.

steelboy (stēl'boi), *n.* [Prob. < *steel*[1] in the phrase "hearts of steel," used by the insurgents in a remonstrance entitled "Petition of the Hearts of Steel" (Record Office, London).] A member of a band of insurgents in Ulster, Ireland, who committed various agrarian and other outrages about 1772–4. *Lecky*, Eng. in 18th Cent., xvi.

steel-clad (stēl'klad), *a.* Clothed in armor of steel.

steelent, *a.* [< ME. *stelen*, < AS. *stȳlen* (= D. *stalen, stelen*), < *stȳle*, **stēle*, steel: see *steel*[1] and *-en*[2].] Of steel; made of steel.

steeliness (stē'li-nes), *n.* The state or character of being steely.

steeling (stē'ling), *n.* [Verbal n. of *steel*[1], *v.*] **1.** The process of welding a piece of steel on that part of a cutting-instrument which is to receive the edge.—**2.** The process of depositing a film of iron on engraved copperplates. The plates are placed in a bath of sulphate of iron and ammonium chlorid, a plate of iron submerged in the solution being connected to the copper pole of the battery, and the engraved copperplate to the zinc pole. From such steeled plates from 5,000 to 15,000 impressions can be taken. The same method has been successfully applied to stereotype plates.

steelmaster (stēl'mas″tėr), *n.* A manufacturer of steel. *The Engineer*, LXIX. 343.

steel-mill (stēl'mil), *n.* A contrivance for giving light, in use previous to the invention of the safety-lamp, in English coal-mines infested with fire-damp. It consisted of a disk of steel which was made to revolve rapidly, a flint being held against it, from which a shower of sparks was given off and a feeble light furnished. This method of obtaining light was for a time quite popular.

steel-ore (stēl'ōr), *n.* A name given to various iron ores, and especially to spathic iron (siderite), because it was supposed to be especially adapted for making steel by the earlier and direct processes. Much of the so-called German steel was made from that ore.

steel-press (stēl'pres), *n.* A special form of press designed for compressing molten steel to form sound and dense castings.

steel-saw (stēl'sâ), *n.* A disk of soft iron, revolving with great rapidity, used for cutting steel hot or cold.

steelware (stēl'wâr), *n.* Articles, collectively, made of steel. *The Engineer*, LXVIII. 642.

steelwork (stēl'wėrk), *n.* Steel articles or objects, or such parts of any work as are made of steel. *The Engineer*, LXIX. 191.

steel-worker (stēl'wėr″kėr), *n.* One who works in steel.

steel-works (stēl'wėrks), *n. pl.* or *sing.* A furnace or other establishment where iron is converted into steel. *The Engineer*, LXV. 38.

steely (stē'li), *a.* [< *steel*[1] + *-y*[1].] **1.** Consisting of steel; made of steel.

Steely iron, a mixture of iron and steel; imperfect steel. *Bloxam and Huntington*, Metals, p. 109.

Steelyard[1] (stēl'yärd, colloq. stil'yärd), *n.* [Early mod. E. also *Stilyard, Stilliard, Steeliard, Steleard, Styliard*, and as two words *Steel yard, Stele yarde* (also *Steel house, Stele house*); explained (erron.) as "the yard in London where steel was sold by German merchants," as if < *steel*[1] + *yard*[2]; also as an imperfect translation of the MD. *staelhof*, later *staalhof*, = MLG. *stalhof*, an office or hall where cloth was marked with a leaden seal as being properly dyed, < MD. *stael*, a specimen, sample, test of dyeing, D. *staal*, a sample, = MLG. *stale*, LG. *stal*, > G. dial. *stahl*, a sample, pattern (hence MD. *staelen* = MLG. *stalen*, mark cloth with a leaden seal as being properly dyed) (connected with MD. *staelen, stallen* = MLG. *stallen* (OF. *estalcr, etaler*), expose for sale on a stall, display or show on a stall, < MD. *stal*, etc., a stall: see *stall*[1]), + *hof*, yard, court: see *hovc*[1]. It has also been surmised that the (poss.) early form *Stellere* (see *steelyard*[2]) points to an origin from OF. *hosteliere*, < ML. *hospitalaria*, a house.] A place in London, comprising great warehouses called before the reign of Edward IV. *Gildhalla Teutonicorum*, 'Gildhall of the Germans,' where, until expelled in 1597, the merchants of the Hanseatic League had their English headquarters; also, the company of merchants themselves. The merchants of the Steelyard were bound by almost monastic gild-rules, under a separate jurisdiction from the rest of London, were exempt from many exactions and restrictions, and for centuries controlled most of the foreign trade of England.

> This yere corn was verie dere, & had ben dearer if marchuntes of ye *styliarde* had not been & Dutche shippes restrined, & an abstinaũce of warre betwene Englande & Flaunders. *Fabyan*, Chron., an. 1528–9.

steelyard[2] (stēl'yärd or stil'yärd), *n.* [Early mod. E. *stilyard, stiliard, stilliard, stelleere* (Cotgrave [in def. of *crochet*], "a Romane beame or *stelleere*"); formerly supposed to be literally 'a rod of steel,' < *steel*[1] + *yard*[1]; but "in fact merely shortened from *stilyard-beme*, meaning the 'beam' or balance used in the *Steelyard*" (*Skeat*). See *Steelyard*[1], which is thus the same word.] A kind of balance with two unequal arms, consisting of a lever in the form of a slender iron bar with

Steelyard.

a, rectangular bar, graduated both above and below; *b*, adjustable counterpoising weight; *c*, hook for supporting articles to be weighed (this can be turned easily over the end of the bar at *c'*); *d* and *d'*, hooks for support of the steelyard, according as one or other of the graduations is turned to the upper side for use in weighing.

one arm very short, the other divided by equidistant notches, having a small crosspiece as fulcrum, to which a bearing for suspension is attached, usually a hook at the short end, and a weight moving upon the long arm. It is very portable, without liability to become separated, and the process of weighing is very expeditious. It is much used for cheap commodities, but owing to its simple construction it is liable to be so made as to give false indications. Often used in the plural. Also called *Roman balance* or *beam.* Compare *Danish balance* (sometimes called *Danish steelyard*), under *balance.*

> *Crochet*, a small hook. . . . A Romane beame or *stelleere*, a beame of yron or wood, full of nickes or notches, along which a certaine peize of lead, &c., playing, and at length setling towards the one end, shewes the just weight of a commoditie hanging by a hooke at the other end.
